## PREFACE

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered, subject to the Constitution, 'to make laws for the peace, order, and good government of the Commonwealth, with respect to . . . Census and statistics.' In the exercise of the power so conferred, a Census and Statistics Act was passed in 1905, and in the year following the Commonwealth Bureau of Census and Statistics was created. The first Official Year Book was published early in 1908. The publication here presented is the fifty-ninth Official Year Book issued under the authority of the Australian Government.

In the various chapters of the Year Book, and in the special index which precedes the general index, there are references to special articles, background material and items of historic interest which have appeared in previous issues.

Among new or revised material included in this issue, the following items may be especially mentioned.

Chapter 2. Physical Geography and Climate. The statistics in this chapter with the exception of area and distance have been converted to metric units.

Chapter 3. General Government. A list of all Australian Government Departments and their functions, page 76. The detailed results of the Constitution Alteration Referendums of 8 December 1973 are shown in the Appendix.

Chapter 5. Repatriation. Results of a survey of ex-service personnel, their widows and children, conducted in November 1971, page 112.

Chapter 7. Population. Final results from the 1971 Census of Population and Housing, including selected characteristics of the population.

Chapter 9. Housing and Building. Final figures from the 1971 Census of Population and Housing, page 191.

Chapter 10. Labour, Wages and Prices. Details of a new wholesale price index relating to metallic materials used in the manufacture of fabricated metal products, page 241.

Chapter 12. Transport, Communication and Travel. Preliminary results of a survey of motor vehicle usage, page 356. An article on the development of telecommunications in Australia, page 378.

Chapter 13. Welfare Services. Results of three surveys conducted in 1971 and 1972 by the Department of Social Services, page 419: (i) morbidity of new invalid pensioners in Queensland, South Australia, Western Australia and Tasmania, (ii) social service pensioners in New South Wales and Victoria receiving Repatriation war pension and, (iii) characteristics of unemployment benefit recipients.

Chapter 14. Public Health. A brief description of the benefits available to patients in approved nursing homes, page 431.

Chapter 16. National Accounts. This issue revises the structure of the accounts which is now based on the international standard described in the United Nations' *A System of National Accounts* (1968).

Chapter 20. Employment and Unemployment. Two new tables have been included on Labour Force, the first showing employment status by birth place and year of arrival in Australia, page 710 and the second showing unemployed persons according to age and whether Australian-born, page 715.

Chapter 24. Forestry. An article on softwood plantations.

Chapter 26. Mineral Industry. Brief details of the changes in the control of the export of certain metals, petroleum, petroleum products and all raw and semi-processed minerals, page 919.

Chapter 29. Final results from the 1968-69 Censuses of Wholesale Trade, and Retail Trade and Selected Services.

Most of the statistics contained in this volume relate to the years ended June or December 1972. More detailed statistics on subjects dealt with in the Year Book are available in the various annual reports published by this Bureau, and more recent statistics are contained in the *Digest of Current Economic Statistics* (monthly), the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and in other publications issued monthly, quarterly, half-yearly, or yearly. The last pages of this volume contain a list of current and recent printed publications available for purchase, showing issue numbers, dates, and prices.

J. P. O'NEILL  
Commonwealth Statistician

Australian Bureau of Statistics,  
Canberra, A.C.T. 2600. January 1974

# CONTENTS

	PAGE
<b>CHAPTER 1. DISCOVERY, COLONISATION AND FEDERATION OF AUSTRALIA</b>	<b>1</b>
Early knowledge and discovery of Australia (1); The annexation of Australia (2); The creation of the several Colonies (3); The establishment of the Commonwealth of Australia (4); The Constitution of the Commonwealth (6); The External Territories of Australia (22).	
<i>Plate—1, Map of Australia (frontispiece).</i>	
<b>CHAPTER 2. PHYSICAL GEOGRAPHY AND CLIMATE</b>	<b>25</b>
General description of Australia (25); Weather and climate of Australia—precipitation (28), temperature (35), humidity, evaporation (39), sunshine and cloud, wind (40), storms and tropical cyclones (43), climatological tables (47), weather of 1972 (59).	
<i>Plates—2-4, Rainfall (30-32); 5-8, Temperatures (37, 38); 9, Frost-free period; 10, Evaporation (41); 11-12, Hours of Sunshine (42); 13-14, Wind roses (44, 45); 15, Thunderdays (46).</i>	
<b>CHAPTER 3. GENERAL GOVERNMENT</b>	<b>61</b>
Parliamentary government (61); The Sovereign (61); The Governor-General (61); Governors (63); Ministries (65); Parliaments and elections (67); Commonwealth referendums (73); Outlay on parliamentary government (75); Commonwealth Government Departments (76); Commonwealth legislation (79).	
<b>CHAPTER 4. DEFENCE</b>	<b>85</b>
Department of Defence (85); Naval defence (89); Military defence (91); Air defence (93); Department of Supply (95).	
<i>Plate—16, Photograph: Nomad aircraft (98).</i>	
<b>CHAPTER 5. REPATRIATION</b>	<b>101</b>
War pensions (101); Service pensions (106); Medical treatment for ex-servicemen and dependants of ex-servicemen (108); General Repatriation benefits and miscellaneous (109); The Services Canteens Trust Fund (112); Survey, ex-service personnel, widows and children (112).	
<b>CHAPTER 6. INTERNATIONAL RELATIONS</b>	<b>115</b>
Relations with Commonwealth and other countries (115); Participation in the United Nations (116); Australia's contribution in international aid (118); Membership of the Organisation for Economic Co-operation and Development (OECD) (120); Diplomatic representation (121); Overseas trade representation (123), Commonwealth Migration Offices overseas (124).	
<b>CHAPTER 7. POPULATION</b>	<b>125</b>
Types of population statistics (125); The census (125); Population recorded at censuses (126); Population estimates (129); Growth of population (131); Mean population (133); Geographic distribution of population (134); Sex distribution (138); Age distribution (139); General characteristics (139); The Aboriginal population (142); 1971 Census of Population and Housing (143); Projections of the population (144); Population of External Territories (146); International population statistics (146); Overseas arrivals and departures (149); Immigration in Australia, powers and legislation of the Commonwealth (154); Assisted migration (155); Passports (157); Citizenship (157).	
<i>Plates—17, Population of Australia (127); 18, Overseas arrivals and departures (149).</i>	
<b>CHAPTER 8. VITAL STATISTICS</b>	<b>161</b>
Provisions for registration and compilation of statistics (161); marriages (162); Births and Fertility—live births and rates (165), masculinity of births (166), fertility rates (166), ex-nuptial births (171), confinements (172), multiple births (174), stillbirths (175); mortality—deaths (176), rates (177), life tables (178), ages at death (179), infant mortality (182), causes of death (183); Vital statistics of External Territories (189); International vital statistics (190).	
<i>Plates—19, Births, deaths and marriages Australia (165); 20, Rates of births, deaths and natural increase (167); 21, Age-specific birth rates (168); 22, Infant mortality rates (183).</i>	

**CHAPTER 9. HOUSING AND BUILDING****191**

Census dwellings (191); Building (198); Government activities in the housing field (209); Advances to home purchasers (220).

*Plates—23, New houses (200); 24, New flats (204).*

**CHAPTER 10. LABOUR, WAGES AND PRICES****227**

Retail prices and price indexes (227); Consumer price index (228); Tabular statements of retail price index numbers (230); International comparisons (234); Wholesale prices and price indexes (235); Export price indexes (244); Arbitration and Wage Boards Acts and associated legislation (246); Incidence of industrial awards, determinations and collective agreements (249); Rates of wage and hours of work (249); Average weekly earnings (255); Surveys of wage rates, earnings and hours (256); Survey of weekly earnings (size distribution), May 1971 (256); Surveys of weekly earnings and hours, October 1962 to October 1972 (259); Determination of wage rates (266); Annual leave (270); Long Service leave (271); Industrial disputes (271); Labour organisations (277).

*Plate—25, Industrial disputes (272).*

**CHAPTER 11. OVERSEAS TRANSACTIONS****281**

Overseas trade, constitutional provisions and legislation (281); Government authorities (286); Trade agreements (287); Trade services (289); Export Payments Insurance Corporation (291); Collection and presentation of trade statistics (292); Total overseas trade (296); Classified summary of overseas trade (297); Exports of principal articles of Australian produce (298); Exports, by industrial group (299); Imports of merchandise, by economic class (300); Direction of overseas trade (301); Trade with major groups of countries (309); Trade with eastern countries (310); Ships' and aircraft stores (311); Overseas trade at Customs ports (312); Movement of bullion and specie (313); Import clearances and net customs duties collected (314); Overseas trade in calendar years (314); Excise (315); Private overseas investment (315); Balance of payments—explanatory notes (321), tables (323); International reserves (327); Indexes of values of exports and imports at constant prices (327).

*Plates—26, Overseas trade (295); 27, Value of exports and imports, proportion by country (295).*

**CHAPTER 12. TRANSPORT, COMMUNICATION AND TRAVEL****329**

The Australian Transport Advisory Council (329), and its advisory committees (330); Control of Shipping (331); Collection and presentation of statistics (334); Overseas shipping (336); Interstate shipping (337); Australian trading vessels (338); Shipping at principal ports (339); Shipping cargo (339); World shipping tonnage (343); Vessels registered (343); Shipping casualties (344); Government railways (344); Standardisation of railway gauges (346); Operations, Government railway systems (348); Private railways (354); Tramway, trolley-bus, bus, and ferry services (355); Motor vehicles (356), Survey of usage (356), on register (357); Registrations of new motor vehicles (358); Licences (359); Road traffic accidents (359); Roads (363); Civil aviation (365), international activity (367), aerodromes facilities, aircraft on register, licences, accidents (369–70); Postmaster-General's Department, facilities, employees, finances (370–3); Postal services (373); Internal telecommunication services (375); Development of telecommunications in Australia (378); Overseas telecommunication services (385); Radiocommunication stations authorised (387); Broadcasting services (387); Television services (389); Broadcast listeners' and television viewers' licences (390); Travel—overseas movement (391), tourist organisation (397).

*Plates—28, Government railways (347); 29, Civil Aviation (369); 30 Photographs: Telegraph Operating Room, Sydney, 1902; Telephone Exchange, Melbourne, 1908 (380).*

**CHAPTER 13. WELFARE SERVICES****399**

Commonwealth expenditure on welfare services (399); Commonwealth social services—reciprocal agreements with other countries (400), benefits provided (401), age and invalid pensions (401), widows' pensions (404), funeral benefits (406), maternity allowances (406), child endowment (407), unemployment and sickness benefits (410), special benefit (411), sheltered employment allowance (412); Commonwealth Rehabilitation Service (412); Assistance to homes for aged and disabled persons (413); The States Grants (Deserted) Wives Act 1968 (415); Telephone rental concessions, compassionate allowances (416); Commonwealth provision of welfare services to Northern Territory, Australian Capital Territory (417); Aboriginal welfare (417); State expenditure on certain welfare services (418), Surveys by the Commonwealth Department of Social Security (419), The role of voluntary agencies in Australian social welfare (422).

**CHAPTER 14. PUBLIC HEALTH . . . . . 425**

Commonwealth government activities—quarantine, human, animal and plant (425–27); National health benefits—cash benefits to persons (428), hospital, nursing home, handicapped children's benefits (429); Medical benefits (432); Subsidised Health Benefits Plan (433); Pensioner Medical Service (433); Free milk for school children scheme (434); Pharmaceutical benefits (434); Anti-tuberculosis campaign (435); Mass immunisation campaign (436); Commonwealth organisations concerned with health (437); Commonwealth grants to mental hospitals (439); Commonwealth grants to organisations associated with public health (440); Commonwealth Parliamentary Committees concerning Public Health (441); State public health legislation and administration (442); Supervision and care of infant life (443); Medical and dental inspection of school children (444); public hospitals and nursing homes (445); Private hospitals and nursing homes (447); Repatriation hospitals (448); Hansenide hospitals (448); Mental health institutions (448); Notifiable diseases (449); Survey of chronic illnesses, injuries and impairments (451); Cremation (451).

**CHAPTER 15. LAW, ORDER, AND PUBLIC SAFETY . . . . . 453**

Lower (magistrates') courts (453); Higher (judges') courts (456); Divorce and other matrimonial causes (458); Bankruptcy (461); Transactions of the High Court (462); Selected crime reported to police (462), drug offences (466); Police (471); Prisons (473); Expenditure on law, order, and public safety (474); Fire brigades (475); Patents, trade marks and designs (477); Copyright (477).

**CHAPTER 16. NATIONAL ACCOUNTS . . . . . 479**

Description of the National Accounts (479); National income and expenditure tables (484); Description of items in the National income and expenditure accounts (490).

*Plate—31, Articulation of Australian National Accounts (480).*

**CHAPTER 17. PRIVATE FINANCE . . . . . 495**

Currency (495); Australian notes in circulation (495); Australian coinage (496); Rates of exchange (497); Volume of money (497); Banking (498); Reserve Bank of Australia (500); Trading banks (502); Savings banks (509); Commonwealth Development Bank of Australia (512); Australian Resources Development Bank Limited (512); Insurance legislation (513); Life insurance (514); Fire, marine and general insurance (521); Export Payments Insurance Corporation (522); Pension and superannuation schemes (522); Finance companies (527); Instalment credit for retail sales (530); Pastoral finance companies (532); Rural debt (533); New capital raisings by companies in Australia (533); Short-term money market (535); Unit trusts, land trusts and mutual funds (537); Registered building societies (538); Friendly societies (539); Co-operative societies (540); Lotteries (541); Betting (542); Probates and letters of administration (542); Australian Industry Development Corporation (543).

*Plates—32, Banking (511); 33, Life Insurance (514).*

**CHAPTER 18. PUBLIC FINANCE . . . . . 545**

Financial provisions of the Constitution (545); Commonwealth Budget (546); Financing of the Commonwealth deficit (547); Commonwealth authorities—general (548), receipts and outlay (550), main components of outlay (553), main components of receipts (565); State authorities—general (586), receipts and outlay (587), main components of outlay (589), main components of receipts (591); Local authorities—area, population, rateable property (593), receipts and outlay (594); All public authorities—receipts and outlay (597), main components of outlay (598), main components of receipts (599), level of government (599); Public sector borrowing (601); Commonwealth and States: loan transactions and Government securities on issue (602); National debt sinking fund (609); State and local authorities' indebtedness (612); Roads and bridges (615); Water supply, sewerage and drainage (623); Harbour boards and trusts (632).

*Plates—34, Commonwealth Authorities (549); 35, State Authorities (589); 36, All Public Authorities (598).*

## CHAPTER 19. EDUCATION, CULTURAL ACTIVITIES, AND RESEARCH . . . . . 637

Pre-school education (637); Education in Australian schools (638); Number of schools, teachers and students (643); Universities (647); Colleges of Advanced Education (653); Teacher education (656); Technical education (659); Agricultural and forestry education (661); Other education (661); Organisations associated with education (664); Commonwealth activities in education (664); Expenditure on education (674); Cultural activities (682); Australian Council for the Arts (682); Australian Elizabethan Theatre Trust (682); Arts Council of Australia (682); Australian National Trusts (682); Historic Memorials Committee (683); Film production (683); Censorship (684); Museums and art galleries (685); Commonwealth libraries (685); State libraries (687); University libraries (688); Children's libraries and school libraries (689); Book publishing (690); Archives (690); Botanical and zoological gardens (692); Scientific and Industrial Research (694); Commonwealth Scientific and Industrial Research Organisation (694); Australian Institute of Marine Science (695); Nuclear energy (695); Industry, productivity action (696); Mount Stromlo and Siding Spring Observatories (698); Scientific societies (700).

*Plates—37, Grades and examinations—diagram (646); 38, University students (649).*

## CHAPTER 20. EMPLOYMENT AND UNEMPLOYMENT . . . . . 701

The population census (701); The population survey (705); The labour force survey (705); Survey of leavers from schools, universities or other educational institutions (717); Survey of multiple jobholding (720); Employed wage and salary earners (720); Commonwealth Employment Service (725).

*Plate—39, Labour force participation and unemployment rates (709).*

## CHAPTER 21. MANUFACTURING INDUSTRY . . . . . 727

Introduction (727), standardisation (727); Statistics from 1901 to 1967–68 (728); Statistics since 1968–69 (729); Concept of 'value added' (731); Tabulations (732–6); Electricity and gas establishments (737); Principal factory products (738).

## CHAPTER 22. RURAL INDUSTRY . . . . . 743

Disposal of crown lands (743); Closer settlement and war service settlement (745); Alienation and occupation of crown lands (745); Number and area of rural holdings (746); Employment on rural holdings (747); Farm machinery on rural holdings (748); The soils of Australia (749); Soil improvement and conservation (749); Agricultural production—progress, assistance and control (751), distribution, production and value of crops (754), areas and yields, principal crops (755–8), wheat (759), other cereal crops (771), fodder crops (779), industrial crops (782), vegetables (793), fruit (796), vineyards (800); Pastoral production—livestock numbers (803), sheep (804), cattle (807), horses (809), wool (809), meat (819), other pastoral products (824); The dairying industry (825); The pig industry (836); The poultry industry (838); The bee-farming industry (843); Value of dairy, poultry and bee-farming production (844).

*Plates—40, Wheat for grain, 1940–41 to 1972–73 (765); 41, Production of oats, 1940–41 to 1971–72 (772); 42, Production of barley, 1940–41 to 1971–72 (775); 43, Production of raw sugar, 1940–41 to 1971–72 (775); 44, Production of potatoes, 1940–41 to 1971–72 (795); 45, Livestock, Australia, 1880–1972 (805); 46, Sheep numbers, Wool production 1880–1972 (813); 47, Production of meat, 1921–22 to 1971–72 (822); 48, Milk production, 1941–42 to 1971–72 (831).*

## CHAPTER 23. WATER CONSERVATION AND IRRIGATION . . . . . 847

Water resources and their utilisation (847); National and interstate aspects (852); New South Wales (856); Victoria (860); Queensland (863); South Australia (868); Western Australia (870); Tasmania (872); Northern Territory (874); Australian Capital Territory (875); Papua New Guinea (876).

## CHAPTER 24. FORESTRY . . . . . 877

Source of statistics (877) Forestry in Australia (877); Softwood plantations (880); administration and research (885); Employment in forestry (888); Forest production (889); Timber and timber products (890); Overseas trade in forest products, etc. (893).

**CHAPTER 25. FISHERIES . . . . . 895**

Fisheries resources and their commercial exploitation (895); Fisheries administration and research (896); Collection and presentation of fisheries statistics (897); Boats and equipment used in fisheries (899); Employment in fisheries (900); Production, processing and domestic marketing of fisheries products (901); Consumption of edible fisheries products (907); Overseas trade in fisheries products (908).

*Plate—49, Fisheries map (898).*

**CHAPTER 26. MINERAL INDUSTRY . . . . . 911**

Geology (911); Mineral resources (914); Administration (917); Government assistance (920); Research (925); International relations (927); Mining industry statistics 1968–69 and 1969–70, integration of mining census with other economic censuses (928); Concept of 'value added' (932); Mineral production (933); Overseas participation (943); Mineral exploration (943); Petroleum exploration (946); Mineral processing and treatment (947); Overseas trade (948); Review of recent developments (952).

*Plates—50, Mineral industry map (913); 51, Mine production of principal metals (gold, silver, lead, zinc and copper) (939); 52, Mine production of principal metals (tin, iron) and production of coal (940).*

**CHAPTER 27. ELECTRIC POWER GENERATION AND DISTRIBUTION . . . . . 955**

Introduction (955); Snowy Mountains Hydro-electric Scheme (956); New South Wales (960); Victoria (962); Queensland (963); South Australia (965); Western Australia (966); Tasmania (966); Commonwealth Territories (968).

*Plates—53, Snowy Mountains Scheme—map (957); 54, Snowy Mountains Scheme—diagrams (958).*

**CHAPTER 28. THE TERRITORIES OF AUSTRALIA . . . . . 969**

The Northern Territory—general description (969), population (971), advancement of Aborigines (971), production (972), trade, transport and communication (977), education (980), finance (981); Australian Capital Territory—general description (982), National Capital Development Commission (982), works and services (983), production (983), transport and communication (985), social (985), finance (986); Norfolk Island (987); Papua New Guinea—general description (990), weather and climate (990), population (997), constitutional development (998); judiciary (1000), agriculture and animal industry (1000), primary industries (1001); secondary industries (1006), electric power generation and distribution (1007), trade, transport and communication (1008), indigenous labour (1010); housing (1011); education and health (1012), finance (1013); Heard and McDonald Islands (1016); Australian Antarctic Territory (1016); Cocos (Keeling) Islands (1017); Christmas Island (1018); Coral Sea Islands (1019).

*Plate—55, Papua New Guinea—annual rainfall map, 1972 (996).*

**CHAPTER 29. MISCELLANEOUS . . . . . 1021**

Valuation of Australian primary production (1021); Indexes of farm production (1023); Consumption of foodstuffs and beverages (1026); Internal trade (1030); Interstate trade (1036); Statistical organisation in Australia (1036); Statistical and other official publications of Australia (1038); Metric conversion for Australia (1042).

**STATISTICAL SUMMARY, 1901–02 TO 1972–73 . . . . . 1049**

**CHRONOLOGICAL TABLE, 1955 TO 1973 . . . . . 1063**

**DIARY OF PRINCIPAL ECONOMIC EVENTS, 1972–73 . . . . . 1067**

## SYMBOLS AND OTHER FORMS OF USAGE IN THIS YEAR BOOK

The following *symbols*, where shown in tables, mean:

n.a. —not available

. . —nil or less than half the final digit shown, or not applicable

p —preliminary—figure or series subject to revision

r —figure or series revised since previous issue

n.e.i.—not elsewhere included

n.e.c.—not elsewhere classified

n.s. —not stated

m.—males; f.—females; p.—persons

— Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means that the figure concerned is not yet available.

The following *abbreviations* are used for the titles of the Australian States and Territories and the Commonwealth of Australia: N.S.W. (New South Wales), Vic. (Victoria), Qld (Queensland), S.A. (South Australia), W.A. (Western Australia), Tas. (Tasmania), N.T. (Northern Territory), A.C.T. (Australian Capital Territory), Aust. (Australia), Cwlth (Commonwealth).

In general, the *statistics in this volume relate to the States and Territories of the Commonwealth of Australia*, i.e. they exclude particulars of the External Territories of Australia, which, however, are specifically dealt with in Chapter 28, The Territories of Australia. A few series elsewhere include particulars of Papua New Guinea because of the nature of the subject-matter—these series are indicated.

*Yearly periods* shown as e.g. 1972 refer to the year ended 31 December 1972; those shown as e.g. 1971–72 refer to the year ended 30 June 1972. Other yearly periods are specifically indicated. The range of years shown in table headings, e.g. 1901 to 1971–72, indicates the period covered, but does not necessarily imply that each intervening year is included.

*Values* are shown in Australian dollars (\$) or \$A) or cents (c) unless another currency is specified.

*Reference numbers.* In the introductory paragraphs to most chapters a list of relevant publications is shown. In each case the reference number is shown in brackets and this should be quoted when ordering Bureau publications.

*Any discrepancies between totals and sums of components* in tables are due to rounding.

Unless otherwise indicated, the *British system of weights and measures* is used in this issue. In the 1974 issue of the Year Book statistics will be shown in metric units. Metric conversion factors are shown on page 1047. The weights and measures used in recording production, etc. of different commodities are as follows:

Bushel (bus)	.	.	=	approximately 2,218 cubic inches
Gallon (gal)	.	.	=	Imperial gallon of approximately 277 cubic inches
Pound (lb)	.	.	=	pound avoirdupois
Cental	.	.	=	100 pounds
Hundredweight (cwt)	.	.	=	112 pounds
Ton	.	.	=	Long ton of 2,240 pounds
Short ton	.	.	=	2,000 pounds
Bale (of wool)	.	.	=	approximately 300 pounds
Barrel (crude oil)	.	.	=	approximately 35 imperial gallons

Cereals, fruit and certain other products are generally recorded in bushels. While the weight of a bushel varies according to the nature of the product, it is also subject to considerable variation for individual products on account of such things as variety and method of packing. However, average bushel equivalent weights, as set out below, may be used for the conversion of each of these products to pounds weight avoirdupois.

**BUSHEL WEIGHTS**  
(lb per bushel)

<i>Product</i>	<i>lb per bushel</i>	<i>Product</i>	<i>lb per bushel</i>	<i>Product</i>	<i>lb per bushel</i>
Apples . . . . .	42	Maize . . . . .	56	Pineapples . . . . .	42
Apricots . . . . .	48	Mandarins . . . . .	48	Plums and prunes . . . . .	58
Bananas . . . . .	56	Mangoes . . . . .	40	Pollard . . . . .	20
Barley . . . . .	50	Millet . . . . .	60	Potatoes . . . . .	60
Beans (dry) . . . . .	60	Mustard seed . . . . .	50	Quinces . . . . .	42
Beans, French (green) . . . . .	20	Nectarines . . . . .	50	Rape . . . . .	56
Bran . . . . .	20	Nuts, other than peanuts . . . . .	40	Raspberries . . . . .	30
Canary seed . . . . .	56	Oats . . . . .	40	Rice . . . . .	42
Cherries . . . . .	48	Onions . . . . .	56	Rye . . . . .	60
Clover seed . . . . .	60	Oranges . . . . .	48	Safflower . . . . .	40
Custard apples . . . . .	35	Panicum . . . . .	60	Setaria . . . . .	60
Figs . . . . .	44	Papaws . . . . .	24	Sorghum . . . . .	60
Flax seed (pure seed) . . . . .	56	Passion fruit . . . . .	34	Soya beans . . . . .	60
Flour . . . . .	56	Peaches . . . . .	45	Strawberries . . . . .	30
Grapefruit . . . . .	42	Peanuts . . . . .	22	Sunflower seed . . . . .	33
Grass seed (most varieties) . . . . .	20	Pears . . . . .	45	Tares . . . . .	60
Lemons . . . . .	48	Peas, field (dry) . . . . .	60	Tomatoes . . . . .	48
Loquats . . . . .	45	Peas in pod (green) . . . . .	28	Wheat . . . . .	60
Lucerne seed . . . . .	60	Persimmons . . . . .	44		

## CHAPTER 1

# DISCOVERY, COLONISATION AND FEDERATION OF AUSTRALIA

### Early knowledge and discovery of Australia

The following paragraphs contain only a bare outline of the more important facts relating to the early history of Australian discovery. A more detailed summary of these facts may be found in Year Book No. 39 (*see* page 1) and earlier issues.

#### Terra Australis

Although references to an Austral land are found in the works of writers in the early centuries after Christ, and evidence appeared in maps, globes, and manuscripts from the Middle Ages onward, there is no definite evidence connecting this so-called *Terra Australis* with Australia. Cornelius Wytfliet's map of 1597, however, indicates roughly the eastern and western coasts of Australia, as well as the gulf of Carpentaria.

#### Early discoveries of Australia

The Portuguese may have discovered part of the Australian coast before 1542, and it has been suggested that the Arabs may have come to Australia even earlier, though there is no evidence to support this theory. For all practical purposes, however, the coastal exploration of Australia may be taken as having begun with the Spaniards and the Dutch.

In 1606 the Spaniard Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought he had discovered the great land of the south, and therefore named the group *La Australia del Spiritu Santo*. After leaving the New Hebrides Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability he sighted the Australian continent but no mention of it is made in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam, Java, to explore the island of New Guinea. During March 1606 the *Duyfken* coasted along the southern shores of New Guinea and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again).

During the following thirty years there were nine visits by Dutch navigators to Australian waters; by 1636, through their efforts, the coast of Australia from Cape York westward around to the Great Australian Bight had been discovered.

In 1642 Abel Janszoon Tasman set out from Batavia to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644 Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far south as the tropic of Capricorn. This voyage of Tasman's may be said to have ended the period of Dutch discoveries, although there were subsequent visits by the Dutch to Australia (de Vlamingh in 1696 and Van Delft in 1705).

#### Discoveries by the English

In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnets*, a trading vessel whose crew had turned buccaneers. In 1699 he again visited Australia, in command of H.M.S. *Roebeck*, and on his return to England published an account in which a description is given of trees, flowers, birds, and reptiles observed, and of encounters with natives.

At the end of the seventeenth century it was uncertain whether Tasmania and New Zealand were parts of Australia or whether they were separated from it but themselves formed part of a great Antarctic Continent. Lieutenant (later Captain) James Cook's first voyage, though undertaken primarily for the purpose of observing the transit of Venus from Tahiti, had also the objective of ascertaining whether the unexplored part of the southern hemisphere was only an immense mass of

water or contained another continent. In command of H.M.S. *Endeavour*, and accompanied by Sir Joseph Banks the botanist, Dr Solander the naturalist, Green the astronomer, draughtsmen, and servants, Cook, after observing the transit of Venus at Tahiti, turned towards New Zealand, sighting that land on 7 October 1769 in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown.

### Discovery of Australia by Captain Cook

On 20 April 1770\* Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, on 29 April 1770\* he discovered Botany Bay, where he landed. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11 June 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north sailing through Torres Strait and eventually anchoring in the Downs on 13 July 1771. In 1772 Cook was put in command of the ships *Resolution* and *Adventure* with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14 February 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance, the existence of a channel between Tasmania and Australia, was made by Bass and Flinders in 1798.

## The annexation of Australia

### Possession taken of eastern coast of Australia by Captain Cook

Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 22 August 1770† that the history of Australia was brought into definite political connection with western civilisation. It was on that date that Captain Cook took possession 'of the whole eastern coast, from latitude 38° S. to this place, latitude 10½° S. in right of His Majesty King George the Third', i.e. over only what are now the eastern parts of New South Wales, Victoria and Queensland.

### Annexation of eastern part of Australian continent and Tasmania

Formal possession on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26 January 1788, when Captain Phillip's Commission, first issued to him on 12 October 1786 and amplified on 2 April 1787, was read to the people whom he had brought with him in the 'First Fleet'. The commission appointed Phillip 'Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south'.

### Extension of New South Wales westward

On 17 February 1824 Earl Bathurst notified Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20 September 1824 of the coast from the 135th to the 129th degree of east longitude. On 16 July 1825 the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales.

\* Year Book No. 1 shows the dates of these events as '19th April' and '28th April' respectively. In Year Book No. 2 they have been changed to '20th of April' and '29th April', and the following footnote inserted:

1. *Correct dates of Captain Cook's Log.* After the 180° meridian of longitude had been passed, and owing to no allowance having been made for westing, the various log-books of this voyage are in error one day as to dates. Thus those in Captain Cook's private log in his official log, in Gunner Forwood's, Pickergill's, Clerke's, Wilkinson's, and Bootie's Journals, in the Pallister copy of Cook's log, and in Wharton's publication, all need correction by adding one day to the date given: that is, the 19th should read the 20th, etc. The anonymous log, doubtless Green's, is erroneously supposed by the author of the "Historical Records of New South Wales," to have been corrected for westing, see the footnote on page 269 therein. The facts are as follows:—What was known as "ship time" began a day earlier than under the present system of astronomical reckoning, that is to say, Jan. 1 began at noon Dec. 31. The "Astronomical day," however, was a whole day later than the *ship's day*: thus what would be assigned to the 24th in Cook's Journal would appear in Green's Journal as the 23rd. (See "Captain Cook's Journal," 1768–71, by Captain W. J. L. Wharton, R.N., F.R.S., London, 1893, preface pp. xii., xiii.). There can be no doubt as to the need of the correction in the dates, since on reaching Batavia the log reads:—"Wednesday 10th, according to our reckoning, but by the people here Thursday 11th." (Op. Cit., pp. 352–3.) Attention was drawn to this matter by Mr. P. de Jersey Grut in the "Argus," Melbourne, May 15, 18 and 22, 1907.

† In all issues up to Year Book No. 56 this date was incorrectly shown as 23 August 1770.

### Annexation of Western Australia

An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George Sound, sailed from Sydney on 9 November 1826, landed at the Sound on 26 December following, and on 21 January 1827 hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17 January 1827, and on his return in the following April submitted a glowing report on what he described as a 'rich and romantic country', urging its occupation for the purpose of settlement. He left for England in July 1827, continuing his advocacy, notwithstanding much discouragement, with unabated enthusiasm. He was at last successful, the result being due mainly to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June 1829. On the second of the preceding month Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of 'all that part of New Holland which is not included within the Territory of New South Wales'. Thus before the middle of 1829 the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

## The creation of the several Colonies

### New South Wales

In Governor Phillip's commission of 1786 the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not until 1798 that the contrary was known. In that year Bass and Flinders proved that it was an island by sailing through Bass Strait. The territory of New South Wales, as originally constituted (1,480,527 square miles, including Van Diemen's Land 26,215 square miles), and of New Zealand (103,862 square miles), which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825 when the western boundary was extended to 129th east meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles. Following the transfer of the Australian Capital Territory and an area at Jervis Bay to the Commonwealth in 1911 and 1915 respectively the area was further reduced to 309,433 square miles.

Lord Howe Island, which is a dependency of New South Wales, and for political purposes is included in one of the electorates of Sydney, is situated in latitude 31° 30' south, longitude 159° 5' east, about 487 miles east-north-east of Sydney, and has an area of 3,220 acres.

### Tasmania

Van Diemen's Land, first settled in 1803, was politically separated from New South Wales in 1825 being constituted a separate colony on 14 June. The area of the colony was 26,215 square miles. The name of the colony was officially changed to Tasmania in 1856 when responsible government was established. Following a resurvey of local government areas, the area of Tasmania was determined at 26,383 square miles at the end of 1964.

Macquarie Island, about 1,000 miles south-east of Hobart, together with a few rocky islets nearby, has been a part of Tasmania since the nineteenth century. In December 1911 five members of the Australasian Antarctic Expedition landed on the island and remained there until 1915. On 3 March 1948 another party was landed to man a new station which has been since maintained as a scientific base. The island is about twenty-one miles long and two miles wide.

### Western Australia

The territory westward of the 129th meridian, comprising 975,920 square miles, was constituted a colony under the name of Western Australia in June 1829. It was always distinct and independent of New South Wales, except for the settlement on King George Sound (*see above*), which remained under the jurisdiction of New South Wales until 1831.

### South Australia

On 15 August 1834 the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a 'province', and settlement took place towards the end of the year 1836. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28 December 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude and between the 141st\* and 132nd

\* The actual surveyed boundary between South Australia and Victoria is at 140° 58' east longitude.

meridians of east longitude. On 10 December 1861, by authority of the Imperial Act 24 and 25 Vict., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th east meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later on 6 July 1863, the Northern Territory, comprising 523,620 square miles, was brought under the jurisdiction of South Australia, which thereupon controlled an area of 903,690 square miles. The Territory was transferred to the Commonwealth on 1 January 1911 (*see* page 5). Following a resurvey of Northern Territory notified in 1964 the area was reduced by 3,340 square miles.

#### **New Zealand**

Although Captain Cook had taken possession of the North Island of New Zealand in November 1769, and of the South Island in January 1770, it is doubtful whether at the time when Captain Phillip's commission was drawn up New Zealand was considered as one of the 'islands adjacent in the Pacific Ocean' (*see* page 2). The fact that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, and that in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, leaves this an open question, as nothing more than extra-territorial jurisdiction may have been intended. New Zealand does not appear to have become British territory unequivocally until 1840, when Captain Hobson arrived at the Bay of Islands, and on 30 January read his commissions, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. In February 1840 the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21 May 1840 British sovereignty over the islands of New Zealand was explicitly proclaimed. New Zealand remained a dependency of New South Wales until, by letters patent of 16 November 1840, it was constituted a separate colony under the powers of the Act 3 and 4 Vict., cap. 62, of 7 August 1840. Proclamation of the separation was made on 3 May 1841. The area of the colony was 103,862 square miles. The present area of New Zealand, which acquired responsible government on 7 May 1856 and Dominion status on 26 September 1907, exclusive of island territories but including minor islands, is 103,736 square miles.

#### **Victoria**

In 1851 the 'Port Phillip District' of New South Wales was constituted the colony of Victoria, 'bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia'. The area of the new colony was 87,884 square miles, and its separate existence took effect from 1 July 1851.

#### **Queensland**

The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt, and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6 June 1859, although separation from New South Wales was not completed until 10 December of the same year. The territory comprised by the new colony was 'so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8' south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of South latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean'. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13 March 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12 April 1862 the area of Queensland was increased by the annexation of 'so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between 141st and 138th meridians of east longitude, together with all the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria'. With this addition the area of Queensland became 670,500 square miles. Following a thorough revision of the area of each local government area of Queensland, based on the most recent maps available, the Surveyor-General in 1958 determined the area of Queensland as 667,000 square miles—a reduction of 3,500 square miles from the area previously determined.

### **The establishment of the Commonwealth of Australia**

#### **Federation**

On 1 January 1901 the colonies mentioned, with the exception of New Zealand, were federated under the name of the 'Commonwealth of Australia', the designation of 'Colonies'—except in the case of the Northern Territory, to which the designation 'Territory' applied—being at the same time changed to that of 'States'.

### Transfer of the Northern Territory to the Commonwealth

On 7 December 1907 the Commonwealth and the State of South Australia entered into an agreement for the transfer of the Northern Territory to the Commonwealth, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under The Northern Territory Surrender Act, 1907 and by the Commonwealth Parliament under the *Northern Territory Acceptance Act* 1910. The Territory was formally transferred to the Commonwealth on 1 January 1911, and became the Northern Territory of Australia.

By Imperial Order in Council dated 23 July 1931 Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the north-west coast of Australia, were placed under the authority of the Commonwealth. The islands were accepted by the Commonwealth on 10 May 1934, in the *Ashmore and Cartier Islands Acceptance Act* 1933, under the name of the Territory of Ashmore and Cartier Islands. The Act authorised the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the Act in July 1938 annexed the islands to the Northern Territory, whose laws, ordinances, and regulations, wherever applicable, thereupon applied.

The area of Ashmore Reef is approximately 60 square miles (to the limit of the reef), and it is situated 220 statute miles off the western coast of Australia and 520 statute miles west of Darwin. Cartier Island is approximately 17 square miles in area (to the limit of the reef), and is situated 184 statute miles off the western coast of Australia and 490 statute miles west of Darwin.

### Transfer of the Australian Capital Territory to the Commonwealth

On 18 October 1909 the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the Seat of Government of the Commonwealth. In December 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5 December 1910 a proclamation was issued vesting the Territory in the Commonwealth on and from 1 January 1911. By the *Jervis Bay Territory Acceptance Act* 1915 an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4 September 1915.

### Present composition of the Commonwealth

Following revision of the areas of Tasmania, Queensland and the Northern Territory, as mentioned on pages 3 and 4, the total area of the Commonwealth of Australia has been determined as 2,967,909 square miles. The years in which the respective areas were annexed, the years of first permanent settlement, and the years in which responsible government was granted to the Colonies, and the present areas of the several States and Territories and of the Commonwealth are shown below.

#### THE COMMONWEALTH OF AUSTRALIA: COMPONENT STATES AND TERRITORIES

<i>State or Territory</i>	<i>Year of annexation</i>	<i>Year of first permanent settlement</i>	<i>Year of formation into separate Colony or Territory</i>	<i>Year in which responsible government was granted</i>	<i>Present area in square miles</i>
New South Wales . . . . .	1770	1788	1786	1855	309,433
Victoria . . . . .	1770	1834	1851	1855	87,884
Queensland . . . . .	1770	1824	1859	(a)1859	667,000
South Australia . . . . .	1788	1836	1834	1856	380,070
Western Australia . . . . .	1829	1829	1829	1890	975,920
Tasmania . . . . .	1788	1803	1825	1855	26,383
Northern Territory . . . . .	..	..	(b)1863	..	520,280
Australian Capital Territory . . . . .	..	..	(c)1911	..	939
<b>Commonwealth of Australia . . . . .</b>	<b>..</b>	<b>..</b>	<b>..</b>	<b>(d)</b>	<b>2,967,909</b>

(a) As part of New South Wales in 1855; as a separate colony in 1859. (b) Previously part of New South Wales then brought under the jurisdiction of South Australia in 1863—transferred to the Commonwealth in 1911. (c) Previously part of New South Wales. (d) Constituted as from 1 January 1901.

## The Constitution of the Commonwealth

Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the federal movement in Australia, was embodied in this chapter in issues of the Year Book up to and including No. 22.

### Commonwealth Constitution Act

The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely: 'An Act to constitute the Commonwealth of Australia', as amended by the *Constitution Alteration (Senate Elections)* 1906, the *Constitution Alteration (State Debts)* 1909, the *Constitution Alteration (State Debts)* 1928, the *Constitution Alteration (Social Services)* 1946, and the *Constitution Alteration (Aboriginals)* 1967, is given *in extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31 December 1972.

### THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT.

63 & 64 VICT., CHAPTER 12.

*An Act to Constitute the Commonwealth of Australia. (9th July, 1900.)*

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State: and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.  
 "The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."  
 "Original States" shall mean such States as are parts of the Commonwealth at its establishment.
7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.  
 Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

### THE CONSTITUTION.

This Constitution is divided as follows:—

- Chapter I.—The Parliament:
  - Part I.—General:
  - Part II.—The Senate:
  - Part III.—The House of Representatives:
  - Part IV.—Both Houses of the Parliament:
  - Part V.—Powers of the Parliament:
- Chapter II.—The Executive Government:
- Chapter III.—The Judicature:
- Chapter IV.—Finance and Trade:
- Chapter V.—The States:
- Chapter VI.—New States:
- Chapter VII.—Miscellaneous:
- Chapter VIII.—Alteration of the Constitution.
- The Schedule.

### CHAPTER I.—THE PARLIAMENT.

#### PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called “The Parliament”, or “The Parliament of the Commonwealth”.

2. A Governor-General appointed by the Queen shall be Her Majesty’s representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen’s pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

#### PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State.\* The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in numbers as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,† and the places of those of the second class at the expiration of [the sixth year] *six years*,† from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*† the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*† following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*† preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the House of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

\* The Parliament has otherwise provided, by means of the *Representation Act* 1948, that the number of senators shall be ten for each State from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18 May 1948).

† As amended by Section 2 of the *Constitution Alteration (Senate Elections)* 1906. The words in square brackets have been repealed; amendments are shown in italics.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth, the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

### PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

(i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators;

(ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purpose of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows:—

New South Wales . . . .	twenty-three;	South Australia . . . .	six;
Victoria . . . . .	twenty;	Tasmania . . . . .	five;
Queensland . . . . .	eight;		

Provided that if Western Australia is an Original State, the numbers shall be as follows:—

New South Wales . . . .	twenty-six;	South Australia . . . .	seven;
Victoria . . . . .	twenty-three;	Western Australia . . . .	five;
Queensland . . . . .	nine;	Tasmania . . . . .	five.

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in the choosing of members each elector shall vote only once.\*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

- (i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:
- (ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.†

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

#### PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State, shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

\* The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918–1965*, Sections 39 and 39A (repealing an earlier provision made by the *Commonwealth Franchise Act 1902*). For present qualifications see Chapter 3, General Government.

† The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918–1965*, Section 69. For present qualifications see Chapter 3, General Government.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer: or
- (iii) Is an undischarged bankrupt or insolvent: or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or
- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section (iv) does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section: or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State:

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.\*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld;
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

\* The Parliamentary allowance has been varied from time to time. For current allowances, see Chapter 3, General Government.

## PART V.—POWERS OF THE PARLIAMENT.\*

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to:—

- (i) Trade and commerce with other countries, and among the States:
- (ii) Taxation; but so as not to discriminate between States or parts of States:
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:
- (iv) Borrowing money on the public credit of the Commonwealth:
- (v) Postal, telegraphic, telephonic, and other like services:
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth:
- (vii) Lighthouses, lightships, beacons and buoys:
- (viii) Astronomical and meteorological observations:
- (ix) Quarantine:
- (x) Fisheries in Australian waters beyond territorial limits:
- (xi) Census and statistics:
- (xii) Currency, coinage, and legal tender:
- (xiii) Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money:
- (xiv) Insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned.
- (xv) Weights and measures:
- (xvi) Bills of exchange and promissory notes:
- (xvii) Bankruptcy and insolvency:
- (xviii) Copyrights, patents of inventions and designs, and trade marks:
- (xix) Naturalization and aliens:
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth:
- (xxi) Marriage:
- (xxii) Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants:
- (xxiii) Invalid and old-age pensions:
- (xxiiiA) †*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:*
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States:
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States:
- (xxvi) The people of any race [other than the aboriginal race in any State]‡ for whom it is deemed necessary to make special laws:
- (xxvii) Immigration and emigration:
- (xxviii) The influx of criminals:
- (xxix) External affairs:
- (xxx) The relations of the Commonwealth with the islands of the Pacific.
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws:
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth:

\* Particulars of proposed laws which were submitted to referendums are referred to in Chapter 3, General Government, of this Year Book.

† Under Section 2 of the *Constitution Alteration (Social Services)* 1946, the Constitution was amended by the insertion of this paragraph.

‡ Under Section 2 of the *Constitution Alteration (Aboriginals)* 1967, the words in square brackets were omitted.

- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State:
- (xxxiv) Railway construction and extension in any State with the consent of that State:
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides:
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law:
- (xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:
- (xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

## CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.\*

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.\*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

\* The number of Ministers of State and the annual appropriation for their salaries have been varied from time to time. For current particulars, see Chapter 3, General Government.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth:—

Posts, telegraphs, and telephones:

Naval and military defence:

Lighthouses, lightships, beacons and buoys:

Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

### CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.\*

72. The Justices of the High Court and of the other Courts created by the Parliament—

- (i) Shall be appointed by the Governor-General in Council:
- (ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity:
- (iii) Shall receive such remuneration as the Parliament may fix; but the remuneration shall not be diminished during their continuance in office.†

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court:
- (ii) Of any other federal court, or court exercising federal jurisdiction; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:
- (iii) Of the Inter-State Commission, but as to questions of law only:

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits inter se of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits inter se of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

\* The *Judiciary Act* 1903 provided for a Chief Justice and two other Justices, increased by subsequent amendments to six.

† The *Judiciary Act* 1903 provided for the payment of a salary of £3,500 (\$7,000) a year to the Chief Justice and of £3,000 (\$6,000) a year to each other Justice. These amounts have been varied from time to time.

75. In all matters—

- (i) Arising under any treaty:
- (ii) Affecting consuls or other representatives of other countries:
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:
- (iv) Between States, or between residents of different States, or between a State and a resident of another State:
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation:
- (ii) Arising under any laws made by the Parliament:
- (iii) Of Admiralty and maritime jurisdiction:
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) Defining the jurisdiction of any federal court other than the High Court:
- (ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:
- (iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

#### CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof

to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise bounties, for such time only as the Governor-General in Council may declare to be necessary:
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth:
- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament:
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
  - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth;
  - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

(i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:

(ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned wherever the Colony, or the Government or an officer of the Colony is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation or trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard

being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The Members of the Inter-State Commission—

- (i) Shall be appointed by the Governor-General in Council;
- (ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity;
- (iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],\* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.†(1.) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

- (a) *the taking over of such debts by the Commonwealth;*
- (b) *the management of such debts;*
- (c) *the payment of interest and the provision and management of sinking funds in respect of such debts;*
- (d) *the consolidation, renewal, conversion, and redemption of such debts;*
- (e) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and*
- (f) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(2.) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(3.) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(4.) *Any such agreement may be varied or rescinded by the parties thereto.*

(5.) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(6.) *The powers conferred by this section shall not be construed as being limited in any way by the provisions of section one hundred and five of this Constitution.*

## CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

\* Under Section 2 of the *Constitution Alteration (State Debts)* 1909, the words in square brackets were omitted.

† Under Section 2 of the *Constitution Alteration (State Debts)* 1928, the Constitution was amended by the insertion of this section.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

#### CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

## CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

\*[127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.]

## CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

## SCHEDULE.

## OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

## AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE. *The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

---

\* Under Section 3 of the *Constitution Alteration (Aboriginals)* 1967 the section in square brackets was repealed.

### The Royal Proclamation

The preceding Act received the Royal assent on 9 July 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on 17 September 1900, constituted the Commonwealth as from 1 January 1901; it read as follows.

#### BY THE QUEEN. A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland* and *Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, *Tasmania*, and *Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

### The External Territories of Australia

#### Norfolk Island

In 1856 Norfolk Island was created a distinct and separate settlement under the jurisdiction of New South Wales. Later, in 1896, it was made a dependency under the Governor of that colony, and finally by the passage of the *Norfolk Island Act* 1913 it was accepted as a Territory of the Commonwealth of Australia. The island is situated in latitude 29° 3' 3" S., longitude 167° 57' 5" E., and comprises an area approximately 14 square miles.

#### Papua

Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1 September 1906, under the authority of the *Papua Act* 1905. The area of Papua is about 86,100 square miles.

#### Trust Territory of New Guinea

In 1919 it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 159° 25' E. The mandate was issued by the League of Nations on 17 December 1920. The Governor-General of the Commonwealth was authorised to accept the mandate by the *New Guinea Act* 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The land area comprises about 92,160 square miles, and the administration under the mandate dated from 9 May 1921. New Guinea is now administered under a Trusteeship Agreement with the United Nations, approved on 13 December 1946.

#### Australian Antarctic Territory

In Imperial Order in Council of 7 February 1933 placed under Australian authority 'all the islands and territories other than Adelie Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude'.

The Order came into force with a proclamation issued by the Governor-General on 24 August 1936, after the passing of the *Australian Antarctic Territory Acceptance Act* 1933 by the Commonwealth Parliament. The boundaries of Adelie Land were definitely fixed by a French Decree of 1 April 1938 as latitude 60° S., longitude 136° E., and longitude 142° E.

#### **Heard and McDonald Islands**

Heard and McDonald Islands, about 2,500 miles south-west of Fremantle, were transferred from United Kingdom to Australian control as from 26 December 1947. Heard Island is approximately 27 miles long and 13 miles wide, and McDonald Islands, about 26 miles to the west of Heard Island, are small, rocky and precipitous.

#### **Cocos [Keeling] Islands**

*The Cocos (Keeling) Islands Act* 1955 provided for the acceptance of the Cocos Islands, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia and was parallel to an Act of the United Kingdom Parliament transferring authority over the islands to the Commonwealth. Consequent on the passing of these Acts, Her Majesty, by Order in Council, specified 23 November 1955 as the date of transfer. From that date the islands came under Australian administration and an Official Representative of Australia was appointed to take charge of the local administration of the islands. Their area is about 5½ square miles, and they are situated in the Indian Ocean in latitude 12° 5' S. and longitude 96° 53' E.

#### **Christmas Island**

The *Christmas Island Act* 1958 provided for the acceptance of Christmas Island, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia. Complementary legislation having been passed by the Parliament of the United Kingdom, the island was transferred to the Australian administration on 1 October 1958, and an Official Representative was appointed to administer the Territory. The area of the island is about 52 square miles and it is situated in the Indian Ocean in latitude 10° 25' 22" S. and longitude 105° 39' 59" E.

#### **Coral Sea Islands**

The Coral Sea Islands were declared to be a Territory of the Commonwealth by the *Coral Sea Islands Act* 1969. The scattered reefs and islands, often little more than sandbanks, spread over a sea area of 400,000 square miles with only a few square miles of actual land area, between the Great Barrier Reef and longitude 157° 10' E.

## CHAPTER 2

# PHYSICAL GEOGRAPHY AND CLIMATE

### General description of Australia

#### Geographical position

The Australian Commonwealth, which includes the island continent of Australia and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 2,967,909 square miles, the mainland alone containing 2,941,526 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 43° 39' S., or, excluding Tasmania, 39° 8' S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean\*. The extreme points are Steep Point on the West, Cape Byron on the east, Cape York on the north, and South-East Cape or, if Tasmania be excluded, Wilson's Promontory, on the south. The difference in latitude between Cape York and Wilson's Promontory is 1,959 miles, and in longitude between Steep Point and Cape Byron 2,489 miles.

#### Tropical and temperate regions

Of the total area of Australia, nearly 39 per cent lies within the tropics. Taking the latitude of the Tropic of Capricorn as 23° 30' S., the areas within the tropical and temperate zones are approximately as follows.

**AREAS OF TROPICAL AND TEMPERATE REGIONS: STATES AND TERRITORIES**  
(Square miles)

<i>Area</i>	<i>N.S.W. (a)</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>Total</i>

Total area .	310,372	87,884	667,000	380,070	975,920	26,383	520,280	2,967,909

(a) Includes Australian Capital Territory (939 square miles).

Fifty-four per cent of Queensland lies within the tropical zone and 46 per cent in the temperate zone; 37 per cent of Western Australia is tropical and 63 per cent temperate; while 81 per cent of the Northern Territory is tropical and 19 per cent temperate. All the remaining States lie within the temperate zone.

#### Area of Australia compared with areas of other countries

The area of Australia is almost as great as that of the United States of America excluding Alaska, four-fifths of that of Canada, more than half as large again as Europe excluding the U.S.S.R., and about twenty-five times that of Great Britain and Ireland. The areas of Australia and of certain other countries are shown in the table on the following page. The areas shown are in the main obtained from the *Statistical Yearbook* 1971, published by the Statistical Office of the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

\* The Southern Ocean is a local designation for the part of the Indian Ocean lying between the southern shores of Australia and Antarctica.

AREA OF AUSTRALIA AND OF OTHER COUNTRIES, *circa 1968*

(a) Greenwich Mean Time is one hour behind British Standard Time.

The coastline of Australia is approximately 12,000 miles long—New South Wales, 700 miles; Victoria, 700 miles; Queensland, 3,200 miles; South Australia, 1,500 miles; Western Australia, 4,000 miles; Northern Territory, 1,000 miles; Australian Capital Territory, Jervis Bay area included in New South Wales; Tasmania 900 miles. These measurements are broadly on a 'direct' basis, but even so they must be regarded as approximate only.

**Geographical features of Australia**

The following description is a broad summary of the main physical characteristics of the Australian continent.

A section through the Australian continent from east to west, at the point of its greatest breadth, shows first a narrow belt of coastal plain. This plain, extending north and south along the whole east coast, is well watered by rivers. It is of variable width, seldom more than sixty or seventy miles, and occasionally only a few miles, the average being roughly about forty to fifty miles. Bordering this plain is the Great Dividing Range, which extends from the North of Queensland to the south of New South Wales, and thence one branch sweeps westward towards the boundary of Victoria and South Australia, and the other, the main branch, terminates in Tasmania. This range, which rises, often abruptly, from the plain, frequently presents bold escarpments on its eastern face, but the descent on its western slopes is gradual, until, in the country to the north of Spencers Gulf, the plain is not above sea-level and occasionally even below it. Thence there is another almost imperceptible rise until the mountain ranges of Western Australia are reached, and beyond these lies another coastal plain. The mountains of Australia are relatively low, the highest peak, Mount Kosciusko, in New South Wales, being only about 7,300 feet. Three-quarters of the land-mass of Australia lies between the 600 and 1,500 feet contours in the form of a huge plateau, constituting the most distinctive feature of the Australian continent, to which the peculiarities of Australia's climate can probably be largely ascribed.

The rivers of Australia may be divided into two major classes, those of the coastal plains with moderate rates of fall and those of the central plains with very slight fall. Of the former not many are navigable for any distance from their mouths, and bars make many of them difficult of access or inaccessible from the sea.

The longest two rivers of the northern part of the east coast are the Burdekin and the Fitzroy in Queensland. The Hunter is the largest coastal river of New South Wales, and the Murray River, with its great tributary the Darling, drains part of Queensland, the major part of New South Wales, and a large part of Victoria, finally flowing into the arm of the sea known as Lake Alexandrina, on the eastern side of the South Australian coast. The total length of the Murray is about 1,600 miles, 400 being in South Australia and 1,200 constituting the boundary between New South Wales and Victoria. The total length of the Murray-Darling from the source of the Darling to the mouth of the Murray is about 2,300 miles. The rivers of the north-west coast of Australia (Western Australia), e.g. the Murchison, Gascoyne, Ashburton, Fortesque, De Grey, Fitzroy, Drysdale, and Ord are of considerable size. So also are those in the Northern Territory, e.g. the Victoria and Daly, and those

on the Queensland side of the Gulf of Carpentaria, such as the Gregory, Leichhardt, Cloncurry, Gilbert, and Mitchell. The rivers of Tasmania have short and rapid courses, as might be expected from the configuration of the country.

The 'lakes' of Australia may be divided into three classes: true permanent lakes; lakes which, being very shallow, become mere morasses in dry seasons or even dry up, and finally present a cracked surface of salt and dry mud; and lakes which are really inlets of the ocean, opening out into a lake-like expanse. The second class is the only one which seems to demand special mention. These are a characteristic of the great central plain of Australia. Some of them, such as Lakes Torrens, Gairdner, Eyre, and Frome, are of considerable extent.

For further information on the geographical features of Australia earlier issues of the Year Book should be consulted. The list of special articles, etc., at the end of this volume indicates the nature of the information available and its position in the various issues.

## Weather and climate of Australia

This section has been prepared by the Director of the Commonwealth Bureau of Meteorology, and the various States and Territories have been arranged in the standard order adopted by that Bureau. The section concludes with a brief summary of the weather of 1972.

### Introduction

Australia extends from about latitude 10° S. to latitude 44° S., but owing largely to the moderating effects of the surrounding oceans and the absence of very pronounced and extensive mountain masses it is less subject to extremes of climate than are regions of similar size in other parts of the world. The average elevation of the land surface is low—probably close to 900 feet above the sea; while the maximum altitude is just above 7,300 feet. Latitude for latitude the Australian climate is generally more temperate than that of the other large land masses of the earth, although it varies considerably from the tropical to the alpine.

The Australian meteorological seasons are: Summer—December, January, February; Autumn—March, April, May; Winter—June, July, August; Spring—September, October, November.

The following general discussion of the climate of Australia is necessarily brief. However, extensive records of Australian climatic data are held and published in various forms by the Bureau of Meteorology. A programme of regional climatic survey has been in progress for some years, and a large number of studies have been published by the Bureau of Meteorology, by the Department of Minerals and Energy, and by State Development Authorities. The Bureau of Meteorology welcomes inquiries for climatic information, which may be made at its Central Office in Melbourne or through the Regional Offices which are situated in each of the State capital cities and in Canberra and Darwin. Reference may also be made to various bulletins and research papers mentioned in this text for more detailed information on particular topics.

### Precipitation

Precipitation of moisture from the atmosphere may take various forms depending chiefly on the thermal conditions existing at the time. Within the Australian region precipitation occurs chiefly as rain because of the generally mild temperatures, but may also occur as snow or hail. Broadly, the immediate physical cause of rainfall may be said to be the lifting of moist air with resultant cooling, condensation into cloud, and eventual precipitation of the heavy water droplets as rain. This process may be achieved by three different means each of which may be combined with either or both of the others:

- (a) Orographic lifting caused by winds blowing onto rising terrain;
- (b) Convective lifting resulting in the development of individual rain clouds of the cumulus or cumulonimbus type producing showers and thunderstorms;
- (c) lifting of a warm air mass as it rises over cooler air—known as a 'frontal' process.

*Annual Rainfall.* The median annual rainfall over Australia is shown in plate 2, page 30 while plate 3, page 31, shows the distribution in 1972. The median is the value equalled or exceeded by half of the occurrences, and usually gives a better indication of the rainfall most frequently occurring.

While Australia is a continent of comparatively low relief, the orographic processes in rain production are very marked in the chain of the Great Dividing Range bordering the whole east coast of the continent, in the ranges of the south-western corner of Western Australia, and in Tasmania. Thus on the east coast the higher rainfall areas lie between the ranges and the Pacific Ocean in the region of prevailing south-east wind circulation. In Tasmania and the south-west of Western Australia the region of high rainfall lies between the ranges and the ocean to the west, these areas lying in a region of predominantly westerly wind flow.

The north-western part of the continent and to some extent the whole region of the Northern Territory and inland north Queensland comes under the influence of the Australian-Asian monsoon. This results in high rainfalls in a summer wet season with the inflow of moist air from the north-west, and a winter dry season with predominantly south-east winds blowing across the dry regions of the interior and producing little rainfall. Tropical cyclones affect the waters adjacent to the north-east and north-west of Australia between December and April. Their frequency varies greatly from season to season, but on the average about three of these disturbances occur in the Coral Sea each season and about two in the eastern Indian Ocean adjacent to the west coast of the continent. When tropical cyclones move close to the tropical coast of the continent they cause very heavy rainfalls over the coastal regions. On occasions these cyclones move over the land and lose intensity, but many still continue to be accompanied by heavy rainfall along their path.

Southern Australia lies in the region of the mid-latitude westerlies for the winter half of the year and is subject to the rain-producing influences of the great depressions of the Southern Ocean and their associated frontal systems. The combined effects of these systems and the topography lead to high winter rainfalls in south-western and south-eastern Australia and in Tasmania, with the highest falls occurring on the windward side of the mountains. The rainfall generally decreases inland with distance from the coast, although the 300 mm isohyet reaches the shore of the Great Australian Bight and the north-western coast of Western Australia in regions which are of very flat relief and which, because of their position and the orientation of the coastline, are only rarely exposed to moist winds.

**AREA DISTRIBUTION OF AVERAGE ANNUAL RAINFALL: STATES AND TERRITORIES**

<b>Total</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

(a) Includes Australian Capital Territory.

The region with the highest annual rainfall is the east coast of Queensland between Port Douglas and Cardwell, where Tully has an annual average of 4,500 mm. A further very high rainfall region is the mountainous west coast of Tasmania, where Lake Margaret has the highest annual average of 3,700 mm. The area of lowest average annual rainfalls is that of some 180,000 square miles surrounding Lake Eyre in South Australia, where on the average only 100 to 150 mm are received annually. The lowest average over a long period of record is at Troudaninna—105 mm. Rain occurs very irregularly, averaging only about one or two days a month in this region.

Of all the continents (excluding Antarctica), Australia receives the least depth of rainfall and has the least run-off from its rivers into the oceans. Only in relatively small areas of the continent could the rainfall be described as abundant.

*Seasonal distribution of rainfall.* The average monthly distribution of rainfall in the various Australian rainfall districts is shown by the histograms of plate 4, page 32.

The following are the most marked features.

- (a) The clearly defined wet summer and dry winter of the monsoon region of northern Australia.
- (b) The more regular distribution of rainfall throughout the year in south-eastern Australia. In the region to the south and west of the Great Dividing Range a less pronounced maximum of rainfall is noticeable in the winter or early spring. On the Gippsland (eastern Victoria) coast the rainfall is fairly evenly distributed throughout the year, but further along the east coast of the continent the rainfall minimum in late winter and early spring begins to appear and becomes more marked as the tropical regions are approached.
- (c) The marked rainfall maximum in the south-western districts of Western Australia in winter—the period of the most active southern depressions and frontal systems in this region.

## MONTHLY DISTRIBUTION OF RAINFALL OVER AUSTRALIA

ALL YEARS OF RECORD TO 1957

Issued by the Director of Meteorology

For further information on monthly rainfalls reference may be made to the various Australian rainfall bulletins, to the Climatological Surveys of particular districts, and to the annual rain maps and books of normals (standard 30 year periods), all published by the Bureau of Meteorology.

*Variability of rainfall.* For most agricultural pursuits a more important criterion of the value of rainfall is its variability or reliability. The adequate description of rainfall variability over an extensive geographical area is a matter of some difficulty. Probably the best available measures are to be found in the tables which have been calculated for a number of individual stations in some of the Climatological Survey districts. These tables show the percentage chances of receiving specified amounts of rainfall in monthly seasonal or annual time spans. Statistical indexes of rainfall variation based on a number of different techniques have been used to produce maps which show the main features of the variability of annual rainfall over Australia.

In general it may be stated that the regions of most reliable rainfall are the south-west of Western Australia, western Tasmania, and western and southern Victoria south of the divide. These areas have one of the most reliable rainfalls in the world. Elsewhere in Australia the degree of variability, in general, increases inland, but the region of the highest variability for low average annual rainfalls extends across the central part of the continent from south-western Queensland to the central coast of Western Australia. Some outstanding examples of the numerous instances of high rainfall variability throughout Australia are given below.

At Onslow (Western Australia) annual totals vary from 14 mm to 1,073 mm, and in the four consecutive years 1921 to 1924 the annual totals were 565, 69, 681, and 55 mm respectively. At Whim Creek, where 747 mm have been recorded in a single day, only 4 mm were received in the whole of 1924. Great variability can also occur in the heavy rainfall areas, e.g. at Tully the annual rainfalls have varied from 7,909 mm in 1950 to 2,487 mm in 1943.

The following table of annual rainfall for the Australian capital cities for the past thirty years indicates the variation in rainfall at these sites.

RAINFALL: AUSTRALIAN CAPITAL CITIES, 1943 TO 1972

(a) Fairbairn Aerodrome.

Prolonged dry spells are fairly common in much of Australia, particularly in inland areas. A discussion of droughts in Australia may be found in Gibbs W. J. and Maher J. V. *Rainfall Deciles as Drought Indicators*, Bureau of Meteorology Bulletin No. 48 (1967). A shorter account of droughts in Australia will be found in a special article in Year Book No. 45, pages 51–6. A more recent account is included with Chapter 22—Water Conservation and Irrigation in Year Book No. 54 of 1968.

*Rainfall and vegetation.* In general, the three main climatic zones of the continent exert a particular controlling influence on the general vegetation. These are the northern third of the continent where rainfall is almost always restricted to the warmer months of the year, the southern third where rainfall is predominantly a winter and spring event, and a transitional zone which experiences rainfall from both sources, although in greatly reduced quantity over the interior, which is subject to frequent drought.

The length of the growing season, or conversely the extent of dry periods during the year, decides the type of vegetation which establishes in a region. The climatic influence on vegetative response is primarily through soil moisture and temperature. Thus in colder south-eastern areas the growing season is mainly temperature dependent, but elsewhere the availability of soil moisture is the prime factor. All rainfall is not equally effective in increasing the soil moisture, its availability from the soil storage to plants depending on the extent of surface run-off, seepage beyond the root zone, and loss by surface evaporation. Furthermore the effectiveness of available soil moisture depends on the evaporative demand of the local climate; for example, an inch of stored moisture may maintain vigorous plant growth for twice as long in Tasmania as in the warmer, drier atmosphere of inland New South Wales. Thus it is not a sound practice to assess the agricultural potential of different areas simply by reference to average rainfall.

Generally speaking, the length of the growing season exceeds nine months over the far south-west of Western Australia and in all eastern coastal districts from Cape York Peninsula to western Victoria, and within this region humid and semi-humid plant formation thrive. Soil types, of course, also play a part in the distribution of vegetation, but they too are, to a considerable extent, the result of climate and weather.

The climate of Arnhem Land (Northern Territory) is such that there is a considerable surplus of moisture for about five months of the warm season, followed regularly by a virtual drought which frequently reaches severe intensity, and this special combination of meteorological conditions results in annual and perennial vegetation adapted to this cycle.

Over the interior the position is more complex because of the lower levels of the rainfall, its greater variability, and the high evaporative power of the drier, warmer atmosphere. In this vast section of the continent the climatic demands are so severe that the vegetative formations of the moisture zones (i.e. the mesophytes, requiring about five months or longer growing season) are unable to exist. Thus a plant species adapted to these very dry and variable conditions (xerophytes), e.g. spinifex, salt bush, blue bush, and stunted eucalypts, capable of maintaining a cattle population, predominates over the arid interior.

The arid and semi-arid lands of Western Australia and inland New South Wales which border the desert carry the majority of the sheep in these States. In New South Wales the most important vegetative formations in these areas are savannah (treeless plains), savannah woodland, mulga scrub, and mallee scrub. In Western Australia sclerophyllous grass steppe and mulga scrub border the deserts and are succeeded to the south by zones of mallee scrub and mallee heath.

*Rainfall intensity.* The study of extremely high rainfall intensities is important in the investigation of the flow characteristics of river systems, and flood prevention measures, the design of irrigation works, and hydro-electric schemes. The highest rainfalls recorded in a period of twenty-four hours up to 1968 for each State and Territory were: Western Australia, Whim Creek, 747 mm, 3 April 1898; Northern Territory, Roper Valley, 545 mm, 15 April 1963; South Australia, Ardrossan, 206 mm, 18 February 1946; Queensland, Croyhamhurst, 907 mm, 3 February 1983; New South Wales, Dorriggo, 636 mm, 24 June 1950; Australian Capital Territory, Jervis Bay, 182 mm, 28 April 1963; Victoria, Balook, 275 mm, 18 February 1951; and Tasmania, Mathinna, 337 mm, 5 April 1929. Most of the very high intensities have occurred in the coastal strip of Queensland, where the combination of a tropical cyclone moving close to the mountainous terrain provides ideal conditions for spectacular falls. For other very heavy falls at various localities reference may be made to Year Books No. 14, pages 60–4, No. 22, pages 46–8, No. 29, pages 43, 44 and 51, and No. 53, pages 32–4.

*Snow and hail.* For varying periods from late autumn to early spring snow usually covers the ground to a great extent on the Australian Alps above a level of about 4,500 to 5,000 feet, where in both New South Wales and Victoria ski-ing resorts operate throughout the season.

In Tasmania also the highlands are frequently covered above the 3,500 feet level for extended periods of the winter. There are, however, some years when snowfalls are much lighter than normal and even fail completely. Light snow has been known to fall occasionally as far north as the New England plateau in New South Wales (latitude 31° S.), and in exceptional seasons much of the dividing range from Victoria to Toowoomba (Queensland) has been covered above a level of about 4,000 feet. In ravines around Mount Kosciusko small areas of snow may persist throughout the summer after a heavy winter fall. This winter snowfall of south-eastern Australia is important in aiding the reliable flow of many streams which are utilised in the hydro-electric schemes of the Snowy Mountains, northern Victoria, and Tasmania. Snowfall at low terrain elevations occurs from time to time, particularly in Tasmania and Victoria, but falls are usually light and rarely lie more than a few days.

Hail is most frequent in winter and spring along the south-eastern coastal region of the continent and in Tasmania, where it is usually of a relatively small size. Summer storms, however, which are quite frequent, particularly in the highland plateau regions of eastern Australia, often produce stones of large size and of destructive intensity. Very large stones capable of piercing light gauge galvanised iron are reported from time to time, and damage to fruit crops in southern and eastern Australia from large hail stones is quite frequent.

*Floods.* In general, flooding in Australia is most pronounced on the shorter streams flowing from the Great Dividing Range into the Pacific Ocean along the seaboard of Queensland and New South Wales. These floods are particularly destructive on the more densely populated coast of New South Wales. The chief rivers in this area are the Tweed, Richmond, Clarence, McLeay, Nepean, Hawkesbury, Hunter, and Shoalhaven, all of which experience quite frequent and considerable flooding. These floods occur chiefly in summer but may occur at any time of the year.

The great Fitzroy and Burdekin river systems in Queensland are also subject to floods during the summer wet season, while much of the heavy monsoon rain in northern Queensland flows southward through the normally dry channels of the network of rivers draining into Lake Eyre. This water may cause extensive floods over a vast area, but it is soon lost by seepage and evaporation and rarely reaches the lake in any quantity. The Condamine and other tributaries of the Darling also carry considerable volumes of water south through western New South Wales to the Murray, and flooding along their courses occurs from time to time.

Flooding also occurs from time to time, usually in autumn, winter, and spring, in the Murray-Murrumbidgee system of New South Wales and Victoria and on the smaller coastal streams of southern Victoria. In Tasmania, flooding of the north coast streams, particularly the South Esk system, is common in the same seasons. In South Australia some flooding has occurred in the lower reaches of the Murray owing to rainfall as far away as Queensland and south-eastern New South Wales. In the north of Western Australia and the Northern Territory, flooding of the coastal streams occurs frequently in summer but is not of such economic importance as the flooding of the eastern coastal streams of the continent, where many localities are more vulnerable to damage.

### Temperature

Conditions vary greatly for a particular individual even in a fixed location, so that it is difficult to describe general comfort variability uniquely throughout a region as varied climatically as Australia. A number of indexes which attempt to incorporate some of the factors concerned\* have been used experimentally from time to time, and further research continues on this very difficult problem. Generally speaking, there is an increase in discomfort northwards within the tropical regions of Australia in summer, owing to the heat and high absolute humidity which reached a maximum in the extreme north of the continent. Such conditions are, however, ameliorated to a large extent in highland areas such as the Atherton Tableland in Queensland. No part of Australia is uncomfortably hot in winter, and only in a small area of the Australian Alps and highland Tasmania does bodily strain due to cold exist in winter. The history of the settlement of the northern regions of Queensland and the Northern Territory indicates that with accelerating development of studies and experience in the arrangement of living and working accommodation, clothing, and general way of life, the effects of extremes of climate can be minimised.

For some further discussion of the problems of temperature and comfort conditions reference may be made to Ashton, H. T., *Meteorological Data for Air Conditioning in Australia*, Bureau of Meteorology Bulletin No. 47 (1964).

*Average seasonal temperature distribution.* Plates 5 to 8, pages 37–8, show the normal daily maximum and minimum temperatures for January and July, which may be taken as indicative respectively of the summer and winter seasons in Australia. Further detailed temperature data are presented on pages 48–57 for the capital cities and more important country towns of the Commonwealth.

---

\* See Year Book No. 53, page 35.

On the basis of average annual mean temperatures, and latitude for latitude, Australia is somewhat cooler than the other land masses of the southern hemisphere and considerably cooler than the same latitudes in the large continental areas of the northern hemisphere. This is due to the insular nature of Australia and the stronger general circulation of the atmosphere in the southern hemisphere resulting in the transport of higher latitude (cooler) air into the subtropical regions.

July is the month with the lowest mean temperature in all parts of the continent, while the month with the highest mean temperature varies from February in Tasmania and southern Victoria to December in the northern part of the continent and November in Darwin. The lateness of the month of highest average temperature in the extreme south of the continent is due in part to the effect of the Southern Ocean, where the sea surface temperature reaches its maximum in February. The cooler period of the late summer in the north is due largely to increased cloudiness associated with the inflow of north-west winds with the onset of the monsoon season.

In January average maximum temperatures exceed  $35^{\circ}\text{C}$  over a vast area of the interior of the continent. The hottest part of Australia is situated in the north of Western Australia around the Marble Bar and Nullagine area, where the daily maximum screen temperature during the summer frequently exceeds  $38^{\circ}\text{C}$  for weeks at a time.

The marked change of maximum temperature in summer with distance from the sea, in areas close to the coasts, particularly along the Great Australian Bight and the Indian Ocean coast of Western Australia is due to the penetration inland of the vigorous sea breezes which are initiated by the considerable temperature contrast between land and sea surface temperatures. The  $25^{\circ}\text{C}$  isotherm of January mean maximum temperature skirts the southern coast of the continent from south-western Western Australia to Gulf St Vincent.

In January the mean minimum temperatures in the tropics, except for some highland regions, exceed  $22^{\circ}\text{C}$ , with a gradual decrease southward to values of  $12^{\circ}\text{C}$  in Victoria and  $9^{\circ}\text{C}$  in Tasmania. Highland regions in the south have mean values of  $5^{\circ}\text{C}$  and lower. In July a more regular latitudinal distribution of mean maximum temperature is evident, only parts of the north of the continent having mean maxima higher than  $30^{\circ}\text{C}$ . Values lower than  $15^{\circ}\text{C}$  are general over the south-eastern part of the continent, with mean maxima falling below  $5^{\circ}\text{C}$  in small alpine areas. Average night minimum temperatures in July fall below  $5^{\circ}\text{C}$  in areas south of the tropics and away from the coast. Alpine regions again record the lowest temperatures with some areas experiencing means lower than  $-3^{\circ}\text{C}$ .

*Extreme variation and daily range.* Only at a few inland places in Australia does the absolute range of temperature (i.e. the range from the highest maximum to the lowest minimum) exceed  $55^{\circ}\text{C}$ . Generally it is in the range  $45^{\circ}\text{C}$  to  $50^{\circ}\text{C}$  in the inland areas and somewhat less on the coasts. The highest temperature recorded in Australia was  $53.1^{\circ}\text{C}$  at Cloncurry (Queensland) on 16 January 1889 and the lowest  $-22.2^{\circ}\text{C}$  at Charlotte Pass in the Southern Alps on 14 July 1945 and again on 22 August 1947. The world record maximum temperature is  $58^{\circ}\text{C}$  at Azizia (Tripoli) on 13 August 1922 and the world record minimum temperature  $-88^{\circ}\text{C}$  at Vostok on the Antarctic plateau on 24 August 1960.

*High temperature.* Heat waves with a number of successive days higher than  $38^{\circ}\text{C}$  are relatively common in many parts of Australia. With the exception of the north-western coast of Western Australia, however, most coastal areas do not usually experience more than a few days in succession of such conditions. The frequency of such conditions increases inland, and periods of up to twenty days have been recorded over most of the settled areas. This figure increases in western Queensland and north-western Western Australia to more than sixty days in places. The central part of the Northern Territory and the Marble Bar-Nullagine area of Western Australia have recorded the most prolonged heat waves for the Australian region. The longest consecutive period of daily maxima greater than  $38^{\circ}\text{C}$  was 160 consecutive days recorded in Marble Bar during the summer of 1923-24.

*Frosts.* Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water ( $0^{\circ}\text{C}$ ), and a ground frost is regarded as having occurred when the grass thermometer has fallen below  $-0.9^{\circ}\text{C}$ . However, as terrestrial minima are not recorded at all stations, it is usual for statistical purposes to regard the registration of a screen thermometer of  $2.2^{\circ}\text{C}$  as indicating a 'light' frost. A map showing frequency of days with screen minima higher than  $2.2^{\circ}\text{C}$  (i.e. the frost free period) is reproduced in plate 9, page 41. A 'heavy' frost is taken as a screen reading of less than  $0^{\circ}\text{C}$ . A 'black' frost occurs with a combination of low temperature and low humidity, and, although frost crystals are not observed on the ground, damage takes place to the plant cells by the freezing and expansion of the moisture they contain.

PLATES 5 and 6

PLATES 7 and 8

The frequency of frost depends largely on altitude, latitude, and proximity to the sea, and locally, to a very large extent, on even minor variations in contour of the land. The parts of Australia which are most subject to frost are the eastern highlands from north-eastern Victoria to the western Darling Downs in southern Queensland. Most stations in this region experience more than ten nights a month with readings of  $0^{\circ}\text{C}$  or under for three to five months of the year. On Tasmania's Central Plateau similar conditions occur for three to six months of the year. Heavy frosts are comparatively infrequent in Western Australia, except in parts of the south and south-west. In South Australia frosts are most frequent in the agricultural areas of the south-east.

Frosts may occur within a few miles of the coast over the whole continent except the Northern Territory and most of north Queensland. Regions in which frosts may occur at any time of the year comprise most of Tasmania, large areas of the tablelands of New South Wales, much of inland Victoria, particularly the north-east, and a small part in the extreme south-west of Western Australia. Over most of the interior of the continent, and on the highlands of Queensland as far north as the Atherton Plateau, frosts commence in April and end in September, but they are infrequent in these months. Minimum temperatures below  $0^{\circ}\text{C}$  are experienced in most of the sub-tropical interior in June and July.

For further details of frost conditions in Australia reference should be made to Foley, J. C., *Frost in the Australian Region*, Bureau of Meteorology Bulletin No. 32 (1945).

### Humidity and saturation deficit

The annual variation of vapour pressure\* for regions outside the tropics closely follows that of temperature. However, the mean relative humidity† in the temperate regions is generally highest in winter and lowest during the summer. In northern Australia the highest relative humidity occurs during the rainy summer season. The relative humidity variation during the day closely follows the diurnal variation of temperature, being highest with low temperatures and lowest with high temperatures. The relative humidity at 9 a.m. for Australian conditions may be considered as a close approximation to the mean for the whole day. In the tables for the capital cities, pages 48–55, the mean monthly vapour pressure and relative humidity for 9 a.m., together with the monthly extremes are listed. The order of the stations in descending values of mean annual vapour pressure at 9 a.m. is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, and Hobart, while the annual mean of the 9 a.m. relative humidities diminishes in the order Darwin, Sydney, Canberra, Melbourne, Brisbane, Hobart, Perth, and Adelaide.

In January the mean saturation deficit‡ at the mean temperature for the month has a maximum value of over 20 mm in the central parts of Western Australia and in south-western Queensland. Gradual decreases occur towards the coast, where values close to the north, east, and south coastlines are around 5 mm. On the western coast values are somewhat higher, and a strong gradient exists in the saturation deficit in the narrow region bordering the Indian Ocean. In July the variation is less, with maxima of 10 mm in the dry north of the Northern Territory and Western Australia, slowly decreasing generally to the south, with values over most of the south-east and extreme south-west of the continent being less than 2 mm. Extremely low values (less than 0.5 mm) exist in July over the highlands of south-eastern Australia and Tasmania.

### Evaporation

In Australia the study of evaporation is of great importance, since in its drier regions water conservation must be practised by the use of tanks and dams. The magnitude of the economic loss by evaporation may be appreciated from plate 10, page 41, which shows that the yearly amount varies from 500 mm over the highland areas of central Tasmania to more than 3300 mm in the northern and north-western part of South Australia.

Over an area of some 70 per cent of the continent, comprising most inland districts and extending to the coast in the north-west of Western Australia and to the head of the Great Australian Bight, the rainfall does not exceed the evaporation loss in any month of the year. The central and north-western portion of the continent experience evaporation far in excess of their rainfall. Vegetation over these areas is characterised by acacia, scrub steppe, and arid scrub, while many areas are merely sand hills and stony desert. Over many of the drier areas, however, particularly in the inland areas of south-eastern Australia, the loss of rainfall by evaporation is made good to some extent by the development of irrigation schemes. Some of these schemes, such as those at the Murrumbidgee Irrigation Area in New South Wales and at Mildura in Victoria and Renmark in South Australia, have been very successful. The Snowy Mountains Hydro-electric Scheme has also resulted in the

\* Vapour pressure—the pressure exerted by the water vapour of the atmosphere. † Relative humidity—the ratio of the existing vapour pressure to the saturated vapour pressure at the existing temperature, expressed as a percentage.  
‡ Saturation deficit—the difference between the saturation vapour pressure and the actual vapour pressure. See Year Book No. 53, page 37 for further information.

large scale supply of water from the south-eastern highlands of Australia for use in the drier areas to the west of the ranges in New South Wales and Victoria. The future development of such schemes as these holds promise for the reclamation of many marginal areas in Australia, which because of low rainfall and high evaporation are at present of little economic value.

Since the loss by evaporation depends largely on the net radiation absorbed and consequently on the extent of the exposed area, tanks and dams so designed that the surface area shall be a minimum are advantageous. Further, the more protected they are from the direct rays of the sun and from winds the less will be the evaporation loss.

Further information on evaporation may be found in Hounam, C. E., *Evaporation in Australia*, Bureau of Meteorology Bulletin No. 44 (1961).

### Sunshine and cloud

The proportion of the sky covered by cloud is of considerable meteorological and climatological importance. A cloud cover inhibits both incoming and outgoing radiation and thus profoundly affects the temperature distribution and other factors at the earth's surface. Cloud amount is measured in eighths of the sky covered.

In Australia the seasonal changes in cloudiness correspond closely to that of rainfall. In the southern or more temperate parts of the continent, particularly in the coastal and low lying areas, the winter months are generally more cloudy than the summer. This is due to the formation of extensive areas of stratiform cloud and fog during the colder months, when the structure of the lower layers of the atmosphere favours the physical processes resulting in this type of cloud. A particularly strong annual periodicity exists in the monsoonal regions of northern Australia, where it is heavily clouded during the summer wet season and practically cloudless during the winter 'dry'. Cloudiness is higher near coasts and on the windward slopes of the mountains of eastern Australia and is least over the dry interior parts of the continent.

A close relationship exists between cloud amount and number of sunshine hours, and it is possible to estimate from cloud data the equivalent number of sunshine hours over a given period. These data can be incorporated with records of direct measurement of sunshine hours, and approximate distribution maps produced for Australia. Maps of the mean sunshine distribution for January and July are reproduced in plates 11 and 12, page 42 and indicate the main features of the variation over Australia in these months.

Except for Tasmania and a narrow fringe bordering the southern, eastern, and northern coasts, the greater part of the continent receives more than 3,000 hours of sunshine each year, and in Central Australia and the mid-western coast of Western Australia totals in excess of 3,500 hours occur. The extreme south coast receives in the main 2,000 to 2,500 hours annually, while the east coast regions of New South Wales and Queensland receive 2,500 to 3,000 hours. A minimum of less than 1,750 hours occurs on the west coast and highlands of Tasmania.

Mean amounts of cloud for each month at the capital cities are included in the tables on pages 48-55, as are the mean daily hours of sunshine. The latter figure is a good single measure of the relative climatic characteristics of the individual cities for different months of the year.

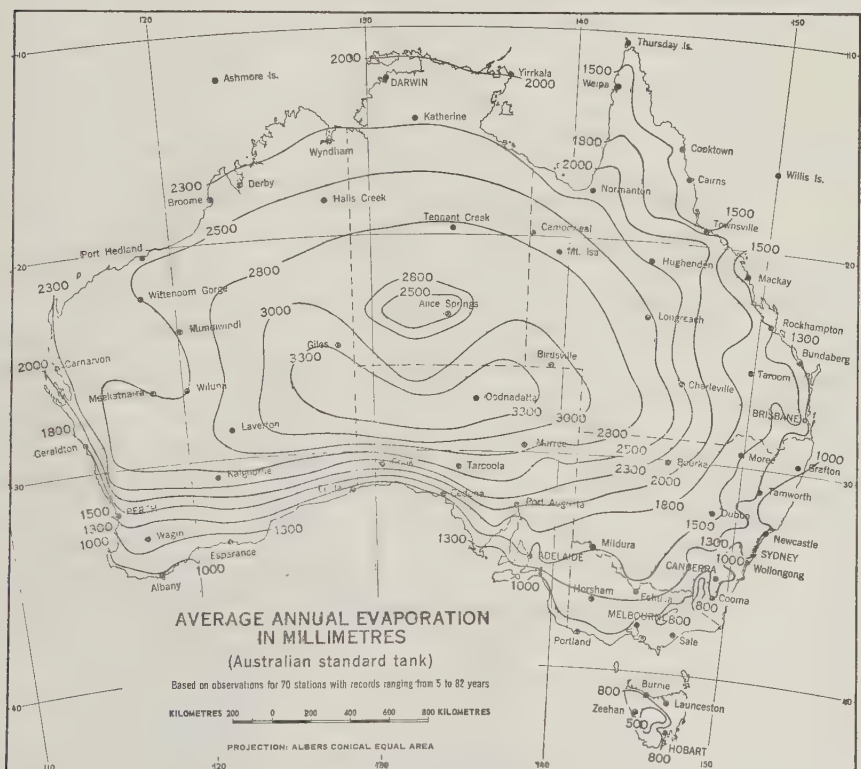

### Wind

Australia lies in those latitudes of the southern hemisphere where it is influenced largely by two wind systems:

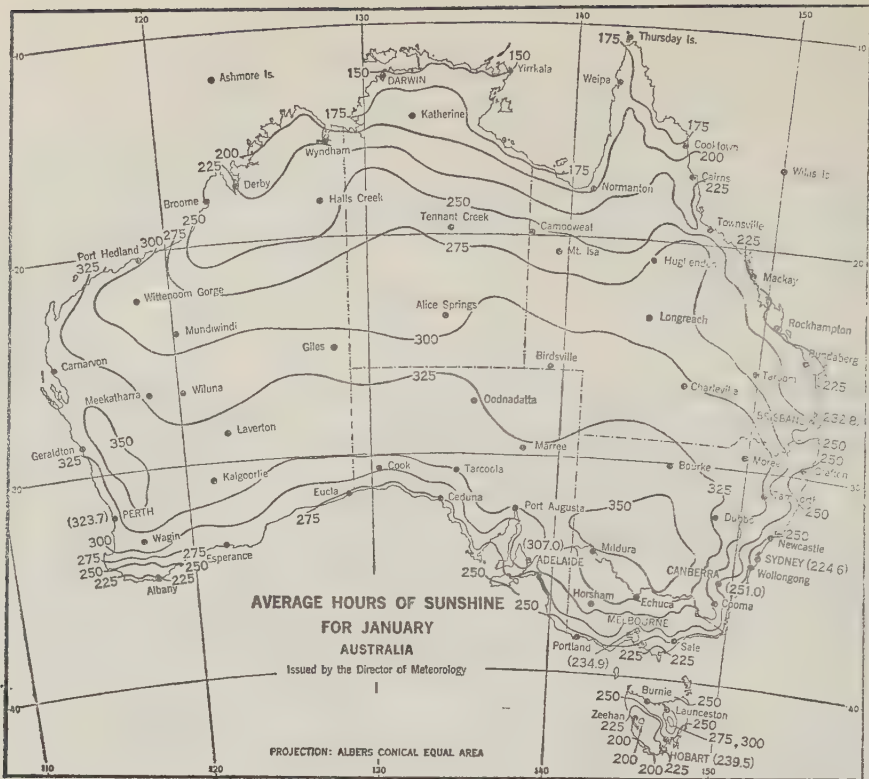

- (a) the south-east trade winds blowing on the equatorial side of the mid-latitude anticyclones: and
- (b) the westerlies south of the mid-latitude anticyclones in which successive low pressure systems move eastward over the Southern Ocean.

The only pronounced seasonal variations of atmospheric pressure in the middle and high latitudes of the southern hemisphere are related to the latitudinal shift in the axes of the sub-tropical high pressure systems and to the change in the tracks of the migratory anticyclones. The latter systems move generally from west to east in the Australian region between the semi-permanent oceanic anticyclones of the Indian and Pacific Oceans. The mean path of these systems lies over southern Australia during the summer but moves northwards during the winter with the thermal equator. The movement is only of a few degrees of latitude but it is of very great importance to the climate of the Australian

PLATES 9 and 10

PLATES 11 and 12

continent. During the summer months, when the anti-cyclones move on a more southerly track, the south-east trades affect the whole coast of eastern Australia north of around latitude  $30^{\circ}$  S., the westerlies retreating to higher latitudes, and conditions are more settled over southern Australia which then lies close to the axis of the anticyclones. In winter the anticyclones move further north, the trades affect only the northern parts of the continent, and southern Australia is exposed to the westerlies of the Southern Ocean.

In summer, with the retreat of the anticyclones to the south, the whole of northern and north-western Australia is exposed initially to light wind systems, and then during the period from December to April to the effects of the north-west monsoon. This process, which is associated with an inflow of north-west winds and intensive rains, is not as regular or persistent as the south-west monsoon of south-east Asia. However, it is a sufficiently regular feature of the climate of northern Australia to be designated as the north-west season, or, as it is best known in the area, 'the wet'. Its influence affects areas as far south as central Queensland, but southern Queensland and the area east of the Great Dividing Range are largely still under the influence of the south-east trades. Fringe or marginal areas on the southern limits of the monsoonal penetration over the continent have a shorter and more uncertain 'wet' season, which in some years fails to appear at all. With the northward advance of the anticyclones in autumn, the monsoon gives way again to the trades, and 'the dry' of northern and north-western Australia commences.

The general features of these wind patterns may be seen in the wind rose diagrams of plates 13 and 14, pages 44-5. It is important, however, to note the dynamic nature of the atmosphere, and that the continual growth, decay, and motion of the pressure systems result in a wide diversity of wind-flow types. Descriptions of wind conditions for particular geographical areas and seasons can thus be only of a very generalised kind. Further, local features can also be imposed on the overall wind pattern—channelling of winds due to topography (e.g. the high frequency of north-west winds in Hobart) and the marked summer sea breeze characteristics of most of the Australian coast, particularly near the Great Australian Bight as shown in the diagrams of 3 p.m. wind frequencies.

### Storms and tropical cyclones

In general there are two types of weather systems in Australia which produce very strong winds and heavy rainfalls over large areas of the continent:

- (a) the active depressions which move eastwards over the Southern Ocean; and
- (b) the tropical cyclones or hurricanes of north-eastern and north-western Australia.

During the winter the southern shores of the continent are subject to the deep depressions of the southern low pressure belt. They are felt most severely over the south-west of Western Australia, the south-east of South Australia, southern Victoria, and Tasmania, and may move inland in all these regions bringing strong winds and heavy rainfall. Further extensions of this type of system frequently develop close to the coast of New South Wales, often bringing severe weather to this region and to southern Queensland. These are generally known as 'east coast lows'.

The frontal systems (i.e. the narrow zones characterised by cloud and bad weather separating two air masses of different density) which are associated with these depressions vary widely in character. A common type in south-east Australia is a cold front located in a  $\Lambda$  shaped trough. Such a system usually brings very strong north to north-west winds in advance of the front with a very abrupt backing of the wind to colder west to south-westerly winds after the frontal passage. Such frontal passages are, in their most severe form, associated with thunderstorms and line squalls, heavy rain, and a change to cold winds and showers. These violent changes with the passage of a cold front and strong southerly winds frequently affect the New South Wales coast as far north as Newcastle during the winter, and are popularly known as 'southerly busters'.

The most extensive rains of inland Australia occur when moist tropical air which has moved inland is lifted by convergence ahead of a slow moving colder air mass moving from the Southern Ocean. The coast of Queensland, particularly the section from Cooktown to Mackay and the adjacent waters, is subject to visitations by tropical cyclones (the 'hurricanes' of the Caribbean and 'typhoons' of the China Sea). These destructive systems can affect this region from December to April, normally forming in the Coral Sea, moving south-west close to the coast and then passing away to the south-east into the Pacific. They may, however, cross the coast from time to time and bring torrential rain and violent winds (often more than 150 km/h) to the coastal regions.

Similar systems affect the north-west coast of Western Australia where they bear the local name of 'willy willies', a name which is, however, often used generally in Australia for minor local whirlwinds or dust devils. The season in this region generally lasts from November to April, the storms originating in the Timor or Arafura Seas travelling usually south-west and approaching the coast most commonly between latitudes  $20^{\circ}$  S. and  $22^{\circ}$  S. Thence the systems may move southwards following the coast,

BUREAU OF METEOROLOGY

WIND ROSES

9 A.M.

SHOWING MONTHLY PERCENTAGE  
FREQUENCY DISTRIBUTION OF  
WIND DIRECTIONS TO EIGHT  
POINTS OF THE COMPASS

SCALE OF PERCENTAGES PER CENT

EXPLANATION

The sides of the octagons face toward the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of these columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12½%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Since the frequency of calms is not shown for the months when the percentage of winds from that direction is practically zero.

# WIND ROSES

SHOWING MONTHLY PERCENTAGE  
FREQUENCY DISTRIBUTION OF  
WIND DIRECTIONS TO EIGHT  
POINTS OF THE COMPASS

The side of the octagons lies towards the cardinal and semi-cardinal points, projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequency of the winds from the given direction in the successive months, working outwards from January to December. The scale is shown above, and the outer octagon from January to December, separated from the inner octagon by a distance representing 121% and the tops of the columns would all be on these outer octagons if winds from all the directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

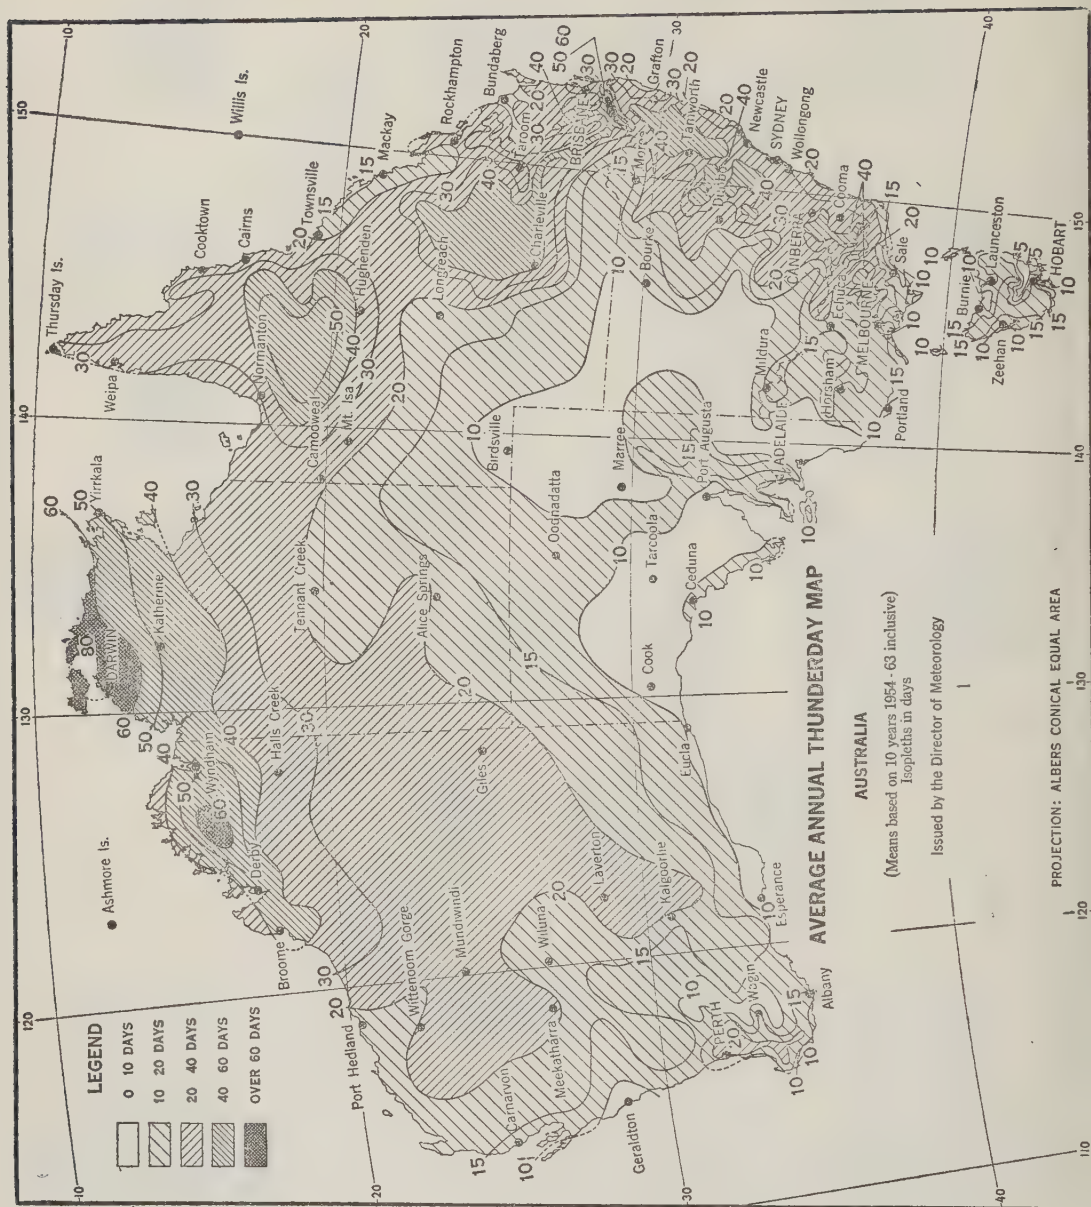

PLATE 15

or sometimes cross inland bringing high rainfalls to the otherwise dry interior of the continent. A further region which is affected somewhat less frequently by tropical cyclones is the coast of Arnhem Land in the Northern Territory and the waters and coasts of the Gulf of Carpentaria.

Tropical cyclones, in general, soon lose their intensity on crossing from sea to land, but, although the wind force rapidly abates, they are still capable of producing the heavy rainfall which leads to flooding of coastal rivers, damage to stock and property, and general disruption of transport.

Thunderstorms which bring local heavy rain and strong winds are common to most of Australia. They are also of particular importance because of the lightning damage which they cause to power transmission lines, and have been extensively studied for the purpose of siting electrical installations as far as possible in areas of low thunderstorm occurrence. Plate 15, page 46, shows the number of days annually on which thunder is heard, which is a better observational criterion than lightning observed. The region of maximum thunderstorm activity is the extreme north-west of the continent and the region south-east of the Gulf of Carpentaria. In the more settled areas maximum thunderstorm occurrence is in central western and south-eastern Queensland and the highland areas of New South Wales. The minimum number of storms occur over the interior of South Australia, western New South Wales, and eastern Tasmania.

#### Climatological tables

The averages and extremes for a number of elements which have been determined from long series of observations at the Australian capitals up to and including the year 1971 (data for Canberra up to 1972) are given in the following pages, together with more limited data for the larger country towns of the Commonwealth.

(a) 1894-1970. (b) 1915 and 1958.

Figures such as 30/16, 12/99, etc. indicate, in respect of the month of reference, the day and year of the occurrence. Dates in italics relate to nineteenth century.

**Rainfall and temperatures, various cities**

Year Book No. 34, page 28, shows rainfall and temperature, and No. 38, page 42, temperature, for various important cities throughout the world and for the Australian capitals.

**Climatological data for selected Australian country towns**

The following table shows some of the more important climatological data for selected Australian country towns, based on standard thirty years normals (1911-1940).

**CLIMATOLOGICAL DATA FOR SELECTED AUSTRALIAN COUNTRY TOWNS**

Town	Rainfall		Temperature				Relative humidity

(a) The average index of mean relative humidity has been derived from the ratio of the average 9 a.m. vapour pressure to the saturation vapour pressure at the average mean temperature of the month. Being thus related to the mean temperature this value of relative humidity is a good approximation to the daily mean.

NOTE. The table on the next page gives the latitude, longitude, and altitude of the weather recording station at each of the above towns.

### The Weather of 1972 (December 1971 to November 1972)

The following is a brief summary of weather conditions experienced during the four seasons ended in November 1972. Plate 3, page 31, shows the rainfall distribution for 1972.

*Summer, 1971-72.* Rainfall was much above average in most of South Australia, Victoria, New South Wales and the east coast of Queensland. The Central Tablelands district of New South Wales recorded its highest summer rainfall on record and other districts in central-eastern New South Wales and central Victoria approached record seasonal falls.

Rainfall was very much below average generally in Western Australia and western Queensland. Notably dry areas were the North Kimberley and Central Coast districts of Western Australia and the lower western district of Queensland.

Elsewhere over the continent and in Tasmania summer rainfall was mainly average.

Temperatures were generally average.

*Autumn, 1972.* Rainfall was significantly below average over most of the continent and in Tasmania. In Western Australia conditions were below average apart from above average falls in the Kimberleys. South Australia, Victoria, New South Wales and Tasmania had a generally dry autumn and rainfall deficiencies were causing concern in some areas.

Queensland had mostly below average rainfall although there were some good falls in parts of the north and the south-east.

The Northern Territory received good rainfall, particularly in the Alice Springs district, which had record falls in March.

Temperatures were average or above. Daily maxima were notably above average in the southern half of Western Australia, South Australia, parts of Victoria and most of Tasmania. Daily minima were notably above average in scattered parts of Western Australia and Queensland.

*Winter 1972.* Rainfall was generally much below average over New South Wales and most of Victoria following a below average autumn. The low winter rainfall resulted in serious rainfall deficiencies over the autumn—winter period in most of inland New South Wales and eastern Victoria; and although useful rain fell at the end of August, follow-up rains were required urgently.

In Western Australia and South Australia, the agricultural areas generally received average rainfall resulting in fair seasonal conditions.

Queensland received below average rainfall and much of the southern inland was suffering from serious deficiencies following a below average autumn.

In Tasmania rainfall was average, or above, and seasonal conditions fair.

Temperatures were mainly average but there were some well below average mean minima over the tablelands of New South Wales. Record low temperatures were experienced in Tasmania in June.

*Spring, 1972.* Widespread heavy rains fell over south-east Queensland and north-east New South Wales with coastal areas receiving up to three times their spring average.

Elsewhere rainfall was below average except for scattered areas above average mainly in Western Australia and Queensland. Many areas of South Australia, western New South Wales, Victoria and north-east Tasmania were up to 50 per cent below average for the season.

Temperatures were appreciably above average. Mean daily maximum temperatures were greater than 1°C above average over most of the interior of the continent, in much of Victoria and in north-east Tasmania. Mean daily minima were greater than 1°C above average over a band of country extending from the north-west coast of the continent across the interior to the east coast.

## CHAPTER 3

# GENERAL GOVERNMENT

### Parliamentary government

#### Scheme of parliamentary government

Under section 1 of the Commonwealth of Australia Constitution the legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor who is the representative of the Sovereign for the State and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office and by the instructions which detail the manner in which his duties are to be fulfilled. The Legislature in each State was bicameral until 1922, when the Queensland Upper House was abolished and the Parliament became unicameral. In the bicameral Parliaments the Upper House is known in the Commonwealth Parliament as the Senate, and in the State Parliaments as the Legislative Council, while the Lower House is known in the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria, and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly. In Queensland the sole legislative chamber is known as the Legislative Assembly. The extent of the Legislative powers of the Parliaments is defined by the Commonwealth and State Constitutions. In those States that have a bicameral legislature the Legislative Assembly or House of Assembly is the larger House. The members of the Legislative Assembly or House of Assembly, as the case may be, of each State are elected by the people, the franchise extending to British subjects who are at least 18 years of age with certain residential qualifications, except in Queensland and Tasmania where persons vote to elect members in both Houses of the respective Parliaments of those States if they are at least 21 years of age. With the exception of the New South Wales Legislative Council, the members of State Legislative Councils are, in common with members of the Lower Houses, elected by the people of the respective States. In New South Wales a quarter of the members of the Legislative Council retire each three years, and the continuing members of the Council and the members of the Legislative Assembly, voting as an electoral body, elect members to fill the vacant positions. In Victoria, and Tasmania members of the Legislative Council are elected by adult suffrage, while the franchise is limited in South Australia to the holders of certain property or service qualifications and their spouses. In the Commonwealth Parliament the qualifications for the franchise are identical for both Houses, extending to British subjects who have lived in Australia for six months continuously and who are at least 18 years of age.\*

#### The Sovereign

On 7 February 1952 the Governor-General and members of the Federal Executive Council proclaimed Princess Elizabeth Queen Elizabeth the Second, Queen of this Realm and of all Her other Realms and Territories, Head of the Commonwealth, Defender of the Faith, Supreme Liege Lady in and over the Commonwealth of Australia. The coronation of Her Majesty in Westminster Abbey took place on 2 June 1953.

#### The Governor-General

*Powers and functions.* As the Queen's representative in Australia, the Governor-General exercises certain prerogative powers and functions assigned to him by the Queen. Other powers and functions are conferred on him by the Constitution. Powers which have been so assigned or conferred include, among others, the power to grant pardons and to remit fines for offences against the laws of the Commonwealth; to appoint certain officers in the Diplomatic or Consular Service of the Commonwealth; to appoint times for holding the sessions of the Parliament, prorogue Parliament, and dissolve the House of Representatives; to cause writs to be issued for general elections of members of the House of Representatives; to assent in the Queen's name to a proposed law passed by both Houses of the Parliament or withhold assent, or to reserve the law for the Queen's pleasure, or to return the proposed law to the House in which it originated and transmit therewith any amendments which he

\* The age qualification for enrolment and voting in both houses of the Commonwealth Parliament was lowered from 21 years to 18 years by Act No. 7 of 1973.

may recommend; to exercise the executive power of the Commonwealth; to choose and summon Executive Councillors, who hold office during his pleasure; and to appoint Ministers of State for the Commonwealth. In addition, the command-in-chief of the defence forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

Many Acts of the Commonwealth Parliament provide that the Governor-General may make regulations to give effect to the Act. The Governor-General may also be authorised by statute to issue proclamations—for example, to declare an Act in force or a state of things to exist, e.g. the calling out of the Citizen Military Forces in time of war or defence emergency. He has been given power by statute to legislate for certain Territories of the Commonwealth. Under the conventions of responsible government obtaining in British Commonwealth countries, the Governor-General's functions are exercised generally on the advice of Ministers of State.

*Holders of office.* The following list shows the names of the Governors-General since the inception of the Commonwealth.

### GOVERNORS-GENERAL

Rt Hon. JOHN ADRIAN LOUIS, EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), P.C., K.T., G.C.M.G., G.C.V.O. From 1 January 1901 to 9 January 1903.

Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 17 July 1902 to 9 January 1903 (Acting).

Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 9 January 1903 to 21 January 1904.

Rt Hon. HENRY STAFFORD, BARON NORTHCOTE, P.C., G.C.M.G., G.C.I.E., C.B. From 21 January 1904 to 9 September 1908.

Rt Hon. WILLIAM HUMBLE, EARL OF DUDLEY, P.C., G.C.B., G.C.M.G., G.C.V.O. From 9 September 1908 to 31 July 1911.

Rt Hon. THOMAS, BARON DENMAN, P.C., G.C.M.G., K.C.V.O. From 31 July 1911 to 18 May 1914.

Rt Hon. SIR RONALD CRAUFURD MUNRO-FERGUSON (afterwards VISCOUNT NOVAR OF RAITH), G.C.M.G. From 18 May 1914 to 6 October 1920.

Rt Hon. HENRY WILLIAM, BARON FORSTER OF LEPE, P.C., G.C.M.G. From 6 October 1920 to 8 October 1925.

Rt Hon. JOHN LAWRENCE, BARON STONEHAVEN (afterwards 1ST VISCOUNT STONEHAVEN), P.C., G.C.M.G., D.S.O. From 8 October 1925 to 22 January 1931.

Rt Hon. SIR ISAAC ALFRED ISAACS, G.C.B., G.C.M.G., K.C. From 22 January 1931 to 23 January 1936.

Brigadier-General the Rt Hon. ALEXANDER GORE ARKWRIGHT, BARON GOWRIE (afterwards 1ST EARL OF GOWRIE), V.C., P.C., G.C.M.G., C.B., D.S.O., K.G.St.J. From 23 January 1936 to 30 January 1945.

His Royal Highness PRINCE HENRY WILLIAM FREDERICK ALBERT, DUKE OF GLOUCESTER, EARL OF ULSTER AND BARON CULLODEN, K.G., P.C., K.T., K.P., G.C.B., G.C.M.G., G.C.V.O., General in the Army, Air Chief Marshal in the Royal Air Force, One of His Majesty's Personal Aides-de-Camp. From 30 January 1945 to 11 March 1947.

Rt Hon. SIR WILLIAM JOHN MCKELL, G.C.M.G., Q.C. From 11 March 1947 to 8 May 1953.

Field Marshal SIR WILLIAM JOSEPH SLIM (afterwards VISCOUNT SLIM OF YARRALUMLA), K.G., G.C.B., G.C.M.G., G.C.V.O., G.B.E., D.S.O., M.C., K.St.J. From 8 May 1953 to 2 February 1960.

Rt Hon. WILLIAM SHEPHERD, VISCOUNT DUNROSSIL, P.C., G.C.M.G., M.C., K.St.J., Q.C. From 2 February 1960 to 3 February 1961.

Rt Hon. WILLIAM PHILIP, VISCOUNT DE LISLE, V.C., P.C., G.C.M.G., G.C.V.O., K.St.J. From 3 August 1961 to 22 September 1965.

Rt Hon. RICHARD GARDINER, BARON CASEY, K.G., P.C., G.C.M.G., C.H., D.S.O., M.C., K.St.J. From 22 September 1965 to 30 April 1969.

Rt Hon. SIR PAUL HASLUCK, G.C.M.G., G.C.V.O., K.St.J. From 30 April 1969.

*Administrators.* In addition to the holders of the office of Governor-General listed above, certain persons have, from time to time, been appointed as Administrator of the Government of the Commonwealth. Administrators are appointed in the event of the death, illness, or absence from Australia of the Governor-General, or for the period between the departure of a Governor-General and the arrival of his successor. The following is a list of such appointments.

### ADMINISTRATORS

Rt Hon. FREDERIC JOHN NAPIER, BARON CHELMSFORD (afterwards 1st VISCOUNT CHELMSFORD), K.C.M.G. From 21 December 1909 to 27 January 1910.

Lieut.-Colonel the Rt Hon. ARTHUR HERBERT TENNYSON, BARON SOMERS, K.C.M.G., D.S.O., M.C. From 3 October 1930 to 22 January 1931.

Captain the Rt Hon. WILLIAM CHARLES ARCEDECKNE, BARON HUNTINGFIELD, K.C.M.G., K.St.J. From 29 March 1938 to 24 September 1938.

Major-General SIR WINSTON JOSEPH DUGAN (afterwards 1st BARON DUGAN OF VICTORIA), G.C.M.G., C.B., D.S.O. From 5 September 1944 to 30 January 1945; 19 January 1947 to 11 March 1947.

General\* SIR JOHN NORTHCOTT, K.C.M.G., K.C.V.O., C.B. From 19 July 1951 to 14 December 1951; 30 July 1956 to 22 October 1956.

General SIR REGINALD ALEXANDER DALLAS BROOKS, K.C.B., K.C.M.G.†, K.C.V.O., D.S.O., K.St.J. From 8 January 1959 to 16 January 1959; 4 February 1961 to 3 August 1961; 5 June 1962 to 3 October 1962; 21 November 1962 to 18 December 1962.

General SIR ERIC WINSLOW WOODWARD, K.C.M.G., K.C.V.O., C.B., C.B.E., D.S.O., K.St.J. From 16 June 1964 to 30 August 1964.

Colonel SIR HENRY ABEL SMITH, K.C.M.G., K.C.V.O., D.S.O., K.St.J. From 7 May 1965 to 22 September 1965.

Lieut.-General SIR EDRIC MONTAGUE BASTYAN, K.C.M.G., K.C.V.O., K.B.E., C.B. From 24 April 1967 to 1 June 1967.

Major-General SIR ROHAN DELACOMBE, K.C.M.G., K.C.V.O., K.B.E., C.B., D.S.O., K.St.J. From 11 February 1971 to 18 February 1971; 12 October 1971 to 19 October 1971; 29 June 1972 to 9 August 1972.

### Governors of the States

*Powers and functions.* The Queen is represented in each of the States by a Governor, the office having been constituted by Letters Patent under the Great Seal of the United Kingdom of various dates. The Governors of the States exercise prerogative powers conferred on them by these Letters Patent, their Commissions of appointment, and the Governor's Instructions given them under the Royal Sign Manual and Signet or other instrument as specified in the Letters Patent. In addition, they have been invested with various statutory functions by State Constitutions and other Imperial Acts and by Acts of the Parliaments of the States.

A Governor of a State assents in the Queen's name to Bills passed by the Parliament of the State, except those reserved for the Royal assent. The latter include certain classes of Bills which are regulated by the Constitution Acts and by the Governor's Instructions. He administers the prerogative of mercy by the reprieve or pardon of criminal offenders within his jurisdiction, and may remit fines and penalties due to the Crown. In the performance of his functions generally, particularly those conferred by Statute, the Governor of a State acts on the advice of Ministers of State for the State.

*Holders of office.* The names of the present (March 1973) State Governors are as follows:

### STATE GOVERNORS, MARCH 1973

*New South Wales*—SIR ARTHUR RODEN CUTLER, V.C., K.C.M.G., K.C.V.O., C.B.E., K.St.J.

*Victoria*—MAJOR-GENERAL SIR ROHAN DELACOMBE, K.C.M.G., K.C.V.O., K.B.E., C.B., D.S.O., K.St.J.

*Queensland*—AIR MARSHAL SIR COLIN THOMAS HANNAH, K.C.M.G., K.B.E., C.B., K.St.J.

*South Australia*—SIR MARK LAURENCE ELWIN OLIPHANT, K.B.E., K.St.J.

*Western Australia*—MAJOR-GENERAL SIR DOUGLAS ANTHONY KENDREW, K.C.M.G., C.B., C.B.E., D.S.O.

*Tasmania*—LIEUT.-GENERAL SIR EDRIC MONTAGUE BASTYAN, K.C.M.G., K.C.V.O., K.B.E., C.B.

### The Cabinet and executive government

Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th Century, and which is generally known as 'Cabinet' or 'responsible' government. Its essence is that the head of the State (Her Majesty the Queen, and her representative the Governor-General or Governor) should perform governmental acts on the advice of her Ministers;

\* Lieutenant-General Sir John Northcott was granted honorary rank of General while administering the Government of the Commonwealth. † G.C.M.G., 1963.

that she should choose her principal Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the lower House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates chiefly by means of constitutional conventions, customs, or understandings, and through institutions that do not form part of the legal structure of the government at all. The Constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall either be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

The executive power of the Commonwealth is exercisable by the Governor-General, and that of the States by the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by some or all of the Ministers of State, meeting without the Governor-General or Governor under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

*The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia all Ministers are members of Cabinet\*. As Ministers are the leaders of the party or parties commanding a majority in the lower House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing, or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

*The Executive Council.* This body is usually presided over by the Governor-General or Governor the members thereof holding office during his pleasure. All Ministers of State must be members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings, for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The Meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings the decisions of the Cabinet are, where necessary, given legal form, appointments made, resignations accepted, proclamations issued, and regulations and the like approved.

*The appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the Queen's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the Lower House, and to commission him, as Prime Minister or Premier, to 'form a Ministry'—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

*Ministers in Upper and Lower Houses.* The following table shows the distribution of Ministers in the Houses of each Parliament in January 1973.

AUSTRALIAN PARLIAMENTS: MINISTERS IN UPPER OR LOWER HOUSES  
JANUARY 1973

<i>Ministers with seats in—</i>	<i>Cwlth</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.(a)</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Total</i>
The Upper House .	6	2	4	(b)	3	3		18
The Lower House .	21	16	12	14	7	9	9	88
<b>Total . .</b>	<b>27</b>	<b>18</b>	<b>16</b>	<b>14</b>	<b>10</b>	<b>12</b>	<b>9</b>	<b>106</b>

(a) By the Constitution Act, the number of Ministers was increased to ten in 1970. (b) Abolished in 1922.

\* Between January 1956 and December 1972 the Commonwealth Ministry was made up of twelve senior Ministers, who constituted the Cabinet, and other Ministers of non-cabinet rank who attended meetings of the Cabinet only when required, as for example, when the business of the Cabinet concerned their Departments.

**Commonwealth Ministries**

*Names and tenure of office, 1901 to 1973.* The following list shows the name of each Commonwealth Ministry to hold office since 1 January 1901, and the limits of its term of office.

**COMMONWEALTH MINISTRIES, 1901 TO MARCH 1973**

- (i) BARTON MINISTRY, 1 January 1901 to 24 September 1903.
- (ii) DEAKIN MINISTRY, 24 September 1903 to 27 April 1904.
- (iii) WATSON MINISTRY, 27 April 1904 to 18 August 1904.
- (iv) REID-McLEAN MINISTRY, 18 August 1904 to 5 July 1905.
- (v) DEAKIN MINISTRY, 5 July 1905 to 13 November 1908.
- (vi) FISHER MINISTRY, 13 November 1908 to 2 June 1909.
- (vii) DEAKIN MINISTRY, 2 June 1909 to 29 April 1910.
- (viii) FISHER MINISTRY, 29 April 1910 to 24 June 1913.
- (ix) COOK MINISTRY, 24 June 1913 to 17 September 1914.
- (x) FISHER MINISTRY, 17 September 1914 to 27 October 1915.
- (xi) HUGHES MINISTRY, 27 October 1915 to 14 November 1916.
- (xii) HUGHES MINISTRY, 14 November 1916 to 17 February 1917.
- (xiii) HUGHES MINISTRY, 17 February 1917 to 10 January 1918.
- (xiv) HUGHES MINISTRY, 10 January 1918 to 9 February 1923.
- (xv) BRUCE-PAGE MINISTRY, 9 February 1923 to 22 October 1929.
- (xvi) SCULLIN MINISTRY, 22 October 1929 to 6 January 1932.
- (xvii) LYONS MINISTRY, 6 January 1932 to 7 November 1938.
- (xviii) LYONS MINISTRY, 7 November 1938 to 7 April 1939.
- (xix) PAGE MINISTRY, 7 April 1939 to 26 April 1939.
- (xx) MENZIES MINISTRY, 26 April 1939 to 14 March 1940.
- (xxi) MENZIES MINISTRY, 14 March 1940 to 28 October 1940.
- (xxii) MENZIES MINISTRY, 28 October 1940 to 29 August 1941.
- (xxiii) FADDEN MINISTRY, 29 August 1941 to 7 October 1941.
- (xxiv) CURTIN MINISTRY, 7 October 1941 to 21 September 1943.
- (xxv) CURTIN MINISTRY, 21 September 1943 to 6 July 1945.
- (xxvi) FORDE MINISTRY, 6 July 1945 to 13 July 1945.
- (xxvii) CHIFLEY MINISTRY, 13 July 1945 to 1 November 1946.
- (xxviii) CHIFLEY MINISTRY, 1 November 1946 to 19 December 1949.
- (xxix) MENZIES MINISTRY, 19 December 1949 to 11 May 1951.
- (xxx) MENZIES MINISTRY, 11 May 1951 to 11 January 1956.
- (xxxi) MENZIES MINISTRY, 11 January 1956 to 10 December 1958.
- (xxxii) MENZIES MINISTRY, 10 December 1958 to 18 December 1963.
- (xxxiii) MENZIES MINISTRY, 18 December 1963 to 26 January 1966.
- (xxxiv) HOLT MINISTRY, 26 January 1966 to 14 December 1966.
- (xxxv) HOLT MINISTRY, 14 December 1966 to 19 December 1967.
- (xxxvi) McEWEN MINISTRY, 19 December 1967 to 10 January 1968.
- (xxxvii) GORTON MINISTRY, 10 January 1968 to 28 February 1968.
- (xxxviii) GORTON MINISTRY, 28 February 1968 to 12 November 1969.
- (xxxix) GORTON MINISTRY, 12 November 1969 to 10 March 1971.
- (xl) McMAHON MINISTRY, 10 March 1971 to 5 December 1972.
- (xli) WHITLAM MINISTRY, 5 December 1972 to 19 December 1972.
- (xlii) WHITLAM MINISTRY, 19 December 1972.

*Names of Members of each Ministry to 19 December 1972.* In Year Book No. 17, 1924, the names are given of each Ministry up to the Bruce-Page Ministry (9 February 1923 to 22 October 1929), together with the names of the successive holders of portfolios therein, and issue No. 39 contains a list, commencing with the Bruce-Page Ministry, which covers the period between the date on which it assumed power, 9 February 1923, and 31 July 1951, showing the names of all persons who held office in each Ministry during that period. The names of members of subsequent Ministries are listed in successive issues of the Year Book after No. 39.

This issue shows only particulars of the Second Whitlam Ministry.

### THE WHITLAM MINISTRY—FROM 19 DECEMBER 1972

(The State in which each Minister's electorate is situated is shown in parenthesis. All Ministers are members of the Australian Labor Party and all are in the Cabinet.)

*Prime Minister and Minister for Foreign Affairs—*

THE HON. E. G. WHITLAM, Q.C., M.P.  
(N.S.W.)

*Deputy Prime Minister, Minister for Defence,  
Minister for the Navy, Minister for the Army,  
Minister for Air and Minister for Supply—*

THE HON. L. H. BARNARD, M.P. (Tas.)

*Minister for Overseas Trade and Minister for  
Secondary Industry—*

THE HON. J. F. CAIRNS, M.P. (Vic.)

*Minister for Social Security—*

THE HON. W. G. HAYDEN, M.P. (Qld)

*Treasurer—*

THE HON. F. CREAN, M.P. (Vic.)

*Attorney-General, Minister for Customs and  
Excise and Leader of the Government in the  
Senate—*

SENATOR THE HON. L. K. MURPHY, Q.C.  
(N.S.W.)

*Special Minister of State, Vice-President of the  
Executive Council, Minister assisting the Prime  
Minister and Minister assisting the Minister for  
Foreign Affairs—*

SENATOR THE HON. D. R. WILLESEE (W.A.)

*Minister for the Media—*

SENATOR THE HON. D. MCCLELLAND (N.S.W.)

*Minister for Northern Development—*

THE HON. R. A. PATTERSON, M.P. (Qld)

*Minister for Repatriation and Minister assisting  
the Minister for Defence—*

SENATOR THE HON. R. BISHOP (S.A.)

*Minister for Services and Property and Leader of  
the House—*

THE HON. F. M. DALY, M.P. (N.S.W.)

*Minister for Labour—*

THE HON. C. R. CAMERON, M.P. (S.A.)

*Minister for Urban and Regional Development—*

THE HON. T. UREN, M.P. (N.S.W.)

*Minister for Transport and Minister for Civil  
Aviation—*

THE HON. C. K. JONES, M.P. (N.S.W.)

*Minister for Education—*

THE HON. K. E. BEAZLEY, M.P. (W.A.)

*Minister for Tourism and Recreation and Minister  
assisting the Treasurer—*

THE HON. F. E. STEWART, M.P. (N.S.W.)

*Minister for Works—*

SENATOR THE HON. J. L. CAVANAGH (S.A.)

*Minister for Primary Industry—*

SENATOR THE HON. K. S. WRIEDT (Tas.)

*Minister for Aboriginal Affairs—*

THE HON. G. M. BRYANT, E.D., M.P. (Vic.)

*Minister for Minerals and Energy—*

THE HON. R. F. X. CONNOR, M.P. (N.S.W.)

*Minister for Immigration—*

THE HON. A. J. GRASSBY, M.P. (N.S.W.)

*Minister for Housing—*

THE HON. L. R. JOHNSON, M.P. (N.S.W.)

*Minister for the Capital Territory and Minister  
for the Northern Territory*

THE HON. K. E. ENDERBY, M.P. (A.C.T.)

*Postmaster-General—*

THE HON. L. F. BOWEN, M.P. (N.S.W.)

*Minister for Health—*

THE HON. D. N. EVERINGHAM, M.P. (Qld)

*Minister for the Environment and Conservation—*

THE HON. M. H. CASS, M.P. (Vic.)

*Minister for Science and Minister for External  
Territories—*

THE HON. W. L. MORRISON, M.P. (N.S.W.)

*Names of Ministers of State.* Year Book No. 38 contains a statement listing the Commonwealth Departments in existence during the period 1 April 1925 to 31 December 1949 and the names of the Ministers of State who had administered them (pages 74-9). This is in continuation of a similar statement covering the period from the inauguration of the Commonwealth Government to 1925 which appears in Year Book No. 18.

### State Premiers, March 1973

The names of the Premiers of each State in March 1973 are shown below.

#### STATE PREMIERS, MARCH 1973†

*New South Wales*—The Hon. Sir Robert Askin, K.C.M.G., M.L.A. (L.P.)

*Victoria*—The Hon. R. J. Hamer, E.D., M.P. (L.P.)

*Queensland*—The Hon. J. Bjelke-Petersen, M.L.A. (C.P.)

*South Australia*—The Hon. D. A. Dunstan, Q.C., M.P. (A.L.P.)

*Western Australia*—The Hon. J. T. Tonkin, M.L.A. (A.L.P.)

*Tasmania*—The Hon. E. E. Reece, M.H.A. (A.L.P.)

### Leaders of the Opposition, Commonwealth and State Parliaments, March 1973

The Leader of the Opposition plays an important part in the Party system of government which operates in the Australian Parliaments. The following list gives the names of the holders of this position in each of the Parliaments in March 1973.

#### LEADERS OF THE OPPOSITION, MARCH 1973†

*Commonwealth*—Rt Hon. B. M. Snedden, Q.C., M.P. (L.P.)

*New South Wales*—P. D. Hills, M.L.A. (A.L.P.)

*Victoria*—A. C. Holding, M.P. (A.L.P.)

*Queensland*—J. W. Houston, M.L.A. (A.L.P.)

*South Australia*—Dr B. C. Eastick, M.P. (L.C.L.)

*Western Australia*—The Hon. Sir Charles Court, O.B.E., M.L.A. (L.P.)

*Tasmania*—The Hon. E. M. Bingham, M.H.A. (L.P.)

### Numbers and salaries of Commonwealth Ministers

Under sections 65 and 66, respectively, of the Constitution of the Commonwealth the number of Ministers of State was not to exceed seven, and the annual sum payable for their salaries was not to exceed £12,000 (\$24,000), each provision to operate, however, 'until the Parliament otherwise provides'.

Subsequently the number and salaries have been increased from time to time, and from April 1973 the annual sum payable for salaries has been fixed at \$302,000 and the number of Ministers at twenty-seven. An additional ministerial allowance of \$10,900 a year is payable to the Prime Minister, and an additional ministerial allowance of \$5,200 a year to the Deputy Prime Minister and \$4,875 a year to other Ministers.

All amounts payable in the foregoing paragraphs are in addition to amounts payable as Parliamentary allowances (see page 75).

## Parliaments and elections

### The Commonwealth Parliaments

The first Parliament of the Commonwealth was convened by proclamation dated 29 April 1901 by His Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9 May 1901 by H.R.H. the Duke of Cornwall and York. The Rt Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since federation.

† Full titles of party abbreviations are shown on page 74.

## COMMONWEALTH PARLIAMENTS

<i>Number of Parliament</i>	<i>Date of opening</i>	<i>Date of dissolution</i>
First . . . .	9 May 1901 . . .	23 November 1903
Second . . . .	2 March 1904 . . .	5 November 1906
Third . . . .	20 February 1907 . . .	19 February 1910
Fourth . . . .	1 July 1910 . . .	23 April 1913
Fifth . . . .	9 July 1913 . . .	30 July 1914(a)
Sixth . . . .	8 October 1914 . . .	26 March 1917

Twenty-fourth . . . .	20 February 1962 . . .	1 November 1963
Twenty-fifth . . . .	25 February 1964 . . .	31 October 1966
Twenty-sixth . . . .	21 February 1967 . . .	29 September 1969
Twenty-seventh . . . .	25 November 1969 . . .	2 November 1972
Twenty-eighth . . . .	27 February 1973 . . .	

(a) A dissolution of both the Senate and the House of Representatives was granted by the Governor-General, acting on the advice of the Cabinet and under section 57 of the Constitution.

There have been twenty-seven complete Parliaments since Federation. Until 1927 the Parliament met in Melbourne; it now meets in Canberra, the first meeting at Parliament House, Canberra, being opened by the Duke of York on 9 May 1927.

The twenty-seventh Parliament opened on 25 November, 1969 and ended on 2 November, 1972 when the House of Representatives was dissolved. Elections for the House of Representatives were held on 2 December, 1972. Elections were also held on the same date to fill a casual vacancy in the Senate for the State of Queensland. Particulars of electors and voting are given on page 70. For particulars of electors enrolled and of electors who voted in the several States and Territories at previous Commonwealth elections, *see* Year Book No. 58 and earlier issues.

A special article describing the Commonwealth Parliament, its functions and procedure, prepared by the Clerk of the Senate and the Clerk of the House of Representatives, appears in Year Book No. 49, pages 65-71.

### Qualifications for membership and for franchise—Commonwealth Parliament

Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, eighteen\* years of age or over and not disqualified on other grounds, who has resided in the Commonwealth for at least three years and who is, or is qualified to become an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under eighteen\* years of age and not disqualified on other grounds, who has lived in Australia for six months continuously. Residence in a Subdivision for a period of one month prior to enrolment is necessary to enable a qualified person to enrol. Enrolment and voting are compulsory except that the compulsory enrolment provisions do not relate to an Aboriginal native of Australia. A member of the Defence Force on service outside Australia who is not less than eighteen\* years of age, is a British subject and has lived in Australia for six months continuously is entitled to vote at Commonwealth elections even though he may not be enrolled.

\* The age for candidature and the franchise age were lowered from 21 years to 18 years by Act No. 7 of 1973.

The principal reasons for disqualification of persons otherwise eligible for election as members of either Commonwealth House are: membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding an office of profit under the Crown (with certain exceptions), or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than twenty-five persons. Persons of unsound mind, attainted of treason, convicted and under sentence for any offence punishable by imprisonment for one year or longer, or persons who are holders of temporary entry permits under the *Migration Act* 1958–1966 or are prohibited immigrants under that Act are excluded from the franchise. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise. Aborigines are entitled to enrol and to vote at both Commonwealth and State elections in all States.

### Commonwealth Parliaments and elections

From the establishment of the Commonwealth until 1949 the Senate consisted of thirty-six members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament, and, as the population of the Commonwealth had more than doubled since its inception, the Parliament passed the *Representation Act* 1948 which provided that there should be ten Senators from each State instead of six, increasing the total to sixty Senators, thus enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation.

In accordance with the Constitution the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate.\* Consequently, in terms of the Constitution and the Representation Act, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows: New South Wales—from 28 to 47; Victoria—from 20 to 33, Queensland—from 10 to 18; South Australia—from 6 to 10; and Western Australia—from 5 to 8. Tasmania's representation remained at 5 (the Constitution provides for a minimum of 5 members for each Original State). The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. Redistributions are carried out by distribution commissioners appointed for each State. The redistributions are effected on a quota basis, but taking into account community interests, means of communication, physical features, existing boundaries, and other factors.

The population as disclosed by the Census taken on 30 June 1954 necessitated a further alteration in representation in the House of Representatives in respect of New South Wales, South Australia, and Western Australia. Representation as from the general election for the House of Representatives on 10 December 1955 was: New South Wales 46, Victoria 33, Queensland 18, South Australia 11, Western Australia 9, Tasmania 5, the total number of members (excluding the members for the internal Territories) being increased from 121 to 122.

The population as disclosed by the Census taken on 30 June 1961 revealed that, under the provisions of the Representation Act, New South Wales, Queensland, and Western Australia would each lose one member in the House of Representatives, while Victoria would gain a member. The distribution commissioners' reports were duly laid before both Houses of Parliament, but the Government decided not to proceed with the proposals and announced that it would amend the Representation Act. In November 1964 the formula provided by Section 10 of the Representation Act for determining the number of members of the House of Representatives was amended so as to give a State an additional member for 'any portion of a quota'. The effect of that amendment would have been that at the next redistribution Victoria and South Australia would each gain one member while all other States would retain their existing representation. However, no fresh redistribution was effected prior to the 1966 Census. Consequent upon the population changes disclosed by the Census taken on 30 June 1966, a redistribution of the State electoral division boundaries was carried out in 1968 and the following representation in the House of Representatives became effective as from the general election held on 25 October 1969: New South Wales 45, Victoria 34, Queensland 18, South Australia 12, Western Australia 9 and Tasmania 5, the total number of members (excluding the members for the internal Territories) being increased from 122 to 123.

The population as disclosed by the Census taken on 30 June 1971 revealed that, under the provisions of the Representation Act, Western Australia will gain an additional member of the House of Representatives as from the next general elections following a redistribution of the electoral boundaries in that State.

\* A proposal to alter the Constitution so that numbers of members of the House of Representatives might be increased without necessarily increasing the number of Senators was the subject of a referendum in March 1967, but was rejected. See Year Book No. 54, page 66, for results of the Referendum.

Since the general election of 1922 the Northern Territory has been represented by one member in the House of Representatives, and the Australian Capital Territory has had similar representation since the elections of 1949. The member for the Australian Capital Territory has had full voting rights since the first sitting of the twenty-sixth Parliament. In May 1968 the Northern Territory Representation Act was amended to give full voting rights to the Member for the Northern Territory effective from 15 May 1968, the day on which the Act received Royal Assent.

Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. At elections for Senators the whole State constitutes the electorate. For the purpose of elections for the House of Representatives the State is divided into single electorates corresponding in number to the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Year Book.

The *Commonwealth Electoral Act* 1948, enacted with the *Representation Act* 1948 which enlarged the Commonwealth Parliament (*see* page 69), changed the system of scrutiny and counting of votes in Senate elections from the alternative vote to that of proportional representation. For a description of the system, *see* Year Book No. 38, pages 82–3. The method of voting for both the Senate and the House of Representatives is preferential.

Particulars of voting at Senate elections and elections for the House of Representatives up to 1969 appear in earlier issues of the Year Book, and additional information is available in the *Statistical Returns* issued by the Chief Electoral Officer following each election and printed as Parliamentary Papers.

The numbers of electors and primary votes cast for the major political parties in each State and Territory at the latest election for each House were as follows.

### COMMONWEALTH ELECTIONS, 1970 AND 1972

### House of Representatives Election, 2 December 1972

Membership at the beginning of 1973 was: *Senate*—Australian Labor Party, 26; Liberal Party of Australia, 21; Australian Country Party, 5; Australian Democratic Labor Party, 5; Independent, 3; *House of Representatives*—Australian Labor Party, 67; Liberal Party of Australia, 38; Australian Country Party, 20.

# Members of the Commonwealth Parliament

The following is a list of Senators and Members of the House of Representatives of the Commonwealth Parliament as at 1 January 1973. Changes since that date are set out in the Appendix to this volume. Party affiliation is indicated by the use of the following abbreviations:

- A.D.L.P.—Australian Democratic Labor Party
- A.L.P.—Australian Labor Party
- C.P.—Australian Country Party
- Ind.—Independent
- L.P.—Liberal Party of Australia

## MEMBERS OF THE COMMONWEALTH PARLIAMENT, 1 JANUARY 1973(a)

### THE SENATE

*President:*

SENATOR THE HON. SIR MAGNUS CAMERON CORMACK, K.B.E.

*Chairman of Committees:*

SENATOR E. W. PROWSE

*Leader of the Government in the Senate:*

SENATOR THE HON. L. K. MURPHY, Q.C.

*Leader of the Opposition in the Senate:*

SENATOR R. G. WITHERS

<i>Senator</i>	<i>State</i>	<i>Term(b) expires 30 June</i>	<i>Senator</i>	<i>State</i>	<i>Term(b) expires 30 June</i>

Commonwealth referendums

In accordance with section 128 of the Constitution any proposed law for the alteration of the Constitution, in addition to being passed by an absolute majority of each House of Parliament, must be submitted to a referendum of the electors in each State, and must be approved by a majority of the electors in a majority of the States and also by a majority of all the electors who voted, before it can be presented for Royal Assent. Twenty-six such proposals have so far been submitted to referendums and the consent of the electors has been received in five cases, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928, the fourth in respect of Social Services in 1946, and the fifth in respect of Aborigines in 1967. In addition to referendums for alterations of the Constitution, other Commonwealth referendums have been held, two prior to Federation regarding the proposed Constitution and two regarding military service during the 1914–1918 War. For details of earlier referendums see Year Book No. 52, pages 66–8.

On 1 March 1967 two Bills were introduced in the House of Representatives to alter the Constitution, one to enable the number of members of the House of Representatives to be increased without necessarily increasing the number of Senators, the other to enable the Aboriginal people to be counted in reckoning the population and to omit certain words relating to the Aboriginal race which some people felt were discriminatory. The proposed laws, after being passed by both Houses of Parliament, were submitted to the electors of the States at referendums held on 27 May 1967. At the referendums the electors voted in all States in favour of the proposal regarding Aboriginals, but rejected in all States but New South Wales the proposal for increasing the number of members of the House of Representatives. For a summary of the results of the voting on each of the proposals *see* Year Book No. 54, page 66.

Consequent upon obtaining the approval of the electors, an Act cited as the *Constitution Alteration (Aboriginals)* 1967 was assented to on 10 August 1967. Section 51 of the Constitution was thereby altered by omitting from paragraph (xxvi) the words 'other than the aboriginal race in any State', and Section 127 of the Constitution was thereby repealed.

### The Parliaments of the States

This chapter contains summarised information on the Parliaments of each State, the numbers of Houses and members, and salaries payable. For greater detail, including some historical material, reference should be made to earlier Year Books, particularly No. 50, pages 69-72. Recent changes have been reported in successive issues of the Year Book.

*Membership of State Parliaments.* The following table shows the party distribution in each of the various State Parliaments at the beginning of 1973.

#### STATE PARLIAMENTS: MEMBERSHIP, BY PARTY AFFILIATION, 1 JANUARY 1973

<i>Party</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>

(a) Abolished in 1922. (b) As at 1 April 1973. Plus expense allowances—Senators and Members of the House of Representatives, \$4,100. Certain additional allowances are also provided for holders of parliamentary offices, etc. (c) Plus allowance of \$2,000. An additional \$20 per day is payable to members who live outside the metropolitan area. (d) Plus allowances from \$2,400 for metropolitan to \$2,875 for urban, \$3,350 for inner country, and \$3,725 for outer country electorates. (e) Plus an allowance varying from \$1,500 to \$3,200 according to location of electorate. (f) Plus expense reimbursement ranging from \$2,000 for a metropolitan member to \$4,100 for a north province member. (g) Plus allowance according to area of electorate and distance from the capital varying from \$650 to \$1,475 in the case of the Legislative Council, and from \$1,100 to \$2,500 in the case of the House of Assembly. (h) Plus allowance varying from \$2,750 to \$4,100 according to location of electorate. (i) Plus individual electoral allowances ranging from \$1,750 to \$4,000.

## Outlay on parliamentary government

The table below shows, in broad groups, the expenditure incurred in the operation of the parliamentary system in Australia, comprising the Governor-General and Governors, the Ministries, the Upper and Lower Houses of Parliament, and electoral activities; it does not attempt to cover the expenditure on Commonwealth and State administration generally. Only broad groups are shown, but even these are not entirely comparable because of differences in accounting procedures and in the presentation of accounts. Expenditure under the head of Governor-General or Governor includes salaries of Government House staffs and maintenance of residences, official establishments, grounds, etc., and expenditure on capital works and services.

OUTLAY ON PARLIAMENTARY GOVERNMENT, 1971-72  
(\$'000)

## Commonwealth Government Departments

In Year Book No. 49 (pages 87-98) a list appears of the Commonwealth Government Departments, giving particulars of each Department, as at the end of 1962, of the principal matters dealt with and the Acts administered by the Minister concerned. Changes made during 1963 and 1966 are shown, respectively, on page 83 of Year Book No. 50 and page 74 of Year Book No. 53. Changes made during 1968 are shown in the Appendix to Year Book No. 54 (pages 1276-7). When the second Whitlam Ministry was constituted in December 1972, various departments were abolished and others established. These changes were notified in Commonwealth of Australia Gazettes No. 129A of 1972 and No. 30 of 1973. Matters dealt with by Commonwealth Government Departments are listed in the paragraphs below. For detailed information on the Acts administered, the functions and the organisation of the Departments and Agencies of the Commonwealth Government *see* the *Australian Government Directory* (latest issue 1973).

**The Department of Aboriginal Affairs—**

Matters related to the Aboriginal people of Australia

The development and administration of national policies for the advancement and welfare of the Aboriginal people, including the administration of welfare activities in the Territories

Special laws for the Aboriginal people

**The Department of Air—**

Air defence

**The Department of the Army—**

Military defence

**The Attorney-General's Department—**

Law and justice

Law enforcement

Human rights

Civil liberties

Legal drafting

Bankruptcy and insolvency

**The Attorney-General's Department—continued**

Bills of exchange and promissory notes

Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants

Copyrights

Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth

Marriage

Recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States

Service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States

Censorship

Police forces of the Northern Territory of Australia, the Australian Capital Territory and Norfolk Island

**The Department of the Capital Territory—**

Administration of the Australian Capital Territory, the Jervis Bay Territory, Norfolk Island and the Coral Sea Islands Territory

**The Department of Civil Aviation—**

Civil Aviation

**The Department of Customs and Excise—**

Duties of customs and excise  
Bounties on the production or export of goods

**The Department of Defence—**

Defence policy, including co-ordination and direction of its execution by the Department of the Navy, the Department of the Army, the Department of Air and the Department of Supply  
Civil defence

**The Department of Education—**

Education, including education in the Northern Territory of Australia, the Australian Capital Territory and Norfolk Island

**The Department of the Environment and Conservation—**

Activities related to—  
Environment and conservation—  
Water, including the protection and use of water resources  
National parks

**The Department of External Territories—**

Matters related to the Territory of Papua, the Territory of New Guinea, the Territory of Cocos (Keeling) Islands and the Territory of Christmas Island

**The Department of Foreign Affairs—**

External affairs, including—  
Treaties  
Relations and communications with overseas governments  
Diplomatic and consular missions

**The Department of Health—**

Public health, including—  
Hospitals  
Community health and dental services  
Research  
Preventive medicine  
Pharmaceutical benefits  
Quarantine  
Health services in the Northern Territory of Australia, the Australian Capital Territory and Norfolk Island

**The Department of Housing—**

Housing  
Provision of hostel accommodation in the Australian Capital Territory and for immigrants

**The Department of Immigration—**

Immigration and emigration  
Nationality  
Naturalization and aliens

**The Department of Labour—**

Industrial relations, including conciliation and arbitration in relation to industrial disputes  
Commonwealth Employment Service  
Re-instatement in civil employment of national servicemen, members of the Reserve Forces and members of the Citizen Forces

**The Department of the Media—**

Matters related to the news, information and entertainment media  
Film-making and development of the film industry  
Government publicity and information  
Government printing, publishing and advertising

**The Department of Minerals and Energy—**

Evaluation and balanced development of mineral and energy resources having regard to future requirements  
Geodetic surveying, and the production of topographical maps, for Commonwealth purposes

**The Department of the Navy—**

Naval defence

**The Department of Northern Development—**

In respect of the part of Australia north of the parallel 26 degrees south latitude—  
Matters related to the specialised development and utilisation of natural resources, being land, water and minerals  
Matters related to the production and marketing of sugar and beef, and the production, processing and export of minerals  
Specialised transport development projects, including beef and development roads, mining, railways and mineral port facilities

In relation to the foregoing—

The undertaking or support of research  
The planning or initiation of projects  
The co-ordination of activities in respect of projects  
Co-operation with the States and other authorities

**The Department of the Northern Territory—**

Administration of the Northern Territory of Australia and the Territory of Ashmore and Cartier Islands

**The Department of Overseas Trade—**

Trade and commerce with other countries, including—  
 Trade promotion  
 Trade agreements  
 Export services

**The Postmaster-General's Department—**

Postal, telegraphic, telephonic, and other like services

**The Department of Primary Industry—**

Agricultural and pastoral industries  
 Fisheries  
 Forestry

**The Department of the Prime Minister and Cabinet—**

Administrative and policy advising for the Prime Minister  
 Assistance to the Prime Minister in connexion with co-ordination of government administration  
 Administration of the Cabinet Office  
 Communications between Commonwealth and State Governments  
 Support for the Arts and Letters  
 National Gallery  
 Honours and awards  
 Government hospitality and ceremonial  
 Relations and communications with the Commonwealth Secretariat in London

**The Repatriation Department—**

Repatriation and other benefits for members of the Defence Force and their dependants

**The Department of Science—**

Science and technology, including research and support of research  
 Meteorology  
 Ionospheric Prediction Service  
 Patents of inventions and designs, and trade marks  
 Weights and measures  
 National standards

**The Department of Secondary Industry—**

Secondary industry, including—  
 The efficiency and development of industries  
 Research

**The Department of Services and Property—**

Elections and referendums  
 Provision of accommodation, staff and other facilities for members of the Parliament other than in Parliament House  
 Acquisition and leasing of land and property in Australia or elsewhere for Commonwealth purposes; management and disposal of property so acquired or leased  
 Land, engineering and topographical surveys for Commonwealth purposes

**The Department of Social Security—**

National social security schemes, including—  
 Invalid and age pensions, maternity allowances, widows' pensions, child endowment, unemployment and sickness benefits  
 Health benefits schemes  
 National superannuation  
 National compensation  
 National rehabilitation service  
 Aged persons' homes  
 Assistance for sheltered workshops and handicapped children

**The Department of the Special Minister of State—**

National archives  
 National Library  
 Royal charters  
 War graves  
 Grants to national organisations  
 World expositions  
 Commonwealth Gazette and Commonwealth Directory

**The Department of Supply—**

Defence research and development, including support of space research programs of international organisations  
 Supply, manufacture and procurement of goods and services, including munitions and aircraft for defence  
 Disposal of surplus goods  
 Government transport and storage facilities in the States and storage and transport of goods in the Australian Capital Territory

**The Department of Tourism and Recreation—**

Promotion of tourism in Australia and between other countries and Australia  
 Regulation of the tourist industry  
 Recreation, sport and physical culture

**The Department of Transport—**

Navigation and shipping  
 Lighthouses, lightships, beacons and buoys  
 Land transport  
 Shipbuilding

**The Department of the Treasury—**

Fiscal policy and monetary policy  
 Accounting for public moneys; budgeting  
 Taxation  
 Borrowing money on the public credit of the Commonwealth  
 Banking  
 Insurance  
 Currency, coinage and legal tender  
 Foreign exchange  
 Census and statistics

**The Department of Urban and Regional Development—**

Matters related to city and regional planning and development, including assistance to, and co-operation with, the States and local-governing bodies

**The Department of Works—**

Planning, execution and maintenance of Commonwealth works

Design, provision and maintenance of furniture, furnishings and fittings for the Commonwealth

Promotion of national standards in relation to building construction

## Enactments of the Parliaments

In the Commonwealth all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States other than South Australia and Tasmania laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly. In South Australia and Tasmania laws are enacted in the name of the Governor of the State, with the advice and consent of the Parliament in the case of South Australia, and of the Legislative Council and House of Assembly in the case of Tasmania. Generally, assent to Bills passed by the legislatures is given by the Governor-General or State Governor acting on behalf of, and in the name of, the Sovereign. In certain special cases Bills are reserved for the Royal assent. The Parliaments of the States are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States in all cases whatsoever. Subject to certain limitations they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is to the extent of the inconsistency invalid.

**The course of Commonwealth legislation**

The actual legislation by the Commonwealth Parliament during 1972 is indicated in alphabetical order in *The Acts of the Parliament of the Commonwealth of Australia passed during the year 1972 in the Second Session of the Twenty-seventh Parliament of the Commonwealth, with Appendix, Tables and Index*. A chronological table of Acts passed from 1901 to 1972 showing how they are affected by subsequent legislation or lapse of time is also given, and, further, a table of Commonwealth legislation passed from 1901 to 1972 in relation to the several provisions of the Constitution is furnished in the same volume. Reference should be made to these for complete information.

The Acts passed by the Commonwealth Parliament during the year 1972 are listed on pages 79–84. In many cases the title of the Act indicates the general scope of the Act, but brief explanatory notes have been added where necessary. Appropriate chapters of this Year Book should be referred to for further information which may be available there.

The following figures indicate the variation over the years in the number of enactments of the Commonwealth Parliament since 1901. Seventeen Acts were passed in 1901, 36 in 1914, 38 in 1927, 87 in 1939, 109 in 1952, 156 in 1965, 157 in 1968, 137 in 1971 and 139 in 1972.

*Commonwealth legislation passed during 1972*

*Aged Persons Homes Act 1972* (No. 84) doubled the rate of subsidy payable to eligible organisations providing personal care for the frail aged in hostel accommodation.

*Aged Persons Hostels Act 1972* (No. 76) assisted the provision of additional hostel-type accommodation for aged persons.

*Agricultural Tractors Bounty Act 1972* (No. 71) extended the operation of the *Agricultural Tractors Bounty Act 1966–1970* for a period of 6 months to 31 December 1972.

*Air Navigation (Charges) Act 1972* (No. 100) increased rates of air navigation charges and introduced charges for airline training flights.

*Airline Equipment (Loan Guarantee) Act 1972* (No. 42) guaranteed loans raised by Ansett Transport Industries Ltd, to finance the purchase of 4 Boeing 727-200 series aircraft.

*Airline Agreements Act 1972* (No. 129) amended the *Australian National Airlines Act 1945–1970* to increase the salaries limit above which the approval of the Minister for Civil Aviation is required.

*Apple and Pear Stabilisation Act 1972* (No. 106) raised the maximum tonnage of export apples and pears eligible for payment at the maximum rate under the stabilisation scheme.

*Commonwealth legislation passed during 1972—continued**Appropriation Act (No. 4) 1971–72 (No. 40)**Appropriation Act (No. 5) 1971–72 (No. 41)**Appropriation Act (No. 1) 1972–73 (No. 104)**Appropriation Act (No. 2) 1972–73 (No. 105)**Asian Development Bank (Additional Subscription) Act 1972 (No. 60)* enabled Australia to take up an increase of \$US127.5 in its capital subscription to the Asian Development Bank.*Australian Capital Territory Evidence (Temporary Provisions) Act 1972 (No. 10)* extended for 12 months the operation of the *Australian Capital Territory Evidence (Temporary Provisions) Act 1971*.*Australian Capital Territory Stamp Duty Act 1972 (No. 68)* amended the *Australian Capital Territory Stamp Duty Act 1971* by the omission of provisions that become redundant on the enactment of the *Consular Privileges and Immunities Act 1972 (No. 62)*.*Australian Capital Territory Stamp Duty Act (No. 2) 1972 (No. 94)* increased the rate of stamp duty in the Australian Capital Territory.*Australian Capital Territory Tax (Purchases of Marketable Securities) Act 1972 (No. 93)* increased the rates at which stamp duty is imposed under the 'broker return' system on the purchase side of transactions in marketable securities.*Australian Capital Territory Tax (Sales of Marketable Securities) Act 1972 (No. 92)* raised the rate of duty payable by the selling broker.*Australian Institute of Marine Science Act 1972 (No. 55)* repealed the previous Act and permitted the Institute to carry out research into marine science and to publish the results of that research.*Australian National Airlines Act 1972 (No. 130)* extended the Government's 2-airline policy and the obligations placed on the major airlines as a pre-requisite to the extension.*Banks (Shareholdings) Act 1971 (No. 2)* introduced a control on the acquisition by local and overseas interests of large shareholdings in banks incorporated in Australia.*Broadcasting and Television Act 1972 (No. 49)* required all advertisements on radio or television for cigarettes or cigarette tobacco to be followed by an announcement warning of health dangers.*Butter Fat Levy Act 1972 (No. 34)* amended the *Butter Fat Levy Act 1965–1966* by repealing sections of the previous Act relating to levies for research purposes.*Child Care Act 1972 (No. 121)* provided assistance for the development of child day care facilities of good quality throughout the Commonwealth.*Commonwealth Teaching Service Act 1972 (No. 13)* established a Commonwealth Teaching Service.*Companies (Foreign Take-overs) Act 1972 (No. 134)* controlled the foreign takeovers of companies.*Compensation (Commonwealth Employees) Act 1972 (No. 122)* amended the *Compensation (Commonwealth Employees) Act 1971* to provide for the payment of compensation at the rate of full sick pay, up to 26 weeks, to Commonwealth employees during total incapacity following a compensatable injury.*Conciliation and Arbitration Act 1972 (No. 37)* amended the *Conciliation and Arbitration Act* to provide for the orderly conduct of industrial relations.*Consular Privileges and Immunities Act 1972 (No. 62)* gave effect in Australia to the Vienna Convention on Consular Relations which provides a comprehensive code of international conduct on consular relations.*Crimes (Hijacking of Aircraft) Act 1972 (No. 101)* created the offence of hijacking in respect of aircraft and provided the necessary procedures with respect to the taking of offenders into custody and their detention pending a decision to try them or extradite them.*Customs Tariff Act 1972 (No. 4)**Customs Tariff Act (No. 2) 1972 (No. 18)**Customs Tariff Act (No. 3) 1972 (No. 63)**Customs Tariff Act (No. 4) 1972 (No. 135)**Customs Tariff Act (No. 5) 1972 (No. 136)**Customs Tariff Validation Act 1972 (No. 51)**Customs Tariff Validation Act (No. 2) 1972 (No. 137)*

*Commonwealth legislation passed during 1972—continued*

*Dairy Produce Export Control Act 1972* (No. 3) amended the *Dairy Produce Export Control Act 1924–1966*, by providing the Australian Dairy Produce Board with investment powers related to its present day needs and circumstances.

*Dairy Produce Sales Promotion Act 1972* (No. 33) repealed Part II of the *Dairy Produce Research and Sales Promotion Act 1958–1965*.

*Dairying Industry Act 1972* (No. 35) extended the previous legislation to provide for payment of bounty on the production of butter, cheese and other related products containing butter fat for a further 5 years ending on 30 June 1977.

*Dairying Research Act 1972* (No. 30) widened the existing Commonwealth industry dairy research scheme so that it will apply to the industry as a whole.

*Dairying Research Levy Act 1972* (No. 31) authorised the imposition of levies on whole milk and butter fat.

*Dairying Research Levy Collection Act 1972* (No. 32) provided the machinery necessary for the collection of the levies imposed by the *Dairying Research Levy Act 1972*.

*Delivered Meals Subsidy Act 1972* (No. 113) increased the assistance to Meals on Wheels organisations.

*Diesel Fuel Tax Act* (No. 1) 1972 (No. 26) converted the rate of tax imposed by the Act on diesel fuel entered for home consumption to its metric equivalent.

*Diesel Fuel Tax Act* (No. 2) 1972 (No. 27) converted the rate of duty imposed by the Act on diesel fuel entered for home consumption to its metric equivalent.

*Diplomatic Privileges and Immunities Act 1972* (No. 69) amended the 1967 Act where necessary to maintain conformity with the provisions of the *Consular Privileges and Immunities Act 1972*, to regulate duty and tax free entry of goods.

*Distillation Act 1972* (No. 24) provided for the measuring by volume the alcohol content of liquors and other minor amendments to the Act relating to the introduction of the metric system.

*Estate Duty Assessment Act 1972* (No. 95) doubled the exemption limits for estate duty.

*Excise Act 1972* (No. 23) amended the *Excise Act 1901–1968* by converting existing references to measurement to metric equivalents.

*Excise Tariff Act 1972* (No. 22) represented the initial step towards the progressive implementation of the metric system of weights and measures in Australia.

*Excise Tariff Act* (No. 2) 1972 (No. 64) amended the excise tariff legislation by the omission of provisions that became redundant on the enactment of the *Consular Privileges and Immunities Legislation*.

*Excise Tariff Act* (No. 3) 1972 (No. 119) reduced excise duty on wine and permitted the delivery free of excise duty, of tobacco, cigars, cigarettes and snuff for use in medical or scientific research.

*Excise Tariff Validation Act 1972* (No. 120) validated excise duty collected on wine at the reduced rate of duty as stated in *Excise Tariff Act* (No. 3) 1972 (No. 119).

*Export Payments Insurance Corporation Act 1972* (No. 88) increased the capital of the Export Payments Insurance Corporation.

*Extradition (Commonwealth Countries) Act 1972* (No. 102) made the offence of hijacking in respect of aircraft an extradition crime for the purposes of the *Extradition (Commonwealth Countries) Act 1966–1968*.

*Extradition (Foreign States) Act 1972* (No. 103) made the offence of hijacking in respect of aircraft an extradition crime for the purposes of the *Extradition (Foreign States) Act 1966–1968*.

*Gift Duty Act 1972* (No. 96) raised the gift duty exemption limit.

*Gift Duty Assessment Act 1972* (No. 97) raised the amounts of gifts requiring a return.

*Gold Mining Industry Assistance Act 1972* (No. 52) amended the *Gold Mining Industry Assistance Act* by increasing the subsidy rate and extended its period of operation until June 1975.

*Home Savings Grants Act 1972* (No. 78) amended the *Home Savings Grants Act 1964–1971* making larger grants available.

*Honey Industry Act 1972* (No. 11) amended the *Honey Industry Act 1962–1966* to provide for some changes in the method of appointing industry members to the Australian Honey Board.

*Commonwealth legislation passed during 1972—continued*

*Income Tax Act 1972* (No. 86).

*Income Tax Assessment Act 1972* (No. 5)

*Income Tax Assessment Act* (No. 2) 1972 (No. 46)

*Income Tax Assessment Act* (No. 3) 1972 (No. 47)

*Income Tax Assessment Act* (No. 4) 1972 (No. 65)

*Income Tax Assessment Act* (No. 5) 1972 (No. 85)

*Income Tax (International Agreements) Act 1972* (No. 48)

*Income Tax (Reduction of Additional Tax) Act 1972* (No. 12)

*Industrial Research and Development Grants Act 1972* (No. 59) extended and amended the provisions of the *Industrial Research and Development Grants Act 1967*.

*Lighthouses Act 1972* (No. 61) provided for the deletion of Papua New Guinea from the *Lighthouses Act* from a date to be proclaimed according to the wishes of the Administrator's Executive Council of Papua New Guinea.

*Loan (Australian National Airlines Commission) Act 1972* (No. 43) approved Commonwealth borrowings to assist in financing the purchase of four Boeing 727-200 jet aircraft by the Australian National Airlines Commission—Trans-Australia Airlines.

*Loan (Australian Wheat Board) Act 1972* (No. 9) enabled the Commonwealth to meet its obligation under a guarantee of repayment of certain borrowings by the Australian Wheat Board from the Reserve Bank of Australia in respect of wheat from the 1970-71 pool.

*Loan (Qantas Airways Limited) Act 1972* (No. 98) approved borrowings by the Commonwealth to assist Qantas Airways Ltd in the purchase of a sixth Boeing 747 jet aircraft.

*Loan (War Service Land Settlement) Act 1972* (No. 91) provided for the raising of loan moneys for war service land settlement in South Australia, Western Australia and Tasmania.

*Metal Working Machine Tools Bounty Act 1972* (No. 115) provided for the payment of bounty on various classes of machine tools.

*Navigation Act 1972* (No. 28) inserted in the Navigation Act power to make regulations for the measurement of ship's tonnage in the way provided in the tonnage mark scheme.

*National Health Act 1972* (No. 114) provided further benefits for pensioners in nursing homes, a new fund benefit for patients in nursing homes and aid for persons providing nursing care for elderly relatives.

*National Urban and Regional Development Authority Act 1972* (No. 117) set up a new authority to work with the States towards urban and regional development.

*Native Members of the Forces Benefits Act 1972* (No. 138) removed the limitations between the war compensation benefits for which Torres Strait Islanders and certain mainland Aborigines are eligible and those for which other Australian ex-servicemen are eligible.

*New Guinea Timber Agreement (Repeal) Act 1972* (No. 73) repealed the *New Guinea Timber Agreement Act* of 1952 and 1953.

*Nitrogenous Fertilisers Subsidy Act 1972* (No. 107) extended the subsidy of nitrogenous fertilisers until 31 December 1974, changed the basis for eligibility for the subsidy and expressed the subsidy rate in metric terms.

*Northern Territory (Administration) Act 1972* (No. 39) widened the Conciliation and Arbitration Commission's jurisdiction.

*Ordinances and Regulations (Notification) Act 1972* (No. 75) made effective the ordinances of all the Territories of the Commonwealth and also the regulations, rules or other instruments under a law of the Commonwealth or a Territory of the Commonwealth.

*Papua New Guinea Act 1972* (No. 74) removed the limitation on the number of offices of Minister of the House of Assembly for Papua New Guinea.

*Papua New Guinea Loan (Asian Development Bank) Act 1972* (No. 19) provided a guarantee by the Commonwealth to a borrowing by the Administration of Papua New Guinea from the Asian Development Bank.

*Papua New Guinea Loan (International Bank) Act 1972* (No. 56) provided a guarantee by the Commonwealth to a borrowing by the Administration of Papua New Guinea from the International Bank for Reconstruction and Development.

*Commonwealth legislation passed during 1972—continued*

*Pay-Roll Tax (Territories) Assessment Act 1972* (No. 66) amended the Territories Pay-Roll Tax legislation by the omission of provisions that became redundant on the enactment of the Consular Privileges and Immunities legislation.

*Pollution of the Sea by Oil Act 1972* (No. 131) amended the *Pollution of the Sea by Oil Act 1960–1965* to incorporate amendments adopted by the Assembly of the Inter-Government Maritime Consultative Organisation.

*Pollution of the Sea by Oil (Shipping Levy) Act 1972* (No. 132) covered the costs attached to combating pollution of the sea by oil from ships.

*Pollution of the Sea by Oil (Shipping Levy Collection) Act 1972* (No. 133) provided for the collection of the levy imposed on certain ships carrying oil.

*Processed Milk Products Bounty Act 1972* (No. 36) extended until 30 June 1977 the operations of the *Processed Milk Products Bounty Act*.

*Public Service Act 1972* (No. 6) amended section 50 of the *Public Service Act 1922–1968* and provided for the establishment of central promotions appeal committees.

*Public Service Arbitration Act 1972* (No. 17) provided for the Public Service arbitration tribunal to deal with industrial situations i.e., strikes, bans or limitations on work engaged in by officers or employees of Commonwealth departments or instrumentalities.

*Public Works Committee Act 1972* (No. 57) increased the standing appropriation in the *Public Works Committee Act 1969*.

*Queensland Grant Act 1972* (No. 29) authorised the payment of a special advance grant to Queensland in 1971–72.

*Repatriation Act 1972* (No. 15) increased repatriation, war compensation and war service pensions.

*Repatriation Act (No. 2) 1972* (No. 82) provided a number of improvements in repatriation benefits.

*Repatriation (Far East Strategic Reserve) Act 1972* (No. 81) extended eligibility for war pensions to student children between the ages of 16 and 21 years.

*Repatriation (Special Overseas Service) Act 1972* (No. 80) extended eligibility for war pensions to student children between the ages of 16 and 21 years.

*Repatriation (Torres Strait Islanders) Act 1972* (No. 139) preserved the rights of ex-servicemen, formerly members of the Torres Strait Light Infantry Forces, who will now be brought under the provisions of the *Repatriation Act*.

*Restrictive Trade Practices Act 1972* (No. 118) amended Part XII of the *Restrictive Trade Practices Act 1971* to enable the Australian Shippers' Council to undertake all negotiations with ship-owners and conferences operating in all Australian export liner trades.

*Sales Tax (Exemptions and Classifications) Act 1972* (No. 67) amended the Sales Tax Legislation by the omission of provisions that became redundant on the enactment of the Consular Privileges and Immunities legislation.

*Sales Tax (Exemptions and Classifications) Act (No. 2) 1972* (No. 87) exempted imported works of art from sales tax.

*Seamen's Compensation Act 1972* (No. 124) increased various rates and amounts of workers compensation payable in respect of seamen and their dependants.

*Seamen's War Pensions and Allowances Act 1972* (No. 16) increased the various rates of pensions in relation to seamen.

*Seamen's War Pensions and Allowances Act (No. 2) 1972* (No. 83) increased the various rates of war pensions in relation to seamen.

*Seat of Government (Administration) Act 1972* (No. 38) related to the application of the *Conciliation and Arbitration Act* to industrial disputes in the Australian Capital Territory.

*Social Services Act 1972* (No. 1) increased unemployment benefits and associated short-term sickness and special benefits.

*Social Services Act (No. 2) 1972* (No. 14) increased age, invalid and widow's pensions, long-term sickness benefits and sheltered employment allowances.

*Social Services Act (No. 3) 1972* (No. 53) enabled certain Australian pensions to be paid overseas.

*Social Services Act (No. 4) 1972* (No. 79) increased pensions and introduced a wife's pension.

*Commonwealth legislation passed during 1972—continued*

*Softwood Forestry Agreements Act* 1972 (No. 89) provided for a continuation of financial assistance for a further 5 years from 1 July 1971 to the States for the purpose of expanding the rate of softwood plantings.

*Spirits Act* 1972 (No. 25) provided for the measuring by volume the alcohol content of liquors and other minor amendments to the Act relating to the introduction of the metric system.

*States Grants (Aboriginal Advancement) Act* 1972 (No. 99).

*States Grants Act* 1972 (No. 20).

*States Grants Act (No. 2)* 1972 (No. 90)

*States Grants (Advanced Education) Act* 1972 (No. 58).

*States Grants (Advanced Education) Act (No. 2)* 1972 (No. 127).

*States Grants (Advanced Education) Act (No. 3)* 1972 (No. 128).

*States Grants (Capital Assistance) Act* 1972 (No. 8).

*States Grants (Capital Assistance) Act (No. 2)* 1972 (No. 21).

*States Grants (Capital Assistance) Act (No. 3)* 1972 (No. 77).

*States Grants (Fruit Growing Reconstruction) Act* 1972, (No. 112).

*States Grants (Independent Schools) Act* 1972 (No. 7).

*States Grants (Independent Schools) Act (No. 2)* 1972 (No. 109)

*States Grants (Pre-school Teachers Colleges) Act* 1972 (No. 72).

*States Grants (Schools) Act* 1972 (No. 108).

*States Grants (Special Assistance) Act* 1972 (No. 116).

*States Grants (Universities) Act* 1972 (No. 125).

*States Grants (Universities) Act (No. 2)* 1972 (No. 126).

*Stevedoring Industry (Temporary Provisions) Act* 1972 (No. 54) extended the operation of the *Stevedoring Industry (Temporary Provisions) Act* 1967–1971 for a further period of 12 months.

*Supply Act (No. 1)* 1972–73 (No. 44).

*Supply Act (No. 2)* 1972–73 (No. 45).

*Tariff Board Act* 1972 (No. 50) amended the previous act to enable the Tariff Board to comprise 11 instead of the present 9 members.

*United States Naval Communication Station (Civilian Employees) Act* 1972 (No. 123) amended the *United States Naval Communication Station (Civilian Employees) Act* 1971 to enable the new compensation rate of full sick pay during total incapacity to be extended to these employees.

*Victoria Grant (Millewa Pipelines) Act* 1972 (No. 70) granted to Victoria an amount of up to \$2 million for specified works in the Millewa region under phase 2 of the national water resources development program.

*Wool (Deficiency Payments) Act* 1972 (No. 110) extended the wool deficiency payments scheme from 1 July 1972 until 30 June 1973.

*Wool Industry Act* 1972 (No. 111) created a wool statutory body to be known as the Australian Wool Corporation bringing under a single direction the functions of the Australian Wool Board and the Australian Wool Commission.

Total for Year: 139 Acts.

## CHAPTER 4

### DEFENCE

#### Department of Defence

##### Functions of the Department of Defence

Broadly the functions of the Department of Defence include all aspects of defence policy and the co-ordination and direction of its execution by the Department of the Navy, the Department of the Army, the Department of Air and the Department of Supply. More particularly its functions include strategic appreciations, national intelligence assessments and strategic intelligence reports; defence planning and the deployment of the Defence Forces; principal military adviser to the Minister for Defence; organisation of collective military advice; planning and control of joint military operations; formulation of defence policy objectives; defence programming and disposition of resources to manning, equipment, supplies and works for the Defence Forces, supervision of estimates, allocation of funds among the Defence Group and control of expenditure; scientific advice and formulation of defence research and development policy; formulation of Defence Group policies relating to defence industry and to material procurement and reserves; rationalisation of Service activities and co-ordination of their policies; financial and other common conditions of service in the Defence Forces and during retirement; establishments, postings and promotions where 1 star or 2 star rank is involved; legislation policy for the Defence Group; policy on Defence Group public relations; Defence and Service Advisers abroad; general policy and technical direction of Defence Group electronic data processing project; development and application of EDP; management of Joint Services and inter-departmental machinery engaged in above matters; and civil defence.

##### Organisation, higher defence machinery, and the control of the joint Service machinery

The following are the principal committees of the joint service and inter-departmental advisory machinery within the Department.

The *Defence Committee* is a statutory body consisting of the Secretary, Department of Defence, who is Chairman; the Chairman of the Chiefs of Staff Committee; the Chiefs of Staff of the three Services; the Secretary, Department of the Prime Minister and Cabinet; the Secretary, Department of Foreign Affairs; and the Secretary to the Treasury. Its function is to advise the Minister for Defence on: the defence policy as a whole and the co-ordination of military, strategic, economic, financial, and foreign affairs aspects of defence policy; matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect; and such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The *Chiefs of Staff Committee* is responsible to the Minister for Defence for professional military advice; preparation of military appreciations and plans; control of joint military operations through designated commanders, and direction and co-ordination of related activities; the exercise of executive functions for the control and administration of special forces of a multi-national nature, the responsibility for which is assigned to the Australian Government; recommending the allocation of resources to joint Service Forces in the field; the exercise of executive functions for the control of joint Service (Military) establishments and organisations; the control and co-ordination of joint Service military training and exercises; the development of joint warfare doctrine; and the development of joint operational requirements.

The *Defence Force Development Committee* consists of the Secretary, Department of Defence (Chairman), the Chairman of the Chiefs of Staff Committee, and the Chiefs of Staff of the three Services. It is responsible for advice to the Minister for Defence on: the development of the Defence Forces as a whole; the inclusion in the five year rolling program of major weapons and equipment capabilities; initiation and review of major studies concerned with the development of the Defence Forces; and review of matters of common interest to members and of progress in the preparation of proposals and appreciations for submission to the Government.

The *Defence Administration Committee* consists of the Secretary, Department of Defence (Chairman), the Chairman of the Chiefs of Staff Committee, the Chiefs of Staff of the three Services, the Secretaries of the three Service Departments and the Department of Supply, and a representative of

the Treasury. Its functions are to review the progress of the Defence Program; consider reports of the Defence (Industrial) Committee; consider priority listing of works projects and programs; consider variations in bases of provisioning and scales of rations, clothing, etc.; consider variations in scales and standards of accommodation; and exercise overall control of the Defence Vote.

The *Defence (Industrial) Committee* co-ordinates and makes recommendations regarding the capabilities of Australian industry to meet the matériel requirements of the Services in peace and war. Members of the Defence Business Board are co-opted as necessary for specific subjects. The *Defence Business Board* is constituted to advise on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Program. The Board comprises businessmen who serve in a part-time honorary capacity. Three of the members also serve as business advisers to the separate Service Departments.

Far-reaching changes have been made in defence administration over the last few years, designed to provide the Government with the best possible advice in making decisions on defence policy by ensuring that all proposals have been thoroughly examined and that the best available military, strategic, technological, intelligence and economic advice is provided. These changes include the establishment of a Joint Staff, the strengthening of the Defence Science Organisation, the establishment of a Joint Intelligence Organisation, strengthening of the Programme Management and Defence Facilities Division and other areas of the Department to provide greater capacity, the introduction of systems analysis and the introduction of the five year rolling program system based on the concepts of planning-programming-budgeting.

#### Basis of current defence policy

The primary aim of Australian defence policy is to ensure the security of Australia and her Territories.

Because of the close links between Australian security and wider regional security, Australian policy stresses not only immediate direct defence, but also progress and stability in nearby countries. The ANZUS Treaty between Australia, New Zealand and the United States of America remains of primary importance. Australia also participates in SEATO and the Five Power Arrangements. As a contributor to the latter, Australia, along with New Zealand and the United Kingdom maintains forces in Malaysia and Singapore.

#### Personnel strengths

The selective national service scheme, which was in its eighth year of operation, was abolished with effect from 5 December, 1972. Those serving under the scheme were given the opportunity of selecting immediate discharge, completing their term of full-time duty or transferring to the permanent force. Those persons eligible for national service selection who had opted to join the CMF were given a similar opportunity in regard to their CMF obligation.

(a) Excludes National Service.

**Equipment**

An amount of \$139.9 million was spent on equipment of a capital nature in 1971-72; this included \$23.9 million under credit arrangements with the Government of the United States of America. An amount of \$200.1 million is expected to be spent in 1972-73 of which \$56.8 million will be under the credit arrangements with the United States of America.

The major equipment items received in 1971-72 by the Services included: 10 Skyhawk aircraft, 11 Macchi aircraft, 12 Bell Light Observation helicopters and some 100 M113 Tracked Carriers.

Major new equipment items planned for delivery in 1972-73 include 1 hydrographic ship (HMAS *Flinders*), 6 F111C aircraft, 2 Macchi aircraft, 6 Bell Light Observation helicopters and 4 heavy landing craft (LCH).

**Research and development**

The laboratories of the Department of Supply together with the Services' own technical establishments, have continued to work on projects and investigations in support of Service needs. An extension to the agreement for the conduct of the Woomera Range and its associated technical facilities has been arranged with the United Kingdom, and collaborative programs in space tracking and other selected topics have been arranged with the United States of America.

Payments from appropriations . . . . .	34,720	305,388	448,915	296,908	122,882	43,052	1,251,865

(a) Includes defence aid for Malaysia, Singapore and South Vietnam.

**Logistic arrangement with the Government of the United States of America**

The logistic arrangement referred to in previous issues of the Year Book continues to apply. No new credits are being arranged.

**Reserve and Citizen Forces**

Citizen and Reserve Forces may be called out by proclamation for continuous full-time service in a "Time of Defence Emergency". The particular circumstances giving rise to the proclamation of a time of defence emergency could be varied, but would occur in a situation where the Regular Forces needed the full-time support of the Citizen and Reserve Forces in hostilities short of general war.

The three Services also have volunteer Emergency Reserves which may be called out for continuous full-time service when they are needed. These reserves provide a ready means of supplementing and reinforcing operational units.

**Australian forces serving overseas**

As at 31 December 1972 the Australian element of the ANZUK Force in Malaysia and Singapore included:

*Navy*—One escort present in the area at all times, and one submarine present for part of the year; shore support units.

*Army*—One battalion of RAR: one field battery; a reconnaissance flight; a transport platoon; elements of headquarters, signals and logistics units integrated with United Kingdom and New Zealand elements. (The Government has announced that the battalion and battery will not be replaced when their tour of duty is completed about the end of 1973).

*Air Force*—Two squadrons of Mirage fighter aircraft and supporting elements.

**Defence Co-operation with South-East Asian countries**

In support of Australia's policy, the Government is pursuing major programs of defence co-operation with Indonesia, Malaysia and Singapore.

Current defence aid to Malaysia and Singapore, to which amounts of \$16 million and \$4 million respectively have been pledged for the period 1971-74, represents a continuation of programs first commenced in 1964. To date over \$45 million has been spent on these programs. As well, other projects in defence co-operation have been undertaken, most notably the provision of 16 refurbished Sabre jet fighters to the Royal Malaysian Air Force. A wide range of equipment has been and is continuing to be supplied to the Malaysian and Singapore armed forces.

In 1972 a 3 year defence co-operation program with Indonesia was begun. An amount of \$20 million has been set aside for this program and in addition 16 ex-RAAF Sabre aircraft have been given to Indonesia.

Both under the above defence aid and co-operation programs and in the context of defence assistance to countries of the region generally, Australia accepts large numbers of overseas trainees in Service training establishments. During 1972 the total was over 600 spread over all three Services.

## Naval Defence

Prior to 1901, naval defence systems were organised under the State Governments. Information regarding these systems is given in Year Book No. 2, page 1084. An outline of the development of Australian naval policy is given in Year Books No. 3, page 1060, and No. 12, page 1012. An account appears in Year Book No. 15, pages 921-3, of the building of the Australian Navy, its costs, the compact with the Imperial Government, and other details. The growth and the activities of the Royal Australian Navy during the 1939-45 War are shown in Year Book No. 36, pages 1023-7.

Under the provisions of the Commonwealth of Australia Constitution Act the Minister of State for the Navy administers the Department of the Navy. Under the *Naval Defence Act* 1910-1966 the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as President, five Navy Members, and the Secretary to the Department of the Navy.

Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers. A liaison staff is also maintained by the Royal Australian Navy in Washington, and a comprehensive exchange of information is provided by this link. Staff courses in the United States of America are also attended by officers of the Royal Australian Navy.

### **Ships of the Royal Australian Navy**

*The Fleet, December 1972:* Melbourne—aircraft carrier; Sydney—transport; Supply—oiler; Stalwart—destroyer tender; Perth, Hobart and Brisbane—guided missile destroyers; Vendetta, Vampire Duchess, Anzac—destroyers; Yarra, Parramatta, Stuart, Derwent, Swan, Torrens,—destroyer escorts; Teal—coastal minesweeper; Curlew, Snipe—coastal minehunters; Moresby, Paluma—surveying ships; Diamantina, Kimbla—oceanographic research ships; Oxley, Otway, Onslow, Ovens—submarines; Attack Aitape, Acute, Adroit, Advance, Archer, Ardent, Arrow, Assail, Aware, Barquette, Barricade, Bayonet, Bombard, Buccaneer, Ladava, Lae, Madang, Samarai—patrol boats; Banks, Bass—auxiliaries;

*In operational reserve, December 1972:* Hawk, Gull, Ibis—minesweepers; Bandolier—patrol boat; Castlemaine—ocean minesweeper; Sprightly—fleet tug.

*On service overseas.* During the year ended December 1972 the following ships served in South-East Asian waters as units of the ANZUK force, with headquarters in Singapore: Derwent, Vampire, Ovens, Onslow and Swan.

The ships Melbourne, Curlew, Snipe, Supply, Stalwart, Teal, Moresby, Sydney, Hobart, Brisbane, Perth, Diamantina also made overseas visits.

### **Fleet Air Arm**

The Fleet Air Arm of the Royal Australian Navy maintains three front line squadrons for embarkation in the operational carrier H.M.A.S. Melbourne. These squadrons currently consist of Skyhawk A4-G fighter/ground attack aircraft, Tracker S2-E anti-submarine aircraft, and Wessex MK. 31B anti-submarine helicopters. Four training and support squadrons are based at the Naval Air Station, at Nowra, New South Wales. Other aircraft operated by the Navy are the Scout helicopter in Moresby, Iroquois helicopter (training and search and rescue), Dakota, Macchi trainer.

### **Ship construction and repairs**

There are two naval dockyards, one at Garden Island, New South Wales, and one at Williamstown, Victoria. Also, the dockyard at Cockatoo Island, which is operated by the Vickers Cockatoo Dockyard Pty Ltd by agreement with the Commonwealth, carries out considerable naval work. All three dockyards carry out ship refitting for the Navy.

Construction of H.M.A.S. Flinders, a small hydrographic ship, is under way at Williamstown Dockyard. An extended refit of the Daring Class destroyers is under way at Williamstown Dockyard with H.M.A.S. Vampire recommissioning into the R.A.N. in late 1971. H.M.A.S. Vendetta and Duchess are currently in refit.

A contract for a further two Oberon class submarines was let during 1971 to Scott Lithgow Ltd. Approval has been given for the construction of a fast combat support ship and an oceanographic ship, both of which are to be built in Australia in the near future. A preliminary design for a new destroyer was completed in 1971. This will determine the major characteristics of the ship and will provide the basis for a detailed design.

#### **Personnel, training, entry, women's services, reserves**

*Personnel.* The estimated strength of the Royal Australian Navy in terms of personnel borne for full-time duty for 1972-73 is 17,461. At 30 December 1972 the actual strength of personnel borne for full-time duty was 2,220 officers and 14,900 sailors, which included 235 officers and sailors of the Citizen Naval Forces and 18 officers and sailors of the Royal Australian Navy Emergency Reserve.

*Training.* On entry, General List officers are trained at the Royal Australian Naval College, H.M.A.S. *Creswell* at Jervis Bay. The College was established to provide trained officers for the R.A.N. Junior entry to the College is at the age of fifteen to seventeen years and senior entry at a maximum age of twenty years. In November 1972 there were 137 cadet midshipmen under training. On completion of initial training, officers go to the Fleet for sea training, followed by advanced training either ashore in Australia, at universities or technical colleges, or at Royal Navy training establishments in the United Kingdom.

H.M.A.S. *Cerberus* at Westernport, Victoria, is the main training establishment for adult sailors in the permanent naval forces, while several advanced training schools are established in New South Wales. The period of initial engagement for sailors varies from six years for tradesmen to nine or twelve years, and on completion sailors may re-engage for shorter periods up to the age of fifty-five.

H.M.A.S. *Nirimba* at Quakers Hill, New South Wales, is the naval school for apprentices. It provides secondary education, as well as technical training in trades, to boys aged fifteen to seventeen and a half years. The school was established in 1956 to meet the R.A.N.'s increased demand for highly skilled tradesmen. In December 1972 there were 517 naval artificer apprentices under training.

H.M.A.S. *Leeuwin* at Fremantle, Western Australia, is the junior recruit training establishment. Entrants must be aged between fifteen and a half and sixteen and a half years. Training lasts one year and instruction is mainly academic, the remaining time being devoted to basic naval and disciplinary training. On completion of the course sailors are posted for a period of sea training, after which they proceed to technical and specialist courses. In December 1972 there were 710 junior recruits undergoing training.

On completion of initial training sailors join the Fleet for sea training before returning to the various training schools at H.M.A.S. *Cerberus*, H.M.A.S. *Penguin* and H.M.A.S. *Watson* at Sydney and R.A.N. Air Station at Nowra, New South Wales. Sailors who are selected for the Submarine service receive initial submarine training in the United Kingdom and a number of technical courses for certain sailors are conducted in the United States of America.

*Direct entry officers.* To meet increasing requirements for officers, direct entries are accepted into the Royal Australian Navy. Short service commissions of seven years are granted on completion of training as seamen, supply or aircrew officers to suitable applicants who have completed their secondary schooling and who are over seventeen years of age and under twenty-four years of age. Other direct entries may be approved outside these age limits from persons with appropriate qualifications and experience.

Opportunities exist for university undergraduates studying medicine, dentistry and engineering to enter the R.A.N., and on successful completion of their studies to commence short or full-time service in the Navy. Fully qualified doctors, dentists, engineers, instructors and legal officers may also enter the R.A.N. directly if they are of the appropriate age.

*Women's Services.* The present Women's Royal Australian Naval Service was inaugurated in January 1951. The numbers serving in shore establishments in December 1972 were 37 officers and 712 W.R.A.N.S. The Royal Australian Naval Nursing Service was reconstituted in November 1964, and its strength in December 1972 was 22 officers.

*Emergency Reserve.* In November 1964 approval was given to form the Royal Australian Naval Emergency Reserve to provide a readily available source of trained manpower which may be called on for continuous full-time service. The authorised establishment of this force is 2,000 officers and sailors. At 30 December 1972 the strength of the reserve available for mobilisation was 72 officers and 858 sailors, which excluded 2 officers and 6 sailors serving full-time. Members are required to complete thirteen days' training annually and are paid an annual bounty.

*Citizen Naval Forces.* The Citizen Naval Forces consist of the R.A.N. Emergency List, Royal Australian Fleet Reserve, Royal Australian Naval Reserve, Royal Australian Naval Reserve (Sea-going), Royal Australian Naval Volunteer Reserve, and Women's Royal Australian Naval Service Reserve. The authorised establishment of the combined forces is 10,000. At 30 December 1972 there were 1,249 officers and 3,976 sailors in the Citizen Naval Forces. These figures excluded 110 officers and 125 sailors serving full-time. The R.A.N.R. is the training reserve of the Citizen Naval Forces. Members carry out weekly training and thirteen days' continuous training annually; sailors engage for periods of three years. Other reserves do not normally carry out part-time training, but members may volunteer for periods of annual training and for periods of full-time service with the R.A.N.

## Military Defence

A detailed historical account of the Australian defence forces prior to federation appears in Year Book No. 2, pages 1075–81. See also Year Book No. 12, page 999.

### Commonwealth systems

Under the terms of the Commonwealth of Australia Constitution Act the Commonwealth took over control of defence matters in March 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogenous Army in 1902 up to the re-establishment of the Military Board and the organisation of Commands after the 1939–45 War see Year Book No. 46 and earlier issues.

National Service Training was introduced in 1951 and suspended in 1959–60. It was re-introduced in June 1965 and suspended in December 1972.

### Organisation

Army Headquarters is responsible for the policy and control of the Australian Army. The Military Board consists of the Minister for the Army, President; the Chief of the General Staff; the Vice Chief of the General Staff; the Chief of Operations; the Chief of Personnel; the Chief of Logistics; the Chief of Matériel; the Citizen Military Forces Member; and the Secretary, Department of the Army. After the 1939–45 War, Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the capital cities of Australia. The geographic extent of Commands is<sup>as</sup> follows.

*Northern Command*—the State of Queensland.

*Eastern Command*—the State of New South Wales, less those parts included in Southern and Central Commands.

*Southern Command*—the State of Victoria and part of southern New South Wales.

*Central Command*—the State of South Australia, plus a portion of south-western New South Wales.

*Western Command*—the State of Western Australia.

*Tasmania Command*—the State of Tasmania.

*Northern Territory Command*—the Northern Territory.

In January 1972 the Prime Minister announced that the Army was to be re-organised on a functional basis to consist of a Field Force Command, a Logistic Command and a Training Command. This re-organisation is to take place over a period of three to five years.

The Army is divided into the Field Force, and the Australian Support Area, with both Regular and Citizen Military Forces elements in each. The basic formation of the Field Force is the division, which consists of nine infantry battalions with supporting arms and service units. Within the division three task force headquarters can command varying combinations of divisional units. The substantial part of the combat elements of one Regular and two C.M.F. divisions have been raised, together with logistic support units. The Australian Support Area provides the training, administrative, and command structures on the mainland.

At 31 December 1972, there was the major part of an infantry battalion group stationed in Singapore.

### Personnel, training, women's services, cadets

*Personnel.* The effective strength at 27 December 1972 was: Australian Regular Army, 39,771 (including 202 Citizen Military Forces on full-time duty, and 1,071 Women's Services); Citizen Military Forces, 24,928.

*Staff College.* Until 1938 the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938 an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945 the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946 the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Commonwealth training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. The course is held annually and is of twelve months' duration. The normal intake is seventy students, and on successfully completing the course an officer is awarded the symbol 'psc'. The course is designed to train selected officers for appointments in all branches of the staff in peace and war and to prepare them to assume, after experience, command and higher staff appointments.

Included in the 1973 course will be students from Canada, India, Indonesia, Malaysia, New Zealand, Pakistan, Philippines, Thailand, United Kingdom and United States of America. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force, and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine, and staff and command training throughout the Commonwealth of Nations, liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom, the United States of America, and Australia. An instructor is also provided by New Zealand.

*Royal Military College.* The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations. The course is four years of military and academic studies. The first three years are primarily academic and the fourth year military. Following affiliation with the University of New South Wales a Faculty of Military Studies was introduced in 1968. Cadets who meet the requirements for admission to the Faculty may take a course, leading to the award of a degree in Military Studies by the University of New South Wales in one of the following: Arts, Applied Science or Engineering. Cadets not admitted to the Faculty take a diploma course appropriate to their educational background. On graduation, cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces. In 1967 one Thai cadet commenced training at the College; another Thai cadet commenced in 1970, a third in 1972 and a fourth in 1973.

*Officer Cadet School.* The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Army. Serving members of the Regular Army, the Citizen Military Forces and civilians between the ages of eighteen and a half and twenty-two and a half are eligible to apply for entrance. A special entry provides for candidates up to twenty-four and a half years. The course lasts for forty-four weeks, and on graduation cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted before being posted to regimental duties. The Officer Cadet School also trains officers on occasions for Kenya, Malaysia, New Zealand, Thailand, the Philippines, Brunei, the Papua New Guinea Defence Force and South Vietnam.

*Officer Training Unit.* An Officer Training Unit has been established at Scheyville, New South Wales, which is responsible for the training of National Service Officers.

*Women's Royal Australian Army Corps School.* The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training wing. The officer cadets are selected from eligible applicants, who may be serving members between nineteen and a half and thirty-two years of age, or civilians between nineteen and a half and thirty years of age. The course is of twenty-seven weeks' duration and on graduation cadets are appointed lieutenants in the Royal Australian Army Nursing Corps or the Women's Royal Australian Army Corps.

*Army Apprentices' School.* The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army and to form a background for an Army career with prospects of promotion for the graduates. The course is open to youths between the ages of fifteen and seventeen years and provides training in a number of highly skilled trades. Most apprentices attend two years of intensive theoretical and practical work at the Apprentices' School which is followed by two years on-the-job training in an appropriate Army workshop or technical unit under the supervision of an Apprentice Master. The exceptions to this are the Radio Tradesmen who train for three years at the Apprentices' School before one year on-the-job training. Before leaving the Apprentices' School all apprentices take the Victorian Apprenticeship Commission's final grade public examination, which ensures that they will be accepted as qualified tradesmen in civilian life when they eventually leave the Army. In addition to trade and military training, the Apprentices' School provides the facility for apprentices to attain an educational standard of Victorian Technical Leaving.

*Other Schools.* Army schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. Courses at Army schools are conducted for members of both the Regular Army and the Citizen Military Forces.

The following Army schools have been established: Jungle Training Centre, Armoured Centre, School of Artillery, School of Military Engineering, Transportation Centre, School of Military Survey, School of Signals, Infantry Centre, Army Aviation Centre, Army Intelligence Centre, Royal Australian Army Service Corps Centre, Royal Australian Army Medical Corps School of Army Health, Royal Australian Army Ordnance Corps Centre, Royal Australian Electrical and Mechanical Engineers' Training Centre, Royal Australian Army Provost School, School of Music, Air Support Unit (Army Component), and Air Movement Training and Development Unit (Army Component).

*Women's Services.* In July 1950 approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment commenced into the Royal Australian Army Nursing Service in November 1950 and into the Australian Women's Army Corps early in 1951. In February 1951 the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June 1951 the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only, the Royal Australian Army Nursing Corps and the Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces, and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command. Companies of the Royal Australian Nursing Corps are also located in each Command excluding Northern Territory Command.

*Australian Cadet Corps.* The Australian Cadet Corps is a voluntary organisation. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, does not, however, form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of fourteen years, and cadets, who, in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers of cadets, cadet under-officers, warrant and non-commissioned officers on an authorised establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units. The establishment of the Corps is 46,000 all ranks, and at 30 June 1972 comprised 332 School Cadet units with a posted strength of 38,621 all ranks.

## Air Defence

There are two elements in air defence: static air defence and counter air operations by strike aircraft.

Static air defence is provided by manned interceptor fighter aircraft, at times augmented by surface-to-air missile systems and gun defences, all operating under the direction of a control organisation. Such static systems are limited in their defensive coverage by the radius of action of the fighter aircraft and/or the effective operating range of the controlling radar.

Complementary to the static air defence system and capable of much wider ranging activities are the counter air strike forces. The aim of these forces is to destroy the enemy's offensive air capabilities at their source.

### Higher organisation

The Air Board is responsible to the Minister for Air for the control, organisation, and administration of the Royal Australian Air Force and is constituted as follows: Chief of the Air Staff, Air Member for Personnel, Air Member for Supply and Equipment, Air Member for Technical Services, and the Secretary, Department of Air.

The Air Board administers and controls R.A.A.F. units in Australia and its Territories through two commands, Operational Command and Support Command. The guiding principles of the command organisation within Australia are to decentralise day-to-day operating activities as far as possible and to streamline the force and make it as efficient as possible. Operational units overseas, working within the broad directives issued by the Air Board, comprise the R.A.A.F. components of the ANZUK Force located at Butterworth in Malaysia and in the Republic of Singapore. The R.A.A.F. component of the Australian Forces in South Vietnam has been withdrawn.

The members of the Air Board and their staffs are located at the Department of Air in Canberra. An R.A.A.F. representative is located in London, and air attaches are located in Djakarta, Saigon, Paris, and Washington. *Operational Command* is responsible for the command of operational units and the conduct of their operations within Australia and its territories. *Support Command* is responsible for the recruitment and training of personnel, and the supply and maintenance of service equipment.

### Development of the Royal Australian Air Force

For a short note about the development of the Royal Australian Air Force, see Year Book No. 58, page 93.

### Organisation of units

*Bases.* Each command is established with the units necessary to carry out its allotted function. There is no fixed rule in relation to the number and types of units within each command, as this depends upon the nature of its present and future responsibilities. Where possible, units having similar functions or requiring similar facilities are located together, and the geographical locations are known as bases.

*Formations*—comprising a headquarters unit to control the activities of a number of units at one location; each formation has a base squadron which provides common services to all units at the location.

*Flying squadrons*—strike reconnaissance, air defence, ground attack, medium and short range transport, helicopter, and maritime reconnaissance squadrons which undertake the operational flying and in conjunction with operational conversion units, the operational flying training commitments of the R.A.A.F.

*Operational conversion units*—specialising in operational conversion training of aircrew for the air defence, and ground attack squadrons.

*Aircraft depots*—specialising in major overhaul, etc., of aircraft and equipment.

*Stores depots*—centrally located depots to which stores and equipment ordered by the R.A.A.F. are delivered for distribution to units.

*Airfield construction squadron*—specialising in airfield construction tasks in support of the R.A.A.F. operational component within Australia and the Territories.

*Telecommunications units*—responsible for the communications services of the R.A.A.F.

*R.A.A.F. Hospitals*—hospitals in Australia and at Butterworth providing medical services for the R.A.A.F.

*Flying and ground schools and units*—schools and units specialising in the aircrew and ground staff training required by the R.A.A.F.

*R.A.A.F. Diploma Cadet Squadron and R.A.A.F. Academy*—training units, to diploma and university degree level respectively for officer cadet entrants to the R.A.A.F.

*R.A.A.F. Staff College*—trains specially selected R.A.A.F. officers for higher staff and command posts.

## Aircraft

The R.A.A.F.'s strike reconnaissance force is currently equipped with Canberra and Phantom F4-E aircraft, and F-111C aircraft will be phased into service during 1973. The air defence and ground attack squadrons are equipped with the Mirage 111-O. Transport aircraft currently in use are Hercules C130A and E, Caribou, Dakota, Mystere 20, HS748, and BAC111. The two helicopter squadrons operate the Iroquois and the two maritime squadrons operate Neptune SP2H and Orion P3-B aircraft. Aircraft used for training are the Winjeel, Macchi, HS748, and Mirage 111-D.

## Personnel, reserve, woman's services

At 30 December, 1972, the authorised Permanent Air Force establishment was 24,794 and the Citizen Air Force 1,080; the enlisted strength was Permanent Air Force 22,593 and Citizen Air Force 731, while the strength of the General Reserve was 7,220. The Permanent Air Force figures include the Women's Royal Australian Air Force, which has an establishment of 1,011 and strength of 893 and the R.A.A.F. Nursing Service with an establishment of 119 and strength of 86.

## Department of Supply

For information relating to the creation of the Department of Supply and its development up to 1959 see Year book No. 51, page 1204, and earlier issues. On 18 December 1959 the Department assumed responsibility for the operation and management of space tracking stations in Australia on behalf of the United States of America's National Aeronautics and Space Administration (NASA). On 29 March 1962 Australia became a foundation member of the European Launcher Development Organisation, and the Department accepted responsibility for the test firing of the launching rocket for that Organisation's experimental satellite, using the facilities of the Woomera Rocket Range. The last of these ten test firings at Woomera was on 12 June 1970.

On 1 May 1968 the Department took over the Administration of the Antarctic Division from the Department of External Affairs. In December 1972, this responsibility was transferred to the Department of Science.

## Functions of Department

The functions of the Department of Supply include the following.

- Defence research and development, including the operation of the Joint United Kingdom-Australia Weapons Research Project, and Australian research and development.

- Planning, establishment, operation and management of facilities producing aircraft, guided missiles, small arms, ammunition, explosives, marine engines, clothing, telecommunications equipment, and other defence goods.

- Printing for the Defence group of departments.

- Arrangement of contracts for purchasing in Australia of supplies and services required by the Armed Forces and certain other Government organisations.

- Acquisition, maintenance, and disposal of strategic materials.

- Investigation and development of Australian sources of supply in connection with defence.

- Disposal of surplus or obsolescent Commonwealth goods on behalf of all departments.

- Provision of Commonwealth transport facilities outside the Australian Capital Territory and the Northern Territory.

- Provision and control of stores required for or in connection with matters administered by the Department of Supply, and general storage for other departments as required.

- Arrangements for ascertaining costs and the control and limitation of profits in connection with the production of munitions and other defence goods.

- Operation and management of space tracking stations and certain other facilities on behalf of the Government of the United States of America.

The Minister for Supply administers the *Supply and Development Act* 1939-1966, except in so far as it concerns the building (see also Chapter 12, Transport and Communication), repair, and maintenance of merchant ships and the building, extension, alteration, repair, and maintenance of shipyards, drydocking, and repair facilities for merchant ships.

For the performance of the above functions the Department is organised into five Divisions, namely:

- Research and Development; Munitions Supply; Aircraft, Guided Weapons and Electronics Supply; Planning and Procurement; and Finance and Management Services.

### Research and Development

The Research and Development Division is responsible for scientific research and development in relation to war matériel; the operation of the Joint United Kingdom-Australian Weapons Research Project; and support of space research programs for the United States of America's National Aeronautics and Space Administration (NASA). The headquarters is situated in Canberra, and the following establishments are included in the Division: (a) Weapons Research Establishment, Salisbury, South Australia; (b) Defence Standards Laboratories, Maribyrnong, Victoria; Woodville North, South Australia; Alexandria, New South Wales; Joint Tropical Research Unit (J.T.R.U.) at Innisfail, North Queensland in conjunction with the United Kingdom Ministry of Defence; (c) Aeronautical Research Laboratories, Fishermen's Bend, Victoria; and (d) Central Studies Establishment, Canberra, Australian Capital Territory.

*Weapons Research Establishment.* The Establishment has three scientific Wings, namely Trials Wing, Applied Physics Wing and Weapons Research and Development Wing. The Trials Wing is concerned with the operation, development and instrumentation of the Woomera Range, and the planning, execution, and assessment of trials to meet the requirements of projects approved under the United Kingdom-Australia Joint Project arrangements. The Applied Physics Wings conducts scientific research of significance to the Defence requirements of Australia in the broad fields of systems analysis, electronics, optics, radio propagation, radar, lasers, infra-red, visual surveillance, whilst the Weapons Research and Development Wing is engaged similarly in aeroballistics, weapon systems, rocket propulsion and marine physics for the Defence group of departments.

In addition, an Engineering Wing provides engineering design, development and maintenance facilities, and certain technical services for the scientific Wings (including the Joint Project Trials Wing). Engineering support is also provided for other Research and Development Division Laboratories. The Engineering Wing also undertakes tasks for other Supply organisations and the Australian Defence Services.

*Defence Standards Laboratories.* This Establishment (at Maribyrnong, Victoria) provides a scientific service to the Defence Services, Department of Supply factories and other authorities engaged in support to Defence, generally within the fields of chemistry, physics, metallurgy, engineering, explosives and ammunition, and to a limited extent, in the fields of biochemistry and physiology. It also undertakes scientific research appropriate to its responsibilities and of significance to the defence requirements of Australia. It is the principal Standards Laboratories of the Defence group of Departments and provides calibration facilities for the higher grades of standards. The Australian National Standards Commission has appointed D.S.L. as a verifying authority under the Weights and Measures (National Standards) Act.

Branches are located at Woodville North, South Australia and Alexandria, New South Wales.

The Joint Tropical Research Unit (J.T.R.U.) at Innisfail provides facilities for studying the behaviour and degradation of a wide range of materials and stores in hot/wet and hot/dry tropical environments.

*Aeronautical Research Laboratories.* The work of this establishment is broadly related to the aeronautical aspects of materials science, mechanical engineering, aircraft structures, aerodynamics and system studies. It undertakes research and development on specific defence projects, provides advice and conducts investigations for the Services, Government departments and industries engaged in defence work. Scientific research related to these responsibilities and of significance to the defence requirements of Australia is also undertaken.

*Central Studies Establishment.* This establishment assists the Defence group of departments in the application of Operational Research and Systems Analysis techniques to the study of military problems.

*United States of America's projects.* Agreements have been signed by the Governments of Australia and the United States of America to co-operate in the establishment and operation in Australia of space vehicle tracking stations. The agencies for the Australian and the American Governments are the Department of Supply and the National Aeronautics and Space Administration (NASA) respectively.

As part of the world-wide network supporting NASA's space programme the stations are designed to track spacecraft in their orbits around the earth or on their journey into space, to receive telemetered data from the spacecraft and to issue radio commands controlling the spacecraft's manoeuvres. The Department of Supply is responsible for managing, staffing and operating the stations on behalf of NASA. The stations which are now in operation are at:

Carnarvon in Western Australia (manned space flights and scientific satellites);

Orroral Valley in the A.C.T. (scientific satellites);

Honeysuckle Creek in the A.C.T. (manned space flights).

Tidbinbilla in the A.C.T. (deep space probes and manned space flights). Construction of a 64 metre tracking antenna, to augment the existing 26 metre antenna, was completed in 1972.

An extensive communications system links the tracking stations with the control centres in the United States of America. At all stations the responsibility is vested in a station director who is a senior officer of the Department of Supply.

Under the Australian Government's policy of using the resources of private industry wherever possible, contracts for operation and maintenance services at the stations have been let as follows: Amalgamated Wireless (A'asia) Ltd, (Carnarvon, Orroral Valley and Tidbinbilla), and Standard Telephones and Cables Pty Ltd (Honeysuckle Creek). NASA expenditure on operations in Australia for the period July 1971 to June 1972 was \$12.0 million.

The Department also manages and operates the Project Hibal Balloon Launching Station, based at Mildura, Victoria. The agencies for this project are the Department of Supply and U.S.A. Atomic Energy Commission. The primary purpose of the station is to monitor the level of radioactivity in the upper atmosphere using high altitude balloons. Research experiments are also flown on behalf of United States and Australian Universities and research institutions.

### Munitions Supply

The Department of Supply is responsible for the production of munitions required by the Armed Services. Production is carried out in Government factories, and a wide range of orders is also placed with private industry.

The factories currently in operation and their main products or services are as follows:

Ammunition Factory, Footscray, Victoria (fuses, primers, cartridge cases and small arms ammunition); Clothing Factory, Victoria (uniforms and clothing); Defence Printing Establishment, Victoria (special defence printing requirements); Engine Works, Victoria (building and servicing of marine diesel engines); Explosives Factory, Albion, Victoria (high explosives, propellants, chemicals); Explosives Factory, Maribyrnong, Victoria (propellants, explosives, chemicals, ammunition, rocket motors); Explosives Factory, Mulwala, New South Wales (propellants, chemicals); Munitions Filling Factory, St Marys, New South Wales (ammunition filling and assembly other than small arms ammunition); Ordnance Factory, Bendigo, Victoria (heavy guns, mountings, large turbine gears); Ordnance Factory, Maribyrnong, Victoria (guns, projectiles, fire control equipment, rocket motor components); and Small Arms Factory, Lithgow, New South Wales (rifles, machine guns, mortar shells, small calibre shells and fuse components.)

### Aircraft, guided weapons and electronics supply

*Aircraft.* Production both in Government factories and in industry of military types of aircraft and aero-engines and of other aircraft components required by the Services is administered by the Department of Supply through this Division. Planning of capacity and the negotiation of contractual arrangements concerning aircraft modification, repair and overhaul, and for the supply of spare parts and airborne equipment for the Services, are also functions of the Division.

The following factories are operated by the Division: The Government Aircraft Factory at Fishermen's Bend and the Final Assembly Workshops and Test Airfield at Avalon, Victoria, and the Machine Shop at Northfield, South Australia.

The Government Aircraft Factories have designed and developed a twin turbo-propellor utility aircraft known as Nomad. (*see* Plate 16 overleaf) The first prototype flew in July 1971 and in May 1972 the first production phase of the aircraft was authorised. The first production run will include aircraft for the Australian Army and for sale to other users.

GAF also designed and is producing the Jindivik radio-controlled target aircraft which has been or is being supplied to Britain, Sweden and America as well as to the Weapons Research Establishment and the R.A.N.

Apart from the Government Aircraft Factory, the Commonwealth Aircraft Corporation Pty Ltd is the only major aircraft manufacturer in Victoria. The Corporation was the prime contractor for the Australian production for the R.A.A.F. and R.A.N. of the Italian Macchi jet trainer and for the production of the British Viper engine that powers this aircraft. Hawker de Havilland Australia Pty Ltd at Bankstown and Lidcombe, New South Wales was the major sub-contractor for the Macchi. Macchi trainer production for R.A.A.F. and R.A.N. was completed in 1972.

PLATE 16

*Guided weapons:* The production of the Ikara anti-submarine missile is continuing at the Government Aircraft Factory at Fishermen's Bend. Production of the complete Ikara system, covering broadly the missile, motor, propellants, guidance equipment, launcher, and magazine handling equipment, is a combined effort by departmental establishments and industry, directed and co-ordinated by the Department.

Ikara has been fitted to 9 R.A.N. ships and variants have also been purchased by the British and Brazilian Navies. Other overseas sales are being actively pursued. Turana, a development from the Ikara concept which can use the same shipboard launchers, is a small jet engine-powered, pilotless target aircraft being produced by the Government Aircraft Factory for the R.A.N.

At St. Marys, New South Wales, a Guided Weapons and Electronics Support Facility has been established to repair and maintain guided missiles for the Armed Services. The facility also provides support to the Services in calibration, aerial testing and modelling, and the provision of sonar and environmental test facilities.

*Naval Systems:* A special group has been formed to handle the co-ordination within the Department of the procurement and industrial development aspects of major RAN equipment purchases. The R.A.N.'s new destroyer project, submarine and ship sonar systems, are current activities of this group.

*Electronics:* The Department is responsible for the technical aspects of supply of telecommunications and electronics equipment for the Defence Group. Production is also arranged for other Commonwealth authorities and foreign aid programs. There has been recently a growing involvement in the negotiation of Australian industry participation in Defence purchases abroad.

Some of the more important projects handled by the Department include multi-channel UHF radio relay equipment and a range of military radio pack-sets for the Army, a computer-based message switching system for the Navy and major fixed telecommunications installations for the Air Force.

A continuing program of technology development in electronics is separately sustained from a production development appropriation within the Department of Supply vote.

Contracts have been awarded to industry for the development of a new Australian advanced submarine detection system known as Project Barra. This system is for use by long range maritime patrol and carrier based aircraft and evolved from work at the Department's Weapons Research Establishment.

### Planning and Procurement

*Contract board:* The Board, constituted under the *Supply and Development Regulations 1939-1966*, arranges for the procurement of supplies and services for the Naval, Military and Air Forces of the Commonwealth and for the Department of Supply. Upon request, the Board also arranges contracts on behalf of other Commonwealth departments and authorities. It also arranges disposal—by means of public tender, auction or otherwise—of all surplus or unserviceable Commonwealth-owned goods. The Board comprises representatives of three Service Departments and of the Department of Supply. In each State there is a District Contract Board similarly constituted, which is authorised to exercise the functions of the Contract Board within certain financial limits.

Purchases by the Contract Board and District Contract Boards in all States in 1971-72 totalled \$286.7 million. (This includes a 5 year period contract for aviation fuels, with an estimated value of \$92.4 million). Total realisation from disposals in 1971-72 was \$13.5 million.

*Planning.* The central planning authority of the Department is the Production Planning Branch, whose principal functions are:

- to study manufacturing capacity available for the Services' requirements in peace and war and to plan for and assist in the development of additional production capacity and to plan the organisation of industrial resources for defence production in war;
- to provide and administer reserve stocks of materials and reserve pools of plant, equipment and other requirements needed for rapid expansion in the event of war;
- to receive and allocate to the appropriate departmental divisions all orders and procurement demands placed on the Department; to monitor all aspects of progress in satisfying them and to keep client departments informed of progress;
- to provide advisory services in the field of materials supply and utilisation to Government factories and contractors engaged in the production of munitions requirements;
- to administer the national stockpile of strategic materials.
- to arrange and administer the Department's interface with industry on matters of general policy.

Emphasis is given to a maximum participation by Australian Industry in meeting the requirements of the Defence Services, whenever it is economically and technically possible to do so. Where it is necessary to order a requirement from overseas, the aim is still to involve local industry through co-production or in work of an offset nature.

The Department's efforts are directed towards:

- achieving closer collaboration with industry and bringing to its early attention, the forecast requirements of the Services;
- exercising and upgrading the technological capability of industry by awarding contracts to assist in complex production and development tasks for defence purposes;
- seeking co-production and offset opportunities with overseas industry in defence contracts; and encouraging and facilitating participation in sub-contract work from overseas industry.

*Stores and transport.* The Stores and Transport Branch functions as the central storage and transport authority for most Commonwealth departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Northern Territory. It has agents in Darwin. It also operates a shipping and customs section and the England-Australia bulk air freight scheme for Commonwealth departments.

On 28 June 1972 the Branch had under its control land, building and works, vehicles, plant and equipment, valued at \$26,967,000; 4,959 motor vehicles and 3,081,000 square feet of storage space as well as storage facilities for large quantities of chemicals, bulk liquids and explosives.

*Overseas sales and aid.* The Sales and Aid Branch promotes sales of Departmental products and administers the Department's patents and licensing agreements. It is responsible also for administering arrangements for the supply of military type stores under Defence Aid programmes.

The Branch is also responsible for the development, co-ordination and monitoring of Australian industry participation arrangements for Australian defence purchases from overseas, and the development of closer co-operation between Australia and New Zealand in the defence supply field.

**Finance and Management Services**

*Finance.* The total expenditure on Department of Supply activities in 1971-72 was \$216,309,000. This was made up of \$114,819,000 from Parliamentary Appropriations, \$455,000 from Loan Fund and \$101,035,000 from Trust Fund Accounts which included \$24,921,000 for Stores and Transport, \$57,190,000 for Government Munitions and Aircraft Factories, \$17,892,000 for projects for other governments and \$1,032,000 for cafeterias.

*Management Services.* The Technical Services Branch of the Department provides an operating, advisory and consultative service to the Department for industrial engineering, office methods, management operations research, archives and registry practice, instrumentation, electrical and communications engineering services, materials handling, defence standardisation, stores cataloguing, library services and safety.

The Automatic Data Processing Branch provides services to the Department by: assisting in the specification of data-processing systems; designing and implementing computer based systems; co-ordinating computer equipment requirements; and providing ADP training programs.

*Personnel.* At 31 December 1972 the Department employed 20,653 personnel as follows: administration 2,468; cadets and trainees 341; laboratories 6,106; aircraft production 2,108; munitions production 6,083; miscellaneous production 1,010; Stores and Transport Branch 2,509; and overseas staff 28.

## CHAPTER 5

### REPATRIATION

The Repatriation Commission, established under the *Repatriation Act* 1920–1972, consists of three full-time members. It is responsible for the administration of the Repatriation Act and associated legislation, all matters of policy, and the general administration and overall supervision of the Repatriation Department. The Chairman of the Commission is also the Permanent Head of the Repatriation Department, which provides the administrative machinery through which the Commission operates. The central office is in Canberra and there is a branch office, under the control of a Deputy Commissioner, in each State.

The principal functions of the Department are: the payment of war and service pensions and allowances to eligible ex-servicemen and ex-servicewomen and their dependants; the provision of medical treatment for ex-servicemen and ex-servicewomen for injuries and illnesses caused or aggravated by their war service; the provision of medical treatment in certain circumstances for ex-servicemen and ex-servicewomen who are suffering from injuries and illnesses not caused or aggravated by war service; the provision of medical treatment for widows and dependants of deceased ex-servicemen whose deaths are due to war service; and a wide range of other benefits for eligible persons.

Benefits are provided in respect of service, not only in the 1914–18 and 1939–45 Wars, but also in the South African War 1899–1902, the Korea and Malaya operations, with the British Commonwealth Far East Strategic Reserve and the Special Overseas Forces serving in prescribed areas.

For information on war service land settlement *see* Chapter 22, Rural Industry; for statistics relating to war service homes *see* Chapter 9, Housing and Building.

For detailed information about repatriation pensions, allowances, benefits and services, reference should be made to the annual reports of the Repatriation Commission.

#### Total expenditure 1967-68 to 1971-72

#### REPATRIATION: TOTAL EXPENDITURE<sup>(a)</sup>, 1967-68 TO 1971-72 (\$'000)

<i>Class</i>	<i>1967-68</i>	<i>1968-69</i>	<i>1969-70</i>	<i>1970-71</i>	<i>1971-72</i>
Pensions, allowances and other benefits .	200,446	221,678	228,309	240,539	266,107
Medical treatment . . . . .	59,645	62,743	68,395	74,627	87,328
Administration . . . . .	12,292	13,196	14,972	16,700	18,913
Works, rent and maintenance . . . .	4,414	4,929	5,423	7,981	5,301
<b>Total expenditure . . . . .</b>	<b>276,797</b>	<b>302,546</b>	<b>317,098</b>	<b>339,847</b>	<b>377,649</b>

<sup>(a)</sup> Includes expenditure by Departments other than Repatriation as follows: 1967–68, \$4,330,994; 1968–69, \$4,841,789; 1969–70, \$5,298,982; 1970–71, \$5,852,357; 1971–72, \$4,982,764.

### War pensions

The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the *War Pensions Act* 1914. This Act was repealed in 1920 by the *Australian Soldiers' Repatriation Act* 1920 (amended from 31 December 1950 to the Repatriation Act). Amendments to the Act in 1943 considerably widened the eligibility provisions, to the benefit mainly of members of the Citizen Military Forces who had not served outside Australia during the 1939–45 War.

For a brief description of eligibility for war pensions; the conditions for payment of the various rates and allowances; and of operation of the Appeals Tribunals, *see* pages 91–93 of Year Book 55, Chapter 5, Repatriation.

### Pensions and allowances

War pensions and associated allowances are not subject to a means test, except in the case of dependants other than wives, widows, widowed mothers and children. Pensions and allowances payable and the main weekly rates from 7 December 1972 are as follows.

*Pensions for war-caused incapacity*—*Special rate* (totally and permanently incapacitated (T.P.I.) or blinded), \$51.10; an equivalent rate is payable for temporary total incapacity or to an ex-serviceman pensioned for pulmonary tuberculosis who is, as a result, unfit for employment; *Intermediate Rate*. (Capable of part-time work only), \$36.55; ex-servicemen pensioned for pulmonary tuberculosis and able only to work part-time receive the same rate; *General Rate* (capable of full-time employment), 100 per cent basic rate, \$16. *Dependants*—Pensions are also payable to the dependants of incapacitated ex-servicemen: Wife, \$4.05; eligible children \$1.38; (Maximum rates).

*Pensions in respect of death*—*War Widows* (where death was due to war service or, at the date of death, the ex-serviceman was receiving a war pension at the special rate, or its equivalent in respect of pulmonary tuberculosis, or as a double amputee) \$21.50; eligible war widows may also receive a domestic allowance, \$8.50; *children* (under 16 years of age) \$7.35; double orphans (both parents deceased), \$14.70.

*Allowances*—various allowances are provided to supplement war pensions and these vary according to the type and severity of disablement and the special needs of the pensioner. The main allowances and maximum weekly rates payable are: *Special compensation allowance* (payable to certain general rate pensioners assessed as being 75 per cent to 100 per cent incapacitated), from \$4.50 to \$6.00; *Attendants allowance* (for the severely disabled), maximum \$17.50; *Clothing allowances* (where clothing is subject to damage from surgical aids, etc.), from 43 cents to 85 cents; *Domestic allowance* (payable to eligible war widows), \$8.50. Other allowances payable include: *Sustenance allowance*; *Fares, subsistence and attendance allowance*; *Recreation transport allowance*; *Funeral benefits, etc.*

### Summary of war pensions

The following tables provide a summary of war pensions (excluding miscellaneous war pensions) for the 1914–18 War, the 1939–45 War (including war pensions payable under the *Interim Forces Benefits Act* 1947–1966 and the *Native Members of the Forces Act* 1957–1972), the Korea and Malaya operations, the Far East Strategic Reserve, and the Special Overseas Service. Statistics relating to miscellaneous war pensions are shown later in this section.

WAR PENSIONS: SUMMARY, AUSTRALIA, 1971-72

	1914-18 War	1939-45 War(a)	Korea and Malaya operations	Far East Strategic Reserve	Special Overseas Service	Total
New claims granted . No.	494	9,075	466	138	2,868	13,041
Restorations. . No.	18	197	7	1	17	240
Claims disallowed(b) . No.	463	3,351	166	36	941	4,957
Pensions cancelled (gross) No.	135	16,878	554	55	204	17,826
Deaths of pensioners . No.	5,440	6,603	55	5	21	12,124
Pensions in force at 30 June 1972 . No.	72,997	453,548	11,841	2,035	12,403	552,824
Annual pension liability at 30 June 1972 . \$'000	55,620	138,011	1,701	227	1,338	196,897
Amount paid in pensions during the year 1971-72 \$'000	n.a.	n.a.	n.a.	n.a.	n.a.	210,647

(a) Includes interim forces and native members of the forces, for all their disabilities disallowed.

(b) Number of ex-servicemen who had their claims

## WAR PENSIONS: SUMMARY, AUSTRALIA, 1967-68 TO 1971-72

	1967-68	1968-69	1969-70	1970-71	1971-72
New claims granted . . .	19,967	17,570	17,129	16,437	13,041
Restorations . . .	343	429	317	569	240
<i>Total additions</i> . . .	<i>20,310</i>	<i>17,999</i>	<i>17,446</i>	<i>17,006</i>	<i>13,281</i>
Pensions cancelled (gross) . .	24,539	22,285	21,222	20,158	17,826
Deaths of pensioners . . .	10,950	11,247	11,785	11,990	12,124

## Classes of war pensions

The following tables provide an analysis of the total number of new claims granted, pensions in force, and class of pension for 1971-72.

## WAR PENSIONS: NEW CLAIMS GRANTED, AUSTRALIA, 1971-72

<i>Class</i>	<i>1914-18 War</i>	<i>1939-45 War(a)</i>	<i>Korea and Malaya operations</i>	<i>Far East Strategic Reserve</i>	<i>Special Overseas Service</i>	<i>Total</i>
Ex-servicemen . . .	266	2,998	109	29	948	4,350
Wives and widows of ex-servicemen . . .	221	3,544	102	30	778	4,675
Children . . .	3	2,445	255	79	1,137	3,919
Other dependants . . .	4	88	..	..	5	97
<b>Total . . .</b>	<b>494</b>	<b>9,075</b>	<b>466</b>	<b>138</b>	<b>2,868</b>	<b>13,041</b>

(a) Includes interim forces and native members of the forces.

## WAR PENSIONS IN FORCE: AUSTRALIA, 30 JUNE 1972

<i>Class</i>	<i>1914-18 War</i>	<i>1939-45 War(a)</i>	<i>Korea and Malaya operations</i>	<i>Far East Strategic Reserve</i>	<i>Special Overseas Service</i>	<i>Total</i>
Ex-servicemen . . .	22,626	183,996	3,408	565	4,888	215,483
Wives . . .	27,126	161,210	2,722	462	3,141	194,661
Children . . .	240	72,537	5,295	920	3,956	82,948
War widows . . .	22,783	26,963	159	30	118	50,053
Children of deceased ex-servicemen . . .	26	3,458	143	48	228	3,903
Orphans . . .	9	132	4	..	1	146
Parents . . .	41	4,602	103	9	71	4,826
Others . . .	146	650	7	1	..	804
<b>Total . . .</b>	<b>72,997</b>	<b>453,548</b>	<b>11,841</b>	<b>2,035</b>	<b>12,403</b>	<b>552,824</b>

(a) Includes interim forces and native members of the forces.

# WAR PENSIONS FOR INCAPACITATED EX-SERVICEMEN IN FORCE: BY CLASS OF PENSION AUSTRALIA, 30 JUNE 1972

<i>Class</i>	<i>1914-18 War</i>	<i>1939-45 War(a)</i>	<i>Korea and Malaya operations</i>	<i>Far East Strategic Reserve</i>	<i>Special Overseas Service</i>	<i>Total</i>
Special rate (T.P.I.) or equivalent . . . . .	6,793	14,618	114	7	37	21,569
Intermediate rate . . . . .	167	1,607	20	1	3	1,798
General rate—from 10 per cent to 100 per cent assessed disability(b) . . . . .	15,666	167,771	3,274	557	4,848	192,116
<b>Total . . . . .</b>	<b>22,626</b>	<b>183,996</b>	<b>3,408</b>	<b>565</b>	<b>4,888</b>	<b>215,483</b>

(a) Includes interim forces and native members of the forces. (b) Excludes 78 ex-servicemen who also receive benefits under items 1-6 of the Fifth Schedule and are included above under Special rate (T.P.I.) or equivalent.

## Number of war pensions and annual liability, States, etc.

The following table shows the number of pensions in force and annual liability at 30 June 1972, according to place of payment.

## WAR PENSIONS: NUMBER OF PENSIONS AND ANNUAL LIABILITY STATES, ETC., 30 JUNE 1972

<i>Place of payment</i>	<i>Number of war pensions in force at 30 June 1972(a)</i>				<i>Annual pension liability at 30 June(b) (\$'000)</i>
	<i>Incapacitated ex-servicemen</i>	<i>Dependants of incapacitated ex-servicemen</i>	<i>Dependants of deceased ex-servicemen</i>	<i>Total</i>	
New South Wales(c) . . . . .	77,497	97,596	21,798	196,891	71,626
Victoria . . . . .	56,898	73,676	16,868	147,442	53,606
Queensland . . . . .	33,776	45,244	8,084	87,104	31,819
South Australia(d) . . . . .	19,844	25,612	5,126	50,582	16,194
Western Australia . . . . .	17,888	22,932	4,228	45,048	13,583
Tasmania . . . . .	8,580	11,874	2,049	22,503	8,477
Overseas . . . . .	1,000	1,458	796	3,254	1,592
<b>Total . . . . .</b>	<b>215,483</b>	<b>278,392</b>	<b>58,949</b>	<b>552,824</b>	<b>196,897</b>

(a) Includes interim forces and native members of the forces 1939-45 War. (b) Includes domestic allowance payable to widows. (c) Includes Australian Capital Territory. (d) Includes Northern Territory.

## Summary of war pensions, 1967-68 to 1971-72

The following table shows the number of pensions granted, claims rejected, pensions in force and the annual liability for pensions in each of the years ended 30 June 1968 to 1972.

## WAR PENSIONS: SUMMARY, AUSTRALIA, 1967-68 TO 1971-72

<i>Year</i>	<i>Number of war pensions in force at 30 June(a)—</i>						<i>Annual pension liability at 30 June(c) (\$'000)</i>
	<i>Pensions granted</i>	<i>Claims disallowed (b)</i>	<i>Incapacitated ex-servicemen</i>	<i>Dependants of incapacitated ex-servicemen</i>	<i>Dependants of deceased ex-servicemen</i>	<i>Total</i>	
1967-68 . . . . .	19,967	4,578	222,479	334,823	58,674	615,976	164,848
1968-69 . . . . .	17,570	4,950	221,343	319,899	59,071	600,313	171,818
1969-70 . . . . .	17,129	5,333	219,841	305,403	59,432	584,676	178,730

### Service pensions

The *Repatriation Act 1920-1972* provides for a service pension to be paid, subject to a means test on income and property, to the following persons:

- ex-servicemen who served in a theatre of war (or in a designated *Operational or Special Overseas Service* area) and have attained the age of sixty years or are permanently unemployable;
  - ex-servicemen who suffer from pulmonary tuberculosis, irrespective of the area of their service; and
  - ex-servicewomen who suffer from tuberculosis, or who served in a theatre of war, or served abroad or embarked for service abroad and have attained the age of fifty-five years, or are permanently unemployable.
- veterans of the South African War 1899-1902 who were members of a naval or military force or contingent raised in Australia for active service in that war.

#### Rates of pension

Maximum service pension rates and allowances are the same as those paid to Age and Invalid pensioners under the Social Services Act. The means test provisions relating to payments are similar.

For information on conditions relating to the various rates and allowances and the operation of the means test, see Chapter 13, Welfare Services.

From 7 December 1972, the maximum weekly rates are as follows:

*Standard Rate*, \$21.50, *Married Rate*, \$18.75; *Guardian's Allowance*, \$4 (\$6 if caring for a child under 6 years or an invalid child requiring full-time care); *Supplementary assistance*, \$4 (or \$2 payable to each of a married couple); *Additional pension for eligible children*, \$4.50 for each child; and in addition \$0.25 is payable in respect of the 2nd, 3rd and 4th child.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war service. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment, and treatment in Repatriation General Hospitals.

### Medical treatment for ex-servicemen and dependants of ex-servicemen

Medical treatment is provided for all disabilities which have been accepted as due to war service. In addition, and subject to certain conditions, treatment is provided for disabilities not due to war service for: ex-servicemen and ex-servicewomen receiving war pensions at or exceeding the maximum general (100 per cent) rate; ex-servicemen who have contracted pulmonary tuberculosis; nurses who served in the 1914-18 war; widows and certain dependants of ex-servicemen whose deaths have been accepted as due to war service and of deceased T.P.I. pensioners; and certain service pensioners, including service pensioners of the South African War 1899-1902. Ex-servicemen who have contracted pulmonary tuberculosis may receive treatment for that condition.

In-patient treatment for eligible patients is provided at the six Repatriation General Hospitals (one in each State) and seven auxiliary hospitals and sanatoria as follows: *New South Wales*—Lady Davidson Hospital; *Victoria*—Macleod Hospital and Anzac Hostel; *Queensland*—Kenmore Hospital and Rosemount Hospital; *South Australia*—Birrlee Hospital; and *Western Australia*—The Edward Millen Hospital. The Anzac Hostel specialises in the care and treatment of long-term patients.

The total number of available beds for patients in wards or parts of wards, open for use, in all these institutions at 30 June 1972 was 3,504, and expenditure during 1971-72 amounted to \$41,143,758. In addition, expenditure of \$46,184,556 was incurred during 1971-72 on medical services outside these institutions.

#### Repatriation hospitals and institutions

Details of full-time staff in Repatriation general hospitals and other Repatriation institutions are given in the following table.

**REPATRIATION HOSPITALS AND INSTITUTIONS: FULL-TIME STAFF**  
**STATES, 30 JUNE 1972**

<i>Type of institution</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Aust.</i>

Average daily beds occupied . . . . .	209	100	123	29	35	..	496

In addition to the Repatriation institutions, eligible patients are treated in other country and metropolitan hospitals and nursing homes at Repatriation expense. During 1971-72, 18,751 Repatriation in-patients were accommodated and treated in hospitals and 926 in nursing homes.

Repatriation psychiatric patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Repatriation Department in separate wings of psychiatric hospitals administered by the State authorities. Excluding 138 on trial leave, there were 688 Repatriation patients in these hospitals at 30 June 1972.

Out-patient treatment is provided throughout the Commonwealth at Repatriation hospitals and clinics and through the Repatriation Local Medical Officer Scheme. During 1971-72, 611,637 out-patients were treated at Repatriation institutions, and visits to or by local medical officers totalled 2,772,618. The number of Repatriation local medical officers in the Commonwealth at 30 June 1972 was 6,301.

#### **Artificial limb and appliance services**

In each State the Repatriation Department maintains a limb and appliance centre, catering for patients requiring artificial limbs, surgical aids and appliances. The centres fit eligible Repatriation patients and those from other Commonwealth departments and instrumentalities, and, when possible, patients from State Government and philanthropic organisations, and private persons who cannot be fitted satisfactorily elsewhere.

Details of production at all centres during 1971-72 are as follows: arms, 210; legs, 1,613; surgical footwear, 8,278; adapted footwear, 1,856; other surgical appliances, 2,456; and repairs, 27,442.

### **General Repatriation benefits and miscellaneous**

#### **Other Repatriation Department activities**

In addition to the payment of pensions and the provision of medical treatment, the Department also provides various benefits and allowances designed to meet the needs of special classes of ex-servicemen and their dependants.

These include educational and vocational training schemes, namely the *Soldiers' Children Education Scheme* (full details of which appear later in this section), the *Disabled Members' Training Scheme*, the *War Widows' Training Scheme* and the *National Service Vocational Training Scheme*.

In addition, gift cars and an annual allowance for their upkeep are provided for ex-servicemen who, as a result of war service, have suffered the amputation of both legs above the knees or amputation of one leg above the knee plus any two other amputations (above the ankle or at or above the wrist) or complete paraplegia resulting in the total loss of the use of both legs. A grant of up to \$100 may be made towards the funeral expenses of eligible ex-servicemen and certain of their dependants. Payment of up to \$10 may be made to provide such necessities as meals, sleeping accommodation etc., for ex-servicemen in need of immediate relief. Also certain concessions in telephone rental charges are provided for some classes of ex-servicemen and their dependants, including war blinded ex-servicemen, war widows and certain service and special rate war pensioners. Ex-servicemen who have been blinded as a result of war service may be issued with talking book machines. The Australian Red Cross Society supplies 'book' records or cassettes for these machines, free of charge, thus enabling the blinded to enjoy a wide range of literature.

Expenditure in 1971-72 on general Repatriation benefits for all wars was \$5,812,000, comprising *Soldiers' Children Education Scheme*, \$3,625,000; recreation transport allowance, \$750,000; and other benefits \$1,437,000.

Trust (and other) funds administered by the Repatriation Department held \$12,676,940 in securities (face value) and \$599,681 in cash, a total of \$13,276,621 as at 30 June 1972.

Reciprocal arrangements with the United Kingdom, New Zealand and other countries provide for the payment of pensions, etc., to eligible Australian ex-servicemen living overseas and to eligible ex-servicemen from overseas who are living in Australia.

### **Soldiers' Children Education Scheme**

The *Soldiers' Children Education Scheme* was established in 1921 and operates with the assistance of the voluntary Education Boards in each State. These Boards consist of representatives of government and non-government education authorities and of ex-service and other organisations which have a general interest in the welfare of the children of ex-servicemen. The objects of the Scheme are to assist and encourage eligible children in acquiring a standard of education compatible with their aptitude and ability, and to prepare them to enter an agricultural, commercial, professional, or industrial calling of their own choice. Eligible children are children of ex-servicemen whose deaths have been accepted as due to war service; or of ex-servicemen who died from causes not due to war service but who were receiving at the date of death a war pension at a special rate for blindness, total and permanent incapacity, pulmonary tuberculosis, or amputation of two or more limbs; or of ex-servicemen who, as a result of war service, are blinded, totally and permanently incapacitated, or receiving the special rate pension for pulmonary tuberculosis and are likely to receive such pension for a period of at least three years. From the commencement of primary education up to twelve years, school requisites and fares are provided. An education allowance is also payable for a child from commencement of secondary education or from the age of twelve years, whichever is the earlier, while the child is undertaking primary or secondary education. Further assistance beyond, or parallel with, the later years of secondary education is provided where an approved beneficiary continues with a course of specialised education or training necessary for a career. At this stage of training, in addition to the education allowance, fees are paid and text books, essential equipment and other minor benefits are provided.

All education allowances are subject to an allowed income limit test, i.e. the amount of education allowance payable depends on the amount of income a child receives over the allowed limit. The scale of maximum allowances payable to eligible children at various stages of education is as follows.

**SOLDIERS' CHILDREN EDUCATION SCHEME**  
**WEEKLY RATES OF ALLOWANCES, FROM 1 JANUARY 1973**  
(£)

<i>Type of training</i>	<i>Living at home</i>	<i>Living away from home</i>
At school—

(c) Includes Northern Territory. (d) From 12 years of age or the commencement of secondary education, whichever is the earlier.

### Settlement of returned service personnel on the land

Reference to the settlement of returned service personnel on the land will be found in the chapter Rural Industry.

### Re-establishment benefits for national servicemen

Subject to prescribed conditions, special re-establishment benefits are provided for national servicemen under the *Defence (Re-establishment) Act 1965-1968*. They apply to all national servicemen whether or not they have served on 'special service' and ensure that servicemen will not be at a disadvantage on their return to civil life. The scheme includes appropriate full or part-time training where it is necessary or desirable for effective re-settlement. The assistance includes payment of tuition fees, other associated fees and fares, and an allowance towards the provision of books and equipment as appropriate. A training allowance is also provided for trainees undertaking full-time studies.

Re-establishment loans may be granted, subject to certain conditions, to those national servicemen in need of financial assistance for their re-establishment in civil life and who, prior to call-up, were engaged on their own account in professional practice, business, or agricultural occupations, or who, because of their call-up, were prevented from engaging in these occupations or, in any other case where it is considered desirable in the circumstances to grant a loan.

The maximum amounts of the loans are business and professional \$3,000, agricultural \$6,000.

## The Services Canteens Trust Fund

The Services Canteens Trust Fund was established under the *Services Trust Funds Act 1947*. Its funds are derived from the assets and profits of wartime services canteens, mess and regimental funds of disbanded units, and several other sources.

The total amount transferred to the Fund to 31 December 1972 was \$11,057,051. The Act prescribed that, of this, \$5 million and such further amounts as the trustees of the Fund might from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-servicemen and ex-servicewomen, and that the balance of the Fund should be used to provide relief for ex-servicemen and ex-servicewomen and their dependants in necessitous circumstances.

The Fund is administered by ten honorary trustees appointed by the Governor-General. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of the benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration. Members of regional committees are all persons who served in the 1939-45 War or are widows of men who served during the war. The trustees and members of regional committees serve in an honorary capacity.

### Assistance from the Fund

Persons eligible for assistance from the Fund are those who, between 3 September 1939 and 30 June 1947, served in the Australian Naval, Military or Air Forces, including members of the canteens staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the Defence Forces who served in an official capacity on full-time paid duty, and their dependants. The trustees have introduced schemes for providing welfare relief for ex-servicemen and ex-servicewomen who are eligible for benefits, and for their dependants; benefits for children of eligible ex-servicemen and ex-servicewomen who are suffering from serious and incapacitating afflictions; and education benefits for the children of eligible ex-servicemen and ex-servicewomen. From its inauguration in 1947 the Fund is to be available for forty years for both welfare relief and educational benefits.

The total assistance granted under these three schemes from the inception of the Fund to 31 December 1972 was \$12,712,216 (\$454,140 during 1972) distributed as follows: *Welfare relief*, \$3,897,188 (\$145,842); *Assistance for afflicted children*, \$336,511 (\$5,991); and *Educational assistance*, \$8,478,517 (\$302,307).

For detailed information on the operation of the Fund reference should be made to the annual reports of the Services Canteens Trust Fund.

## Ex-service personnel, widows and children

In November 1971, a survey based on the quarterly population survey (see Chapter 20, Employment and Unemployment) was conducted at the request of the Repatriation Department and the Services Canteens Trust Fund. The survey questions were designed to identify four classes of person, namely:

- (a) those who had served in the Australian armed forces during wartime;
- (b) those ex-service personnel who had a disability which had been accepted by the Repatriation Department as having been war-caused and those who were in receipt of a war pension;
- (c) widows of men who had served during wartime;
- (d) children, under 21 years of age, of ex-service personnel or their widows.

Certain categories of persons covered by the survey were not asked the survey questions. These comprise persons who were patients in hospitals or sanatoria other than Repatriation Hospitals, or who were inmates of gaols, etc., and for whom, for the purposes of the survey, the institution was regarded as their dwelling. The estimates ascribe to such persons characteristics (e.g. ex-service status) according to the proportions found in the sample. Patients in Repatriation Hospitals, however, were asked the relevant questions.

The comments on the reliability of estimates and table of standard errors given in Chapter 20, Employment and Unemployment, are also applicable to this survey.

Definitions used and further details of the survey were published in the mimeographed bulletin *Ex-service Personnel, widows and children*, November 1971 (Reference No. 15.1).

EX-SERVICE PERSONNEL(a), BY WAR AND AREA OF SERVICE, STATES, NOVEMBER 1971

## CHAPTER 6

# INTERNATIONAL RELATIONS

Australia's international relations have developed as a natural outcome of the country's growth from 19th century colonial status to independent nationhood. Initially, association with Britain and co-operation with the Commonwealth countries were the chief pre-occupations. Later, as a consequence of the vital role played in the Pacific by the United States of America in the 1939-1945 War and during the Cold War period in ensuring Australian security, close relations were also developed with that country.

Although these links remain important factors in Australia's foreign policy, the emphasis in recent years has become increasingly focused on participation in regional associations and relations with Asian and Pacific countries. At the same time, Australia is not neglecting the development or expansion of relations with countries of all ideologies in all parts of the world, since Australia's interests are world-wide.

Australia's foreign policy today aspires to a more independent stance; one that is less militarily oriented, not liable to suggestions of racism, and one that will achieve for Australia regard in the world at large as a distinctive, tolerant and co-operative nation.

### Relations with Asia and the Pacific

Asia and the Pacific is the area of Australia's primary interest and concern. This has long been reflected by Australia's active role in regional associations and organisations such as the United Nation's Economic Commission for Asia and the Far East (ECAFE), the Colombo Plan, the Asian Development Bank, the South-East Asia Treaty Organisation (SEATO) the South Pacific Forum, the South Pacific Commission and in many other commercial and professional bodies, both private and government.

Australia's policy in the Asian and Pacific regions is one of continuing and constructive involvement. Australia believes that peace and prosperity there largely depend on the ability of member countries to co-operate; and for major powers, both local and external, to reach a durable accommodation of interests in which the fears and aspirations of the others and the independence of the smaller or less populous countries of the region will be respected. As new situations emerge Australia will develop flexible approaches towards relations with countries of these regions. Australia has welcomed the ceasefire agreements in Vietnam and Laos and the prospects for peace in Indo-China which they open up. It looks forward to a situation where Australia and its neighbours, as well as the major powers, can play a role in the economic reconstruction and rehabilitation of the whole Indo-China area.

In the longer term, Australia seeks new forms of regional co-operation that are geared to the realities of the present and future. It would like to see consideration given by all countries of the region to the creation of a new regional organisation that would be genuinely representative of the Asia-Pacific region, without ideological overtones, and designed to help free the region from great power rivalries and ideological interference from outside.

Australia welcomes the progress achieved by the Association of South-East Asian Nations (ASEAN), which it considers a model of successful regional co-operation in South-East Asia. It has also followed with interest the initiatives of ASEAN member countries to achieve a zone of peace, freedom and neutrality in South-East Asia; it supports these efforts and would encourage other countries to do likewise. Australia continues to take a sympathetic interest in the developments in the Indian subcontinent.

Australia places high priority on maintaining and strengthening its cordial and close relations with Indonesia, its nearest neighbour. Australia believes that its future is indissolubly linked to Indonesia's, and that the relations between the two countries are a crucial factor which will determine the future of their region for the rest of this century.

Australia also gives high priority to developing and strengthening her relations with Japan, both bilaterally and through international forums, on a basis of mutual trust and understanding. The two nations have become increasingly interdependent in economic terms: Japan is Australia's biggest trading partner and Australia is Japan's second largest source of imports. Both countries have a common interest in the Asia-Pacific regions' economic and political development.

Diplomatic relations were established with the People's Republic of China in December 1972, and an Australian Embassy in Peking opened on 12 January 1973. Australia looks forward to the development of a substantial relationship with this major power in the Asian region, and preliminary arrangements for a number of exchanges in trade and cultural fields have already commenced.

In the Pacific, Australia looks to expand and consolidate its co-operative activities to promote the stability, welfare, harmony and economic development of the region. Australia has long been an active member of the South Pacific Commission and was a founding member of the South Pacific Forum. Matters of common interest and concern are frequently discussed with Australia's Pacific partners.

#### **Relations with the great powers**

It remains a constant objective of Australian foreign policy to maintain close and continuing co-operation with the United States of America. This relationship is formally expressed in the ANZUS Treaty, which establishes the framework for both countries to co-operate and to consult closely at both the political and official levels. The ANZUS Treaty remains the crucial treaty for Australia, being one of its basic associations in the Pacific and the legal embodiment of the common interests of the people of Australia, New Zealand and the United States of America.

Australia will also continue to promote the development of closer understanding and co-operation to our mutual benefit with the Soviet Union, the other great power with a substantial interest in the Asian and Pacific region.

#### **Relations with Britain and the Commonwealth**

Although aspects of the relationship are changing, the ties of kinship that most Australians have with Britain will remain strong. Because of differences in geographical orientation some divergences in our respective approaches to certain problems of Asia and Europe may emerge, but Australia's relationship with Britain will nevertheless continue to be of great importance. There are opportunities in many fields for mutually beneficial co-operation, which will be facilitated by our close ties of friendship.

Australia also attaches great importance to the Commonwealth of Nations, a unique multi-racial group which brings Australia into more intimate and informal contact at all levels with African, Asian and Caribbean countries. Australia will continue to take an active role in the meetings of Commonwealth Heads of Government, and will co-operate in economic, scientific and technical programs for social and economic advancement.

#### **Relations with Europe, Africa, the Middle East and South America**

Australia also recognises the importance of relations with other parts of the world, including Europe, Africa, the Middle East and South America. The growing trade with member countries of the European Economic Community is an example of Australia's world-wide commercial interests. There is also increasing scope for co-operation in the scientific and technical fields. Australia, in 1971, joined the OECD (Organisation for Economic Co-operation and Development), which has provided another point of contact with countries sharing similar social and economic circumstances.

### **United Nations Participation**

Australia played an active part in drafting the Charter of the United Nations at the Conference on International Organisation in San Francisco in 1945, and has been a consistent supporter of the principles and objectives of the United Nations since its foundation. Its influence in the affairs of the United Nations has been exerted through the annual debates in the General Assembly, through membership of the Security Council (1946-47, 1956-57 and 1973-74), the Economic and Social Council (1948-50, 1953-55 and 1962-64), and the Trusteeship Council, and of the several specialised agencies.

Australia, as one of the administering powers of Nauru up to January 1968, and as the sole administering power of New Guinea, has been a member of the Trusteeship Council since 1947. The Australian Ambassador to the United Nations, was elected president of the Council at its 37th session in May 1970. Australia is a member of the Special Committee on Colonialism (the Committee of Twenty-four) and the Committee to consider measures for keeping the Indian Ocean a zone of peace. In 1950, Australia contributed to the participating United Nations forces in Korea. It has also been directly involved in United Nations peace-keeping activities in Greece (1947), Palestine (1947), Indonesia (1948-49), Kashmir (1947), the Arab States and Israel (1948), Hungary (1956-57) and Cyprus (since 1964). It is also a member of the special Committee on Peace-keeping Operations. Australia contributed its share of the costs, both assessed and voluntary, of the United Nations operations in the Congo. It also contributes personnel for United Nations observer missions in India/Pakistan and the Middle East, and has made voluntary contributions totalling \$US1,620,000 (to 31 December, 1972) to the costs of maintaining the United Nations force in Cyprus. In addition, it has borne approximately \$US2,800,000 being the cost of maintaining its police element in Cyprus. It also bought \$US4,000,000 worth of United Nations bonds. These were issued to meet financial difficulties arising mainly from the cost of these operations, and from the failure of some member States to pay assessed contributions toward the Middle East and Congo operations.

In the economic, social and cultural sphere, Australia has contributed to the work of the United Nations through membership of its specialised agencies and of the Economic and Social Council. It was a foundation member of one of the four United Nations Regional Economic Commissions—the Economic Commission for Asia and the Far East, the 4th, 15th and 24th Sessions of which were held in Australia. In 1963, Australia became a full regional member of ECAFE.

Australia has had varying periods of service as a member of the executive bodies of the principal specialised agencies. As a leading agricultural country, Australia played a large part in the establishment of the Food and Agriculture Organisation. The 10th Regional FAO Conference for Asia and the Far East was held in Canberra in August-September 1970. Australia continues to be a member of the International Civil Aviation Organisation, the International Telecommunication Union, the World Meteorological Organisation, the Inter-Governmental Maritime Consultative Organisation, the International Atomic Energy Agency, and Universal Postal Union. It is also a member of the United Nations Development Program, the International Labour Organisation, the World Health Organisation, UNESCO and numerous financial and other bodies. Australia became a member of the United Nations Governing Council for Environmental Programs for three years from 1973.

Australia's commitment to the United Nations ideal is based on the belief that only through such a body can there be concerted international efforts for the maintenance of a stable and harmonious world order. The purposes of the Charter are, indeed, basic to Australia's approach to international relations. The manifesto of the governing Labor Party commits it to 'make every effort to make the United Nations an effective instrument for justice and peace and political, social and economic advancement'.

To reflect the new Australian Government's more positive support for regional initiatives, and its determination to condemn colonialism and racial discrimination, Australia changed its voting policy on nine politically significant resolutions in the last (1972) session of the United Nations General Assembly.

The changes in policy are especially noticeable in the case of southern African issues. Australia can in future be expected to support resolutions calling for self-determination, decolonisation, and an end to racial discrimination especially in Africa. It recently voted for increased sanctions against Rhodesia and the consideration by the Security Council of similar action against South Africa and Portugal because of their refusal to apply the sanctions imposed by the Security Council. At the same time, Australia has been careful neither to encourage nor to support calls for the use of force to change the racial policies applied in southern Africa.

Australia supported the 1972 resolution establishing an Ad Hoc committee of 15 to study the implications of proposals to declare the Indian Ocean to be a zone of peace, and also agreed to serve on the committee. These actions demonstrate Australia's concern with questions affecting the future stability of the Indian Ocean area, and its readiness to play a responsible part in regional initiatives.

Since its assumption to office, the present Government has also signed the two International Covenants on Human Rights, and has taken action to expedite ratification of the United Nations Convention on the Elimination of All Forms of Racial Discrimination. In addition it has recently ratified the Nuclear Non-Proliferation Treaty and the Seabed Arms Control Treaty, as well as ILO Conventions Nos. 87 and 98.

### Australia's contribution in international aid

Since 1945, Australia has spent almost \$2,000 million on aid. In the last decade, official development assistance has more than trebled from \$64 million in 1961-62 to \$200 million in 1971-72. For 1972-73, it is expected to reach \$220 million. This represents an expenditure of about \$17 per head of population in Australia.

Australia has consistently been among the first three or four of the major aid donors, with a figure for direct government aid averaging 0.56 per cent of GNP over the last four financial years.

The table below lists various items of expenditure which can be fairly readily identified as economic (i.e. non-military) aid to developing countries:

**AUSTRALIA'S CONTRIBUTION IN INTERNATIONAL AID, 1967-68 TO 1971-72**

(a) Administered principally by the Department of Education. (b) Includes emergency relief for Pakistan refugees (\$2,300,000) and rehabilitation and relief aid for Bangladesh (\$1,515,000). (c) The Department of the Treasury has the principal responsibility for the management of Australia's participation in these organisations. (d) The grant to assist the economic development of the Territory of Papua New Guinea is administered principally by the Department of External Territories.

About two-thirds of Australia's aid goes to Papua New Guinea (See Chapter 28, The Territories of Australia). The remainder is channelled through multilateral programs (e.g. the U.N. Agencies and the Asian Development Bank) and through Australia's bilateral programs. The following table sets out the geographic distribution of Australia's bilateral aid.

**AUSTRALIA'S BILATERAL AID BY GEOGRAPHICAL REGION AND COUNTRY**

(a) East African Common Services Organisation.

NOTE. The cumulative totals do not include expenditure made under the Commonwealth Co-operation in Education Scheme before 1968-69.

This bilateral aid is channelled through a number of programs, which include the Colombo Plan, the South Pacific Aid Program and the Special Commonwealth African Assistance Plan. The largest of these is the Colombo Plan which is the principal framework for economic development within the Asian region.

Through these programs, Australia assists with a number of developmental projects including the provision of experts and equipment, balance of payments support and training of students.

The following table sets out the numbers of students who have been trained in Australia under the aid programs.

**STUDENTS TRAINED IN AUSTRALIA UNDER AID PROGRAMS**  
(Number)

<i>Scheme</i>	<i>Cumulative total at 30 June 1972</i>	<i>Total in training at 30 June 1972</i>	<i>Number of new awards 1971-72</i>
Colombo Plan . . .	11,794	1,616	1,089
SCAAP(a) . . .	886	89	118
SPAP(a) . . .	341	55	73

AIAS(a) . . .	128	10	4
<b>Total</b> . . .	<b>13,235</b>	<b>1,780</b>	<b>1,288</b>

(a) The Special Commonwealth African Assistance Plan (SCAAP) was established to provide training awards to Commonwealth countries in Africa. The South Pacific Aid Program (SPAP) provides the same sort of assistance to the islands and territories of the Pacific. A small training program known as the Australian International Awards Scheme (AIAS) is intended to meet occasional requests from countries outside these regions, particularly those from the Commonwealth countries of the Caribbean and Mediterranean regions.

## Membership of the Organisation for Economic Co-operation and Development (OECD)

Australia joined the Organisation for Economic Co-operation and Development (OECD) as a full member on 7 June 1971.

The Organisation's membership consists of the following 23 countries: Australia; Austria; Belgium; Canada; Denmark; Finland; France; Germany; Greece; Iceland; Ireland; Italy; Japan; Luxembourg; Netherlands; Norway; Portugal; Spain; Sweden; Switzerland; Turkey; The United Kingdom; The United States of America; and the two special status countries of New Zealand and Yugoslavia.

The OECD was established in 1961 to succeed the former Organisation for European Economic Co-operation (OEEC) which had its origins in the administration of Marshall Plan aid in Europe after the Second World War. The need for a new Organisation was apparent by the beginning of the 1960's, when changing economic conditions called for new arrangements for international economic co-operation. The functions of the OEEC were revised and membership was extended with the inclusion of the United States of America and Canada, and later Finland and Japan in the new Organisation.

The broad aims of the Organisation are to achieve high, sustainable economic growth and employment as well as financial stability in member countries, and to contribute to the expansion of world trade on a multi-lateral, non-discriminatory basis.

OECD member countries, which as a group comprise the major industrialised countries of the world, now participate in a well-established pattern of consultation, co-operation and co-ordination on a wide range of economic matters, including mutual balance of payments problems.

Since joining the OECD, Australia has participated in many important meetings, including the Ministerial Council Meetings in June 1971 (when Australia was invited to join the Organisation) and May 1972; the Economic Policy Committee (which meets two or three times a year) and the Ministers of Science Meeting in October, 1971.

The Secretary-General of the OECD, visited Australia in March 1972 and held wide-ranging discussions with the Australian Government and leaders in primary and secondary industry.

### OECD functions

The following is a brief description of some of the more important OECD functions.

The *Council* is the OECD's governing body. It meets annually at Ministerial level and regularly at Permanent Representative level. Questions to be submitted to the Council, whether relating to the general policy of the Organisation or to the progress of its work, are first examined by the *Executive Committee*.

The *Economic Policy Committee* has developed as an important means of maintaining and improving the co-ordination of member countries' economic policies. The Committee's work has become increasingly involved in identification of the major problems which accompany growth in industrialised countries, and the policy implications of these problems.

Ten separate committees in the *Financial Affairs* area cover invisible transactions, payments, financial markets, monetary and foreign exchange matters, fiscal affairs, insurance, tourism, restrictive business practices, maritime transport and consumer policies.

The *Economic Development Review Committee* is responsible for the annual economic survey of individual member countries. Each country's economic situation and policies are examined by a panel of representatives of other member governments and the results are published in an annual survey.

The *Development Assistance Committee (DAC)* attempts to expand the aggregate volume of resources made available to the developing countries and to improve their effectiveness. All the major developed countries of the OECD are members of the DAC, which Australia joined separately in 1966. Member countries of the DAC comprise the largest donors of financial and technical aid, representing some 95 per cent of the global total of aid from both official and private sources to developing countries.

The *Environment Committee* investigates problems associated with pesticides, water and air pollution, noise and urban development, etc.

The OECD emphasises the economic and trade implications of environmental policies, relating such policies to qualitative objectives of growth policies, and formulating concerted solutions to problems. In May 1972 the Organisation adopted a set of 'guiding principles concerning the international economic aspects of environmental policies', incorporating *inter alia* the 'polluter pays' principle.

The *Trade Committee* and its subsidiary bodies consider questions which relate to trade policies and practices or consult with each other on particular trade issues. The Committee is also used as a forum for the co-ordination of trade policy issues which arise in relation to non-member countries, particularly the developing countries. The Organisation has played a central role in the introduction of a system of generalised non-reciprocal and non-discriminating tariff preferences for the benefit of developing countries.

The *Committee for Scientific and Technological Policy* assumed the functions of the former Committee for Science Policy in January 1972 and had its mandate extended to include responsibility for ensuring co-operation among member countries in the field of technology as well as science. The Committee examines national policies and links between science, economic growth and social development. Ministerial meetings on science and technology are held every two years for which the Committee makes the necessary preparations.

The *Manpower and Social Affairs Committee* studies and compares member countries' progress with manpower and industrial relations, and studies aspects of social planning.

Other major committees of the organisation include those for agriculture, industry, science, education, energy and oil.

*Problems of world trade.* The meeting of the Ministerial Council of the OECD in June 1971 authorised the establishment of a small, high level group to study problems of world trade and related matters arising in the longer term perspective. Australia has made submissions to this group. The group's report was released in September 1972. In October 1972, the council decided that discussions on international monetary and trade issues should continue in the organisations Executive Committee, which would meet at 'high level' for the purpose.

### Diplomatic representation

The Department of Foreign Affairs is responsible for advising the Minister for Foreign Affairs and the Australian Government on the conduct of foreign affairs and relations with foreign Governments. Its officers staff the Australian diplomatic service and the consular and administrative service.

In March 1973 Australia maintained the following diplomatic and consular missions overseas and full details of these missions are available from the Department of Foreign Affairs, Canberra, A.C.T.

NOTE. In certain cases the Head of Mission accredited to one country is also accredited to another country. Where this is the case the name of the country in which the Head of Mission is located is shown in brackets. Except where indicated the missions are located in capital cities.

### AUSTRALIAN MISSIONS OVERSEAS

**Commission**

Hong Kong

**Other**

*Mission to*—European Atomic Energy Community (Brussels); European Coal and Steel Community (Brussels); European Economic Community (Brussels); United Nations (New York); United Nations (Geneva); Organization for Economic Co-operation and Development (Paris).

*Consulate-General in*—Los Angeles; New York; San Francisco; Chicago; Berlin; Hamburg; Osaka; Milan; Bombay; Calcutta; Karachi; Bahrain.

*Consulate in*—Graz; Geneva; Noumea; Capetown; Honolulu; Rio de Janeiro.

Specialist officers of the Department of Trade, other Commonwealth Government Departments and the Defence Services stationed abroad are attached to Australian diplomatic or consular missions. Senior attached officers are in some cases accredited to the missions with diplomatic or consular ranks approved by the Minister for Foreign Affairs. In addition, the Department of Trade and Industry maintains Trade Commissioner posts which engage in trade promotion in a number of cities where Australia does not have diplomatic or consular representation (*see* below).

The Department of Immigration similarly maintains offices overseas which engage in selection of migrants (*see* page 124).

**Agents-General for States**

From early times the Australian colonies maintained agents in London to encourage immigration and to carry out commercial and financial negotiations. Since federation the States have continued to maintain Agents-General in London, all of whom work in close co-operation with the High Commissioner for Australia at Australia House, London. Some of the States also maintain other offices overseas e.g. New South Wales has offices in New York, Tokyo and Wiesbaden.

**Diplomatic representatives in Australia**

There are forty-eight non-Commonwealth and ten Commonwealth countries accredited to Australia.

The following list shows the diplomatic missions in Australia. Full details of Commonwealth and foreign representation in Australia are available from the Department of Foreign Affairs, Canberra. Consular representatives are not included and particulars of these are available from the Department of Foreign Affairs, Canberra. There are about 300 such representatives in Australia, and sixty countries are represented.

**DIPLOMATIC REPRESENTATION TO AUSTRALIA****Embassies (48)**

Arab Republic of Egypt	Greece	The Philippines
Argentina	Indonesia	Poland
Austria	Iran	Portugal
Bangladesh	Ireland	Romania ( <i>in</i> Japan)

Finland	Norway	Yugoslavia, Socialist Federal Republic of
France	Pakistan	
	Peru	

\* Administered by Department of the Prime Minister and Cabinet.

**High Commissioners (10)**

Britain	India	Singapore
Canada	Malaysia	Sri Lanka
Fiji	Malta	
Ghana	New Zealand	

**Overseas trade representation****The Australian Trade Commissioners Service, January 1973**

The Department of Overseas Trade maintains Trade Commissioners at fifty-one posts in thirty-seven countries. Twenty-five editions of the Department of Overseas Trade's promotion periodical *Austral News* now circulate in more than 100 countries in seven languages. (See also Australian Trade Missions in the chapter Overseas Transactions.)

The countries where Australian Trade Commissioner posts are located are shown in the following list. Except where indicated the missions are located in capital cities.

Argentina	Indonesia	Singapore
Austria	Iran	South Africa, Republic of (Johannesburg, Cape Town)
Bahrain	Italy (Rome, Milan)	Sweden
Belgium	Japan (Tokyo, Osaka)	Switzerland (Geneva, Berne)
Britain	Korea	Thailand
Canada (Montreal, Vancouver, Ottawa, Toronto)	Kenya	Trinidad
Chile	Lebanon	Arab Republic of Egypt
Fiji	Malaysia	United States of America (Washington, D.C., Chicago, New York, San Francisco, Los Angeles)
France	Mexico	U.S.S.R.
Germany, Federal Republic of (Bonn, Hamburg)	The Netherlands	Yugoslavia
Greece	New Zealand (Wellington, Auckland, Christchurch)	
Hong Kong	Pakistan	
India	Peru	
	The Philippines	

Full details of the Australian Trade Commissioner posts are available from the Department of Overseas Trade, Canberra, A.C.T.

**Australian Trade Correspondents and Marketing Officers**

Detached Australian Trade Correspondents and Marketing Officers have no official status but supplement the work of the Trade Commissioner in whose Territory they are located. Correspondents are located in Addis Ababa, Ethiopia; Istanbul, Turkey; Mozambique; Port Louis and Mauritius; Marketing Officers are located in Bombay and Calcutta, India; Brussels, Belgium; Colombo, Ceylon; Dublin, Ireland; Madrid, Spain; Rangoon, Burma; Rio de Janeiro, Brazil; and Tel Aviv, Israel.

**Trade Commissioners of overseas governments in Australia**

The Trade Representatives of overseas governments in Australia are shown in the following list. Full details of Trade Representatives in Australia are available from the Department of Foreign Affairs, Canberra, A.C.T.

Austria (Sydney)	Mexico (Sydney)
Belgium (Sydney, Melbourne, Perth)	New Zealand (Sydney, Melbourne, Canberra, Brisbane, Perth)
Britain (Canberra, Sydney, Melbourne, Brisbane, Adelaide, Perth)	Norway (Canberra)
Bulgaria (Sydney)	Pakistan (Sydney)
Canada (Sydney, Melbourne)	Peru (Canberra)
People's Republic of China (Canberra)	Philippines (Sydney, Melbourne)
Czechoslovakia (Sydney)	Poland (Sydney)
Finland (Sydney)	Romania (Sydney)
France (Sydney, Melbourne)	Singapore (Sydney)
Greece (Sydney)	South Africa, Rep. of (Melbourne)
Hungary (Sydney)	Spain (Sydney)
Italy (Sydney, Canberra, Melbourne)	Sri Lanka (Sydney)
Indonesia (Sydney, Canberra)	Sweden (Sydney, Melbourne)
Japan (Canberra)	United States of America (Sydney, Melbourne)
Malaysia (Sydney)	U.S.S.R. (Canberra)

**Commonwealth Migration Offices overseas**

The Department of Immigration has established offices overseas to handle migration matters, and in some countries regional officers are provided. Inquiries and applications may also be made at any Australian diplomatic, consular or trade post overseas. Full details are available from the Department of Immigration, Canberra, A.C.T.

## CHAPTER 7

### POPULATION

This chapter includes statistics of the distribution, growth and structure of the population and statistics of the numbers and characteristics of overseas arrivals and departures. More detailed figures will be found in the bulletin *Demography* (4.9), and *Overseas Arrivals and Departures* (4.1 and 4.23), and current statistics are published in the *Monthly Review of Business Statistics* (1.4), the *Quarterly Summary of Australian Statistics* (1.3), and the mimeographed series *Summary of Vital and Population Statistics* (4.11) and *Overseas Arrivals and Departures* (4.3). The final detailed results of each population census are published in a series of printed volumes and parts (*see* list for 1966 and 1971 censuses at end of this Year Book, *also* the chapter Miscellaneous—Statistical and other official publications of Australia).

With the proclamation of the *Constitution Alteration (Aboriginals)* 1967 on 10 August 1967 the provision in Section 127 of the Constitution requiring the exclusion of Aborigines in reckoning the numbers of the people of the Commonwealth or of a State or other part of the Commonwealth, was repealed. Accordingly, population statistics for all dates subsequent to 10 August 1967 no longer exclude full-blood Aborigines. Estimates for earlier periods back to 30 June 1961 have also been revised to include these Aborigines.

Particulars of the Aboriginal population are given on pages 142–3 in this chapter.

#### Types of population statistics

Statistics of the population and its characteristics for Australia or the component States and Territories or other constituent areas at specific dates are divided in four main ways.

- (i) *Those ascertained by census enumeration.* The population censuses result in comprehensive statistics of characteristics of the population, such as age, sex and birthplace.
- (ii) *Those ascertained by 'population counts'.* From time to time in specific areas there are additional enumerations of the population, which are known as population counts, because normally very little information other than the number of persons and their sex is obtained.
- (iii) *Current estimates of number, sex and age.* Estimates are prepared for dates subsequent to a census, taking account of natural increase and net migration since the last census.
- (iv) *Projections of the population.* Projections of the population and its age/sex structure are prepared from time to time, based on current estimates of population by age and sex and on assumptions about future trends in mortality, fertility and net migration.

#### The census

In Year Book No. 53 a special article was included outlining the history, purposes, legal basis, organisation, and publication of results of population censuses in Australia (*see* pages 164–70 of that issue).

##### Early 'musters'

Although regular censuses were not instituted in the several colonies until the years specified in the table below, population returns in one form or another have existed from a very early period in the history of Australia. The earliest enumerations were known as 'musters', and although the actual results of very few of them have been preserved, it is probable that during the early days of colonisation they were of frequent occurrence. The first official 'muster' was taken in 1788 soon after the new settlement at Sydney Cove was formed, and in 1803 the first 'muster' of convicts in Van Diemen's Land (now Tasmania) was conducted.

##### Development of the census

The first regular census in Australia was taken in New South Wales in November 1828, and included the population of Moreton Bay (now Queensland) but not Van Diemen's Land (Tasmania). Particulars were asked concerning the names, ages and civil conditions of the inhabitants. The next

census was taken in 1833, and was followed by another in 1836, when arrangements were made for the enumeration of the population of the newly-established settlement at Port Phillip, (Victoria). The first censuses taken in Tasmania, Victoria and Queensland as separate colonies were in 1841, 1854 and 1861 respectively. The first regular census in South Australia was taken in 1844 and in Western Australia in 1848. The 1881 census was the first simultaneous census taken in Australia and formed part of the first simultaneous census of the British Empire.

The following table shows the total population recorded at each census conducted prior to 1891.

POPULATION(a), CENSUSES IN AUSTRALIA, 1828 TO 1886

Date	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

1886- 1 May	..	..	322,853	..	..	..	..	..	..

(a) Excludes full-blood Aborigines. (b) Previously included with New South Wales. (c) Included with South Australia for the censuses of 1866, 1871 and 1876. Actually Northern Territory was not transferred to the Commonwealth until 1 January 1911.

### Australia-wide censuses

State and Territory populations recorded at the Australia-wide censuses taken over the period 1881 to 1971 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) and Territories as they existed at the date of each census, except that the Northern Territory has been shown separately from South Australia for the censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in the chapter Discovery, Colonisation and Federation of Australia (page 5).

At censuses up to 1966, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between recent censuses, the 1961 and 1966 population in the following tables has been amended to include Aborigines and therefore differs from the 1961 and 1966 population previously published.

POPULATION, BY SEX: AUSTRALIAN CENSUSES, STATES AND TERRITORIES

## Population estimates

The estimated population for Australia as a whole takes account of natural increase and net overseas migration since the latest census. The population in each State and Territory is estimated by adding to the population ascertained at the census the recorded natural increase and the net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of residence under child endowment procedures or Commonwealth electoral procedures or are indicated by the results of any special count. As records of migration by State or Territory are not complete, the estimated State and Territory populations so derived are approximate.

Estimates carried forward in this way eventually reach the point when another census is taken, and the numbers so ascertained supersede those resulting from the estimates. In the light of the census results the estimates for the newly completed intercensal period are revised to adjust for the differences between the new census result and the population at the census date estimated on the basis of the previous census. This is to bring intercensal estimates into line with the two census results and thus effect adjustment for unrecorded or inaccurately recorded movement of population in the intercensal period. Such a revision is made when the preliminary (field count) results of a census become available. Further revision may be necessary when the final results of a census become available. The final results of the Census of Population and Housing of 30 June 1971 have been taken into account in the population estimates for dates subsequent to the Census of 30 June 1966.

Final revised estimates become the permanent population estimates. A mean population for twelve month periods is calculated by the method described on page 133. As populations at specific dates are used in these calculations, consequential revisions are made to mean populations when estimates for specific dates are revised as described above.

The method used for estimating State and Territory populations, as described above, is different from that used prior to June 1961 (for particulars *see* Year Book No. 52, page 191). Population estimates subsequent to the 1961 Census are based on a method which excludes holiday, business or other similar short-term movements between States and Territories since the census. As a consequence, marked quarterly seasonal movements in some States due to interstate holiday movements are reflected in population figures prior to 1961 but not for subsequent years. This has some effect on the continuity of the series of mean population figures and should be borne in mind when making calculations which use mean populations as a basis (*see* page 133). Since June 1961 such movements affect the estimates only in so far as people who were on holiday or other short-term interstate travel at the time of the Census are counted in the population of the State or Territory where they spent Census night. However, there are seasonal features in the movement of the populations of States and Territories due to movements of visitors from overseas and of Australians travelling overseas for holiday, business or other similar short-term periods.

(a) Excludes full-blood Aborigines before 1961. The final results of the Census of 30 June 1971 have been taken into account in the preparation of estimates for dates after the Census of 30 June 1966. See text page 129.

The estimated population at 31 December each year from 1788 to 1946 is shown in *Demography*, Bulletin No. 67, 1949, and for the period 1901 to 1970 in *Demography*, Bulletin No. 86 (see also Statistical Summary in this Year Book). A graph illustrating the growth of the population of Australia and of each State and Territory appears on plate 17, page 127.

NOTE, Additional information about density and masculinity appears later in this chapter.

### Elements of increase

The 'total increase' of the population is obtained by combining 'natural increase', i.e. the excess of births over deaths, with 'net migration', i.e. the excess of arrivals over departures. Comparison of the total increase so obtained with that derived by subtracting the population recorded at one census from that recorded at the next census reveals differences which are attributable partly to differences in the coverage of the census enumerations, and partly to deficiencies in the records of the elements of increase.

In the following table figures for increase in total population include, in addition to the recorded natural increase and net overseas migration gain, adjustments to make the series of increases agree with total intercensal increases revealed by successive censuses (up to the Census of 30 June 1971). The adjustment reflects the combined net error in the recording of births, deaths and migration during the five year period and in the census enumerations.

POPULATION: ELEMENTS OF INCREASE, AUSTRALIA, 1946 TO 1972

Period		Natural increase (a)	Net overseas migration gain(b)	Increase in total population(c)

1972	. .	155,209	27,847	85,949	97,107	183,056

(a) Excess of births registered over deaths registered. From September 1939 to June 1947, deaths of defence personnel whether overseas or in Australia are included. Excludes full-blood Aborigines before 1961. (b) Excess of recorded overseas arrivals over recorded overseas departures. Excludes troop movements for the period September 1939 to June 1947. (c) Increase in total population as recorded at censuses or as estimated for intercensal periods. Excludes full-blood Aborigines before 1961.

### Rate of population growth

In the following two tables natural increase refers to the excess of births over deaths, net migration refers to excess of overseas arrivals over departures (excluding overseas movement of defence personnel for the period of September 1939 to June 1947) and total increase is the sum of natural increase and net migration together with adjustments to make the series of increases agree with total intercensal increases revealed by successive census results (up to the Census of 30 June 1971).

Average annual rates of population growth for periods greater than one year are calculated on the compound interest principle. If  $P_0$  and  $P_t$  are populations at the beginning and end of a  $t$ -year period, and  $r$  is a rate, then  $P_t = P_0 (1 + r)^t$ . The average annual percentage rate of population growth is thus

$$100 \left( \sqrt[t]{\frac{P_t}{P_0}} - 1 \right)$$

The average annual rate of natural increase and net migration is computed by dividing the average annual rate of total increase between its components in proportion to the fraction of total increase due to each component during the period. Differences between the sum of the rates of natural increase and of net migration and the rate of total increase are due to the intercensal adjustment.

Rates of natural increase and net migration are more conventionally shown as rates per 1,000 of mean population. Figures prepared on this basis are shown in the table on page 133. Crude birth and death rates, also calculated as rates per 1,000 of mean population, are shown in Chapter 8 (see pages 166 and 177).

**POPULATION: ANNUAL RATE OF GROWTH, AUSTRALIA  
1946 TO 1972**  
(Per cent)

<i>Period</i>	<i>Natural increase(a)(b)</i>	<i>Net migration</i>	<i>Total increase(b)</i>
<b>Average annual rate—</b>			
1946–50 . . .	1.36	0.91	2.26
1951–55 . . .	1.38	0.95	2.31
1956–60 . . .	1.40	0.83	2.22
1961–65 . . .	1.27	0.74	1.98
1966–70 . . .	1.11	0.91	1.94
<b>Annual rate—</b>			
1968 . . .	1.10	0.95	1.96
1969 . . .	1.18	1.06	2.15
1970 . . .	1.16	0.99	2.07
1971 . . .	1.31	0.67	1.93
1972 . . .	1.20	0.22	1.42

(a) From September 1939 to June 1947, deaths of defence personnel, whether overseas or in Australia, are included. (b) Excludes full-blood Aborigines before 1961.

The average annual rate of population growth during the present century has been 1.73 per cent, but the results from year to year have deviated widely from this figure. In the following table the period 1 January 1901 to 31 December 1972 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population.

**POPULATION(a): PERIODIC RATES OF GROWTH, AUSTRALIA  
1901 TO 1972**

<i>Period</i>	<i>Interval (years)</i>	<i>Total increase (‘000)</i>	<i>Average annual numerical increase (‘000)</i>	<i>Average annual rate of population growth (per cent)</i>		
				<i>Natural increase</i>	<i>Net migration</i>	<i>Total</i>
1901 to 1913 . . .	13	1,128	87	1.55	0.49	2.04
1914 to 1923 . . .	10	862	86	1.49	0.15	1.64
1924 to 1929 . . .	6	680	113	1.26	0.62	1.88
1930 to 1939 . . .	10	569	57	0.82	0.02	0.85
1940 to 1946 . . .	7	513	73	0.98	0.01	1.01
1947 to 1952 . . .	6	1,222	204	1.37	1.19	2.54
1953 to 1961 . . .	9	1,862	207	1.40	0.79	2.17
1962 to 1970 . . .	9	2,021	225	1.16	0.85	1.95
1971 and 1972 . . .	2	428	214	1.25	0.44	1.68

(a) Excludes full-blood Aborigines before 1962.

Up to 1913, the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards by increased government assistance, was responsible for the comparatively high annual rate of 2.04 per cent during this period. The 1914–18 War was a dominating influence in the decade 1914–23, and its effects can be seen in the reduction of the rate from 2.04 to 1.64 per cent. From 1924 to 1929, more settled and prosperous conditions were experienced: encouraged migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth rate, the annual rate of growth rose to 1.88 per cent. After 1929, came the economic depression, and immigration ceased—in fact, Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the annual rate of growth of the population fell to 0.85 per cent. With the outbreak of the 1939–45 War, Australia entered a new phase in her demographic history. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each year from 1940 to 1945, and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The period 1947 to 1961 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in very high net

gains in each of the four years 1949 to 1952. During the period 1962 to 1970 net migration has continued at the same rate as in the previous decade but there was a decline in the crude birth rate and rate of natural increase from 1962. In recent years growth has been maintained by high natural increase offsetting a decline in net migration.

Rates of population growth from 1901 are shown for each State and Territory of Australia in the bulletin, *Demography* (see also Statistical Summary in this Year Book). Estimated rates of growth of the population of Australia in comparison with those for other countries of the world for the period 1963-1971 are shown in the table on page 148.

**RATES OF NATURAL INCREASE AND NET  
MIGRATION(a): AUSTRALIA, 1946 TO 1972**

Period	Rate of natural increase(b)	Rate of net migration
Average annual rate—		
1946-50 . . . . .	13.63	8.96
1951-55 . . . . .	13.61	9.18
1956-60 . . . . .	13.81	8.13
1961-65 . . . . .	12.60	6.90
1966-70 . . . . .	11.05	8.18
Annual rate—		
1968 . . . . .	10.93	9.40
1969 . . . . .	11.71	10.51
1970 . . . . .	11.53	9.81
1971 . . . . .	12.96	6.62
1972 . . . . .	11.95	2.14

(a) Natural increase or net migration during each period per thousand of mean population for the period. (b) From September 1939 to June 1947, deaths of defence personnel, whether overseas or in Australia, are included. Excludes full-blood Aborigines before 1961.

**Mean population**

The mean populations given below are calculated for twelve-month periods to provide an average basis for calculations requiring allowance for the continuous change in population figures during such periods. Mean populations are used for the calculation of rates such as crude birth, death and marriage rates and per capita rates of consumption, income, etc.

The mean population for any year has been calculated by the formula:

$$\text{Mean population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d*, and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g. in the case of a calendar year, 31 December of the preceding year, and 31 March, 30 June, 30 September and 31 December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, and *e*.

**MEAN POPULATION: CALENDAR YEARS, STATES AND TERRITORIES, 1968 TO 1972**

## Geographic distribution of population

### Criteria for the delimitation of urban boundaries

The criteria used for delimiting urban centres, were determined by the Thirty-First Conference of Statisticians, October 1969, and are as follows.

At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named *urban centres* and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.

Resolution 3 stated that around each urban centre with a population of at least 100,000, a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete local government areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.

#### In delimiting urban centres with 25,000 or more population:

- (a) all contiguous census collector's districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, statistical division, local government area and other administrative boundaries shall be disregarded;
- (b) a collector's district which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;
- (c) a collector's district consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with collector's districts which are themselves urban;
- (d) any collector's district which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by collector's districts which are themselves urban;
- (e) any area which is completely surrounded by collector's districts which are urban must itself be classified as urban;
- (f) where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting collector's district or districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) large peripheral collector's districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as collector's districts.

#### In delimiting urban centres with less than 25,000 population:

- (a) the urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) all continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3 (*see above*), where appropriate, particularly in urban centres which are approaching a population of 25,000.

In selecting the boundaries for the splitting of collector's districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones;

- (a) For State capital cities, nomenclature for the area delimited by—
  - (i) the urban, and
  - (ii) the outer boundary

shall be (using Melbourne as the example)—

- (i) Urban Melbourne, and
- (ii) Melbourne Statistical Division;
- (b) In other cases where the dual boundary concept is employed, the nomenclature shall be (using Newcastle as the example)—
  - (i) Urban Newcastle, and
  - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned.

These criteria were similar to those used at the 1966 Census, the main changes being:

- (a) the elimination of the 'indentation' provision. At the 1966 Census an indented area was included within the urban centre if the distance across the 'neck' was less than one mile;
- (b) a re-interpretation of the 'enclosure' rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround was the sea or a wide unbridged river this rule was not applied.

At the 1971 Census these concepts were used to determine the urban boundaries of all those centres expected to reach 25,000 population in 1971. These were Sydney, Broken Hill, Maitland, Newcastle, Tamworth, Wagga Wagga, Gosford-Woy Woy and Wollongong in New South Wales; Albury-Wodonga, which is in both New South Wales and Victoria; Melbourne, Geelong, Ballarat and Bendigo in Victoria; Brisbane, Bundaberg, Cairns, Mackay, Rockhampton, Toowoomba and Townsville in Queensland; Gold Coast, which is in both New South Wales and Queensland; Adelaide and Whyalla in South Australia; Perth in Western Australia; Hobart and Launceston in Tasmania; Canberra, which is in both the Australian Capital Territory and New South Wales; and Darwin in the Northern Territory.

A change in nomenclature has been made with the introduction of the term *major urban* in place of *metropolitan*. At the 1966 Census, the latter covered the capital city urban areas. At the 1971 Census *major urban* covers population living in urban centres of 100,000 or more population. Thus in New South Wales the term covers urban population in Sydney, Newcastle, Wollongong and that part of the Municipality of Queanbeyan which is included in Urban Canberra. In Victoria it refers to the urban population in Melbourne and Geelong, and in other States the capital city urban population.

The population classified as *rural* at the 1971 Census comprises those persons who were not enumerated in urban centres and who were not classified as *migratory*. The migratory population comprises those persons who, on the night of 30 June, were travelling on board ships in Australian ports, or on board ships travelling between Australian ports, or were enumerated on long-distance trains, motor coaches, or on aircraft.

#### URBAN AND RURAL POPULATION(a): STATES AND TERRITORIES, CENSUS 30 JUNE 1971

(a) Includes Aborigines. For definition of urban, rural, etc., see explanation preceding this table.

**Classification of urban centres by size**

The following table classifies the urban centres in Australia into grades of size of population at the Censuses of 30 June 1966 and 1971. Corresponding details for each State and Territory at the 1966 Census were included in Year Book No. 54, page 127.

A table showing the aggregate urban population at the 1961 Census of all cities and towns outside the metropolitan area of each State with 2,000 or more, and 3,000 or more, urban inhabitants was included in Year Book No. 51, page 267. A table showing similar data for the 1954 Census was included in Year Book No. 47, page 295 and one for the 1947 Census in Year Book No. 40, page 334. Comparisons between these various tables can be made only if allowance is made for changes in the status and structure of local government areas and for changes in the manner of determining urban population at each census.

(a) Includes Aborigines.

(b) Urban centres classified as such on grounds other than population and density.

**Selected population centres**

The following table shows the population of selected population centres in each State and Territory of Australia at the censuses of 30 June 1966 and 1971.

At the Census of 30 June 1966 new methods were used to define the boundaries of capital city and other urban areas for statistical purposes. These methods, and modifications made for the 1971 Census, are described on pages 134-5.

Annual post-censal population estimates are made for all local government areas. Copies of publications showing the estimated population of local government areas, statistical divisions and statistical districts can be obtained from the office of the Deputy Commonwealth Statistician in each capital city.

For the urban centres recognised at the census but not definable in terms of local government area boundaries, only a few post-censal estimates are available. For the capital cities and for some other cities and towns the definition of urban boundaries has resulted in the urban population as delineated at the 1971 Census being significantly larger than the population within the corresponding local government area of the same name. For further details see also *Field Count Statements Nos. 3-9, Census of Population and Housing, 30 June 1971.*

(a) Unless otherwise indicated as 'Statistical Division', 'Statistical District' or 'Urban'. (b) Population at Census date. (c) The population of all component local government areas may be obtained from the relevant publication issued by the office of the Deputy Commonwealth Statistician of the State concerned. (d) That part of urban Albury-Wodonga in New South Wales. The total population of urban Albury-Wodonga was 37,931 at 30 June 1971. (e) That part of Blue Mountains which lies outside Sydney Statistical Division. (f) Includes part (299 persons at 30 June 1971) of The Entrance urban centre. (g) Included in Canberra Statistical District. (h) In October 1971 the boundary of Mildura City was extended to include part of the adjoining shire, involving a gain of 989 persons. (i) Includes part (229 persons at 30 June 1971) of Urban Moe-Yallourn. (j) Includes Ipswich; the population of the City of Ipswich was 63,000 at 30 June 1972. (k) That part of urban Gold Coast in Queensland. The total population of urban Gold Coast was 74,240 at 30 June 1971. (l) The estimated populations at 30 June 1972 of urban centres (as delineated at 30 June 1971) are: Hobart 130,980; Burnie-Somerset, 20,380; Devonport, 18,630; Launceston, 62,250. (m) Figures given for local government area are for the proposed Greater Darwin area. (n) Includes Queanbeyan in New South Wales. (o) That part of urban Canberra in the Australian Capital Territory. Population figures for Canberra City District are: 141,795 at 30 June 1971 and 156,100 at 30 June 1972.

## Principal cities of the world

The following table shows the population of the world's largest cities at the latest available date. The data refer to urban agglomerations, where available; in other cases the so-called city proper. The urban agglomeration is defined on page 23 of the United Nations *Demographic Yearbook* 1971, from which most of the figures in the table have been taken, as including also the suburban fringe or thickly settled territory lying outside of, but adjacent to, the city boundaries. (See also the Technical Notes on Statistical Tables and footnotes to the table in the *Demographic Yearbook*). International comparability is limited by different methods used in constructing the estimates, variations in national concepts of urban boundaries, and the different dates to which the statistics refer.

## Sex distribution of the population

The number of males to each hundred females has been adopted as a measure of the 'masculinity' of the population. With the exception of some dislocation arising from the two World Wars, there was a continuous diminution of the masculinity of the population until 1945. This resulted mainly from a decline in the proportion of overseas-born in the population and in their masculinity. At the census of 1901 the overseas-born comprised 23 per cent of the population and had a masculinity of 151 per cent. By 1947 these proportions had declined to 10 per cent and 127 per cent, with a consequent decline in the masculinity of the total population. Although the proportion of overseas-born has increased since 1947, with the resumption of immigration, its masculinity has declined and there has thus been little change in the masculinity of the total population.

POPULATION(a): MASCULINITY, STATES AND TERRITORIES, DECEMBER 1945 TO 1972  
(Number of males per 100 females)

(a) Includes full-blood Aborigines.

Estimates of the age distribution of population, based on the census distribution of ages and records of births, ages at death, and ages of migrants, are made for intercensal years. The following estimated age distribution of the Australian population at 30 June 1972 will be subject to revision when the 1976 Census results for distribution of ages become available.

**POPULATION: ESTIMATED AGE DISTRIBUTION(a)**  
**AUSTRALIA, 30 JUNE 1972**

Age last birthday (years)	30 June 1972		
	Males	Females	Persons
0-4 . . .	645,029	618,371	1,263,400

<b>Total . . .</b>	<b>6,512,745</b>	<b>6,446,339</b>	<b>12,959,084</b>

(a) Based on the age distribution of all persons enumerated at the Census of 30 June 1971 adjusted for mis-statement of age and on subsequent births, recorded ages at death and recorded ages of migrants.

### General characteristics of the population, censuses 1966 and 1971

Particulars of the characteristics of the population of Australia at the 1971 Census compared with the 1966 Census are shown in this section. Information from the 1966 Census for the individual States and Territories is shown in Year Book No. 54. Information concerning the industry, occupational status, and occupations of the population as recorded at the 1971 Census is given in the chapter Employment and Unemployment, and on dwellings in the chapter Housing and Building.

The characteristics dealt with in the following pages are: age; marital status; country of birth; period of residence in Australia of overseas born; nationality; religion. Further details are available in a series of bulletins which are available from the Bureau. All tables include particulars of full-blood Aborigines.

## The Aboriginal population of Australia

In Year Book No. 17, pages 951–61, a brief account was given of the Australian Aboriginal population, its origin, its numbers as estimated from time to time and the steps taken for its protection. On pages 914–16 of Year Book No. 22 particulars were shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appeared on pages 687–96 of Year Book No. 23.

Aborigines have been enumerated in all censuses of the Commonwealth, but the degree of coverage and information obtained has varied substantially since 1911. Since the census taken in 1933 the adequacy of the particulars obtained has improved progressively as a result of an increasing number of Aborigines coming into contact with more populated areas.

At the 1966 Census extensive arrangements were made to obtain as full a coverage of Aborigines as possible and to enumerate fully those Aborigines 'out of contact'. Throughout Australia the assistance of Aboriginal welfare bodies, mission superintendents, station owners, patrol officers, and police was sought in an effort to include all Aborigines and to obtain complete information about them, e.g. in the Northern Territory information was obtained from missions and settlements concerning Aborigines normally resident at such locations but who were absent at the time of the census, and of Aborigines resident at such locations but who normally resided elsewhere. The two sets of information were then reconciled to produce what is considered to be a fairly complete and accurate coverage of Aborigines in the Territory.

### Selected characteristics

For details of certain selected characteristics derived from the 1966 Census see Year Book No. 56, pages 138–42. Details of all characteristics enumerated, together with details for States and Territories, and comparisons between the Aboriginal population and the total population, may be found in the publication *The Aboriginal Population of Australia* (Reference No. 2.23).

At censuses prior to the 1966 Census, the instructions relating to race were insufficient to enable respondents to classify themselves according to degree of race mixture. For example, from 1933 to 1961 persons were asked to state:

'For persons of European Race, wherever born, write "European". For non-Europeans state the race to which they belong, for example, "Aboriginal", "Chinese", "Negro", "Afghan", etc. If the person is half-caste with one parent of European race, write also "H.C.", for example, "H.C. Aboriginal", "H.C. Chinese", etc.'

At the 1966 Census the instructions were redesigned as follows in an endeavour to obtain precise data on race mixture and also to avoid the opprobrium attaching to the term 'half-caste':

'State each person's race. For persons of European race wherever born, write "European". Otherwise state whether Aboriginal, Chinese, Indian, Japanese, etc., as the case may be. If of more than one race give particulars, for example,  $\frac{1}{2}$  European— $\frac{1}{2}$  Aboriginal,  $\frac{2}{3}$  Aboriginal— $\frac{1}{3}$  Chinese,  $\frac{1}{2}$  European— $\frac{1}{2}$  Chinese.'

Investigations made by matching the replies of individuals at the 1961 and 1966 Censuses and by comparing overall census results with data available from the State instrumentalities responsible for Aboriginal welfare suggest that considerable doubt attaches to the validity of the replies given to the question on race at the 1966 and previous censuses.

It was concluded:

- (a) that reporting by Aborigines in the 1966 Census was insufficiently precise to differentiate persons who are 50 per cent Aboriginal from those who are more than 50 per cent Aboriginal;
- (b) that similar dissections obtained at censuses prior to the 1966 Census were similarly imprecise; and
- (c) that even a total of all persons who are 50 per cent or more Aboriginal may be suspect, primarily because of the inclusion of persons who are less than 50 per cent Aboriginal and described themselves simply as 'Aboriginal', but also because of persons who are 50 per cent Aboriginal stating their race as 'European'.

Nevertheless, the statistics herein, which relate to persons who have described themselves as 50 per cent or more Aboriginal or simply as 'Aboriginal', are presented subject to these limitations.

The following table shows particulars of the Aboriginal population of Australia at the Censuses of 30 June, 1954, 1961, and 1966. Because of some doubt about the accuracy of separate figures for full-blood and half-blood Aborigines as shown in previous issues of the Year Book, their separate

publication has been discontinued. Torres Strait Islanders are not included in this table, but are included in the census figures shown elsewhere in this chapter. At the 1966 Census they numbered 5,403 persons.

**ABORIGINAL POPULATION(a): STATES AND TERRITORIES  
CENSUSES, 1954, 1961 AND 1966**

State or Territory	Census, 1954(a)			Census, 1961(a)			Census, 1966(b)		
	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons
New South Wales	6,278	5,935	12,213	7,494	7,222	14,716	7,343	6,876	14,219
Victoria	691	704	1,395	899	897	1,796	856	934	1,790
Queensland	8,368	7,781	16,149	10,146	9,550	19,696	9,644	9,359	19,003
South Australia	1,675	1,537	3,212	2,607	2,277	4,884	2,914	2,591	5,505
Western Australia	6,564	6,135	12,699	8,351	7,925	16,276	9,505	8,934	18,439
Northern Territory	5,990	5,798	11,788	9,013	8,747	17,760	10,651	10,468	21,119
Australia(c)	29,716	28,006	57,722	38,612	36,697	75,309	40,984	39,223	80,207

(a) Prior to the 1966 Census, Aborigines 'out of contact' were not enumerated and estimates of these were made by authorities responsible for native welfare. It is estimated that at the 1954 Census 12,956 Aborigines (of which 2,311 were estimated to be in Queensland, 1,760 in South Australia, 3,516 in Western Australia and 5,369 in the Northern Territory) were not contacted by census collectors and were not included in the Census. Increasing numbers, however, were coming into contact and at the 1961 Census it is estimated that 2,000 Aborigines in Western Australia and 1,944 in the Northern Territory were not contacted by census collectors. At the 1966 Census, efforts were made to obtain complete coverage. (b) The figures relate to those persons who described themselves in the 1966 Census as being 50 per cent or more Aboriginal or simply as 'Aboriginal'. For reasons stated above, it has not been possible to differentiate between persons who are 50 per cent Aboriginal from those who are more than 50 per cent Aboriginal. (c) Includes Tasmania and the Australian Capital Territory.

### 1971 Census of Population and Housing

In view of the limitations on the statistics described above, an attempt was made for the 1971 Census to design a question which would obtain more meaningful data on the Aboriginal population. The advice of expert bodies approached was that such data would be obtained by asking each respondent to indicate the race to which he considered himself to belong.

In addition the repeal of Section 127 of the Constitution in 1967 removed the need for the question on racial origin to identify 'Aboriginal natives'. ('Aboriginal natives', the term used in the Constitution, was interpreted as those persons possessing more than 50 per cent Aboriginal blood).

The question at the 1971 Census read:

What is this person's racial origin?

(If of mixed origin indicate the one to which he considers himself to belong)

(Tick one box only or give one origin only)

- ☐ European origin
- ☐ Aboriginal origin
- ☐ Torres Strait Islander origin
- ☐ Other origin (give one only).....

The following table shows particulars of the Aboriginal population of Australia at the Census of 30 June 1971. The statistics for Aborigines are not on a comparable basis with those from previous Censuses (see above).

(a) For definition of urban, rural, etc., see explanation given on page 134.

### Projections of the population

Projections are sometimes distinguished from forecasts on the basis that the former are extrapolations of existing populations assuming the continuance of past trends of births, deaths, and migration. Forecasts may also take into account expectations of trends in other factors such as employment opportunities, government policy or technological advance.

The method chosen for these projections is similar to the method used for the current estimates of the population except that hypothetical figures of births, deaths and net migration are used instead of recorded births, deaths and net migration.

The assumptions employed in the latest set of projections, and summaries of the results, are given below. They cover the years 1972 to 2000, taking 1970 as the base year.

*Fertility.* For the projections of base year populations, the age-specific birth rates and the masculinity of births recorded in *each State and Territory* in 1970 were used for all future years. Additional female population resulting from future migration was assumed to experience the age-specific birth rates and masculinity of births recorded in 1970 for *Australia as a whole*. The projected births for Australia are the sum of the projected births for each State and Territory.

*Mortality.* It was assumed that the average age-specific mortality rates recorded in *each State, Territory and Australia* in the three years 1965 to 1967, related to the 1966 Census population, would remain unchanged. The projected deaths for Australia are the sum of the projected deaths for each State and Territory. Deaths of persons in the migration component are projected on the basis of the *Australian* 1965-67 mortality experience.

*Migration.* The age-sex composition of all future net interstate and/or overseas migration was assumed to be the average age-sex distribution of the net overseas migration (excess of total arrivals over total departures) recorded for Australia as a whole for the five years ended 30 June 1970.

It has been assumed that the future migration component, for a State, Territory or Australia, will be subject for the whole of the projection period, to the same age-specific fertility and mortality rates as experienced by the Australian population as a whole in 1970 (fertility) and 1965-67 (mortality), regardless of the State or Territory to which the people move, or the State, Territory or country whence they came.

Projections of the population resulting from net migration at a rate of 100,000 persons per annum are shown in the last column of the next table. The table also provides projected populations exclusive of future migration. The use of a single set of assumptions regarding fertility, mortality and age-sex composition of the migration component enables pro-rata calculations to be made of the migration components of projected State and Territory populations, as well as for Australia as a whole, to any chosen constant level.

**PROJECTION OF THE POPULATION EXCLUDING OVERSEAS OR INTERSTATE MIGRATION AFTER 30 JUNE 1970: STATES, TERRITORIES AND AUSTRALIA; AND EXTRA POPULATION RESULTING FROM NET MIGRATION AT 100,000 PERSONS PER ANNUM, 1972 TO 2000**

(a) The projected net gain from migration for any State or Territory resulting from sustained net migration at any other level may be calculated *pro rata* from the figures in this column. (b) Estimate based on the Census of 30 June 1966 and subsequent births, deaths and migration, adjusted in accordance with preliminary results of the 1971 Census. (c) 1971 Census, preliminary results. These figures include migration during the twelve months ended June 1971.

To indicate the effects on total population if recent migration levels were to continue unchanged, projections of population resulting from migration have been made for the States, Territories and Australia, using as annual intake levels the estimated average net interstate and overseas migration recorded for the five years ended 30 June 1970. These average annual levels are shown in the following table, together with selected projections of the populations of the States, Territories and Australia, inclusive of future migration at these levels.

**PROJECTION OF THE POPULATION INCLUDING ANNUAL OVERSEAS AND INTERSTATE NET MIGRATION AFTER 30 JUNE 1970 AT AVERAGE 1966-70 LEVELS: STATES, TERRITORIES AND AUSTRALIA 1972 TO 2000**

('000 persons)

(a) Net annual migration gain allocated to each State or Territory at the average annual 1966-70 levels. (b) Estimate based on the Census of June 1966 and subsequent births, deaths and migration, adjusted in accordance with preliminary results of the 1971 Census. (c) 1971 Census, preliminary results.

### Population of External Territories

Ordinances of the individual External Territories under the control of Australia provide for a census of the population to be taken on the day prescribed for the taking of a census in the Commonwealth of Australia. The following table shows the population of the Territories of Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Papua and the Trust Territory of New Guinea at the Census of 30 June 1971 and as estimated at 30 June 1972.

POPULATION: EXTERNAL TERRITORIES, 30 JUNE 1971 AND 1972

Territory	Census 30 June 1971(a)			Estimate 30 June 1972
	Males	Females	Persons	Persons
Christmas Island . .	1,732	959	2,691	2,741
Cocos (Keeling) Islands .	312	306	618	637
Norfolk Island . . .	824	859	1,683	1,694
Papua—				
Indigenous population .	n.a.	n.a.	n.a.	686,618
Non-indigenous population	n.a.	n.a.	n.a.	n.a.
<i>Total, Papua . . .</i>	<i>n.a.</i>	<i>n.a.</i>	<i>n.a.</i>	<i>(b)n.a.</i>
Trust Territory of New Guinea—				
Indigenous population .	n.a.	n.a.	n.a.	1,845,264
Non-indigenous population	n.a.	n.a.	n.a.	n.a.
<i>Total, New Guinea .</i>	<i>n.a.</i>	<i>n.a.</i>	<i>n.a.</i>	<i>(b)n.a.</i>

(a) Results from the 1971 Census of Papua New Guinea are not yet available. Estimates of population for 30 June 1971 are as follows: Indigenous; Papua, 668,864; New Guinea, 1,796,979; Total Non-indigenous, 53,132; Total population, Papua New Guinea, 2,518,975. The estimates for both 1971 and 1972 are subject to revision when 1971 Census results become available.  
(b) The total population for Papua New Guinea was 2,581,032 at 30 June 1972.

Further particulars concerning the indigenous populations of the Territories are given in the chapter The Territories of Australia.

### International statistics of population

In the following tables the population, density, rate of growth, natural increase and masculinity are shown in respect of all countries which had an estimated population of at least ten million persons in 1971, excepting for the group 'Oceania', which is treated in more detail. The source of these figures for all countries except Australia is the 1971 *Demographic Yearbook*, which is prepared and published by the Statistical Office of the United Nations. The tables include figures varying in reliability and accuracy, there being considerable variation in the quality of demographic statistics between countries, but this information has been shown to provide a guide as to the magnitude and trend of population movements in overseas countries.

Where the information available to the Statistical Office of the United Nations relates to only part of the population of a country, the population characteristic (e.g. rate of growth), or vital statistics rate (e.g. marriages), has been omitted from the tables, and this is indicated by a footnote.

For fuller particulars of the differences in the quality of the statistics and their reliability and for other qualifications, reference should be made to the detailed explanations contained in the *Demographic Yearbook* of the Statistical Office of the United Nations (see particularly Technical Notes on Statistical Tables and footnotes to the tables).

### Population, rate of growth and density: world, continents and regions

In preparing the population figures shown below the Population Branch of the United Nations includes revisions made to the estimates from time to time as new data become available, for example, from a census. Adjustments for under-enumeration have also been made. Reference should be made to the description contained in the United Nations *Demographic Yearbook*, 1971 (pages 15-16), regarding the scheme of regionalisation.

### POPULATION, DENSITY AND RATE OF INCREASE FOR THE WORLD AND CONTINENTS—SELECTED YEARS

(Source: United Nations *Demographic Yearbook*, 1971)

Continent and region	Population						Annual rate of increase 1963-71 (per cent)	Average annual increase 1963-71 (millions)	Density (persons per square mile) 1971

### Population, density, rate of growth, natural increase, and masculinity of selected countries

Certain details of the population of the more populous countries within continental groups are shown in the following table. As explained above, reference should be made to the detailed comments contained in the United Nations *Demographic Yearbook*, 1971, regarding geographical units used, boundaries of areas, reliability of estimates, etc.

**POPULATION, DENSITY, RATE OF INCREASE, NATURAL INCREASE AND  
MASCULINITY—SELECTED COUNTRIES**

### Overseas arrivals and departures

This section contains summary statistics of total overseas arrivals and departures and detailed statistics of permanent movement. For information on passengers in other categories, see Chapter 12, Transport, Communication and Travel.

More detailed statistics of overseas arrivals and departures, covering country of residence, country of embarkation or disembarkation, mode of travel, month of arrival or departure, etc., are shown in the tables of Section II, Overseas Arrivals and Departures, of the annual bulletin *Demography* and for 1972 and later years, in an annual mimeographed bulletin *Overseas Arrivals and Departures*. Mimeographed bulletins are also issued monthly and quarterly.

#### Overseas arrivals and departures since 1941

Earlier issues of the Year Book contain tables showing the increase of population by net migration from 1861 to the latest date, while information for individual years from 1901 is published in the annual bulletin *Demography* (see also Statistical Summary of this Year Book). Australian statistics of overseas arrivals and departures exclude aircraft and ships' crews, persons on pleasure cruises commencing and finishing in Australia on ships not then engaged in regular voyages and persons who pass through on the same ship or flight or who change flights without leaving the airport's transit area. The following table shows arrivals and departures since 1941, and refers to total movement irrespective of length of stay.

#### OVERSEAS ARRIVALS AND DEPARTURES, BY SEX: AUSTRALIA, 1941 TO 1972

(a) Excludes movements of defence personnel from September 1939 to June 1947.

PLATE 18

**Excess of arrivals over departures**

The excess of total overseas arrivals over departures is one of the elements of population increase taken into account in preparing the estimated population for other than census dates (*see* pages 125 and 131 of this chapter). It is necessary to use statistics of total overseas arrivals and departures for this purpose, because Australian population statistics relate to the total population present in Australia at the date of the census or estimate, and not the population normally resident in Australia (which would include those temporarily overseas and exclude those temporarily visiting Australia).

**Classification of travellers**

Since 1 July 1924 overseas travellers have been classified into two principal categories, distinguishing movements for short terms from movements for longer periods (including permanently). Before 1957 these categories were classified as *temporary* and *permanent*. Thereafter the categories were entitled *short-term* and *permanent and long-term*, but the basis of classification was not changed and the figures are directly comparable for the whole period. For short-term travel, overseas visitors and Australian residents are identified separately.

Revised questions for travellers were introduced in mid-1958, and these enabled the separation, from 1 January 1959, of permanent from other long-term movements and also the identification among the permanent departures of former settlers departing.

The principal categories of overseas movement are as follows:

*Permanent*—consists of persons arriving with the stated intention of settling permanently in Australia (settlers), and Australian residents departing with the stated intention of residing permanently abroad; the latter include *former settlers*, i.e. persons who, on departure from Australia, stated that they had come to Australia to settle, had stayed for a period of twelve months or more and were now departing permanently.

*Long-term*—consists of the arrival of overseas visitors and the departure of Australian residents with the stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more; and the departure of visitors and the return of residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

*Short-term*—consists of all other movements, including the movement of Australian troops irrespective of period of stay, and U.S. troops who visited Australia on rest and recreation leave during the period October 1967 to December 1971.

This classification is based on statements made by the traveller on arrival in, or departure from, Australia. They represent the traveller's intention at that time. Many travellers subsequently change their intentions, and this must be borne in mind in interpreting the statistics.

The numbers so classified since 1 January 1946 are as follows:

#### Permanent movement

In the following paragraphs particulars are given of the persons who on arrival in Australia stated that they came intending to settle, and of Australian residents who on their departure from Australia stated their intention of residing permanently abroad, classified according to nationality, occupation, age, marital status, and State or Territory of intended residence (arrivals) or of last residence (departures).

*State or Territory of intended residence (arrivals) or last residence (departures).* The following table shows the number of settlers arriving in Australia by State or Territory of intended residence and the number of Australian residents departing permanently by State or Territory of last residence, for the years 1970 to 1972. Settlers are asked, on or before arrival, the State or Territory of Australia in which they next intend to stay for twelve months or more. The statements represent the settlers' intentions at the time and these may not be realised. Residents departing permanently are asked the State or Territory in which they last stayed for twelve months or more. The allocation to States and Territories in the table is based on these statements, except that settlers proceeding to the migrant reception centre, Bonegilla, Victoria, were allocated, as far as was practicable, to the State or Territory of their placement from the centre. The migrant reception centre was closed late in 1971.

## IMMIGRATION INTO AUSTRALIA

### Powers and legislation of the Commonwealth

Under Section 51 (xix), (xxvii) and (xxviii) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration, emigration, aliens and the influx of criminals. Immigration into Australia is regulated by the *Migration Act* 1958–1966 which came into force on 1 June 1959.

Any immigrant entering Australia after the commencement of the Act without having been granted an 'entry permit' or who is not within an exempted class is a prohibited immigrant. Exempted persons include diplomatic, consular and trade representatives of other countries, and seamen who enter with leave while their ships are in Australian ports. For the purposes of the Migration Act an immigrant includes a person entering for temporary stay.

An entry permit is normally granted at the port of entry by means of a stamp in the traveller's passport or equivalent travel document. Temporary permits are granted to visitors and persons whose stay is to be of limited duration. For other persons permits are issued without limitation as to stay. A person who is refused an entry permit must not be permitted (by the carrier company) to enter Australia; otherwise the carrier company is liable to a fine of \$1,000.

The Act contains provision for the deportation of persons who enter Australia without an entry permit, who overstay their approved period of residence or who are convicted of crimes.

The Act does *not* affect passport or visa requirements for travel to Australia.

The *Aliens Act* 1947–1966 provides that a register of aliens shall be maintained for every State and mainland Territory of Australia. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration and to notify that Department of their address, occupation, or employment during the month of September each year. They are required to notify marriage within thirty days of marriage taking place. The Act provides also that the consent of the Department must be obtained before an alien may change his surname.

The *Immigration (Guardianship of Children) Act* 1946-1966 provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia (except for certain exempted groups) other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the child welfare authorities in each State and mainland Territory who, as the Minister's delegates under the Act, supervise the welfare of each 'immigrant child'.

## Department of Immigration

### Functions of the Department of Immigration

The functions of the Department of Immigration include: administration of immigration policy; planning immigration programs; consideration of all applications for permanent and temporary residence; formulation of policy in relationship to international organisations and international conventions; Australian citizenship; passports; emigration; deportation; prevention of illegal entry; migrant accommodation; migrant education and settlement; and research into effects of immigration.

### Immigration Program 1972-73

The number of settlers reaching Australia during the financial year 1972-73 should total 110,000, including some 60,000 financially assisted.

### Immigration Policy

The Government's policy gives special emphasis to family reunion and sponsored migration. It also provides for specific national needs. Within Australia, citizenship and the settlement of migrants is of primary importance.

## Assisted migration into Australia

Detailed statistics of assisted migration into Australia are shown in *Australian Immigration: Consolidated Statistics* and *Australian Immigration: Quarterly Statistical Summary* published by the Department of Immigration.

Immigration has been a major factor in Australia's economic growth and since 1945 successive Australian governments have borne a substantial part of the passage costs of selected migrants from overseas countries.

The following tables show total assisted migration since 1947 and arrivals under other assisted passage schemes and arrangements.

### ASSISTED MIGRATION: AUSTRALIA, 1947 TO 1972

Period	Nominated and selected (assisted) arrivals
1947-50 . . . . .	273,195
1951-55 . . . . .	275,241
1956-60 . . . . .	305,517
1961-65 . . . . .	337,132
1966-70 . . . . .	537,478
1965 . . . . .	93,653
1966 . . . . .	89,743
1967 . . . . .	82,247
1968 . . . . .	105,102
1969 . . . . .	125,958
1970 . . . . .	134,428
1971 . . . . .	103,811
1972 . . . . .	63,710

Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, were published in earlier issues of the Year Book (see No. 38, page 576). After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war. Details of assisted migration schemes which have operated since 1947 are shown in earlier issues of the Year Book (see No. 58, page 153).

(b) Includes United States Passage Assistance Programme (U.S.P.A.P.).

**Accommodation of migrants**

Migrants must be assured of accommodation on arrival, unless they have sufficient funds to be independent. For those migrants nominated by relatives or friends this initial accommodation has usually been in private homes. Most of the assisted migrants nominated by the Australian Government are provided with transitory accommodation in migrant hostels operated by Commonwealth Hostels Ltd, a non-profit making Government-sponsored company registered in Victoria. These hostels, which provide a range of services to help migrants to settle in Australia, are progressively being improved to provide accommodation with private facilities for all families. The total capacity of hostels is now about 13,000. A further 2,000 migrants nominated by the Commonwealth can be accommodated in self-contained flats. Hostel accommodation is available to families for up to 12 months, while tenancies of flats are limited to six months. For Commonwealth nominated migrant families wishing to settle in country areas there is an arrangement involving subsidised boarding-house accommodation for up to six months. Single unaccompanied migrant women are provided with subsidised accommodation for up to three months in capital cities in hostels run by organisations such as the Y.W.C.A.

British assisted migrants nominated by State Governments are provided with initial accommodation in reception centres operated by the State immigration authorities. The Commonwealth Government contributes to the capital cost of these establishments on a dollar for dollar basis.

### **Immigration Advisory, Planning and Publicity Councils**

Three bodies have been established to advise the Minister for Immigration on the social, economic and publicity aspects of the immigration program.

The *Immigration Advisory Council*, established in 1947, is representative of a broad cross-section of the Australian community. Members, in general, represent national organisations e.g. the Australian Council of Trade Unions, the Returned Servicemen's League of Australia, and the National Youth Council. The Council advises the Minister on the integration of migrants.

The *Immigration Planning Council*, established in 1949 comprises members of the community who are recognised leaders in industry and commerce (trade unions and employers), demography, economics, finance, science and town planning. The Council advises the Minister on the economic considerations affecting the immigration program, size, and distribution of future population and urban environmental development.

The *Immigration Publicity Council*, established in 1962, advises on publicity and publications used in Australia and overseas. Its members represent the press (including the foreign language newspapers), radio, advertising and television interests.

### **Professional migration**

The Department of Immigration, working in co-operation with the Department of Labour, provides a special service, including advisory staff in London, by giving advice and information to professionally qualified persons on prospects in Australia and by putting such applicants in touch with Australian employers.

On 27 March 1969, a Committee on Overseas Professional Qualifications was established. It has the task of collating information about overseas professional qualifications and evaluating their comparability with Australian qualifications.

## **Passports**

Australian passports are issued under the *Passports Act* 1938-1966 and Passport Regulations. Passports are obtainable on application at offices of the Commonwealth Department of Immigration in each State, the Northern Territory, and the Australian Capital Territory, from overseas offices of that Department, from any Australian diplomatic or consular mission abroad, or from the office of any Australian Government Trade Commissioner overseas. Applicants for passports must furnish evidence of their identity and citizenship and pay a fee of four dollars. Approximately 250,000 Australian passports are issued each year in Australia and abroad.

## **Citizenship**

### **Commonwealth legislation**

The *Nationality and Citizenship Act* 1948 which came into force on 26 January 1949 created the status of 'Australian citizen'. On 4 June 1969 the Act became the *Citizenship Act* 1948-1969.

Australian citizenship may be acquired (a) by birth in Australia, (b) by birth abroad subject to registration of the birth at an Australian Consulate, and (c) by grant of citizenship to persons resident in Australia under the conditions prescribed in the Act.

The Act recognises the independence of married women. Australian citizenship is not lost solely by marriage to an alien nor do alien women automatically acquire Australian citizenship upon marriage to an Australian citizen. Alien wives of Australian citizens may acquire citizenship under easier conditions than those which apply to other aliens.

### Migrant integration

Integration services assist migrants to settle in Australia. In addition to the direct service provided by the Department of Immigration through social workers, welfare and integration officers and a translation and interpreting service, the program includes the following activities.

Migrant education services are available to help migrants to overcome language problems and to settle effectively into the Australian community. For adults instruction is provided in source countries before embarkation, on board ship and after arrival in Australia. Since April 1970 the special needs of certain groups of migrants, e.g. professional workers, women, adolescents, industrial workers, are being met by greater stress on accelerated forms of instruction and the development and use of television programmes and other audio-visual aids. Special English classes are also provided for migrant children in migrant hostels and in schools. Authority for these activities derives from the *Immigration (Education) Act* 1971. At 30 June 1972, 26,814 migrants were receiving instruction under the adult program in Australia and 34,806 children were receiving special tuition under the child migrant education program. Additional information on expenditure and other aspects of the Migrant Education program is available in the Report to Parliament on 19 September 1972. (*See also* Migrant Education, in Education, Cultural Activities and Research chapter.)

As it is not always possible for migrants to have access to social workers in the capital city offices of the Department of Immigration, grants are paid by the Government to selected community-based voluntary welfare agencies to employ additional social workers to assist migrants locally.

Ethnic communities play an important part in the settlement of migrants. During 1969 a National Group Liaison Unit was created to develop links with ethnic organisations. A survey, covering 905 of the 1,898 known ethnic organisations in Australia was conducted to ascertain their activities, services and potential and a report is being prepared.

Following a survey of interpreter needs in the community, an emergency twenty-four hour on-call telephone interpreter service commenced in February 1973 at the Department's Sydney and Melbourne offices and later in the other capital city offices.

A team of psychologists undertakes surveys and other research into migrant integration and welfare in Australia and migrant selection overseas. Important areas of this research are studies of the general background, motivation and post-arrival experiences of immigrants generally and of particular groups, including investigations into practical short and long term difficulties experienced during the process of integration. Studies are also undertaken on aspects of more general relevance to migrant integration and their welfare and adjustments. The information gained facilitates the evaluation of current programs and policies bearing upon the settlement and integration of immigrants in Australia and their selection and counselling overseas.

Eight Good Neighbour Councils in the six States and two Territories of Australia operate as autonomous voluntary organisations. These Councils co-ordinate and co-operate with the many community groups and people throughout Australia whose common objective is to assist migrants to integrate. In certain instances Councils offer direct services to migrants and are financially sponsored by grants from the Commonwealth Government. These grants enabled Councils at 1 January 1972, to pay the administrative costs involved in maintaining central offices in the capital cities, ten regional offices and five sub-offices as well as employing some seventy staff members. At the same time the Councils worked with more than 900 organisations and controlled a net-work of 86 branches and 530 representatives in cities and towns.

## CHAPTER 8

### VITAL STATISTICS

The tables in this chapter are confined to the principal characteristics of vital statistics for Australia and relate, in the main, to the year 1972 for marriages and 1971 for births, deaths, and infant deaths. Comparisons have been restricted, in general, to the individual years 1968 to 1972 and the five-year periods 1946-50 to 1966-70, while age data have been shown in five-year groups. Comparisons over longer periods, together with more detailed figures such as single age particulars and cross-classifications of various characteristics, are published in the annual bulletins, *Demography* (4.9) and *Causes of Death* (4.7). Current information is published in the *Monthly Review of Business Statistics* (1.4), the *Quarterly Summary of Australian Statistics* (1.3), the mimeograph bulletins *Births* (4.4), *Deaths* (4.8), *Marriages* (4.10) (annual) and *Vital and Population Statistics* (quarterly) (4.11).

In most tables the statistics of births, deaths and marriages exclude particulars of full-blood Aborigines for years before 1966. Differences between the statistics now published and those formerly published which implied the exclusion of Aboriginal vital events cannot be taken as reliable statistics of births, deaths, or marriages among full-blood Aborigines, because in many areas no satisfactory administrative or other basis existed for distinguishing vital events of full-blood Aborigines from those of part-Aborigines or the rest of the population.

Vital statistics for certain countries of the world are set out in International Vital Statistics at the end of this chapter.

#### Provisions for registration and compilation of statistics

In Australia, vital statistics are compiled from information supplied for the registration of births, deaths, and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths, and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853, and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration having been taken over from South Australia in 1911 in respect of the Northern Territory and from New South Wales in 1930 in respect of the Australian Capital Territory. The authority responsible for the registration of births, deaths, and marriages occurring within his particular State or Territory is the Registrar-General (the Government Statist in Victoria) or the Principal Registrar.

The statistics in this chapter refer to events registered by the State and Territorial registrars during the year shown. There is usually an interval of at least several days between the occurrence and the registration of an event. As a result of the delay in registration some events occurring in one year are not registered until the following year. Events which are registered more than ten years after date of occurrence are excluded from the statistics.

For tables showing statistics for the States and Territories, figures are compiled from registrations of events which took place in each State and Territory. Some events take place in States other than the State in which the persons concerned (e.g. mother, deceased, bride/groom) usually resided. The effect of such interstate registrations on State totals however is slight. See page 166.

## Marriages

The *Marriage Act* 1961-1966 came into operation on 1 September 1963, placing the marriage laws of all States, the mainland Territories and Norfolk Island on a uniform basis. Provision is made for the celebration of marriage by ministers of religion registered with the Registrar of Ministers of Religion appointed in each State and Territory by the Attorney-General, and by certain civil officers, in most cases district registrars. In each State or Territory the authorised celebrant is required to register particulars of the parties married with the appropriate registering authority as soon as practicable and in any case not later than fourteen days after the marriage.

The marriage of minors is not permissible without the consent of parents or guardians or (where this is not obtainable) of a magistrate or some other prescribed authority. The *Marriage Act* 1961-1966 provides that the minimum age at which persons are legally free to marry is 18 years for males and 16 years for females. A judge or magistrate may, in exceptional circumstances, make an order authorising a male who has attained 16 years or a female who has attained 14 years to marry a person of marriageable age.

### Numbers of marriages and crude marriage rates

The median age at marriage of brides and bridegrooms has declined during recent years. The median ages, in years, of brides for each of the five years to 1972 were: 1968, 21.50; 1969, 21.54; 1970, 21.46; 1971, 21.39 and 1972, 21.41. The median ages, in years, of bridegrooms were: 1968, 23.89; 1969, 23.78; 1970, 23.74; 1971, 23.78 and 1972, 23.80. The difference in the median age at marriage between brides and bridegrooms is generally about two years, the difference in 1972 being 2.39 years. The median age is the age at which half of the bridegrooms or brides were younger and half were older than that age. It gives a better indication of the most common age at marriage than the average age (mean).

### Celebration of marriages

Marriages may be celebrated by a minister of religion registered as an authorised celebrant, by a district registrar or by other suitable persons authorised by the Attorney-General. Notice of the intended marriage must be given to the celebrant at least seven days before the marriage. Most of the marriages are celebrated by ministers of religion. The registered ministers in 1972 belonged to more than fifty different religious denominations.

PLATE 19

**Divorce**

See the chapter Law, Order, and Public Safety.

**Births and fertility**

Information concerning a birth is required to be supplied to the registration authority within 28 days in the Australian Capital Territory and the Northern Territory, and 60 days in the States.

Information is required in all States and Territories concerning what have been commonly known as 'stillbirths'. These are excluded from all the tables of births and deaths in this chapter and are included only in the special tables on stillbirths shown on pages 175-6.

**Number of live births**

Plate 19, above compares the annual number of births, deaths and marriages. During the 1940s, 1950s and 1960s annual births increased rapidly as fertility rose following the low birthrates of the depression years. The fall from 1961 to 1966 resulted from a steep decline in fertility. Since 1966, numbers have been increasing again.

(a) Excludes particulars of full-blood Aborigines before 1966.

**Masculinity of live births**

There is a universal tendency for the number of male births to exceed female births usually by between 5 to 6 per cent. The masculinity of live births, is the number of males born for every 100 female births. When the number of births for which masculinity is being calculated is small (for example, totals for smaller States) considerable variation is shown. The following table shows the figures for Australia for each five year period from 1946 to 1970 and for each of the years 1968 to 1972.

**MASCUILITY(a) OF LIVE BIRTHS REGISTERED: AUSTRALIA, 1946 TO 1972**

	1946-50	1951-55	1956-60	1961-65	1966-70	1968	1969	1970	1971	1972

(a) Number of males born for every 100 female births. Excludes particulars of full-blood Aborigines before 1966.

**Crude birth rates**

The simplest method of measuring fertility is to relate the number of births to the mean population, which gives the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period. Other methods of measuring fertility are shown on pages 168-70. The difference between the crude birth rate and the crude death rate is the rate of natural increase (the hatched area in plate 20, page 167). In the past 100 years the crude birth rate has shown a general downward trend. Since 1967 there has been a small upward movement, which is expected to continue for a few years, partly as a consequence of the increasing number of young women from the postwar baby boom who are now reaching maturity.

**CRUDE BIRTH RATES(a): STATES AND TERRITORIES, 1946 TO 1972**

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

1972	20.39	20.20	20.95	18.37	20.99	19.90	29.23	25.68	20.39

(a) Number of births per 1,000 of mean population. Excludes particulars of full-blood Aborigines before 1966.

The birth rates in the table above are based on *live births registered in the respective States and Territories*. Some confinements, however, take place in States other than the State in which the mother usually resides, particularly in areas near State borders. The variations thus caused in the birth rates for the States and Territories by *referring the birth registrations to the mother's usual residence* are shown by the following corrected rates for 1971—New South Wales, 21.41; Victoria, 21.48; Queensland, 21.77; South Australia, 19.46; Western Australia, 23.53; Tasmania, 21.34; Northern Territory, 33.68 and Australian Capital Territory, 27.48

The crude birth rates of Australia and the more populous countries of the world for the latest available year are shown in International Vital Statistics at the end of this chapter.

**Fertility rates**

Changes in the crude birth rate are in general indicative of changes in fertility. However they may result from changes in the proportion of women of childbearing age in the population. Changes in the proportion of such women who are married may also affect fertility and the crude birth rate.

PLATE 20

The fertility rates in the following table are for the Census years 1881 to 1971. The births for the three years around the census are related to women of childbearing age as enumerated at each census. Although the childbearing age has been taken to be 15-44 years, births to younger and older women are included in the computations. Nuptial births are related to married women aged 15-44 years to give married fertility rates.

Although married fertility fell by 58 per cent between 1880-82 and 1970-72, total fertility and the crude birth rate fell by only 41 per cent. The effect of a decline in the fertility of married women on total fertility and the crude birth rate is partly offset by an increase in the proportion of such women in the population. In 1881 only 51 per cent of females aged 15-44 were married but in 1966, 68 per cent were married. Also during this time births to unmarried women increased from 14 to 29 per thousand for single, widowed and divorced females aged 15-44.

**CRUDE BIRTH RATES AND FERTILITY RATES: AUSTRALIA, 1880-82 TO 1970-72(a)**

1970-72 . . .	20.85	100	134	59	59	42

(a) Excludes particulars of full-blood Aborigines before 1965-67. (b) Number of births per 1,000 of mean population.

**Age-specific birth rates**

Fertility within the childbearing group varies considerably, as may be seen from the five-year age-specific rates in the following table. These rates were obtained by dividing births according to age of mother by the estimated number of women in the corresponding five-year age group.

Total fertility is obtained by summing single age specific rates or by summing five-year age-specific rates and multiplying by 5. This total, divided by 1000, represents the hypothetical number of children a woman would bear during her lifetime if she experienced the rates of the year shown.

Since 1946, the fertility of younger women has increased, largely as a result of younger marriage, whereas fertility in the thirty and forty age groups has declined. Total fertility rose to a peak in 1961, of 3.4 children per woman, declined to 2.8 in 1967 and has been about 2.9 since.

**AGE-SPECIFIC BIRTH RATES(a): AUSTRALIA, 1946 TO 1971**

Period	Age group (years)							Total fertility
	15-19	20-24	25-29	30-34	35-39	40-44	45-49

1971	55.17	180.92	195.39	102.26	44.90	11.42	0.78	2.954

(a) Number of births per 1,000 women in each age group. Excludes particulars of full-blood Aborigines before 1966.

(b) Average annual rates.

**Gross and net reproduction rates**

The gross reproduction rate is derived from total fertility and the ratio of female to total births. It indicates the number of female children who would be born on average to women supposing the rates from which it was calculated were to apply throughout the reproductive period. It is an indication of the extent to which the population is reproducing itself except that it does not allow for females who failed to survive to the end of the childbearing period. The net reproduction rate allows for such mortality. It is obtained by multiplying the age-specific rates by the survivor proportions in the corresponding age group of the stationary or life table population. Mortality in childhood and young adulthood is now so low that there is little difference between current gross and net reproduction rates.

**GROSS AND NET REPRODUCTION RATES(a): AUSTRALIA, 1947 TO 1971**

Year	Gross reproduction rate	Net reproduction rate	Year	Gross reproduction rate	Net reproduction rate
1947 . . . . .	1.494	(b)1.416	1968 . . . . .	1.402	(e)1.359
1954 . . . . .	1.559	(c)1.499	1969 . . . . .	1.402	(e)1.359
1961 . . . . .	1.728	(d)1.672	1970 . . . . .	1.389	(e)1.347
1966 . . . . .	1.400	(e)1.355	1971 . . . . .	1.441	(e)1.397
1967 . . . . .	1.385	(e)1.342			

(a) Excludes particulars of full-blood Aborigines before 1966. (b) 1946-1948 mortality experience used. (c) 1953-1955 mortality experience used. (d) 1960-1962 mortality experience used. (e) 1965-1967 mortality experience used.

In the following table a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1966 to 1971. The registration of vital events has not been fully established in many countries and consequently details for the calculation of reproduction rates for those countries are not available.

**GROSS AND NET REPRODUCTION RATES: VARIOUS COUNTRIES**

**Fertility of marriages**

Estimates of the fertility of marriages may be made by relating nuptial births in each year to the marriages from which they could have resulted. Births to women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously and the resulting rates are added to give a total for all durations, namely, the index of current marriage fertility.

The figure for a particular year gives the estimated number of children which a thousand marriages would produce according to the fertility conditions of that year.

Births are omitted from the calculation if the marriage did not take place in Australia. Births which occur overseas to Australian marriages cannot be included and hence some understatement is present.

The following table gives an analysis of the index, shown in the total column, according to duration of marriage, expressing the results as births per thousand marriages.

#### DURATION-SPECIFIC FERTILITY RATES(a): AUSTRALIA, 1959 TO 1971

Births occurring in—	Duration of marriage (years)										Total

(a) Number of births per thousand marriages. From 1966 includes births of Aborigines where parents were legally married and excludes births of tribal marriages.

The summation of duration-specific rates for a particular year without reference to changing patterns in age at marriage or age of parents contributes to the hypothetical nature of the index. It is more satisfactory, therefore, to express the rates in cohort form by following the experience of marriages of a particular year cumulated over successive durations of marriage.

Since the fertile period of a marriage has a duration of up to some thirty years, completed fertility can only be determined with certainty for marriages occurring before 1940. Fortunately, because of the concentration of births in the early years of marriage the ultimate level of fertility and the size of family can be assessed with a fair degree of precision by the end of the fifteenth year. The most recent cohort to reach this duration was that of 1956-57.

To determine the relevant marriage cohorts from which births can have derived, a system of quarterly weights is applied. Births in 1969 to marriages in their third year, for example, could have arisen from marriages in any one of the eight quarters of 1966 and 1967. Proportions of the marriages in each of these quarters, namely  $\frac{1}{8}$ ,  $\frac{3}{8}$ ,  $\frac{5}{8}$ ,  $\frac{7}{8}$ ,  $\frac{7}{8}$ ,  $\frac{5}{8}$ ,  $\frac{3}{8}$ , and  $\frac{1}{8}$  respectively, are summed to arrive at the total marriages in the 1966-67 cohort. This method is applied to all marriages of completed durations three or more years. The first two years of marriage are weighted on a monthly basis.

#### CUMULATED DURATION-SPECIFIC FERTILITY RATES, MARRIAGE COHORTS(a) AUSTRALIA, 1955 TO 1971

Marriages of year—	Completed duration of marriage (years)						
	1	2	3	4	5	10	15
1955-56 . . . . .	352	674	983	1,262	1,511	2,262	2,497

1970-71 . . . . .	282	..	..	..	..	..	..

(a) Cumulated number of births per thousand marriages. From 1966 includes births of Aborigines where parents were legally married and excludes births of tribal marriages.

A more detailed analysis of the figures in the above table and of earlier cohorts has been made by tabulating the number of births within each duration of marriage which were first, second, third or subsequent births to the marriages under consideration. Details then derived of relative family size at each duration of marriage have enabled the computation of duration-parity-specific fertility rates.

#### Ex-nuptial live births

A birth is registered as ex-nuptial if the parents were not married to one another at the time of the confinement. Births to tribally-married Aborigines are classified as nuptial. Ex-nuptial births have been increasing and in 1971 they comprised 9.27 per cent of all births. The variations in the proportions of ex-nuptial live births as between the individual States and Territories for 1971 and for Australia at intervals from 1946 to 1971 are shown in the following tables. The high ex-nuptial birth rate for the Northern Territory is due in part to difficulties in identifying births where parents were tribally married. It is suspected that a substantial number of ex-nuptial births for the Northern Territory are in fact births to women adhering to tribal marriage systems.

EX-NUPTIAL LIVE BIRTHS  
NUMBER AND PROPORTION, STATES AND TERRITORIES, 1971

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number	9,674	5,010	4,859	1,782	2,720	722	664	198	25,629
Proportion of total births %	9.82	6.64	12.16	7.75	11.22	8.68	23.45	4.90	9.27

EX-NUPTIAL LIVE BIRTHS: NUMBERS, PROPORTION AND RATES(a)  
AUSTRALIA, 1946 TO 1971

	Annual average									
	1946-50	1951-55	1956-60	1961-65	1966-70	1967	1968	1969	1970	1971
Number	7,349	7,999	10,027	13,798	18,937	17,734	19,171	19,585	21,367	25,629
Rates(b)	0.95	0.91	1.02	1.25	1.57	1.50	1.60	1.60	1.71	2.01
Proportion of total births %	4.04	3.97	4.51	5.92	7.88	7.73	7.96	7.83	8.30	9.27

(a) Excludes particulars of full-blood Aborigines before 1966. (b) Number of ex-nuptial births per 1,000 of mean population.

A further measure of ex-nuptiality is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population aged from 15 to 44 years. On this basis, the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 44 is as follows: 1946-48, 11.45; 1953-55, 14.45; 1960-62, 18.49; 1965-67, 20.96; and 1970-72, 28.59. Ex-nuptial births to married women, which are not recorded separately, are included in these figures and it is not possible to determine to what extent they influence the trend shown.

#### Legitimations

Under the provisions of the Commonwealth *Marriage Act* 1961-1966, which came into operation on 1 September 1963, a child whose parents were not married to each other at the time of its birth becomes legitimised on the subsequent marriage of its parents. The legitimisation takes place whether or not there was a legal impediment to the marriage of the parents at the time of the child's birth and whether or not the child was still living at the time of the marriage, or in the case of a child born before 1 September 1963, at that date. Prior to the introduction of this Act, legitimations took place under Acts passed in the several States to legitimise children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who came within the scope of their purposes, born before or after the passing thereof, was deemed to be legitimate from birth by the post-natal union of its parents and entitled to the status of offspring born in wedlock. The number of children legitimised in Australia during 1971 was 3,896.

#### Multiple births

Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child, the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are stillborn the confinement is excluded, and secondly, because some cases of multiple births in which only one child was live-born are registered as single births.

**Number of confinements**

The following table shows the number of single and multiple confinements and the number of live births. The table includes only those confinements resulting in at least one live birth.

**LIVE BIRTHS AND CONFINEMENTS: STATES AND TERRITORIES, 1971**

<b>Total</b> .	<b>97,474</b>	<b>74,716</b>	<b>39,606</b>	<b>22,764</b>	<b>24,037</b>	<b>8,238</b>	<b>2,812</b>	<b>3,995</b>	<b>273,642</b>

NOTE. Owing to the registration procedure adopted in some States, it is possible that in some cases where one child only of a multiple pregnancy was liveborn, the confinement has been treated as a single birth. However, the numbers of multiple births are not significantly affected. See also page 174.

Multiple births recorded during 1971 comprised 2,779 cases of twins, 23 cases of triplets, and two cases of other multiple births the resulting number of live-born and stillborn children respectively 5,450 and 108 for twins, 63 and 6 for triplets, 11 and 2 for other multiple births. This represents an average of 10.16 recorded cases of twins and 0.08 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented 1 in every 98 mothers and mothers of triplets 1 in every 11,900. Total cases of multiple births represented 10.25 per 1,000 confinements or 1 in every 98 mothers.

**Confinements—relative ages of parents**

The relative ages of the parents of children whose births were registered in 1971 have been tabulated separately for male and female births, multiple births being distinguished from single births. For confinements and for multiple births, the relative ages of parents are shown in *Demography*, Bulletin No. 86.

**Confinements—age, duration of marriage and issue of mothers**

The total number of nuptial confinements resulting in live births in 1971 was 248,238, comprising 245,666 single births, 2,550 cases of twins, 20 cases of triplets, two cases of other multiple births. The following tables relating to previous issue exclude the issue of former marriages and stillborn children. On the other hand, they include in some States children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the calculation of average issue shown.

The following table shows that in 1971 the average size of family increased fairly regularly with the duration of the marriage. However, the average issue relates only to those women who gave birth in 1971. The table should not be interpreted to mean that, for example, *all* women who have been married for over ten years have an average of more than four children or those married twenty years, six children. The average issue of all married mothers who bore children in 1971 was 2.22 compared with 2.27 in 1970, 2.30 in 1969, 2.34 in 1968, and 2.38 in 1967.

**Multiple births—previous issue of mothers**

Of married mothers of twins in 1971, 803 had no previous issue either living or dead, 805 had one child previously, 468 had two previous issue, 241 three, 110 four, 62 five, 28 six, 13 seven, 9 eight, 5 nine, 1 ten, 2 eleven, 2 twelve and 1 fifteen. Of the 20 cases of nuptial triplets, and two cases of other multiple births registered during 1971, 5 mothers had no previous issue, 6 had one, 6 had two, 4 had three and 1 had four previous issue.

**Nuptial first births**

A nuptial first birth is defined as the first birth to the existing marriage. About two-thirds of first births occur to women aged under 25, and over half occur within the first two years of marriage, (in 1971, 35 per cent in the first and 24 per cent in the second year).

The following table shows the number of nuptial first births classified by grouped ages of mothers and grouped durations of marriage of mothers.

**NUPTIAL FIRST BIRTHS, BY AGE OF MOTHER AND DURATION OF MARRIAGE  
AUSTRALIA, 1971**

		Age of mother (years)								
Duration of marriage		Under 20	20-24	25-29	30-34	35-39	40-44	45 and over	Not stated	Total

1971 . . .	95,418	152,820	248,238	38.44	

(a) Excludes particulars of full-blood Aborigines before 1966.

### Stillbirths

Comparison of the figures and rates in the following tables are affected by the differences in the definitions adopted by the various States in earlier years. Beginning in 1964, steps were taken to amend the States' registration laws and so make uniform the criteria whereby stillbirths are registered. The amended legislation provides for all foetal deaths of at least twenty weeks' gestation (or 400 grammes weight) to be registered. The dates on which the legislation came into effect for each State are as follows: New South Wales, January 1969; Victoria, May 1971; Queensland, October 1967; South Australia, January 1968; Western Australia, January 1968; Tasmania, March 1967; Northern Territory, September 1964; Australian Capital Territory, September 1969. Prior to these dates the statistics of stillbirths shown relate to those in several States of at least seven months gestation and in other States to those of at least twenty-eight weeks gestation. So as to preserve as much comparability as possible with figures for earlier years the figures shown for each State since the amended legislation relate to stillbirths of at least twenty-eight weeks gestation.

**STILLBIRTHS(a): STATES AND TERRITORIES, 1946 TO 1971**

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Annual average—									
1946-50 . . .	1,405	949	626	368	274	161	n.a.	12	(b)3,795
1951-55 . . .	1,239	849	581	290	271	139	8	16	3,393
1956-60 . . .	1,253	839	558	274	235	109	6	19	3,293
1961-65 . . .	1,104	794	468	264	194	87	17	18	2,946
1966-70 . . .	876	767	361	215	192	86	(c)39	27	2,563
Annual total—									
1967 . . .	863	797	372	211	188	83	(c)49	24	2,587
1968 . . .	806	734	318	217	183	79	(c)39	26	2,402
1969 . . .	857	761	295	208	203	79	(c)35	26	2,464
1970 . . .	888	782	312	200	211	80	(c)30	29	2,532
1971 . . .	893	760	329	199	206	67	(c)24	41	2,519

(a) Excludes particulars of full-blood Aborigines before 1966. (b) Excludes Northern Territory. (c) Figures from 1966 include foetal deaths occurring in remote localities for which the period of gestation was not known. The numbers of such cases were: 1967, 25; 1968, 13; 1969, 13; 1970, 14; 1971, 3. The Registration Ordinance requires registration of any foetal death of at least twenty weeks gestation.

## PROPORTION OF STILLBIRTHS(a): STATES AND TERRITORIES, 1946 TO 1971

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Average annual rate—									
1946-50 . . . . .	20.0	19.6	21.9	22.1	20.5	22.3	n.a.	16.3	(b)20.5
1951-55 . . . . .	16.5	15.5	18.4	15.8	17.0	17.5	17.2	17.1	16.6
1956-60 . . . . .	15.5	13.5	16.1	13.5	13.7	12.6	8.6	14.3	14.6
1961-65 . . . . .	13.1	12.0	13.1	12.2	11.4	10.2	18.4	9.3	12.5
1966-70 . . . . .	10.5	11.0	10.1	10.0	9.8	10.7	18.3	9.7	10.6
Annual rate—									
1967 . . . . .	10.8	12.0	10.6	10.2	10.3	10.9	24.9	9.9	11.2
1968 . . . . .	9.8	10.3	9.0	10.1	9.3	9.4	18.4	9.7	9.9

1971 . . . . .	9.0	10.0	8.2	8.6	8.4	8.0	8.4	10.0	9.0

(a) Number of stillbirths per 1,000 of all births (live and still). Excludes particulars of full-blood Aborigines before 1966. (b) Excludes Northern Territory.

NOTE. Because of the smallness of the numbers of stillbirths occurring in the Australian Capital Territory and the Northern Territory the rates for these Territories are subject to considerable fluctuation.

## Mortality

This section contains statistics of general mortality and infant mortality. Statistics of foetal deaths (stillbirths) are shown separately in the preceding section. For the registration of a death the period allowed is 8 days in Tasmania, 14 days in South Australia, Western Australia, Australian Capital Territory, and Northern Territory, 21 days in Victoria, and 30 days in New South Wales and Queensland.

## Number of deaths

The following table shows the number of deaths registered in each State and Territory for years commencing 1946. Stillbirths, although registered as both births and deaths in some States are excluded from the death statistics.

## DEATHS(a): STATES AND TERRITORIES, 1946 TO 1972

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Annual average—									
1946-50(b) . . . . .	29,552	21,827	10,357	6,507	4,802	2,459	76	103	75,683

1971 . . . . .	41,691	30,598	16,339	9,686	7,806	3,295	637	598	110,650
1972—									
Males . . . . .	23,044	16,215	9,526	5,477	4,317	1,793	351	393	61,116
Females . . . . .	18,608	13,641	7,072	4,287	3,124	1,434	202	276	48,644
Persons . . . . .	41,652	29,856	16,598	9,764	7,441	3,227	553	669	109,760

(a) Excludes particulars of full-blood Aborigines before 1966. (b) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September 1939 to June 1947.

NOTE. Annual averages for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 597.

### Crude death rates

The simplest method of measuring mortality is to relate the number of deaths for a given period to the mean population for that period, which gives the crude death rate. This rate for a given period measures the number per thousand of population by which the population is depleted through deaths during that period.

#### CRUDE DEATH RATES(a): STATES AND TERRITORIES, 1946 TO 1972

<i>Period</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Average annual rate—									
1946–50(b)	9.70	10.37	9.13	9.76	9.23	9.30	6.27	5.31	9.74
1951–55	9.49	9.55	8.71	9.25	8.49	8.48	6.86	4.58	9.25
1956–60	9.20	8.91	8.36	8.62	7.90	7.97	5.32	4.31	8.78
1961–65	9.27	8.73	8.63	8.28	7.78	8.15	4.95	3.94	8.75
1966–70	9.43	8.78	9.07	8.50	7.84	8.50	7.97	4.40	8.90
Annual rate—									
1968	9.58	9.00	9.29	8.83	8.15	8.64	8.04	4.35	9.11
1969	9.15	8.55	8.95	8.19	7.69	8.59	6.63	4.83	8.68
1970	9.62	8.79	9.50	8.75	7.59	8.18	7.67	4.51	9.02
1971	9.04	8.72	8.93	8.23	7.57	8.42	7.35	4.15	8.66
1972—									
Males	9.84	9.13	10.09	9.23	7.98	9.08	6.78	4.84	9.36
Females	7.98	7.66	7.62	7.19	6.06	7.33	4.89	3.58	7.52
Persons	8.91	8.40	8.86	8.21	7.04	8.21	5.94	4.23	8.45

(a) Number of deaths per 1,000 of mean population. Excludes particulars of full-blood Aborigines before 1966.  
 (b) Excludes deaths of defence personnel, etc., from September 1939 to June 1947.

A graph showing the crude death rate for each year from 1870 to 1972 is shown on plate 20 page 167.

The crude death rate is affected by the particular sex and age composition of the population. While it is an element in the rate of natural increase of the population it cannot validly be used to compare the relative incidence of mortality in different populations. The crude death rate will tend to be low if the community contains a large proportion of young people and high if the population is elderly. Age specific death rates and true death rates are a guide to comparative mortality.

### True death rates

A composite measure of mortality unaffected by the age structure of the population can be obtained from life tables. The basic life table functions include expectation of life remaining at each year of age. The reciprocal of the expectation of life at birth is known as the true death rate, since, if the expectation of life of a person at birth is say, fifty years, then each person will on the average die fifty years after birth, so that in a stationary population one person in fifty or twenty per thousand, will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of mortality from each year of age to the next. The next table sets out true death rates for the periods covered by Australian life tables.

**TRUE DEATH RATES: AUSTRALIA  
1946-48 TO 1971(a)**

Period	True death rate	
	Males(b)	Females(c)
1946-48 . . .	15.14	14.16
1953-55 . . .	14.89	13.75
1960-62 . . .	14.72	13.48
1965-67 . . .	14.79	13.49
1968 . . . .	14.82	13.48
1969 . . . .	14.81	13.40
1970 . . . .	14.84	13.49
1971 . . . .	14.72	13.42

(a) Excludes particulars of full-blood Aborigines before 1965-67. (b) Number of deaths per 1,000 males in stationary population. (c) Number of deaths per 1,000 females in stationary population.

The crude death rates and the true death rates of Australia and the more populous countries of the world for the latest available year are shown in the table in International Vital Statistics at the end of this chapter.

#### Australian Life Tables

It has been the practice at each census from 1911 onwards to prepare complete life tables representative of the mortality experience of Australia. The mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated in 1911 by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881-90, 1891-1900 and 1901-10. These compilations furnished a comprehensive view of Australian mortality in respect of sex, time, and geographical distribution, and practically superseded all life tables prepared in Australia prior to 1911. For subsequent censuses the official life tables have been prepared only for Australia as a whole. They have been based upon recorded census population and the deaths of the three years around the census. The 1965-67 life tables included particulars of Aborigines for the first time. The 1920-22 life tables were prepared by the Commonwealth Statistician, those of 1932-34, 1946-48, 1953-55, 1960-62 and 1965-67 by the Commonwealth Actuary. Full particulars of the data used and the methods of construction are to be found in the reports of the Commonwealth Actuary.

#### COMPLETE EXPECTATION OF LIFE ( $e_x^0$ ) AT SELECTED AGES

Age (x)	Males				Females			
	1901-10	1953-55	1960-62	1965-67(a)	1901-10	1953-55	1960-62	1965-67(a)
0 . . .	55.20	67.14	67.92	67.63	58.84	72.75	74.18	74.15
10 . . .	53.53	59.53	59.93	59.50	56.38	64.78	65.92	65.75
20 . . .	44.74	50.10	50.40	49.98	47.52	55.06	56.16	56.00
30 . . .	36.52	40.90	41.12	40.72	39.33	45.43	46.49	46.34
40 . . .	28.56	31.65	31.84	31.44	31.47	35.99	36.99	36.85
50 . . .	21.16	22.92	23.13	22.76	23.69	27.03	27.92	27.83
60 . . .	14.35	15.47	15.60	15.27	16.20	18.78	19.51	19.52
70 . . .	8.67	9.59	9.77	9.52	9.96	11.62	12.19	12.23
80 . . .	4.96	5.47	5.57	5.51	5.73	6.30	6.68	6.72

(a) Includes particulars of full-blood Aborigines.

NOTE.  $e_x^0$  = complete expectation of life at specified ages.

The progress towards lower mortality rates evident over the past sixty years or more, did not continue in the 1960's. Expectation of life at birth was slightly less in 1965-67 than in 1960-62 for both males and females. The detailed 1965-67 life tables show that lower mortality rates were experienced only at ages 0-14, 28 to 32 and over 88 for males and at ages 0-13 and over 72 for females.

## Age distribution at death

Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first year and in completed years of life thereafter. These ages are usually combined in groups for publication, the most common being weeks for the first four weeks, months or groups of months for the first year, single years of age for the first five years, and thereafter the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for the year 1971 is given for Australia in the following table.

## DEATHS, BY AGE AT DEATH AND SEX: AUSTRALIA, 1971

Age at death	Males	Fe- males	Per- sons	Age at death	Males	Fe- males	Per- sons

				<b>Total all ages . . . . .</b>	<b>61,074</b>	<b>49,576</b>	<b>110,650</b>

There are different mortality rates at various stages of life, and the actual number of deaths in any period is related to the numbers living at the respective stages. Changes in the number of deaths from one period to another are associated with changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups. The combined effect of various influences, i.e. the decline in the rate of mortality, the long term decline in the birthrate, and the effects of past and present migration on the age distribution of the population, is shown in the following table, which shows the proportion of deaths in various age groups in five-year periods from 1946 to 1970 and for the year 1971.

PROPORTION OF DEATHS IN EACH AGE GROUP: AUSTRALIA, 1946 TO 1971(a)  
(Per cent)

(a) Excludes particulars of full-blood Aborigines before 1966.

A table showing these proportions for males and females separately for the period 1901 to 1950 was published in Year Book No. 39, page 614.

## Age-specific death rates

In previous issues of the Year Book, average annual age-specific death rates, i.e. the average number of deaths per 1,000 of population in each age group, were given for each State and Australia for the periods 1932-1934, 1946-1948, 1953-1955, 1960-1962 and 1965-1967 (see Year Books, No. 37, pp. 778-9, No. 39, pp. 615-6, No. 44, pp. 640-1, No. 52, p. 253, and No. 55, p. 189). These rates were based on the age distribution of the population at the relevant censuses.

(a) Number of deaths per 1,000 of population of the same age group and sex. The populations used in the calculation of these rates are based on census populations at 30 June 1947, 1954, 1961 and 1966. Rates for years 1967 to 1971 are based on population estimates revised in accordance with the final results of the 1971 Census. (b) Excludes particulars of full-blood Aborigines prior to 1965. (c) Average annual rate per 1,000 of census population, based on deaths in the three year period, i.e. census year and the years preceding and following it. (d) Infant deaths per 1,000 live births registered.

**Infant deaths and death rates—States and Territories**

The next table shows for each State and Territory, for the period 1946 to 1972, the number of deaths under one year of age and the rates of infant mortality under one year. Rates for Australia and the more populous countries of the world for the latest available year are shown in the table International Vital Statistics at the end of this Chapter.

(a) Excludes particulars of full-blood Aborigines before 1966. (b) Number of deaths of children aged under one year per 1,000 live births registered.

Because of the smallness of the numbers of these deaths occurring in the Australian Capital Territory and the Northern Territory, the rates for these Territories (i.e. number of such deaths per thousand live births) are subject to considerable fluctuation.

**Infant deaths and death rates—Australia**

The fact that out of 642,664 male infants born from 1967 to 1971, 12,859 (20.01 per 1,000) died during the first year of life, while of 611,592 female infants only 9,474 (15.49 per 1,000) died during the first year, accords with the universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births. Stillbirths, for which masculinity is also higher, are not included in any of the tables relating to deaths.

As shown by the following table, the disparity is greater during the first four weeks of life, termed the neonatal period, than during the remainder of the first year of life, or the post-neonatal period.

(a) Excludes particulars of full-blood Aborigines before 1966.

(b) Age four weeks and under three months.

(c) Number of deaths of children aged under one year per 1,000 live births registered.

Plate 22 below, shows infant mortality rates for each year from 1910 to 1972.

PLATE 22

**Causes of death**

The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899, and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death, and further international revisions in 1909 (Second), 1920 (Third), 1929 (Fourth), 1938 (Fifth), 1948 (Sixth), 1955 (Seventh) and 1965 (Eighth), were successively adopted for use in Australian statistics.

The Eighth Revision of the classification (now known as the International Classification of Diseases, Injuries and Causes of Death) was used in Australia for the first time in 1968. Hence, cause of death figures for 1968 and subsequent years are not comparable, for some causes, with figures for 1967 and earlier years.

In order to facilitate the concise presentation of cause of death statistics, the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used as the basis of the cause of death tabulations for 1971 which follow. Some categories have been sub-divided to show additional particulars of interest in Australian statistics. Table A shows the total number of males and females who died, the death rates per million of mean population, and the percentage of total deaths. Table B shows deaths for males and females, classified by age groups. More detailed data on causes of death will be found in the bulletin *Causes of Death* (4.7), No. 8.

### A. CAUSES OF DEATH: NUMBERS, PROPORTIONS AND CRUDE RATES(a), MALES AND FEMALES, AUSTRALIA, 1971

#### ABBREVIATED LIST OF 50 CAUSES WITH CERTAIN SUB-DIVISIONS

Cause of death	Males			Females			
	ICD numbers	Number of deaths	Percentage of total	Crude rates(a)	Number of deaths	Percentage of total	Crude rates(a)
B 1 Cholera . . . . .	000	..	..	..	..	..	..
B 2 Typhoid fever . . . . .	001	..	..	..	..	..	..
B 3 Bacillary dysentery and amoebiasis . . . . .	004, 006	6	(b)	1	3	(b)	(c)

(a) Categories of the Abbreviated List for which no deaths were recorded in 1971 have been omitted from this table. For details of such categories see Table A, pages 184-5.

## Causes of death—children under one year

Causes of death of children under one year of age should be considered in relation to age at death because the emphasis on various causes changes rapidly as age at death varies. A summary for 1971, of deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

DEATHS OF CHILDREN UNDER ONE YEAR OF AGE, BY CAUSE OF DEATH  
AUSTRALIA, 1971

Inter- national Classifi- cation of Diseases number	Cause of death	Age at death										
		Days		Total under one week	Weeks		Total under four weeks	Months			Total under one year	
		Under 1	1-6		1	2		1-2 (a)	3-5	6-11

(a) Age four weeks and under 3 months.

(b) 140-474, 490-738, 780-796.

(c) E800-E910, E914-E999.

## Deaths from certain important causes

In the preceding tables, particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Eighth Revision of the International List. Certain important causes are discussed in detail below. The Abbreviated Classification numbers used in Tables A and B (pages 184-6) are indicated in parentheses for each cause or group of causes.

*All forms of tuberculosis (B5, B6).* The reduction in mortality from tuberculosis is shown by the decline in the crude death rate from tubercular diseases, which fell from 49 per 100,000 of mean population in 1931 to 18 in 1951, and to 1.4 in 1971. The reductions in the younger age groups are much greater. In making these comparisons, consideration of the effect of the change in basis from the Fifth to the Sixth Revision of the International List is particularly important.

*Malignant neoplasms, including neoplasms of lymphatic and haematopoietic tissues (B19).* Deaths classified under this heading according to the Sixth, Seventh and Eighth Revisions of the International List (used in Australia for deaths registered since 1950) are not directly comparable in total with those on the Fifth Revision basis (see Year Book No. 39, p. 628).

The most common sites of malignant neoplasms causing death in 1971 are identified in Table B (pages 185-6). Malignant neoplasms are predominantly diseases of advanced age, but leukaemia and aleukaemia frequently cause death at early ages.

Deaths in age groups and age-specific death rates for males and females who died from malignant neoplasms in 1971 are given in the table below, together with figures for 1950 and 1960.

**DEATHS AND DEATH RATES FROM MALIGNANT NEOPLASMS(a), BY AGE GROUP AND SEX  
AUSTRALIA, 1950 TO 1971(b)**

Age group (years)	1950				1960				1971			
	Number		Rate(c)		Number		Rate(c)		Number		Rate(c)

65 and over . . . .	3,072	2,694	1,014	748	4,067	3,373	1,075	679	5,767	4,535	1,291	734
<b>Total . . . . .</b>	<b>5,355</b>	<b>5,075</b>	<b>130</b>	<b>125</b>	<b>7,207</b>	<b>6,092</b>	<b>139</b>	<b>120</b>	<b>10,195</b>	<b>8,143</b>	<b>159</b>	<b>128</b>
	(d)				(e)							

(a) Includes neoplasms of lymphatic and haematopoietic tissues. (b) Excludes particulars of full-blood Aborigines prior to 1967. (c) Number of deaths per 100,000 of population at risk. For the individual age groups, the population at risk is that estimated at 30 June. For the total of all ages, the population at risk is the calendar year mean population.

(d) Includes 1 male, age not stated. (e) Includes 3 males, age not stated.

Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries for the latest available year are as follows: Israel, 116; Japan, 116; South Africa (white population), 135; Poland, 138; Canada, 141; Australia, 143; United States of America, 162; Italy, 174; Uruguay, 190; Netherlands, 195; France, 206; England and Wales, 236; Scotland, 242.

*Causes of infant mortality.* See paragraph devoted to causes of infant deaths on page 187.

*Diseases of the circulatory system (B25-B30, part B46).* This class is the largest among causes of death, representing 55 per cent of total deaths in 1971. The following table shows the number of deaths and death rates per 100,000 of mean population from diseases of the circulatory system for the years 1950-71. Comparability of the figures is not significantly affected by the various revisions of the International Classification of Diseases.

**DEATHS AND DEATH RATES FROM DISEASES OF THE CIRCULATORY SYSTEM  
BY SEX, AUSTRALIA, 1950 TO 1971(a)**

Year	Cerebrovascular disease				Heart disease				Other diseases of circulatory system				Total			
	Number		Rate(b)		Number		Rate(b)		Number		Rate(b)		Number		Rate(b)	
	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F
1950 . . . . .	4,035	5,351	98	132	14,687	10,256	356	253	1,736	1,802	42	44	20,458	17,409	496	429
1955 . . . . .	4,811	6,224	103	137	16,382	11,303	352	249	1,843	1,886	40	42	23,036	19,413	495	427
1960 . . . . .	5,183	6,659	100	131	18,654	13,173	359	259	2,068	1,970	40	39	25,905	21,802	499	429
1965 . . . . .	5,809	7,835	101	139	21,843	15,546	381	275	2,029	2,071	35	37	29,681	25,452	517	450
1970 . . . . .	6,508	9,178	103	148	23,639	17,269	376	278	2,266	2,516	36	40	32,413	28,963	515	466
1971 . . . . .	6,497	9,234	101	145	22,980	17,176	358	270	2,271	2,454	35	39	31,748	28,864	494	454

(a) Excludes particulars of full-blood Aborigines prior to 1967. (b) Per 100,000 of mean population.

*Accidents, poisonings and violence (BE47 to BE50).* Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accidents, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; injuries undetermined whether accidentally or purposely inflicted; and injury resulting from operations of war, including delayed effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population, indicates that the death rate from violence is between two and three times as great for males as for females. The low level of the rates and proportions for the years 1941-45 is due largely to the exclusion of deaths of defence personnel from accidents, suicide and homicide, though the rates have been based on total mean population (including defence personnel). A further contributing factor is the decrease during this period in the number of automobile accidents. From July 1947 deaths of defence personnel from accidents, etc. have again been included.

**ACCIDENTS, POISONINGS, AND VIOLENCE: DEATH RATES(a), BY SEX  
AUSTRALIA, 1941 TO 1971(b)**

Death rate from—												
Period	Motor vehicle accidents		Suicide		Homicide(c)		Other violence(d)		Total violence		All violence, percentage of total deaths	
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
1941-45 .	19	5	11	5	1	1	48	21	79	31	7.30	3.48
1946-50 .	30	6	14	5	1	1	46	21	91	33	8.44	3.83
1951-55 .	38	9	15	5	2	1	44	22	99	37	9.64	4.53
1956-60 .	37	11	17	6	2	1	38	20	93	39	9.57	4.95
1961-65 .	38	13	19	9	2	1	34	19	93	42	9.54	5.50
1966-70 .	43	15	17	9	2	1	33	20	95	45	9.61	5.71
1967 .	42	14	19	11	2	1	35	20	98	47	10.08	6.11
1968 .	43	14	17	8	2	1	34	21	95	45	9.43	5.51
1969 .	44	16	17	8	2	1	30	18	92	43	9.54	5.65
1970 .	46	17	17	8	2	1	32	19	97	45	9.67	5.58
1971 .	45	15	18	9	2	1	31	18	96	44	10.09	5.61

(a) Number of deaths per 100,000 of mean population. (b) Excludes particulars of full-blood Aborigines before 1967. (c) Includes deaths from injury purposely inflicted by other persons (not in war) and legal intervention. (d) Includes deaths from injury undetermined whether accidentally or purposely inflicted.

In 1971 the total number of deaths from *accidental causes* (BE47, BE48) was 6,802 (4,752 males and 2,050 females). Over half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows: Motor vehicle traffic accidents, 3,740 (54.98 per cent); motor vehicle non-traffic accidents, 107 (1.57 per cent); other road vehicle accidents, 31 (0.46 per cent); railway accidents, 83 (1.22 per cent); water transport accidents, 101 (1.48 per cent); aircraft accidents, 41 (0.60 per cent); a total of 4,103 (60.32 per cent). Other important causes were accidental falls, 1,171 (17.22 per cent); accidental drowning (not in transport), 422 (6.20 per cent); accidents caused by fires and flames, 168 (2.47 per cent); and accidental poisonings, 119 (1.75 per cent).

Deaths from *suicide* (BE49) in 1971 numbered 1,738 (males 1,150; females, 588). Poisoning, other than by gases, occurred in 705 cases (40.56 per cent of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows; firearms and explosives, 402 (23.13 per cent); poisoning by gases, 209 (12.03 per cent); hanging or strangulation 204 (11.74 per cent); submersion (drowning), 83 (4.78 per cent); other and unspecified modes, 135 (7.77 per cent). Of the 1,150 males who committed suicide, 374 (32.52 per cent) used firearms or explosives. For females the most common mode was poisoning (other than by gases). This was used in 390 cases (66.33 per cent).

Of the 404 deaths assigned in 1971 to all other external causes (BE50), there were 228 deaths from homicide and injury purposely inflicted by other persons, 5 deaths from legal intervention by firearms, 163 deaths from injury undetermined whether accidentally or purposely inflicted (of which 76 were due to poisoning other than by gases) and 8 deaths from late effects of injury due to operations of war.

### Vital statistics of External Territories

The following table shows, for the year 1971, the number of marriages, births and deaths registered in the External Territories under the control of Australia. More detailed information will be found in *Demography*, Bulletin No. 86.

#### EXTERNAL TERRITORIES: VITAL STATISTICS, 1971

Territory	Marriages	Births	Deaths
Christmas Island(a)	8	34	4
Cocos (Keeling) Islands(a)	11	13	5
Norfolk Island(a)	11	24	16
Papua New Guinea(b)	388	1,323	170

(a) Total population. (b) Non-indigenous population only.

## International vital statistics

In the following table vital statistics rates for certain countries are shown. Crude marriage, birth, and death rates represent the number of 'events' reported for the year stated per 1,000 of the population. Infant mortality rates are the number of deaths which occurred under one year of age per 1,000 live births. The true death rates (reciprocals of the expectation of life at birth) have been computed from the life tables for the respective countries as published in the United Nations *Demographic Yearbook*, 1971 (see explanation of true death rates, pages 177-8).

In many instances the rates shown in the following table are estimates and the results of sample surveys only. Reference should be made to the detailed comments contained in the United Nations *Demographic Yearbook*, 1971 (see particularly Technical Notes on Statistical Tables and footnotes to the tables). The countries are arranged in the same order as in the table on page 147 of the Population chapter.

## CHAPTER 9

### HOUSING AND BUILDING

Pages 191-8 of this chapter give details of the *characteristics of dwellings obtained from censuses*, pages 198-209 contain a *summary of building activities*, pages 209-20 outline *government activities in the field of housing*, and pages 220-26 relate to *financial arrangements associated with the erection or purchase of homes*.

Further information on dwellings obtained from censuses is available in the detailed tables of the publications issued for each individual Census. A list of the 1971 Census publications is shown at the end of this volume.

More detailed information on building activity is contained in the annual bulletin *Building and Construction* (3.1) and the *Quarterly Bulletin of Building Statistics* (3.6), and current information is obtainable also in the *Quarterly Summary of Australian Statistics* (1.3), the *Monthly Review of Business Statistics* (1.4), the *Digest of Current Economic Statistics* (1.5), and the mimeographed statements *Building Statistics: Number of New Houses and Flats* (quarterly) (3.5), and *Building Approvals* (monthly) (3.2). Details for particular States are available from publications issued regularly by the Deputy Commonwealth Statistician in each State. The *Housing Quarterly* published by the Commonwealth Department of Housing contains further information on current trends in housing activity.

Commonwealth Government activities relate in the main to the provision of moneys to State Governments under the States Grants (Housing) Act, to the assistance of defence (and eligible ex-service) personnel in the erection and purchase of homes, to assistance to young married couples under the Home Savings Grant Act, to the operation of the Housing Loans Insurance Corporation, and to the provision of homes in the Territories. The annual reports of the Commonwealth Department of Housing, the Defence Service Homes Division and of other Commonwealth and State Housing Authorities show further details of government activities in the field of housing.

#### Census dwellings

At each census of the population, in addition to the questions relating to personal particulars, there have been a number of questions relating to dwellings. A 'dwelling' is defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building, and includes, *in addition to houses and self-contained flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. This section contains particulars of such information on dwellings as is available from the 1971 Census, together with information from earlier censuses. In conformity with the 1967 repeal of section 127 of the Constitution, 1971 Census statistics include Aborigines. In order to provide comparability between the 1971 and 1966 censuses, tables showing 1966 data have been amended to include Aborigines or their dwellings (except where noted to the contrary) and therefore differ from the 1966 tables previously published.

#### Number of dwellings

The following table shows the number of occupied and unoccupied dwellings in Australia at each census from 1911 to 1971. Occupied dwellings are classified into 'private' and 'other than private' dwellings (*see* page 192 for definitions of 'private' and 'other than private' dwellings). Unoccupied dwellings include dwellings whose occupants are temporarily absent, holiday homes, and other temporarily vacant dwellings (*see* page 197 for full explanation of the term 'unoccupied').

**DWELLINGS(a): AUSTRALIA, CENSUSES, 1911 TO 1971**

Census	Occupied		Total	Unoccupied
	Private	Other than private		
1911 . . . . .	894,389	29,070	923,459	33,473
1921 . . . . .	1,107,010	46,275	1,153,285	51,163
1933 . . . . .	1,509,671	37,705	1,547,376	68,772
1947 . . . . .	1,873,623	34,272	1,907,895	47,041
1954 . . . . .	2,343,421	36,932	2,380,353	112,594
1961 . . . . .	2,781,945	35,325	2,817,270	194,114
1966 . . . . .	3,155,340	33,917	3,189,257	263,873
1971 . . . . .	3,670,553	24,006	3,694,559	339,057

(a) Excludes dwellings occupied solely by Aborigines before 1966.

The following table shows the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at the Census of 30 June 1971. For delimitation of 'urban centres' see this Year Book, page 134.

**DWELLINGS: URBAN AND RURAL, AUSTRALIA, CENSUS, 30 JUNE 1971**

Division	Occupied				Unoccupied	
	Private	Other than private	Total		Number	Percentage of total
			Number	Percentage of total		
Urban—						
Major . . .	2,428,912	10,662	2,439,574	66.03	142,731	42.10
Other . . .	755,196	7,734	762,930	20.65	94,183	27.78
Rural . . .	486,445	5,610	492,055	13.32	102,143	30.12
<b>Total . . .</b>	<b>3,670,553</b>	<b>24,006</b>	<b>3,694,559</b>	<b>100.00</b>	<b>339,057</b>	<b>100.00</b>

The total numbers of occupied and unoccupied dwellings in each State and Territory at the Censuses of 1966 and 1971 were as follows.

**DWELLINGS: STATES AND TERRITORIES, CENSUSES, 1966 AND 1971**

State or Territory	Census, 30 June 1966		Census, 30 June 1971	
	Occupied	Unoccupied	Occupied	Unoccupied
New South Wales . . .	1,190,010	101,546	1,364,542	124,522
Victoria . . .	889,053	64,757	1,015,485	88,521
Queensland . . .	450,309	41,818	517,245	51,077
South Australia . . .	302,626	25,110	344,112	30,553
Western Australia . . .	225,701	17,965	286,845	28,274
Tasmania . . .	99,366	10,800	110,420	13,307
Northern Territory . . .	8,637	380	17,792	929
Australian Capital Territory . . .	23,555	1,497	38,118	1,874
<b>Australia . . .</b>	<b>3,189,257</b>	<b>263,873</b>	<b>3,694,559</b>	<b>339,057</b>

**Class of dwelling (1966 and 1971)**

The following table shows the numbers of the various classes of occupied dwellings in the major urban, other urban, and rural areas of Australia at the Census of 30 June 1971 and totals for the Censuses of 1966 and 1971. The numbers of the various classes of dwelling for each State and Territory at the 1971 Census are given in the table on page 193.

**Private dwellings** are classified into the following categories for the 1971 Census:

*private house*—includes separate, semi-detached, attached and terrace or row houses.

*villa unit*—also includes dwellings variously described as town house, cottage unit, villa development, cottage flats.

*self-contained flat*—part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities. Includes home units.

*other private dwellings*—comprise non-self contained parts or rooms of houses, flats or other premises. Also includes sheds, tents, garages, caravans and houseboats occupied on a permanent or semi-permanent basis.

**Other than private dwellings** includes hotels; motels; boarding houses and hostels; educational, religious and charitable institutions; hospitals; defence and penal establishments; caravan parks; staff barracks and quarters, etc.

## Occupied dwellings, by class

(a) Bathrooms, toilets, pantries, laundries, storerooms, halls and rooms used only for business purposes are excluded, but permanently enclosed sleep-outs are included. A combined purpose room such as a living-dining or kitchen-dining room is counted as only one room. (b) Villa units were not separately identified at the 1966 Census.

OCCUPIED PRIVATE DWELLINGS BY NUMBER OF BEDROOMS AND CLASS OF DWELLING

**Unoccupied dwellings (1971)**

An unoccupied dwelling is defined as a structure built specifically for private living purposes and which is habitable, though unoccupied at the time of the Census. The total number of unoccupied dwellings shown for any area does not represent the number of vacant dwellings available for sale or renting.

## Building

### Statistics of building approved

Statistics of building approvals have been compiled since the year 1953-54 from (a) permits issued by local government authorities in the areas subject to building control by these authorities, and (b) contracts let or work commenced and day labour projects authorised by government authorities. *They relate only to approvals for buildings as distinct from the construction of roads, railways, bridges, earthworks, water storages, etc.* Values shown represent the estimated cost when completed (excluding cost of land) of new buildings and alterations and additions to existing buildings. Before 1 July 1966 additions of \$10,000 and over were included with new buildings in all States except New South Wales, where they were included in 'alterations and additions'. From 1 July 1966 alterations and/or additions of \$10,000 and over are included with new buildings in all States.

### Statistics of building commenced, completed and under construction

These relate to building by private contractors, government authorities and owner-builders. The following outlines the scope of the statistics; (a) *only the erection of new buildings as distinct from the construction of roads, railways, bridges, earthworks, water storages, etc., is covered*; (b) before 1 July 1966 major new additions to existing buildings in all States and major alterations in New South Wales were included with new buildings, while from 1 July 1966 alterations and/or additions of \$10,000 and over are included with new buildings in all States; (c) minor additions, alterations,

renovations and repairs are excluded because of the difficulty of obtaining details of this work; (d) temporary dwellings, sheds, huts, etc., are excluded; (e) figures for houses exclude flats and dwellings attached to other new buildings (the value of dwellings attached to other new buildings is included with the value of buildings to which they are attached); figures for flats include 'home units'; (f) details obtained from government authorities and building contractors refer to all areas, whereas details for owner-builders cover only areas subject to building control by local government authorities.

The following definitions of terms used in this section are necessary for interpretation of the data presented.

*Private or government ownership.* A building is classified as 'private' or 'government' according to ownership at date of commencement. Thus 'government' includes buildings erected for Commonwealth and State Governments, semi-government and local government authorities, either by contractor or by day-labour, whether these buildings are for their own use or for rental or sale after completion. Houses erected for particular persons under government-sponsored home building schemes or with government financial assistance are classified as 'private'.

*Owner-built.* An 'owner-built' house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

*Contract-built.* Includes the operations of all building contractors, and government authorities which undertake the erection of new buildings with day labour.

*Commenced.* A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by informants may not be entirely uniform.

*Completed.* A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

*Under construction.* A building is regarded as being under construction if it has been commenced but not completed, whether or not work on the building is actively proceeding.

*Values.* All values shown exclude the value of land and represent the estimated value of buildings on completion.

*Values of work done.* The values of work done during the period represent the estimated value of work actually carried out on buildings during the period. For any building the sum of these values obtained during its construction equals the value of the building on completion. Data relating to the value of work done on owner-built houses are not collected. However, the figures shown for the value of work done include a component relating to owner-built houses calculated on the basis of the figures collected for the value of owner-built houses commenced, completed and under construction.

*The values of work yet to be done on buildings under construction at the end of period* are the differences between the estimated total value of work done at the end of period and the estimated final value of the building on completion. They therefore represent the values of work which will be carried out in subsequent quarters on buildings already under construction.

*Type of building.* Classification is according to the function a building is intended to serve. A building which is ancillary to other buildings or forms part of a group of related buildings is classified according to the function of the group as a whole.

*Persons working.* Figures relate to persons working on the jobs of contractors who undertake the erection of new buildings and of government authorities which erect new buildings on their own account. They include persons working on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and authorities. Contractors are asked to give details of all persons working on their jobs on a specified day, including working principals, men working as or for sub-contractors and men temporarily laid off on account of weather. Because of the intermittent employment of various types of sub-contractors on any particular job, it is sometimes difficult for contractors and authorities to provide precise particulars of the number of sub-contractors and the number of employees of sub-contractors working on their jobs on the specified day. This factor may cause some estimation by persons completing returns and some degree of understatement in figures shown in tables. On the other hand, because of frequent movement between jobs of some types of tradesmen (such as electricians) who may work on several jobs on the one day, a small element of duplication may occur. The figures exclude persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

New houses approved, commenced, completed and under construction

The next table provides a summary for 1971-72 of the number of new houses approved, commenced, completed and under construction in each State and Territory. For a graph showing the number of new houses commenced, completed and under construction for the period 1962-63 to 1971-72 see plate 23, below.

NEW HOUSES: NUMBER, STATES AND TERRITORIES, 1971-72

**Value of building approved**

The following table shows the values of approvals for houses and flats, other new buildings, and alterations and additions in Australia for the years 1967-68 to 1971-72. Before 1 July 1966 additions of \$10,000 and over were included with new buildings in all States except New South Wales, where they were included in 'alterations and additions'. From 1 July 1966 alterations and/or additions of \$10,000 and over are included with new buildings in all States.

**BUILDING APPROVED: VALUE, AUSTRALIA, 1967-68 TO 1971-72  
(\$'000)**

Type of building	1967-68	1968-69	1969-70	1970-71	1971-72

## Government activities in the housing field

### Housing Agreements between Commonwealth and State Governments

Under the Commonwealth-State Housing Agreements the Commonwealth Government makes substantial long-term loans to the States for the provision of housing.

*The 1945 Agreement.* In November 1945 the Commonwealth Government entered into an Agreement with the Governments of the States whereby the Commonwealth Government would provide finance for, and the State Governments would undertake the building of, housing projects. Between 1945-46 and 1955-56, under this Agreement, the Commonwealth Government advanced to the States a total of \$481,118,000.

Initially, dwellings constructed under the 1945 Agreement were only sold to tenants if the tenant was able to arrange payment of the full purchase price to the State immediately on sale. Subsequent amendments to the Agreement progressively eased conditions of sale. For information on the conditions of sale, etc., under the 1945 Agreement see Year Book No. 48, page 367.

*The 1956 Agreement.* In 1956 the Commonwealth and the States entered into a new Agreement under which added emphasis was placed on the construction of dwellings for private ownership. The Agreement provided that parts of the loans advanced to each State were to be advanced to building societies and other approved institutions for lending to private home builders and purchasers. The balance of the amounts advanced to each State was used by the States for the erection of dwellings for either rental or sale. The Commonwealth was entitled to specify that up to five per cent of the moneys allocated for the erection of dwellings by the State be set aside for the erection of dwellings for serving members of the defence forces. For features of the 1956 Commonwealth and State Housing Agreement see Year Book No. 48, pages 367-8.

*The 1961 Agreement.* The period during which Commonwealth advances to the States could be made under the 1956 Agreement terminated on 30 June 1961. A new Agreement was entered into which extended for a further five years the period during which advances could be made and also amended the 1956 Agreement in certain respects concerning funds for the erection of dwellings for rental to servicemen and the rate of interest payable on Commonwealth advances.

*The 1966 Agreement.* A new Agreement was entered into which extended for a further five years the period during which advances could be made, and also amended the 1956-1961 Agreement in certain respects concerning the definition of 'member of the forces', the erection by the States of blocks of flats in metropolitan areas, the erection of dwellings for rental to servicemen, and the provision of finance to home builders in rural areas.

For further information regarding the 1961 and 1966 Agreements see Year Book No. 53, pages 276-7, and Year Book No. 58, pages 208-9.

#### **States Grants (Housing) Act 1971**

The 1956-66 Housing Agreement expired on 30 June 1971 and was not further renewed. Instead, the Commonwealth and State Governments agreed upon a new arrangement under which the provisions contained in the Housing Agreement would be substantially continued for a period of five years up to 30 June 1976. Financial assistance is being made available principally in the form of non-repayable interest-free grants for specific purposes.

A basic housing grant of \$2.75 million per annum is payable for 30 years in respect of State housing activities in the 1971-72 financial year. Similarly a further \$2.75 million per annum is payable for 30 years in respect of State housing activities in each of the following four financial years. In total, over the period for which the grant is payable, the States will receive \$412.5 million. The grant is to be applied towards reducing the payments that would otherwise, but for the grant, have been required to be made not only by tenants and purchasers of State housing authority dwellings but also by borrowers from building societies and certain other approved institutions operating on advances from a special Home Builders' Account.

A Rental Assistance Grant of \$1.25 million per annum in each of the five years 1971-72 to 1975-76 is being distributed amongst the States for use by each State housing authority in reducing the rents of dwellings for families they consider to have insufficient means to meet the rents ordinarily payable to the authority.

#### **Commonwealth-State Housing Agreement (Servicemen)**

An Agreement was concluded between the Commonwealth and State Governments to take effect for five years from 1 July 1971, to provide separately for the erection by the States of dwellings for allotment to servicemen. Construction programs are negotiated annually for which the full capital cost is advanced by the Commonwealth as required by the States.

**Operations under the States Grants (Housing) Act and the Commonwealth-State Housing Agreement (Servicemen)**

The following table shows the results of operations under the *States Grants (Housing) Act* 1971 and the Commonwealth-State Housing Agreement (Servicemen) during 1971-72. Corresponding figures for 1970-71 appear in Year Book No. 58, page 208.

(a) The maximum amount is 70 per cent of the State loan moneys for housing. (b) The minimum amount must be 30 per cent of the State loan moneys for housing. (c) Also included in State housing program above and may include completions of houses for servicemen programmed in previous years. (d) Tasmania did not operate under the 1945 Agreement after August 1950.

**Dwellings for Aged Pensioners Scheme**

This Scheme is directed towards those in the community considered to be most in need of housing assistance. These are single eligible pensioners living alone in unsuitable private accommodation and paying too high a proportion of their pensions in rent. Most State housing authorities have for many years been building accommodation for aged persons, and Commonwealth Government assistance under this Scheme was introduced to supplement the States' efforts and to effect a more rapid reduction in the waiting lists with State housing authorities.

Under the *States Grants (Dwellings for Aged Pensioners) Act* 1969 an amount of \$25 million is being made available to the States over a period of five years from 1969-70 to 1973-74 for construction by them of single self-contained accommodation for allocation, at rents they can afford to pay, to single eligible pensioners in receipt of supplementary assistance under the *Social Services Act* 1947-1972 or the *Repatriation Act* 1920-1972.

Building Schemes approved so far under the Act are shown in the following table. Typical rents for these units are in the vicinity of \$3.00 a week.

#### War service homes

The *Defence Service Homes Act* 1918-1973 formerly the *War Service Homes Act* 1918-1971 makes provision for assistance to be granted to persons who satisfy the eligibility conditions set out in the Act, to enable them to acquire on concessional terms a soundly constructed home that they would occupy as a residence.

Persons eligible for assistance under the Act include members of the Australian forces and nursing services enlisted or appointed for or employed on active service outside Australia or on a ship of war during the 1914-18 and 1939-45 Wars and persons who served in the warlike operations in Korea or Malaya or who have served on 'special service' as defined in the *Repatriation (Special Overseas Service) Act* 1962-1968. 'Special service' includes 'special duty' in an area which by reason of warlike operations or a state of disturbance has been declared a 'special area' under the *Repatriation (Special Overseas Service) Act*. The areas declared as a 'special area' under the Act are:

Vietnam (Southern Zone) from 31 July 1962;

certain areas of Borneo, Sabah and Sarawak from 8 December 1962 to 30 September 1967;

certain areas of Malaya from 28 May 1963;

Malaysia (the remainder) and Singapore from 7 July 1965 to 30 September 1967;

Vietnamese waters from 1 March 1967.

The categories of eligible persons also include the widow and, in some circumstances, the widowed mother of an eligible person and persons domiciled in Australia and employed in certain sea-going service during the 1914-18 and 1939-45 Wars.

The maximum amount of loan or advance which may be granted under the *War Service Homes Act* 1918-1971 is \$9,000. The period of repayment may be up to forty-five years. In the case of a widow or widowed mother of an Australian ex-serviceman, the period may be extended to a maximum of fifty years.

The Director of War Service Homes is responsible for the execution of the War Service Homes Act subject to the directions of the Minister for Housing.

**Operations under the War Service Homes Act**

The following tables give details of the operations under the War Service Homes Act in the year 1971-72 and from the inception of the scheme on 6 March 1919 to 30 June 1972. The earliest single year for which details are given in the tables is 1967-68; for earlier years *see* previous issues of the Year Book. The figures shown include operations in Papua New Guinea and Norfolk Island.

(a) Includes Norfolk Island. (b) Includes Papua New Guinea. (c) Included in South Australia. (d) Included in New South Wales.

In addition to the homes provided under the War Service Homes Act and shown above, 2,846 homes, which had been provided originally under the Housing Agreements with the States, have been taken over in accordance with those Agreements.

#### Home Savings Grant Scheme

The administration of the Home Savings Grant Scheme is a function of the Commonwealth Department of Housing. The purpose of the Scheme is to assist young married persons, and young widowed or divorced persons with dependent children, to purchase or build their own homes. A further objective is to increase the proportion of total savings available for housing purposes by encouraging young people to save with those institutions which provide the bulk of housing finance. The Scheme is governed by the *Homes Savings Grant Act 1964-1972*. The Act authorises the payment of grants from the National Welfare Fund.

The Scheme provides for the payment of grants of \$1 for every \$3 saved by eligible persons under 36 years of age for the first home they own after marriage. The savings must be made over a period of at least three years and held in an approved form. The maximum grant to a married couple, or to husband or wife if only one is eligible, or to a widowed or divorced person, is \$750 on savings of \$2,250 or more. Smaller grants down to a minimum of \$10 are payable on lesser amounts saved.

To be eligible for the grant, a person must be married, widowed or divorced, with one or more dependent children, and must have—or must be married to a person who has—entered into a contract to buy a home or have one built, or begun to build a home as an owner-builder. The person must be under 36 years of age at the time of marriage and at the date of the contract to buy or build or the date building began; must have either been an Australian citizen or lived in Australia during the three years immediately preceding that date; and must also have saved in Australia in an approved form throughout that period. Those three years are known as the applicant's 'savings years'. The grant is payable in respect of existing homes and homes being built. Flats and home-units may also be eligible provided separate title can be obtained. The value of the home, including the land, the house itself and any other improvements, must not exceed \$22,500, or \$17,500 if the contract to buy or build the home was made, or the building of the home as an owner-builder began, before 16 August 1972. Most homes are eligible, the main exception being homes purchased from State housing authorities which have been built with moneys advanced by the Commonwealth under the Commonwealth-State Housing Agreement at concessional rates of interest or where the terms of purchase have been subsidised by reason of a Commonwealth Grant to the State under the *States Grants (Housing) Act 1971*.

The main forms of savings acceptable under the Scheme are accounts with savings banks and fixed deposits with trading banks (but not cheque accounts), and deposits with or shares in registered building or co-operative housing societies. Savings spent in connection with the purchase or construction of the home prior to the date of the contract to buy or build the home, or the date building began, are also acceptable. Savings held with a credit union are acceptable provided the particular credit union has become an approved credit union for the purposes of the Scheme. The amount of savings that qualify for a grant is the sum of the amounts by which the acceptable savings have increased each year, up to a limit of \$900 in any one savings year (\$600 if the contract date was before 16 August 1972), added to the acceptable savings held at the start of the three-year savings period.

Full details of the Scheme are set out in the official pamphlet *A Grant for Your Home* available from banks, building and housing societies, post offices, and offices of the Commonwealth Department of Housing throughout Australia. Additional statistical information is contained in the Annual Reports by the Secretary, Department of Housing, on the *Homes Savings Grant Act 1964-1972*, which are available from the Australian Government Publishing Service Bookshops.

#### Operations under the Home Savings Grant Scheme

Particulars of applications received and approved during 1971-72 and during the period from 20 July 1964, when the Scheme commenced to operate, to 30 June 1972 are set out below.

#### HOME SAVINGS GRANT SCHEME: OPERATIONS, STATES AND TERRITORIES, 1971-72

## Homes qualifying for grants

The following two tables contain particulars of homes in respect of which grants were approved during 1971-72. As grants are payable only to persons under 36 years of age and in respect of homes costing no more than a prescribed amount (\$17,500 if acquired before 16 August 1972), these statistics should not be regarded as being applicable to home owners in general.

(c) Includes Northern Territory. (d) Includes Queanbeyan, N.S.W.

## Housing loans insurance scheme

The Housing Loans Insurance Corporation was established by the *Housing Loans Insurance Act* 1965-66 to insure approved lenders against losses arising from the making of housing loans. The main purpose of the activities of the Corporation is to assist people to borrow, as a single loan, the money they need and can afford to repay to obtain a home suited to their requirements.

The Corporation will insure loans of up to \$40,000. The maximum loan to valuation ratio is 95 per cent for loans for the purchase or construction of homes. A once-and-for-all premium of 1.5 per cent of the amount of the loan is charged by the Corporation for the insurance of loans representing 90 per cent or more of valuation. The premium rate falls progressively to a minimum of 0.25 per cent on loans of less than 70 per cent of valuation. The premium normally is paid by the borrower, but lenders may agree to add it to the amount of the loan for repayment by the borrower over the duration of the loan. The maximum period for repayment of a loan on the purchase or construction of a home is forty years.

The Corporation insures loans for purposes other than the purchase or construction of a dwelling. These include alterations, extensions or improvements to a dwelling. An insured loan may be made only by an approved lender. Approved lenders are appointed by the Corporation from within approved classes of lenders specified by the Minister for Housing. The approved classes include banks, building and housing societies (permanent and terminating), friendly societies, life and general insurance companies, trustee companies, superannuation and other retirement funds, mortgage management companies and solicitors. The Corporation commenced its operations in November 1965. By the end of December 1972 110,456 loans to a value of \$1,159 million had been insured.

### State housing authorities

The following paragraphs describe briefly the organisation of the various State housing authorities and their activities in the fields of home construction and provision of homes on a rental basis (*see* pages 220–24 for their financial advances to persons wishing to purchase or build a home). For summarised figures of total government construction of houses and flats, *see* pages 202, and 205. For a fuller description of the activities of State housing authorities and their financial advances to home purchasers or builders *see* Year Book No. 53, pages 283–91.

*New South Wales—The Housing Commission of New South Wales.* The Housing Commission of New South Wales was constituted in 1942, its principal function being the provision of low-cost housing to persons in the lower or moderate income groups.

Advances from the Commonwealth have provided most of the Housing Commission's capital funds and by 30 June 1972 had aggregated \$575,209,000 of which \$69,348,000 had been repaid. Other net funds of the Commission at 30 June 1972 comprised repayable advances from the State, \$58,559,000; public loans raised by the Commission, \$1,895,000 grants from the Commonwealth, \$5,499,000, grants from the State, \$20,107,000 (including \$9,035,000 from consolidated revenue and \$11,000,000 from taxes on poker machines); provision for maintenance of properties, \$5,296,000; and accumulated surplus, \$49,546,000. In addition, the Commission owed \$14,591,000 to creditors, mainly for purchase, of land and work-in-progress. These funds were represented by fixed assets, \$656,308,000 (including \$217,489,000 debtors for purchase of homes) and current assets, \$5,044,000. In 1971–72, the Commission's income was \$51,115,000 (including rent \$34,723,000 and interest \$11,518,000), expenditure \$46,543,000 (interest, \$22,656,000), and capital expenditure \$63,293,000.

Most of the permanent dwellings provided by the Commission have been erected under the Commonwealth-State Housing Agreements. In 1971–72, 5,218 houses and flats, valued at \$44,550,000, were completed for the Housing Commission by private builders on contract to the Commission.

Upon request by other State Departments the Housing Commission will erect houses for employees of those Departments, the Departments providing the necessary lands and funds. In addition, the Commission erects (with State funds) dwellings for employees of industries connected with decentralisation and development. Specially designed units are erected by the Housing Commission to provide dwellings for elderly persons at rentals within their means. The rents of these units, as at 30 June 1972, are approximately \$3.95 a week for elderly single persons and \$6.00 a week for elderly couples, and 6,184 units had been completed at 30 June 1972.

*Victoria—Housing Commission, Victoria.* The Housing Commission, Victoria, was set up in 1938 as a result of the Housing Act of the previous year. The objects of the Commission as now laid down are the improvement of existing housing conditions; the provision of suitable rental housing for persons displaced by slum reclamation or living under unsatisfactory conditions, and for other eligible persons; the sale of houses to eligible persons and the making of advances to such persons to enable them to own their homes; the development of land for housing and related purposes; and the preparation and implementation of Urban Renewal Proposals. Since the signing of the 1945 Commonwealth-State Housing Agreement the construction of dwellings has been financed by the Commonwealth Government and Commission Funds.

At 30 June 1972 the Housing Commission had completed 1,328 dwelling units under the State Housing Scheme, and 71,093 dwelling units under Commonwealth-State Agreements and Commonwealth Grant. Specially designed dwelling units are erected by the Commission to provide dwellings for elderly persons at rentals within their means. To 30 June 1972, 5,099 units have been completed.

*Queensland—The Queensland Housing Commission.* The Queensland Housing Commission was established in 1945 to assist in meeting the housing shortage. In addition, the Commission was empowered to build houses itself, either for sale or for rental.

The Housing Commission finances its operations through two Treasury Trust Funds—the Queensland Housing Commission Fund and the Commonwealth-State Housing Fund. In addition, a Home Builders' Deposit Trust Fund is available to assist eligible persons to accumulate money to acquire land and erect a Commission dwelling thereon, or to purchase a dwelling under contract of sale conditions. Total disbursements by the Commission for the year 1971–72 amounted to \$37,812,651, representing \$9,001,660 from the Queensland Housing Commission Fund and \$28,810,991 from the Commonwealth-State Housing Fund, while the Home Builder's Deposit Fund had a nil balance at 30 June 1972.

During 1971–72 the Commission completed 1,750 house units, bringing the total completions under all schemes since the revival of housing construction in 1944–45 to 43,466. Of this number 25,373 houses, or 58.4 per cent, were for home ownership, and 18,093, or 41.6 per cent, were for rental.

In the field of rental housing the Commission administers and acts as the constructing authority under the Commonwealth-State Housing Agreements and the Commonwealth Acts—*States Grants (Aged Pensioners Housing) Act* 1969 and *States Grants (Housing) Act* 1971. Operating under the provisions of the *State Housing Act* 1945–1971, the Commission, through its scheme of workers' dwellings, makes advances for the construction of dwellings to eligible persons who own a suitable building site. The number of workers' dwellings completed during 1971–72 amounted to 157, making a total of 31,143 completions since the inception of the scheme. The Commission also has power to make advances, secured by mortgage, to firms for housing of employees. The Commission has power to sell houses under contract of sale conditions. Contract of sale agreements were made to purchase 735 of the Commission's houses during 1971–72.

*South Australia—The South Australian Housing Trust.* The South Australian Housing Trust operates under the South Australian Housing Trust Act, 1936–1971 and the Housing Improvements Act, 1940–1971 for the purpose of providing houses for families of limited means. Houses are built for both rental and sale, and to 30 June 1972, 72,507 had been completed throughout the State, of which some 38,049 had been built and sold under various schemes. At 30 June 1972 the rents of five-roomed (i.e. three bedrooms) double-unit houses ranged from \$10.00 a week for houses of an older type to \$12.50 a week for houses then being completed. Single units rent ranged between \$14.00 and \$18.50. Two- and three-storey groups of flats with weekly rentals ranging from \$9.00 to \$17.75 per flat have been built in the Metropolitan Area; of these 1,501 flats are situated in the Metropolitan Area and 292 at Elizabeth. In 1953 the Trust began building cottage or pensioner flats for elderly people. At 30 June 1972 it had built 1,367 cottage flats from its own resources and an additional 774 for charitable and non-profit organisations.

During 1962–63 the Trust commenced construction of rental-purchase houses. The aim of this scheme is to provide less expensive houses for the lower income groups. It is expected that such houses will, to some extent, replace double-unit type rental houses. The Trust has also undertaken the construction of houses for various State Government Departments which need to house staff in country districts. In addition, 243 houses in country areas have been built for the Department of Community Welfare. The letting of these houses to selected Aboriginal families is administered by the Department. In order to assist primary producers the Trust will erect houses on the applicant's own land for his own use or that of his employees, either using local materials or transporting pre-fabricated houses to the site.

*Western Australia—State Housing Commission of Western Australia.* The activities of the State Housing Commission extend throughout the whole State. In addition to construction of a variety of dwellings for its own rental and purchase programme as determined under the State Housing Act, the Commonwealth-State Housing Agreements prior to 30 June 1971 and subsequently the *States Grants (Housing) Act* 1971, its activities include;

- The management as agent of the Commonwealth War Service Homes Scheme in Western Australia;

- Construction of houses for other Government Departments (both Commonwealth and State also semi- and local government authorities) in Western Australia;

- Construction and maintenance of houses for the Government Employees' Housing Authority.

At 30 June 1972, the Commission had completed under all schemes since 30 June 1944, a total of 56,455 units of accommodation throughout the State.

During the twelve months ended 30 June 1972, 2,579 units of accommodation were completed; metropolitan area, 2,007; country, 395; and north of 26th parallel, 177; and a further 1,242 units were under construction.

Despite the high rate of home construction and the ready availability of private project-built homes for purchase, the demand—particularly from the lower income groups—continues to be high. A large proportion of this demand is directed to the State Housing Commission.

Building societies are a major source of housing finance in Western Australia. At 30 June 1972 it was estimated that the assets of all societies were about \$403 million. Currently, 15 permanent and 375 terminating societies are operating. As a condition of eligibility for assistance under the *States Grants (Housing) Act 1971*, the State is required to allocate at least 30 per cent of its housing authority new borrowings for advances through building societies, or other approved bodies.

Under the *Housing Loans Guarantee Act, 1957–1972*, the guarantees provided to financial institutions enable loans to be made to lending institutions with full security. The Act enables building societies and other approved bodies to make high ratio advances to families of low and moderate means without additional charge. The interest rate charged to the borrower may not exceed 7.5 per cent reducible. Loans may be made up to 95 per cent of the value of the house and land or a specified sum, whichever is the lesser amount. In respect of the metropolitan region, the maximum loan permitted is \$12,000, and outside the metropolitan region, but south of the 26th parallel, \$13,000. For a new house situated north of the 26th parallel and in the North West or Eastern Land Divisions, the maximum loan is \$17,500 and in the Kimberley Land Division \$20,000.

*Tasmania—The Housing Department.* The Housing Department was established in 1953 and is responsible for administering that portion of the *Homes Act 1935* which relates to the acquisition and development of land for housing purposes and the erection of homes for rental and sale by purchase contract, and the *Casual Worker's and Unemployed Persons' Homes Act 1936*.

During 1971–72, 563 dwellings were completed. Construction since 1944 has totalled 13,212 dwelling units, comprising 12,444 detached and semi-detached units (9,641 of timber), 449 elderly persons' flatettes, 22 maisonettes, and 296 multi-unit flats.

Flats, maisonettes, villa units, and elderly persons' homes are for rental only. Single unit dwellings may be allotted on either a purchase contract or rental basis. The weekly rental of a newly erected three-bedroom brick veneer house in the Hobart metropolitan area approximated \$20.25 in the June quarter of 1972. In certain necessitous cases rental rebates are allowed. Under the current rental rebate formula, a married couple occupying an elderly persons' unit and whose only income is the age pension pay \$3.80, while a single person solely dependent on the pension pays \$2 a week.

Most purchase contract allotments are made on a no-deposit basis with repayments over a maximum period of fifty-three years. Purchase contracts are sometimes surrendered to the Department. Net of surrenders, 8,985 purchase contracts had been entered into by June 1972. The sale price, excluding land, of a new three-bedroom house in the Hobart metropolitan area was approximately \$12,000 in June of 1972.

#### Housing schemes in Commonwealth Territories

*Northern Territory.* In 1946 control of all government-owned residences in the Territory (excluding those belonging to the Defence Services or Commonwealth Railways, or attached to post offices) was vested in the Administration. The Northern Territory Housing Commission was established in 1959 and operates under authority of the *Housing Ordinance 1959–1971*. The Commission became autonomous on 1 October 1969 and provides rental housing for persons of limited means who are not adequately housed and who are not officers of either the Commonwealth or the Northern Territory Public Service. To 30 June 1972 the Commission had completed a total of 3,169 houses and flats; 2,275 of these are in Darwin (including 490 flats), 609 in Alice Springs (including 161 flats); 136 in Katherine (including 29 flats); 131 in Tennant Creek (including 15 flats); 6 houses in Pine Creek; 8 houses in Adelaide River and 2 each in Elliot and Mataranka. In addition, 49 houses and 8 flats were taken over from the Department of Defence in Alice Springs; 2 houses in Katherine and 1 house in Tennant Creek were acquired from the Northern Territory Administration. A further 363 houses and 22 flats were under construction.

*Australian Capital Territory.* The Commonwealth Government provides houses and flats for rental to persons employed in the Australian Capital Territory. At 30 June 1972 the Department of the Capital Territory controlled 8,109 houses and 2,022 flats for rental purposes. Government rental houses may be purchased by tenants. From 1 July 1950 to 30 June 1972, 9,780 houses had been sold to tenants.

*Papua New Guinea.* In 1960 the Administration, through the Commissioner for Housing, commenced a housing loans scheme for providing low-cost houses for rental and eventual sale,

where possible, to indigenes, mixed race peoples and Asians. This scheme was taken over by the Housing Commission at its inception on 1 July 1968, along with the 323 houses built under the scheme.

A Housing Commission was established to improve existing housing conditions, to provide adequate and suitable housing for letting and sale to persons who are of limited means, to make advances for home purchase, and to develop land for housing. Details of housing constructed are as follows: 323 houses taken over from the Administration on 1 July 1968; 279 houses constructed during the year ended 30 June 1969; 54 houses and 64 flats constructed during the year ended 30 June 1970; 50 houses taken over from the Administration on 1 July 1970; 481 houses and 64 flats constructed during the year ended 30 June 1971; and 436 houses and flats constructed during the year ended 30 June 1972.

#### Summary of rental activities of government authorities

The first of the following two tables shows the revenue from rental for dwellings under control of government housing authorities each year from 1967-68 to 1971-72, and the second, the number of tenants paying rent for dwellings under control of government housing authorities at the end of each year 1967-68 to 1971-72.

#### GOVERNMENT HOUSING AUTHORITIES: REVENUE FROM RENTALS STATES AND TERRITORIES, 1967-68 TO 1971-72

(\$'000)

(a) Excludes tenanted temporary dwellings. (b) Excludes temporary and emergency dwellings. (c) Number of occupied dwellings at 30 June.

#### Advances to home purchasers

Many prospective home purchasers wish to borrow for the purpose of constructing or purchasing their own homes. Usually the loan is covered by way of mortgage of the home to be constructed or bought. Such loans are provided from a number of private sources and from agencies owned or guaranteed by the State or Commonwealth Governments. The information in this section concerns the direct loans made to home purchasers by the more important institutional lenders. Loans to institutions which in turn lend moneys to home purchasers and loans to contract builders, etc. are excluded as far as possible. The loans may be for the construction of new dwellings, the purchase of existing dwellings, for additions, renovations, etc., as first or subsequent mortgages, overdrafts and so on. While figures of all loans to home purchasers are not available, the institutions mentioned account for a significant proportion of total loans. Details of the terms and conditions of lending are given, together with available information on the number and value of loans made.

## State authorities and agencies

*New South Wales*

*Rural Bank of New South Wales—Sale of Homes Agency.* A Sale of Homes Agency was established in 1954 to arrange for the sale on terms of houses erected by the Housing Commission of New South Wales. The Agency's operations began with the sale to selected purchasers of 100 houses made available by the Commission during 1954-55 and 1955-56. The sales were made on the basis of 10 per cent deposit and repayment of the balance over a maximum period of forty years, with interest at 4.5 per cent per annum. Total advances under that scheme amounted to \$646,648; at 30 June 1972 the advances outstanding amounted to \$280,517 in respect of 64 houses.

Since 1956 the Sale of Homes Agency has acted as the agent of the Housing Commission in arranging the sale on terms of houses erected under the Commonwealth-State Housing Agreements. The terms of sale provide for a minimum deposit of \$200 and repayment of the balance over a maximum period of forty-five years, with interest rates, since the inception of the scheme, ranging from 4.25 to 6.75 per cent per annum. Particulars of the advances made by the Agency in connection with the sale of houses erected under the 1956, 1961, and 1966 Agreements and the *States Grants (Housing) Act* of 1971 are given in the following table.

**RURAL BANK OF NEW SOUTH WALES—SALE OF HOMES AGENCY ADVANCES FOR HOMES SOLD UNDER THE 1956, 1961 AND 1966 COMMONWEALTH-STATE HOUSING AGREEMENTS AND THE STATES GRANTS (HOUSING) ACT OF 1971**  
1967-68 TO 1971-72

Year	Advances during year		Total advances to end of year		Advances outstanding at end of year(a)	
	Number of houses	Amount	Number of houses	Amount	Number of houses	Amount
		\$'000		\$'000		\$'000
1967-68 . . .	1,444	12,866	20,809	149,975	18,724	127,288
1968-69 . . .	1,227	11,167	22,036	161,141	19,406	133,363
1969-70 . . .	1,751	17,074	23,787	178,215	20,523	144,511
1970-71 . . .	2,080	22,144	25,867	200,359	21,953	160,426
1971-72 . . .	1,978	24,827	27,845	225,186	23,130	177,309

(a) Comprises principal outstanding and loan charges due but not paid.

The Sale of Homes Agency also acts as agent for the Housing Commission in arranging the sale of houses erected by the Commission on applicants' land. Under this scheme persons who have established a housing need may apply to the Commission to have a standard-type dwelling erected on their own land. The houses are sold, at a price equivalent to their capital cost, on the same terms as for houses erected under the 1956 to 1966 Housing Agreements and the *States Grants (Housing) Act* of 1971. Up to 30 June 1972, 667 houses had been built at a cost of \$5,179,856, the balance of indebtedness at that date was \$4,299,719.

*Rural Bank of New South Wales—Other loans.* The Rural Bank of New South Wales provides assistance to individuals for the erection or purchase of homes and for other approved purposes associated with homes. Advances are based on the bank's official valuation of the dwelling. The rate of interest on long-term loans for housing purposes is 5.75 per cent per annum.

*Victoria*

*Housing Commission of Victoria.* Very few houses were sold by the Commission until 1954 but the added emphasis given to the construction of houses for private ownership by the amendments in the Commonwealth-State Housing Agreement in 1955-56 had the effect of substantially increasing the number of houses sold.

Of the 72,421 dwelling units built up to 30 June 1972, under the State Housing Scheme, the Commonwealth-State Agreements and Commonwealth Grant, a total of 33,131 houses have been sold (17,620 in the metropolitan area and 15,511 in the country).

*Home Finance Trust.* In 1956 a Home Finance Trust was established with the object of receiving money from institutions and others in order to make loans for the erection or purchase of houses. Applicants for loans must declare that they intend to use the houses as homes for themselves, their families and dependants.

Loans granted are on the basis of a first mortgage over the house. Loans are not to exceed ninety-five per cent of the value of the security (house and land) and are not made if the value of the security exceeds \$14,000. The house must not have been erected more than two years before the date of mortgage. Repayment of loans may be made over a maximum period of thirty years, with interest charges determined by the Trust. At 30 June 1972, 3,682 loans totalling \$26,121,109 were outstanding.

In 1963 the Trust was empowered to make housing loans on the security of second mortgages subject to conditions similar to those applying to the first mortgage loans, except that the maximum term for repayment of a loan is ten years and no restriction is placed on the percentage of loan to valuation. At 30 June 1972, 1,648 second mortgage loans were outstanding, the amount involved being \$2,336,860.

(See Savings Banks, page 224, for activities of the State Savings Bank of Victoria).

### *Queensland*

*Queensland Housing Commission.* The present maximum advance allowable under the Act is \$10,500 for a timber, brick veneer, brick, or concrete building. The rate of interest charged on new advances was increased from 5.5 per cent to 6.125 per cent per annum from 3 November 1969, and was further increased to 7.125 per cent per annum from 30 July 1970. The rate charged on new advances was reduced to 5.5 per cent per annum from 1 October 1971. Repayments may be made at the option of the borrower over either a thirty year or a forty-five year period.

*Workers' dwellings.* From 4 October 1962 the maximum advance under this scheme was increased to \$7,000 for all types of workers' dwellings. This was increased to \$8,000 from 2 June 1966, to \$9,000 from 22 May 1969, to \$10,000 from 23 September 1971 and \$10,500 from 1 July 1972. Total advances made for dwellings since operations commenced in 1910 to 30 June 1972 amounted to \$74,009,285.

### *South Australia*

*South Australian Housing Trust Sales Schemes.* Prospective purchasers of Housing Trust houses (other than Rental Purchase houses) may purchase either by paying cash or by paying a deposit and arranging for a loan on security of a first mortgage from any of the recognised lending authorities. In cases where the deposit and the first mortgage so raised are insufficient, the Trust may advance the balance of the house price on security of a second mortgage, the term of which is usually coterminous, but not exceeding 30 years. The interest rate is 7.5 per cent and the principal is adjusted quarterly. During 1971-72 the Trust commenced 344 second mortgages valued at \$530,585. At 30 June 1972 second mortgages totalled 8,400 and the balance outstanding at that date was \$9,500,000. A minimum deposit of \$100 is required for houses built under the Rental Purchase Scheme. The balance of the purchase price is repayable to the Trust in weekly instalments over periods up to 40 years at 5.5 per cent interest per annum.

*State Bank of South Australia.* The State Bank, together with the Housing Trust, are the principal agents of the State Government for the distribution of moneys received under housing assistance arrangements with the Commonwealth. During 1971-72 the Bank opened 1,880 new accounts worth \$16,606,831 in the Home Builders' Account. The balance of loans outstanding on this account at 30 June 1972, totalled \$116,150,247. The Bank administers the Advances for Homes Act, 1928-1972 on behalf of the State Government. However, advances under this Act have virtually ceased and the only funds being made available are for repairs to tenancy houses and for extra bedroom accommodation. The balance outstanding under this Act at 30 June 1972 was \$18,864,133. The present maximum housing loan is \$10,000, repayable over a period not exceeding fifty years at a rate of interest of 6 per cent per annum calculated on monthly balances.

(See Savings Banks, page 225 for activities of the Savings Bank of South Australia.)

### *Western Australia*

*State Housing Commission of Western Australia.* Under the State Housing Act (and the Commonwealth-State Housing Agreement up to 30 June 1971) the maximum loan is \$8,000 by way of mortgage, while under contract of sale the maximum is \$6,500 on the building plus the value of the land in the metropolitan area, and greater amounts in rural areas, depending on the circumstances.

To proceed under the mortgage conditions, a deposit of not less than 10 per cent is required, but under contract of sale the deposit may be as low as \$200. The interest rate on all advances is 5.375 per cent per annum and the repayment period is forty-five years. The income eligibility figure varies according to the movement of the basic wage, and currently an applicant in the Metropolitan Area cannot have an income exceeding \$5,038 a year, plus \$100 for each dependent child under twenty-one

years of age. For the country, the corresponding amount is \$5,064 per annum plus \$100 for each dependent child under twenty-one years, and north of the twenty-sixth parallel the Minister may allow families with an income of up to \$5,350 plus \$100 for each dependent child under twenty-one years of age to be given financial assistance. A second-mortgage scheme exists under the State Housing Act, which provides that assistance be limited to those applicants who are building or purchasing new homes, the cost of which, excluding land, does not exceed \$10,000. The Commission limits the second mortgage to a maximum of \$2,000.

(See Savings Banks, page 225, for activities of the Savings Bank Division of The Rural and Industries Bank of Western Australia.)

### *Tasmania*

*Housing Department.* The interest rate on purchase contract loans as at 1 July 1972, was 5 per cent. To be eligible for a house on purchase contract terms an applicant must be married or about to be married, or have dependants for whom it is necessary to provide a home. The number of loans outstanding at 30 June 1972 was 7,998, and the amount outstanding \$58,982,000.

*Agricultural Bank of Tasmania.* The Agricultural Bank, as an approved institution under the Commonwealth-State Housing Agreement, receives part of those funds allocated for advances to home builders. To be eligible for a loan an applicant must be married or about to be married, be over the age of twenty-one, and own a block of land. The maximum amount of an advance to an applicant is \$9,000 for all types of houses in certain areas, provided that the total advance does not exceed ninety per cent of the Bank's valuation of land and dwelling. Advances to borrowers are repayable by equated instalments over thirty years. Advances made as from 1 March 1972 were at an interest rate of 6 per cent per annum.

During 1971-72, 291 advances were approved, valued at \$2,571,000. Since November 1945 a total of 4,900 loans amounting to \$32,658,000 has been approved, of which 3,630 have been for erection of dwellings and 1,270 for the purchase of existing homes. Total advances outstanding at 30 June 1972 amounted to \$22,187,000. These figures exclude advances to building societies.

### **Commonwealth authorities and Territories**

#### *Department of Housing*

In December 1963 the Department of Housing was created, and to it were transferred the functions and staff of the War Service Homes Division, and the Housing and Building Industry Branch of the then Department of National Development.

#### *War Service Homes*

For details of the operations under the *Defence Services Homes Act* 1918-1973, formerly the War Service Homes Act, see pages 212-14.

#### *Northern Territory*

*Loans Scheme.* This scheme was commenced in 1953 and is administered by the Home Finance Trustee under the *Housing Loans Ordinance* 1949-1967. Advances may be made for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. Loans are provided on a deposit of 5 per cent of the first \$4,000 and 10 per cent of the balance of the Trustee's valuation up to a maximum of \$9,000. The rate of interest charged is 7.25 per cent per annum reducible to 6.25 per cent per annum if instalment payments are made by the due date. The maximum period of repayment is forty-five years for brick houses and twenty-five years for other houses. Up to 30 June 1972, 1,361 loans totalling \$7,761,950 had been approved. These were for: erection, 794; purchase, 410; enlargement or completion, 98; discharge of mortgage, 59.

*Sales Scheme.* Tenants of government-owned houses under the control of the Administration may purchase the dwellings they occupy either for cash or on terms requiring a minimum deposit of 5 per cent of the purchase price with repayments over a maximum period of forty-five years including interest at 6.25 per cent per annum.

*Housing Commission Sales Scheme.* Since the November 1963 amendment of the *Housing Ordinance* 1959-1971 the Housing Commission has been permitted to sell its houses to tenants in occupation. The terms require a minimum cash deposit of \$200 and repayment of the remainder of the loan over a period not exceeding forty-five years; there is no prescribed limit to the amount of the loan and the rate of interest is fixed by the Commission from time to time.

*Australian Capital Territory*

Loans may be granted by the Commissioner for Housing to enable persons to purchase or build a new house in the Australian Capital Territory. Where the Commissioner's valuation does not exceed \$4,000 the maximum loan may not exceed ninety-five per cent of the valuation. If the Commissioner's valuation exceeds \$4,000, the maximum loan is ninety-five per cent of the first \$4,000 and ninety per cent of the balance (but in no case can the amount lent exceed \$9,000). Repayment may be made over a maximum period of forty-five years. The current rate of interest is 7.25 per cent per annum with a concession of 1 per cent for payments made on or before the due date. At 30 June 1972, 9,780 houses were under mortgage to the Commissioner.

Government rental houses may be purchased by tenants. The basis of the sale is a minimum deposit of 5 per cent of the purchase price fixed by the Department of the Capital Territory with no limit to the amount which may be held on mortgage from the Department. Repayment of the amount covered by mortgage may be made over a maximum period of forty-five years. The interest rate is 7.25 per cent per annum with a concession of 1 per cent for payment made on or before the due date. To 30 June 1972, 9,780 houses had been sold to tenants.

*Papua New Guinea*

Under authority of the *Housing Loans Ordinance* 1953-1963, the Commissioner for Housing may make advances to any members of the community for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. The Commissioner's responsibilities were transferred to the Housing Commission on 1 July 1968. The maximum loan is \$7,000 or 90 per cent of the Commission's valuation whichever is the lesser. The maximum period of repayment is twenty-five years for all dwellings. The effective rate of interest is currently 8.25 per cent per annum, or 1 per cent above the borrowing rate of the funds. Up to 30 June 1972, 634 loans totalling \$3,279,115 had been approved.

**Savings banks**

All savings banks lend funds for housing to both individuals and building societies. Details of savings banks housing finance transactions during the years 1969-70, 1970-71 and 1971-72 are shown in the following table. (See the chapter Private Finance for further details.)

**SAVINGS BANKS: HOUSING LOANS APPROVED AND BALANCES OUTSTANDING TO INDIVIDUALS, STATES AND TERRITORIES, 1969-70 TO 1971-72**

(\$'000)

Year	N.S.W.	Vic.	Qld	S.A.(a)	W.A.	Tas.	A.C.T.	Total
LOANS APPROVED DURING YEAR

1971-72	663,869	915,839	260,540	307,357	166,540	59,782	18,115	2,392,042

(a) Includes Northern Territory.

*State Savings Bank of Victoria.* The Bank grants long-term loans to depositors to enable them to build, purchase or improve homes. These loans are granted by both the Credit Foncier and Savings Bank Departments.

The maximum proportion of valuation to be granted as Credit Foncier loan is eighty per cent and the maximum loan is \$8,000. Interest is 6.25 per cent and the term of the loan is ten years, subject to renewal. The maximum proportion of valuation granted as Savings Bank Department loan is eighty per cent with no limit on the maximum loan. For a property to be occupied by the borrower the interest rate is at least 6.75 per cent, depending on the amount of the loan. The above conditions are those current as at 16 October 1972 but are subject to review and alteration by the Bank at any time. During the year 1971-72 the Bank advanced \$90,002,809 to 9,819 borrowers in addition to

\$64,835 to Co-operative Housing Societies. At 30 June 1972 the total debt of 78,994 individual borrowers was \$472,271,987, while indebtedness of Co-operative Housing Societies and the Home Finance Trust amounted to \$9,113,235 and \$9,544,134 respectively.

*Savings Bank of South Australia.* The bank grants mortgage loans for the building or purchase, for personal occupation, of existing houses, houses not previously occupied and those to be erected. Normally advances are made up to 85 per cent of the Bank's valuation or 90 per cent where the borrower elects to insure the loan with the Housing Loan Insurance Corporation and pay the necessary premium which may be added to the loan if so desired. The maximum loan period is thirty years and the rate of interest on loans of up to \$10,000 is 6.75 per cent per annum; this rate is subject to review at any time. Loans above \$10,000 are available at slightly higher interest rates.

During 1971-72 the Bank advanced \$19,497,145 by way of housing loans, the number of new loans totalling 2,289. At 30th June 1972 there were 27,372 housing loans current with a balance outstanding of \$148,403,252.

*Rural and Industries Bank of Western Australia (Savings Bank Division).* The Rural and Industries Bank of Western Australia is authorised by the *Rural and Industries Bank Act, 1944-1966* to make loans from moneys on deposit with its Savings Bank Division to a person or body for the purchase or erection of a dwelling. It is the policy of the Bank to provide funds for housing primarily for occupancy by the borrower. There is no fixed limit on the amount of a loan. At 30 June 1972 loans up to \$8,000 attracted interest at 6.5 per cent per annum reducible, loans up to \$10,000 7 per cent per annum reducible, whereas loans above \$10,000 attracted varying rates of interest dependent upon the particular circumstances. Loans may be approved up to terms of thirty years but the average term of housing loans is eighteen to twenty years.

The bank undertakes the sub-division and development of land and the erection of homes which are sold under conditions which ensure that the purchasers are genuine home seekers. This activity commenced in May 1967. The number of homes built to 30 June 1972 was 384, whilst another 44 were under construction. In addition, 331 building lots (under certain restrictions) were made available to project builders for the erection and sale of houses. A further 1,001 building lots have been auctioned to the public under restrictions designed to favour genuine home seekers.

### Trading banks

Apart from loans by certain State banks as Government agencies (*see* pages 221-23) advances for housing to individuals are also provided by the trading banks. Amounts outstanding in respect of advances to individuals for housing purposes made by the major trading banks were \$341 million on the second Wednesday of July 1972 (*see* the chapter Private Finance for further details).

### Life insurance companies

The life insurance companies are another source of funds for housing. Details of new loans paid over during the twelve months ended June 1968 to 1972 and amounts outstanding at end of June 1968 to 1972, are given in the following table.

**LIFE INSURANCE COMPANIES: HOUSING LOANS PAID OVER AND AMOUNTS OUTSTANDING, STATES AND TERRITORIES, 1967-68 TO 1971-72**  
(\$'000)

(a) Excludes the business of the State Government Insurance Office of New South Wales and the Queensland State Government Insurance Office. (b) Includes Papua New Guinea. (c) Loans made in Northern Territory included in South Australia.

**Registered building societies**

There were 5,429 registered building societies operating in Australia during the year ending 30 June 1971 of which 189 are permanent societies and the remainder terminating societies. The permanent societies are, in the main, investment societies which make loans for housing purposes, usually on credit foncier terms, and obtain their funds from share capital, deposits and borrowings from banks and other lending institutions. The terminating societies make loans to members from funds obtained from lending institutions (usually government guaranteed), members' subscriptions and, since 1956, from moneys provided under the Commonwealth-State Housing Agreements. Details of new loans paid over and net advances outstanding for each of the years ended June 1967 to 1971 are given in the following table (*see also* the chapter Private Finance).

(a) Net of borrowing members' funds.

**Other lenders**

Little information is available on advances made by other lenders such as superannuation and other trust funds, private finance and investment companies, etc. In South Australia advances on first mortgage made by the South Australian Superannuation Fund are granted on a credit foncier basis. Loans are limited to 70 per cent of value unless repayments are insured with an approved insurer, in which case loans of up to 90 per cent of value are made. The interest rate may be varied from time to time, the present minimum rate being 7.5 per cent per annum. The maximum term is 30 years for homes of solid construction, and 20 years for timber-framed homes. At 30 June 1972 there were 4,978 loans current, the principal outstanding totalling \$24,752,034. During 1971-72 the value of advances made was \$2,970,300.

## CHAPTER 10

### LABOUR, WAGES AND PRICES

For particulars of the Farm Production Price Index, see the chapter Miscellaneous. For current information on the subjects dealt with in this chapter, see the *Monthly Review of Business Statistics* (1.4), the *Digest of Current Economic Statistics* (1.5) (monthly), and the *Quarterly Summary of Australian Statistics* (1.3), also the mimeographed statements *Wage Rates and Earnings* (6.16), *Consumer Price Index* (9.1), *Consumer Price Index Monthly Food Group Index Numbers* (9.11), *Wholesale Price Index of Materials used in Building other than House Building* (9.6), *Wholesale Price Index of Materials used in House Building* (9.9), *Wholesale Price Indexes—Price Index of Electrical Installation Materials* (9.5), *Wholesale Price Indexes—Price Indexes of Metallic Materials* (9.10), and *Export Price Index* (9.2). For further information on these subjects, except the Export Price Index, see the *Labour Report* (6.7) issued by this Bureau.

### RETAIL PRICES AND PRICE INDEXES

Retail prices of food and groceries and average rentals of houses for years extending back to 1901 have been collected by the Commonwealth Statistician, and in some cases were recorded by the Statisticians of various States for earlier years.

Retail prices of a more extensive range of commodities (including clothing) and certain services in common demand have been ascertained at frequent and regular intervals since 1923, and comparable information was ascertained for the month of November in each year from 1914 to 1922. The range of items for which retail prices data are obtained was considerably expanded in 1948 and in later years. Average retail prices of certain food and grocery items in current periods are published in the annual *Labour Report*.

An explanation of the nature and purposes of retail price indexes is given in the various editions of the annual *Labour Report*, together with further particulars of indexes then current. Previous retail price indexes for Australia are briefly described below. The current retail price index, entitled the Consumer Price Index, was published for the first time in August 1960. It was compiled retrospectively to 1948–49. A description of the Consumer Price Index is given on pages 228–30.

#### Previous retail price indexes

Five series of retail price indexes had been compiled at various times for Australia by the Commonwealth Statistician prior to 1960. Each of these was continued until changed conditions required the compilation of indexes more directly relevant to current conditions. The respective indexes were as follows.

- (i) *The 'A' Series Index* (covering food, groceries and house rents) was first compiled in 1912 with the year 1911 as base = 1,000. It was discontinued in June 1938.
- (ii) *The 'B' Series Index* (covering food, groceries and rent of 4 and 5 roomed houses) was first compiled in 1925 and continued until December quarter 1953. It was the food and rent constituent of the 'C' Series Index and was designed to replace the 'A' Series Index for general statistical purposes.
- (iii) *The 'C' Series Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, and some other miscellaneous items) was first compiled in 1921. It was last issued on its original basis for December quarter 1960. For certain transitional purposes a 'C' Series Index was issued for some quarters after that. This was calculated by varying the index numbers of December quarter 1960 in proportion to movements shown by the Consumer Price Index.
- (iv) *The 'D' Series Index*, derived by combining the 'A' and 'C' Series Indexes, was used by the Commonwealth Court of Conciliation and Arbitration from May 1933 to May 1934 and then discontinued.

- (v) *The Interim Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, certain services and some miscellaneous items) was first compiled in 1954 with the year 1952-53 as base = 100. As its title indicated, it was constructed as a transitional index. Its compilation was discontinued following its replacement by the Consumer Price Index in June quarter 1960.

An index of retail price movements from 1901 to 1972 is shown on page 234 of this Year Book. It is derived by linking together successive indexes (the 'A' Series, the 'C' Series and the Consumer Price Index) available for that period.

In 1937 the Commonwealth Court of Conciliation and Arbitration introduced a 'Court' Index for the purpose of its system of making automatic quarterly adjustments to the basic wage within its jurisdiction. By decision of the Court the 'Court' Index ceased to be issued by the Industrial Registrar as at December quarter 1953. These 'Court' Index numbers were an arithmetical conversion of the 'C' Series Retail Price Index.

## Consumer Price Index

This retail price index was first compiled in 1960, retrospectively to September quarter 1948. A full description of the index is given in *Labour Report* No. 56, 1971.

### Origin

The list of component items and the weighting pattern of the 'C' Series Retail Price Index, first adopted in 1921, were slightly revised by a Conference of Statisticians in 1936, but otherwise continued almost unchanged until the index was discontinued in 1960. The reasons for this and the circumstances which led to the present Consumer Price Index appear from ensuing paragraphs.

From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls (including rationing) caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes desirable, but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern of household expenditure in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Statistician to collect price data of about 100 additional items and to gather information about current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the 'C' Series Retail Price Index in the light of the new pattern of wage-earner expenditure and consumption that appeared to be emerging. But there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and in the pattern of wage-earner expenditure. Under these conditions it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing 'C' Series Retail Price Index on the 1936 revision.

A Conference of Statisticians considered the matter in June 1953, and resolved (in part) as follows:

- (a) that, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period it is undesirable to make a general revision of the list of items and weighting system of the 'C' Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes;
- (b) that an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure.

The 'C' Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index was introduced in 1954 and continued until March quarter 1960.

The Interim Index was a transitional index designed to measure retail price variations on the 'C' Series model in terms of post-war consumption weights as emerging in the early 1950's. It embraced a wider range of commodities and services than did the 'C' Series Retail Price Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not in fact be detected and measured promptly and incorporated into an index concurrently with their happening. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

In this period home-owning largely replaced house-renting, the use of the motor car greatly increased and partly replaced use of public transport, and various items of electrical household equipment and television came into widespread use. The impact of these (and other) changes in usage upon the pattern of household expenditure was heightened by disparate movements in prices. Together, they rendered nugatory the attempt to meet the situation by devising a single Interim Retail Price Index. As studies progressed and new data became available it was clear that no single list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals.

### **Purpose, scope and composition**

The Consumer Price Index is a quarterly measure of variations in retail prices for goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditures and not to estimated expenditure of an 'average' or individual household of specified size, type, or mode of living. In this way it is possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Consumer (retail) price indexes are sometimes loosely called 'cost of living indexes' and are thought to measure changes in the 'cost of living'. Neither the Consumer Price Index nor any other retail price index measures those changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes, but the change in prices of goods and services is a very important part of the change in the cost of living and this part is measured by consumer (retail) price indexes.

The Consumer Price Index covers a wide range of commodities and services arranged in the following five major groups:

- Food;
- Clothing and drapery;
- Housing;
- Household supplies and equipment;
- Miscellaneous.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

Index numbers for sub-groups and special groupings have been compiled and published for the six State capital cities combined for each quarter from December quarter 1963. From December quarter 1968 onwards, information of contributions by index sub-groups to the total index in terms of All Groups Index Points has also been published. These details are shown in the tables on pages 31 to 33 of *Labour Report* No. 56, 1971.

Users of these figures should bear in mind that the Consumer Price Index is designed to measure the proportionate change in retail prices as combined in the five major groups and more particularly the total of the groups. For sub-groups or particular items, the index does not necessarily provide comprehensive and valid measures of price changes in those particular fields. Nor does it necessarily measure the relative influences of those classes of items in aggregate variations in prices. The Consumer Price Index is essentially a combination of selected items under various headings and not a dissection of total household expenditure into its component parts. Details of index numbers for sub-groups and special groupings are published to assist interpretation of movements shown by the Consumer Price Index and also to provide additional data of changes in retail prices.

### **Structure—a chain of linked indexes**

Substantial changes have occurred in consumer usage and patterns of expenditure since the 1939–45 War. In order to keep the weighting pattern representative of current expenditures it has been necessary to construct indexes with additional items and changes in the weighting pattern at intervals, rather than on the basis of a list of items and set of weights that remained unchanged throughout the whole period covered. For the six State capital cities six series for short periods (namely, from the September quarter of 1948 to the June quarter of 1952, from the June quarter of 1952 to the June quarter of 1956, from the June quarter of 1956 to the March quarter of 1960, from

the March quarter of 1960 to the December quarter of 1963, from the December quarter of 1963 to the December quarter of 1968, and from the December quarter of 1968 onwards) have therefore been constructed and linked to form a continuous retail price index series known as the Consumer Price Index. (For information regarding these links for Canberra see *Labour Report* No. 56, 1971.)

During each period between links the items and weighting remained unchanged. At times of linking the weighting pattern was altered, and new items (mainly ones that had become significant in household expenditure) were introduced. Under this method, in effect, average percentage price movements are assessed on one pattern up to the time of the link and on another pattern thereafter. The process of linking ensures that the series reflects only price variations and not differences in cost of the old and new lists of items. The introduction of new items and weights by linking does not, of itself, raise or lower the level of the index.

### **Tabular statements of retail price index numbers**

#### **Consumer Price Index**

The index has been compiled for each quarter from September quarter 1948 and for each year from 1948-49. 'All Groups' index numbers and 'Group' index numbers for each of the five major groups are compiled and published regularly for the six State capital cities combined and separately and for Canberra. Index numbers for sub-groups and special groupings of the Consumer Price Index for the six State capital cities combined have been compiled and published for each quarter from December quarter 1963 and for each year from 1966-67. The reference base for these indexes is: Year 1966-67 = 100.0.

Index numbers for each quarter are first issued in mimeographed statistical bulletins available from the Commonwealth Statistician about three weeks after the end of the quarter. These bulletins contain comment on the index and on significant price movements in that quarter. Tables showing index numbers for preceding quarters and years are presented.

The tables on the following pages show Consumer Price Index Numbers (Total All Groups) for the six State capital cities combined and separately and for Canberra for periods from the year 1955-56 (see page 231), Consumer Price Index Group Index Numbers for the six State capital cities combined for periods from the year 1955-56 (see page 232), and Consumer Price Index Group Index Numbers for each State capital city and for Canberra for recent years and quarters (see page 233).

**CONSUMER PRICE INDEX: ALL GROUPS INDEX NUMBERS  
SIX STATE CAPITAL CITIES AND CANBERRA, YEARS 1955-56 TO 1971-72  
AND QUARTERS MARCH 1968 TO DECEMBER 1972**

*(Base of each index: Year 1966-67 = 100.0) (a)*

The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number. (b) Weighted average.

### Retail Price Index Numbers, 1901 to 1972

The index numbers shown below are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are; from 1901 to 1914, the 'A' Series Retail Price Index; from 1914 to 1946-47, the 'C' Series Retail Price Index; from 1946-47 to 1948-49, a composite of Consumer Price Index Housing Group (partly estimated) and 'C' Series Index excluding Rent; and from 1948-49 onwards, the Consumer Price Index.

#### RETAIL PRICE INDEX NUMBERS: SIX STATE CAPITAL CITIES COMBINED, 1901 TO 1972

(Base: Year 1911 = 100)

Year	Index number	Year	Index number	Year	Index number
1901	88	1925	165	1949	240
1902	93	1926	168	1950	262

1923	166	1947	198	1971	621
1924	164	1948	218	1972	658

(a) November.

### International comparisons

The following table shows index numbers of consumer (retail) prices for various countries. Except where otherwise noted, the year 1963 is taken as base (= 100). The index numbers show fluctuations in prices in each country, and do not measure relative price levels as between countries.

# INDEX NUMBERS OF CONSUMER (RETAIL) PRICES IN VARIOUS COUNTRIES ALL GROUPS INDEXES, 1965 TO 1972

(a) Consumer Price Index converted to base: 1963 = 100. (b) Rent is not included. (c) Beginning March 1972, new index, base: December 1971 = 100. (d) Beginning March quarter 1969, new index, base: 1960 = 100. (e) Excluding compulsory social insurance and wage tax. (f) Industrial workers. (g) All races. (h) White population.

NOTE. Symbol — on each side of an index number (e.g. -95-) indicates that two series have been linked during that period. Symbol — between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they may be shown on the same base period.

## WHOLESALE PRICES AND PRICE INDEXES

Two indexes of wholesale prices of basic materials have been compiled by the Commonwealth Bureau of Census and Statistics. These are:

- the Melbourne Wholesale Price Index;
- the Wholesale Price (Basic Materials and Foodstuffs) Index.

New series of wholesale price index numbers relating to materials used and articles produced by defined areas of the economy are being developed. Three such indexes have already been published. They are the Price Index of Materials used in Building other than House Building (issued April 1969), the Price Index of Materials used in House Building (issued November 1970) and the Price Index of Metallic Materials Used in the Manufacture of Fabricated Metal Products (issued December 1972). Work continues on the preparation of further measures.

Two special purpose measures, the Price Index of Electrical Installation Materials and Price Indexes of Copper Materials Used in the Manufacture of Electrical Equipment, are also published by the Bureau.

## Melbourne Wholesale Price Index

An index of Melbourne wholesale prices was first compiled in 1912. It related chiefly to basic material and foods weighted in accordance with consumption in the years immediately preceding that year. Neither the list of items nor the weighting was varied, except for some changes in the building materials group in 1949. The series has some historical significance as a measure of changes, since the year 1861, in the prices of its component items combined in the proportions in which they were in common use about the year 1910. A description of the index and a list of the commodities included in it were published in *Labour Report* No. 38, 1949, pages 43-5. Index numbers up to the year 1961, the last period for which the index was compiled, were published in Year Book No. 48, 1962.

### Wholesale Price (Basic Materials and Foodstuffs) Index

General publication of this index was discontinued with the issue of index numbers for the month of December 1970. Index numbers up to that period may be found in the mimeographed bulletin *Wholesale Price (Basic Materials and Foodstuffs) Index* (9.4) or in the printed publications *Monthly Review of Business Statistics* and *Quarterly Summary of Australian Statistics*.

The index related to commodities priced in their primary or basic form wherever possible and as nearly as might have been at the point where they first made effective impact on the local price structure. With a few exceptions, prices were from Melbourne sources. The weights were based on estimates of the average annual consumption of the commodities in Australia during the period 1928–29 to 1934–35 inclusive.

A list of the commodities and other information concerning the Wholesale Price (Basic Materials and Foodstuffs) Index is given in *Labour Report No. 53*, 1967, pages 38–41.

### Wholesale Price Index of Electrical Installation Materials

This special purpose index was introduced in 1964, and index numbers were published at quarterly intervals from August 1959 to February 1969, when monthly publication commenced. In addition to its use in connection with the Bureau's constant price estimates in the national accounting field, the index has a direct value as a measure of changes in aggregate cost of materials used in an important part of the building industry (other than house building).

A description of this index is given in Year Book No. 58, 1972, pages 239–40. Index numbers are published monthly in *Wholesale Price Indexes—Price Index of Electrical Installation Materials* (9.5).

### Wholesale Price Index of Materials used in Building other than House Building

#### General

This index was introduced in April 1969 and relates to the construction of buildings other than houses. Further information concerning the method of compiling the index, as well as more detailed group index numbers for each capital city, will be found in the publication *Price Index of Materials used in Building other than House Building* (9.6) of 23 April 1969 and subsequent issues, as well as in the *Labour Report No. 56*, 1971.

#### Scope and composition

The index measures changes in prices of selected materials used in the construction of buildings other than houses and 'low-rise' flats (in general, those up to three storeys). Its composition is in accordance with the materials usage in actual building projects which were selected as representative for the purpose.

The index includes 72 items, combined in eleven groups, in addition to an 'All groups' index. Some items carry the weights of similar items not directly priced. Items are described in terms of fixed specifications with the aim of recording price changes for representative materials of constant quality.

Although the selected materials (or many of them) are also used in house (and low-rise flat) building, in building repair, maintenance and alteration work, and in 'engineering construction' work (e.g. projects such as roads, dams, bridges and the like), the weighting pattern of the index, being designed for the specific purpose mentioned in the first paragraph of this section, is not applicable to these other activities of the Construction industry. In addition, since the weights are based on an average materials usage over a range of building 'use-types' (e.g. office building, factory, etc.), the index is not necessarily applicable to any specific building or any particular type of building.

#### Base period and method of calculation

The reference base of the index is the year 1966–67 = 100.0. The weighting base corresponds broadly with the reference base, but does not exactly coincide because of the nature of the data from which the weights were derived.

The index is a fixed-weights index and is calculated by the method known as 'the weighted arithmetic mean of price relatives'.

#### Derivation of items and weights

The items and weights used in the index were derived from reported values of each material used in selected representative buildings constructed in or about 1966–67. The selection took account of building use-type and construction characteristics (e.g. type of frame, wall, floor, etc.) within use-types. Information of the former was obtained from building statistics, and of the latter from an *ad hoc* survey of approximately 800 buildings.

### The weights

The weighting pattern used in the index given in Year Book No. 55, 1969, pages 1259-60, as well as in the publications referred to in the paragraph under General above. This single weighting pattern, relating to the whole of Australia, is applied (with minor exceptions) to local price measures in calculating indexes for each State capital city.

The index for the six State capital cities combined is a weighted average of individual city indexes. The relative weighting of the capitals is in proportion to the estimated value on completion of building other than house building in the separate States during the three years ended June 1967.

### Prices

Prices are collected as at the mid-point of the month to which the index refers, or as near thereto as practicable. They relate to specified standards of each commodity and are obtained in all State capital cities from representative suppliers of materials used in building. In general the point of pricing is 'delivered on site' but in some cases it has been necessary to use the nearest realistic price available, e.g. that for 'supplied and fixed'. Local prices are used in the indexes for each capital city with the main exception that, for the whole of the group Electrical installation materials and the majority of the items in the group Mechanical services components, Sydney and Melbourne price series are used.

### Index numbers

The index has been compiled for each month from July 1966, and for the financial years from 1966-67. Index numbers for the individual groups and all groups for the weighted average of the six State capital cities, and for all groups combined for each State capital city, are given in the following tables. Figures are published to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number.

The separate city indexes measure price movements in each State capital city individually. They enable comparisons to be drawn between capitals as to differences in degree of price movement from period to period, but not as to differences in price level.

In interpreting movements in the index, particularly those from month to month, it should be noted that changes frequently occur in an uneven fashion both over time and also for separate capital cities, as between the same points of time. Changes in index numbers for individual months should not be interpreted in isolation and without reference to changes over longer periods.

## Wholesale Price Index of Materials used in House Building

### General

This index, referring to materials used in house building, was introduced in November 1970 and is complementary to the Price Index of Materials used in Building other than House Building. Further information concerning the method of compiling the Index, as well as more detailed group index numbers and the separate weighting patterns for the six State capital cities, will be found in the publication *Price Index of Materials used in House Building* (9.9) of 27 November 1970. This and subsequent issues are available on request. A full description of the index is also given in *Labour Report* No. 56, 1971.

### Scope and composition

The index measures changes in prices of selected materials used in the construction of houses. Its composition is in accordance with the usage of materials in actual houses which were selected as representative for the purpose. The index does not purport to represent buildings of any kind other than houses. The house building construction types included are those which use brick, brick veneer, timber or asbestos cement sheeting as the principal material for the outer walls.

The numbers of items included in the lists for the respective State capital cities vary between 49 and 51. In all cases the selection of materials was based on local usage. Items are combined in eleven groups in addition to the 'All groups' index. Some items carry the weight of similar items not directly priced. They are described in terms of fixed specifications with the aim of recording price changes for representative materials of constant quality.

### Base period and method of calculation

In the interests of uniformity and ease of use, the reference base of the index is the year 1966-67 = 100.0, the same as that used for the Price Index of Materials used in Building other than House Building. However, because of the later time at which the weighting source data were collected, the weighting base approximates more closely to the year 1968-69.

The index is a fixed weights index and is calculated by the method known as 'the weighted arithmetic mean of price relatives'.

### Derivation of items and weights

The items and weights used in the index were derived from reported values of each material used in selected representative houses constructed in or about 1968-69 in each State capital city. The selection took account, within the four major construction types, of a range of characteristics of these houses—e.g. internal partitions, windows, roofing, etc., as well as whether such things as paths and fences were included in the job. Information of this nature was obtained from an *ad hoc* survey of some 250 house builders from whom data regarding approximately 900 houses representative of their operations were obtained. The survey was conducted in all State capital cities.

### The weights

The group and item weights used in the index for each State capital city are given in the publications referred to in the paragraph under **General** above. The pattern resulting from their aggregation over the six State capitals is given in *Year Book* No. 57, 1971, pages 236-7 as well as in those publications referred to above.

Each State capital city has a unique weighting pattern which reflects the difference in the estimated relative importance of given items as between cities. The weighting pattern for each capital city is applied to local price measures in calculating indexes for that city.

### Prices

Price series used relate to specified standards of each commodity with the aim of incorporating in the index price changes for representative materials of constant quality. In general the point of pricing is 'delivered on site', but in some cases it has been necessary to use the nearest realistic price available, e.g. that for 'supplied and fixed'. The price series are obtained in all State capital cities from representative suppliers of materials used in house building. In the main they are collected as at the mid-point of the month to which the index refers, or as near thereto as practicable.

### Index numbers

The index has been compiled for each month from July 1966, and for the financial years from 1966-67. Index numbers for the individual groups and all groups for the six State capital cities combined and for all groups combined for each State capital city, are given in the following tables. Figures are published to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number.

The separate city indexes measure price movements in each State capital city individually. They enable comparisons to be drawn between capitals as to differences in degree of price movement from period to period, but not as to differences in price level.

In interpreting movements in the index, particularly those from month to month, it should be noted that changes frequently occur in an uneven fashion both over time and also for separate capital cities, as between the same points of time. Changes in index numbers for individual months should not be interpreted in isolation and without reference to changes over longer periods.

## Wholesale Price Index of Metallic Materials used in the Manufacture of Fabricated Metal Products

### General

This index, relating to important metallic materials used in the manufacture of fabricated metal products, was introduced in December 1972. In addition to constituting a further step in the publication of an expanded range of wholesale price indexes, this index and the Wholesale Price Index of Copper Materials Used in the Manufacture of Electrical Equipment (*see* page 244) have been designed as a modern replacement for the metals components of the Wholesale Price (Basic Materials and Foodstuffs) Index.

### Scope and Composition

The index includes important metallic materials selected and combined in accordance with a weighting pattern reflecting value of usage as reported at the 1968-69 Census of Manufacturing Establishments for establishments classified to the Fabricated Metal Products Sub-division of Manufacturing Industry (Australian Standard Industrial Classification Sub-division 31).

Index numbers are compiled and published for four groupings of items and for the 'All groups' combination. The materials have been grouped under the headings Iron and steel, Aluminium, Copper and brass, and Other metallic materials.

The composition and weighting pattern of the index is given on page 243.

### Base period and method of calculation

The reference base of the index is the year 1968-69 = 100.0. The index is a fixed weights index and is calculated by the method known as 'the weighted arithmetic mean of price relatives'.

### Prices

Prices for each of the items relate to representative goods of fixed specification collected from a selection of representative sources. In each case, these specifications are sufficiently detailed to ensure that the price changes incorporated in the indexes are measured, as far as possible, on the basis of constant quality.

The price series used are obtained monthly, by mail collection, from major Australian manufacturers of the relevant materials. In the main prices are collected as at the mid-point of each month.

The prices collected are, as far as possible, those normally charged to representative manufacturers for goods delivered into their stores.

## Index numbers

The index has been compiled for each month from July 1968, and for financial years from 1968-69. Index numbers for financial years are simple averages of the relevant monthly index numbers. Index numbers for each group and all groups are given below. In interpreting movements in the index, particularly those from month to month, it should be noted that changes frequently occur in an uneven fashion over time. Changes in index numbers for individual months should not be interpreted in isolation and without reference to changes over longer periods. Figures are published to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number.

Current index numbers are published monthly in *Wholesale Price Indexes of Metallic Materials* (9.10).

## Wholesale Price Indexes of Copper Materials used in the Manufacture of Electrical Equipment

This special purpose measure was introduced in December 1972. In addition to constituting a further step in the publication of an expanded range of wholesale price indexes, it has been designed to supplement the Price Index of Materials Used in the Manufacture of Fabricated Metal Products in providing a replacement for the metals components of the Wholesale Price (Basic Materials and Foodstuffs) Index.

A description of this index is given in *Labour Report* No. 57, 1972. Index numbers are shown in the monthly publication *Price Indexes of Metallic Materials* (9.10).

## EXPORT PRICE INDEXES

An annual index of export prices has been published by the Bureau since its inception. Brief descriptions of indexes issued between 1901 and 1962 (that is, prior to the introduction of the current Export Price Index) are shown in Year Book No. 55, 1969, pages 256-7.

### The current Export Price Index

The current Export Price Index was first published in October 1962, but index numbers were compiled back to July 1959. The reference base of this index is: year 1959-60=100. Index numbers from July 1969 have been compiled on an interim basis which incorporates a re-weighting of the items contained in the original index, and the inclusion of some additional items. This interim basis was introduced pending completion of a comprehensive review and re-basing of the index as a whole.

The Export Price Index is a fixed-weights index, and its purpose (as was that of the previous fixed-weights index) is to provide comparisons monthly, over a limited number of years, of the level of export prices of the selected items, making no allowance for variations in quantities exported. The index numbers are thus measures of price change only. The price series used in the index relate to specified standards for each commodity and in most cases are combinations of prices for a number of representative grades, types, etc. For some commodities price movements in the predominant market, or markets, are used, while for other commodities average realisations in all export markets are used. As nearly as possible, prices used are on the basis f.o.b. at the main Australian ports of export. The index is calculated by the method known as 'the weighted arithmetic mean of price relatives'.

#### Composition and weighting

Over the period of ten years between July 1959 and June 1969, there were twenty-nine items in the export price index, and the weights used to combine these were based on average annual values of exports during the years 1956-57 to 1960-61. The twenty-nine items constituted in excess of 80 per cent of the total value of Australian exports in the earlier part of the ten years mentioned: this percentage, however, decreased markedly in more recent years. A review of the content and weighting pattern of the index was consequently undertaken, and an interim series incorporating some of the results of this review was introduced with effect from July 1969.

#### Interim basis

The interim series is a fixed-weights export price index, compiled monthly as from June 1969, which has been linked at June 1969 to the current index in its original form. The weights of the items in the interim series are derived from the values of exports for the year 1969-70, and the group weights have been adjusted to reflect the proportion that the value of wool bore to the value of all exports in that year. In addition to the twenty-nine items of the current index as first introduced, the interim series includes the four items; iron ore, bauxite, alumina and mineral sands. These items are not attached to any of the original single groups of the index but are incorporated in the 'All groups' index number from June 1969. The thirty-three items contained in the interim series constituted 74 per cent of the total value of Australian exports (merchandise and non-merchandise) in 1969-70.

## Index numbers

Index numbers for each of the groups and 'All groups' are shown in the following table. The yearly index numbers are simple averages of the twelve monthly index numbers in each year.

**EXPORT PRICE INDEX NUMBERS, YEARS 1967-68 TO 1971-72 AND MONTHS  
JULY TO DECEMBER 1972**

(Base of each index: year 1959-60 = 100)

Period	Wool	Meats	Dairy produce	Cereals	Dried and canned fruits	Sugar	Hides and tallow	Metals and coal (a)	Gold	All groups
1967-68.	95	125	79	109	95	67	67	120	104	100
1968-69.	99	131	72	104	97	72	73	123	117	102
1969-70(b)	87	148	73	96	99	93	94	143	109	(c)103
1970-71.	67	152	88	100	102	113	94	139	109	(c)101
1971-72.	72	147	135	99	103	127	96	138	126	(c)104
1972-73—	(b)	(b)	(b)	(b)	(b)	(b)	(b)	(b)	(b)	(b)(c)
July .	(d)100	157	132	98	p104	140	114	141	(d)141	p114
August .	102	157	125	95	p101	142	125	140	(d)141	p113
September .	120	161	126	98	p100	135	132	139	184	p118
October .	167	162	126	106	p102	141	146	139	178	p131
November .	153	163	126	105	p100	136	150	137	168	p127
December .	166	168	118	105	p100	144	152	138	172	p131

(a) Comprises coal, iron and steel, copper, zinc, lead and silver. Does not include iron ore, bauxite, alumina and mineral sands, which, however, have been included in the 'All groups' index from July 1969. (b) Interim series linked as at June 1969. (c) Interim series includes, in addition to the specified groups the 4 items: iron ore, bauxite, alumina and mineral sands. (d) Nominal.

## Link between current and previous indexes

In order to show approximate movements in export prices over a long period, the 'All groups' indexes of the successive series have been linked together at the earliest year for which each of the indexes was compiled. The table below shows this linked series and a long-term price index for wool, which is the most important single component in the movement of the 'All groups' index.

**EXPORT PRICE INDEX NUMBERS—LINKED SERIES 1936-37 TO 1971-72**

(Base of each index: year 1959-60 = 100)

Period	Wool	All groups	Period	Wool	All groups
1936-37 . . . . .	29	30	1954-55 . . . . .	127	114
1937-38 . . . . .	23	27	1955-56 . . . . .	109	105

(a) Interim series linked as at June 1969.

## WAGES, EARNINGS AND HOURS

### Arbitration and Wages Boards Acts and associated legislation

Particulars regarding the operation of Commonwealth and State Laws for the regulation of wages, hours and other conditions of employment were first compiled for the year 1913, and revised particulars have appeared annually in the *Labour Report*. A summary of the Commonwealth legislation and brief particulars of Commonwealth and State industrial tribunals are given in the following paragraphs.

#### Commonwealth industrial legislation and tribunals

Under placitum (xxv) of Section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to 'conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State'. The Parliament has made such a law, namely the *Conciliation and Arbitration Act 1904-1972*.

This Act defines an 'industrial dispute' as:

'(a) A dispute (including a threatened, impending or probable dispute) as to industrial matters which extends beyond the limits of any State; and (b) a situation which is likely to give rise to a dispute as to industrial matters which so extends; and includes—(c) such a dispute in relation to employment in an industry carried on by, or under the control of, a State or an authority of a State; (d) a dispute in relation to employment in an industry carried on by, or under the control of, the Commonwealth or an authority of the Commonwealth, whether or not the dispute extends beyond the limits of any one State; and (e) a claim which an organization is entitled to submit to the Commission under section eleven A of the *Public Service Arbitration Act 1920-1972* or an application or matter which the Public Service Arbitrator has refrained from hearing, or from further hearing, or from determining under section fourteen A of that Act, whether or not there exists in relation to the claim, application or matter a dispute as to industrial matters which extends beyond the limits of any one State.'

The Conciliation and Arbitration Act was extensively amended by an Act (No. 44 of 1956) assented to on 30 June 1956. This amendment altered the structure of the arbitration machinery by separating the judicial functions from the conciliation and arbitration functions. The Commonwealth Industrial Court was established to deal with judicial matters under the Act, and the Commonwealth Conciliation and Arbitration Commission to handle the functions of conciliation and arbitration. A summary of the provisions of the *Conciliation and Arbitration Act 1904-1972* is given in the following paragraphs.

The Commonwealth Industrial Court is at present composed of a Chief Judge and seven other Judges. The jurisdiction of the Court shall be exercised by not less than three Judges, except in the following circumstances. A single Judge may exercise the jurisdiction of the Court with respect to the dismissal or injury of an employee on account of industrial action, interpretation of awards, questions concerning eligibility of membership of an organisation, disputes between an organisation and its members (except disputes regarding the requirements and performance of the rules of an organisation), and a prescribed matter of practice or procedure. A single Judge may refer a question of law for the opinion of the Court constituted by not less than three Judges. The Court is a Superior Court of Record with the same power to punish contempts of its power and authority as is possessed by the High Court. In general, decisions of the Industrial Court are final; however, an appeal lies to the High Court, but only when the latter grants leave to appeal. The Act provides for the registration of associations of employees and employers, and for inquiries to be held concerning disputed elections in organisations; and certain powers in connection therewith are, by the Act, given to the Industrial Court. Provision is also made for the Commission to exercise the powers of the Court with regard to an application for cancellation of registration of an organisation. Any such change of jurisdiction must be notified by proclamation. This provision could be used if the powers of the Court in this regard were declared, in whole or in part, to be invalid.

Special provision is made concerning the right of audience before the Commonwealth Industrial Court. Briefly, except in proceedings which, in general, involve questions of law or offences against the Act, parties are able to elect whether to appear personally or to be represented by lawyers or officials. Even in proceedings involving questions of law, except appeals from decisions by other Courts to the Industrial Court, on matters arising under this Act or the *Public Service Arbitration Act 1920-1972*, the parties may, if they wish and the Court grants leave, be represented by officials.

The Commonwealth Conciliation and Arbitration Commission at the end of 1972 was composed of a President, six Deputy Presidents, a Senior Commissioner, fourteen Commissioners and three Conciliators. The Commission is empowered to prevent or settle industrial disputes by conciliation

or arbitration, and to make suggestions and to do such things as appear right and proper for (a) effecting a reconciliation between parties to industrial disputes; (b) preventing and settling industrial disputes by amicable agreement; and (c) preventing and settling, by conciliation or arbitration, industrial disputes not prevented or settled by amicable agreement. The Commission may exercise its powers of its own motion or on the application of a party.

The *Conciliation and Arbitration Act 1972* provided for the separation of the Commission's functions of conciliation and arbitration and for the appointment of Conciliation Commissioners and Arbitration Commissioners. The role of Presidential Members has been expanded beyond the hearing of reserved matters, appeals and references, to include involvement in settling individual disputes. The Act provided for the establishment of panels or 'task forces' within the Commission. Under this system the President assigns an industry or a group of industries to a panel of the Commission consisting of a Presidential Member, at least one Arbitration Commissioner and at least one Conciliation Commissioner. As far as practicable, the functions of the Commission in relation to that industry or group of industries are exercised by members of that panel.

When an industrial dispute occurs or is likely to occur, the Act provides that the Conciliation Commissioner shall take steps for the prompt prevention or settlement of that dispute. If agreement is reached, the parties may make a memorandum of their agreement and request the Conciliation Commissioner to certify that memorandum as an award, or they may request him to make an award or order giving effect to that agreement. The Conciliation Commissioner must satisfy himself that the agreement reached by the parties is in the public interest.

If the parties do not reach agreement the Conciliation Commissioner reports to the Presidential Member responsible for the panel. An Arbitration Commissioner or the Presidential Member then proceeds by arbitration to deal with the dispute or matters still in dispute. If the parties decide to resolve their differences at this stage, an award can be made by the Commission as if it were made pursuant to the conciliation process (*see above*).

Only a Full Bench of the Commission constituted by at least three Presidential Members nominated by the President has the power to make awards, or to certify agreements, concerning standard hours, national wage cases, the minimum wage, equal pay principles, annual leave and long-service leave. When the Full Bench is constituted to deal with appeals and references and the reserved matters listed above, it must consider the public interest in its decisions, having regard in particular to the state of the national economy and the likely effects on that economy of any award it might make.

An industrial dispute being heard by a Conciliation or Arbitration Commissioner or a Presidential Member may be referred to the Commission on the ground of public interest. If a party to a dispute makes an application for such a reference, the Commissioner or Presidential Member shall consult with the President, who may direct that the Full Bench constituted by at least three members nominated by the President, each of whom is either a Presidential Member or an Arbitration Commissioner, and at least two of whom are Presidential Members, shall hear and determine the dispute, or that part referred to it. In this hearing the Commission may have regard to evidence given and arguments adduced in arbitration proceedings prior to the hearing, and it may refer a part of the dispute to a Presidential Member or an Arbitration Commissioner for determination.

An appeal against the decision of an Arbitration Commissioner or a Presidential Member shall be heard by at least three members nominated by the President, each of whom is either a Presidential Member or an Arbitration Commissioner, and at least two of whom are Presidential Members. The President, after taking account of the views of the parties to a dispute, may appoint a member of the Commission to take evidence on behalf of the Full Bench, so that it can have this evidence before it when it commences its hearing.

Full benches of the Commission not constituted by the same persons may sit in joint session at the direction of the President when he considers it desirable and has the opinion that a question is common to the matters before those benches. A joint session may be held whether the benches concerned are constituted pursuant to the Conciliation and Arbitration Act or the Public Service Arbitration Act, and whether they are constituted to hear references or appeals. However, it is left to each appropriate full bench to determine any of the matters before it.

Provision is also made in the Act for a presidential member of the Commission to handle industrial matters in connection with the maritime industries, the Snowy Mountains Area and the stevedoring industry, except in those matters for which the Act requires that the Commission shall be constituted by more than one member. The Commonwealth Conciliation and Arbitration Commission also deals with disputes and industrial matters, interstate or intra-state, associated with undertakings or projects of the Commonwealth Government which have been declared by the Minister to be Commonwealth projects for the purposes of this Act. In effect, this places employees of Commonwealth projects, so declared, under the jurisdiction of the Commission. The Minister has the power to exempt certain persons or classes of persons working on these projects from the jurisdiction of the Commission.

The Commission may make an award in relation to an industrial dispute concerning employees of a Commonwealth project or when the Public Service Arbitrator refrains from dealing with claims made by a Public Service employee organisation or consents to the claims being presented to the Commission, though such an award may be inconsistent with a law of the Commonwealth relating to salaries, wages, rates of pay or terms or conditions of service of employees in the Public Service as defined by section three of the *Public Service Arbitration Act* 1920-1972, not being the *Compensation (Commonwealth Employees) Act* 1971-1972, the *Commonwealth Employees' Furlough Act* 1943-1968, the *Superannuation Act* 1922-1969 or any other prescribed Act.

An amendment of the Conciliation and Arbitration Act operative from November 1967 provided for the appointment of a person to be the Flight Crew Officers Industrial Tribunal empowered to prevent or settle industrial disputes relating to pilots, navigators, or flight engineers of aircraft.

The Conciliation and Arbitration Act provides that where a State law, or an order, award, decision or determination of a State industrial authority is inconsistent with or deals with a matter dealt within an award of the Commission, the latter shall prevail, and the former, to the extent of the inconsistency or in relation to the matter dealt with, shall be invalid.

Amendments to the Seat of Government (Administration) Act and the Northern Territory (Administration) Act, assented to on 2 June 1972, extended the Commission's jurisdiction in the Australian Capital Territory and the Northern Territory to disputes involving persons in employment whether or not they are in an industry in the constitutional sense of that word.

For further particulars regarding Commonwealth arbitration legislation, see the annual *Labour Report*. For information concerning the Australian Stevedoring Industry Authority see the chapter Transport and Communication of this Year Book, and for information on the Coal Industry Tribunal and the Commonwealth Public Service Arbitrator see the *Labour Report*.

### State industrial tribunals

#### New South Wales

The controlling authority is the Industrial Commission of New South Wales, consisting of a President and eight other Judges. Subsidiary tribunals are the Conciliation Commissioners and Conciliation Committees constituted for particular industries. Each Conciliation Committee consists of a Conciliation Commissioner as Chairman and equal numbers of representatives of employers and employees. Special Commissioners with conciliatory powers and limited arbitration powers also may be appointed. The Apprentices Act, 1969 conferred specific powers on the Industrial Commission in relation to certain apprenticeship matters. Compulsory control commenced in 1901, after the earlier Acts of 1892 and 1899 providing for voluntary submission of matters in dispute had proved abortive.

#### Victoria

The authorities are separate Wages Boards for the occupations and industries covered, each consisting of a chairman and equal numbers of representatives of employers and employees, and a Court of Industrial Appeals, the latter presided over by a Judge of the County Court. The system was instituted in the State in 1896, and represented the first example in Australia of legal regulation of wage rates.

#### Queensland

Legal control was first instituted in 1908 with the passing of the Wages Boards Act. 'The Industrial Conciliation and Arbitration Act of 1961' established the Industrial Conciliation and Arbitration Commission and preserved and continued in existence the Industrial Court. The Industrial Court is constituted by the President (a Judge of the Supreme Court of Queensland) sitting alone, and the Full Industrial Court by the President and two Commissioners. The Conciliation and Arbitration Commission is constituted by a Commissioner sitting alone; and the Full Bench of the Commission by at least three Commissioners. Not more than five Commissioners shall be appointed. A Commissioner shall not be capable of being a member of the Executive Council or of the Legislative Assembly, and shall not take part in the management of any business.

#### South Australia

In South Australia from July 1966 the system of control consists of an Industrial Commission, an Industrial Court, and Conciliation Committees. The Industrial Commission is composed of a President, two Deputy Presidents, and four Commissioners and has power to make awards. The President of the Commission is also Judge of the Industrial Court which deals with legal matters and workmen's compensation. The four Commissioners are chairmen of each of the Conciliation

Committees consisting of an equal number of representatives of employers and employees. These committees issue awards. Where complete agreement cannot be reached in these committees the chairman sits as a Commissioner to determine the unresolved matters. Provision is made for references and appeals to the Full Commission.

### Western Australia

Legal control dates back to 1900. The present system of control comprises a five-man Western Australian Industrial Commission and an Industrial Appeal Court consisting of three Supreme Court Judges who are nominated by the Chief Justice of Western Australia. A Commissioner may, in relation to any dispute or other matter, refer such matters to the Commission in Court Session. Similarly, appeals from decisions of a single Commissioner are heard by three other Commissioners acting as the Commission in Court Session, but such hearings are restricted to the evidence and matters raised in the proceedings before the single Commissioner. Up to December 1966 the Commission in Court Session fixed and adjusted the basic wage. In December 1966 legislation provided that the Western Australian basic wage rates should be the same as the Commonwealth Six Capitals rates as soon as these exceeded the State rates. However, Commonwealth basic wages were eliminated from Commonwealth awards in July 1967. Western Australian legislation operative from 22 November 1968 fixed the State basic wages for adult males and adult females and provided for the Commission to review the basic wage at least every twelve months (for further details see page 269). Appeals from the Commission to the Industrial Appeal Court are limited to matters which are erroneous in law or in excess of jurisdiction. The Court has the power to impose penalties for disobedience of orders made by the Commission.

The Western Australian Coal Industry Tribunal, established under the *Mining Act*, 1904–1971, has power to determine any industrial matter in the coal mining industry. It consists of a chairman and four other members (two representatives each of employers and employees). Boards of reference may be appointed by the Tribunal, and decisions of the Tribunal may be reviewed by the Western Australian Industrial Commission on the application of a party subject to the decision.

### Tasmania

The Authority consists of Wages Boards for separate industries, comprising a Chairman (who is common to all Wages Boards) appointed by the Governor, and equal numbers of representatives of employers and employees appointed by the Minister administering the Act. The system was instituted in 1910.

## Incidence of industrial awards, determinations and collective agreements

In May 1968 a survey ascertained the approximate proportions of employees whose wages, salaries and conditions of work were normally varied in accordance with variations in awards, determinations and registered collective agreements of Commonwealth and State industrial authorities. The scope, results, etc. of this survey are published in a statistical bulletin *Survey of the Incidence of Industrial Awards, Determinations and Collective Agreements*, May 1968 (6.5) and in statistical bulletin *Survey of the Incidence of Industrial Awards, Determinations and Collective Agreements*, May 1968 (Bulletin No. 2) (6.25).

## Rates of wage and hours of work

This section contains indexes (with base: year 1954 = 100) of minimum weekly and hourly rates of wage and standard hours of work for adult males and adult females for Australia and each State. In the indexes there are fifteen industry groups for adult males and eight industry groups for adult females. For relevant periods these indexes replace cognate indexes (base: year 1911 = 1,000 for males and April 1914 = 1,000 for females) published in Year Books before No. 46, 1960. The current indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954 which showed the number of employees covered by individual awards, determinations and collective agreements. This provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc. thereby providing occupation weights.

The industrial classification used in the current indexes, shown in the table on page 251, does not differ basically from the previous classification, the alterations being largely in the arrangement of classes. The former Pastoral, agricultural, etc. group and the domestic part of the Amusement, hotels, personal service, etc. group are excluded from the current indexes because of coverage difficulties.

The minimum wage rates and standard hours of work used in the current indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and collective agreements in force at the end of each month or quarter, commencing with March 1939 for adult males and March 1951 for adult females. Particulars have been available as at the end of each month for adult males from January 1957 and for adult females from July 1967. The index for adult males includes rates and hours for 3,415 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 and 515. Using the industry and occupation weights derived from the surveys described above, these rates and hours were combined to give weighted averages for each industry group for each State and Australia.

Because the indexes are designed to measure movements in prescribed minimum rates of 'wages' as distinct from 'salaries', those awards, etc. which relate solely or mainly to salary earners are excluded.

A more detailed description of the current indexes of minimum rates of wage and standard hours of work is given in the *Labour Report*, which also contains an extensive tabular presentation of the minimum rates of pay for adult males and females in the principal occupations in the capital city of each State. Further particulars of wage rates and index numbers will be found in mimeographed bulletins *Minimum Wage Rates*, March 1939 to June 1965 and *Wage Rates Indexes*, June 1965 to June 1968. Current figures are published in the monthly bulletin *Wage Rates and Earnings*.

#### Weekly wage rates—adult males

The following table shows, for each State and Australia, the weighted average minimum weekly rates of wage payable to adult male workers for a full week's work and index numbers at the dates specified.

#### WEEKLY WAGE RATES: ADULT MALES, ALL GROUPS(a), STATES, DECEMBER 1950 TO 1972 WEIGHTED AVERAGE MINIMUM WEEKLY RATES(b) PAYABLE FOR A FULL WEEK'S WORK (EXCLUDING OVERTIME) AND INDEX NUMBERS OF WAGE RATES

End of December—	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
RATES OF WAGE(c) (\$)							
1950 . . .	20.62	20.18	19.52	19.79	20.06	19.80	20.20
1960 . . .	36.28	34.99	35.07	34.22	35.81	35.15	35.50
1970 . . .	54.40	53.68	55.07	52.12	55.99	54.49	54.20
1971 . . .	61.50	61.35	62.94	59.42	61.97	60.82	61.48
1972p. . .	67.06	67.30	68.12	65.26	65.60	65.81	66.96

#### INDEX NUMBERS

(Base: Weighted Average Weekly Wage Rate for Australia, 1954 = 100)

1950 . . .	73.0	71.4	69.1	70.1	71.0	70.1	71.5
1960 . . .	128.5	123.9	124.2	121.2	126.8	124.5	125.7
1970 . . .	192.6	190.1	195.0	184.6	198.2	192.9	191.9
1971 . . .	217.8	217.2	222.9	210.4	219.4	215.3	217.7
1972p. . .	237.4	238.3	241.2	231.1	232.3	233.0	237.1

(a) Excludes rural industry. (b) As prescribed in awards, determinations and collective agreements. (c) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.

The following table shows for Australia the weighted average minimum weekly rates of wage and index numbers in each industry group and for all groups (excluding rural industry) at the dates specified.

**WEEKLY WAGE RATES: ADULT MALES, INDUSTRY GROUPS, AUSTRALIA  
DECEMBER 1950 TO 1972**

(a) As prescribed in awards, determinations and collective agreements. (b) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends. (c) For mining, rates of wage used are those prescribed for the principal mining centres and include lead bonuses, etc. (d) Includes rates of wage (and value of keep) for occupations in the coastal shipping service, other than masters, officers and engineers. (e) Excludes rural industry.

*Adult males—jurisdiction.* Weighted average minimum weekly wage rates for adult males covered by *Commonwealth awards, etc.* and for those covered by *State awards, etc.* (as defined below) are shown separately in the following table. For the purposes of the index, *Commonwealth awards, etc.* include awards of, or collective agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. *State awards, etc.* include awards or determinations of, or collective agreements registered with, State industrial tribunals, together with certain unregistered collective agreements when these are dominant in the particular industries to which they refer.

**Standard hours of work**

In the fixation of weekly wage rates most industrial tribunals prescribe the number of hours constituting a full week's work (excluding overtime) for the wage rates specified. The hours of work so prescribed form the basis of the compilation of the weighted averages and index numbers on page 254. The main features of the reduction of hours to forty-four and later to forty per week are summarised in previous issues of the Year Book. Since January 1948 practically all employees in Australia have had a standard working week of forty hours or less.

**Hourly wage rates**

The average rates of wage in the preceding tables are based on the minimum rates prescribed for selected occupations in awards, etc. for a full week's work, excluding overtime. However, the number of hours constituting a full week's work differs in some instances between various occupations in each State, and between the same occupations in the several States. For some purposes a better comparison may be obtained by reducing the results in the preceding paragraphs to a common basis, namely the rate of wage per hour. The particulars of weighted average minimum hourly rates of wage given in the following tables relate to all industry groups except rural industry, and shipping and

stevedoring. The rural industry is not included in the index, and shipping and stevedoring has been excluded because, for some of the occupations in this group, definite particulars for the computation of average working hours and hourly rates of wage are not available.

The following table shows the weighted average minimum hourly rates of wage payable to adult male workers and index numbers of hourly rates in each State.

**Weighted average standard weekly hours of work**

The 40-hour week has operated in Australia generally from 1 January 1948. However, as stated on page 248, the number of hours constituting a full week's work (excluding overtime) differs between occupations and/or between States. The weighted average standard hours of work (excluding overtime) prescribed in awards, determinations and collective agreements for a full working week, in respect of adult male workers in all industry groups except rural industry, and shipping and stevedoring, at 31 December 1972, were: New South Wales, 39.78; Victoria, 39.97; Queensland, 39.89; South Australia, 39.96; Western Australia, 39.85; Tasmania, 39.93; Australia, 39.87. Corresponding figures for adult female workers at 31 December 1972 were: New South Wales, 39.53; Victoria, 39.81; Queensland, 39.70; South Australia, 39.77; Western Australia, 39.78; Tasmania, 39.63; Australia, 39.67.

**Average Weekly Earnings**

The figures in this section are derived from particulars of employment and wages and salaries recorded on payroll tax returns, from other direct collections and from estimates of the unrecorded balance. The figures relate to civilians only. In addition to salary and wage payments at award rates, the total earnings figures used in the calculation of average weekly earnings include the earnings of employees not covered by awards, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the period, etc.

Particulars of wages and salaries paid are not available for males and females separately from the sources used for this series; average weekly earnings have therefore been calculated in terms of *male units*, i.e. total male employees plus a proportion of female employees, the proportion being derived from the estimated ratios of female to male average earnings. Different ratios of female to male average earnings, based on information from the annual surveys of weekly earnings and hours, from a sample survey carried out in November 1969 and from other sources, are used for individual States. Ratios used for the June 1973 quarter are as follows: New South Wales (including the Australian Capital Territory) 58 per cent, Victoria 57, Queensland 54, South Australia (including the Northern Territory) 53, Western Australia 51 and Tasmania 54. As the number of male units used in calculating Australian average weekly earnings is the sum of the estimates for the States, a separate ratio for Australia is not used, but the weighted average of the State ratios is approximately 56.0 per cent. Further changes in these ratios are expected to become necessary from time to time to reflect, for example, the extension of equal pay provisions, or appreciable and sustained changes in the levels of male overtime earnings. However, small differences in these ratios have relatively little effect on the earnings figures; a one per cent rise in the ratio reduces average weekly earnings of \$100 by about 35 cents.

Annual averages for each State and Australia for the years 1966-67 to 1972-73 are shown in the table below.

NOTE. At the 1971 population census all trainee teachers were for the first time classified as not in the labour force. Previously those enrolled at government teachers colleges (and in some cases at other institutions also) had been included. Trainees affected by the reclassification have now been excluded, together with their allowances, from the calculation of average weekly earnings from September quarter 1971. The effect of their exclusion has been to increase average earnings figures in all States by approximately 30 cents.

**AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT(a), 1966-67 TO 1972-73**  
(£)

<i>Period</i>	<i>N.S.W.(b)</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.(c)</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Aust.</i>

(a) See explanatory notes above.

(b) Includes the Australian Capital Territory.

(c) Includes the Northern Territory.

Because of the adoption of a new definition of the labour force at the June 1966 population census, there is a break in comparability between June and September quarters of 1966 in the employment series used in the calculation of average weekly earnings. For this and other reasons (in particular, the

lack of precise information about the ratios of female to male earnings in the several States for 1965-66 and earlier years), it is not possible to make a comparable series of State estimates for periods prior to September quarter 1966. However, in order to provide a broad indication of trends over a longer period, estimates for Australia as a whole have been calculated for the period back to September quarter 1961 by methods and on a basis that are as nearly as possible comparable with those used for the current series. Annual averages for this period are: 1961-62, \$47.60; 1962-63, \$48.90; 1963-64, \$51.50; 1964-65, \$55.30; 1965-66, \$57.90.

For current statistics in this series reference should be made to the quarterly publication *Average Weekly Earnings* (6.18).

### Surveys of wage rates, earnings and hours, 1960 to 1972

Since 1960 a number of statistical surveys of wages and hours of work in Australia have been undertaken by this Bureau. The object of these surveys has been to obtain information on wage rates, actual weekly earnings and hours of work on a more comprehensive scale than previously available in Australia. A summary of the scope and coverage of each of these surveys is shown on the following pages.

#### Survey of wage rates and earnings, September 1960

For information on the results of this survey see Year Book No. 51, pages 439-42.

#### Survey of weekly earnings, October 1961

The results of this survey were published in Year Book No. 51, pages 442-4.

#### Surveys of weekly earnings and hours, October 1962 to 1972 (excluding October 1965)

For details of these surveys see pages 259-65.

#### Survey of weekly earnings, October 1965

A survey of weekly earnings of male employees was conducted for the last pay-period in October 1965. The survey was conducted by means of: (i) a sample of private employers subject to pay-roll tax (that is those paying more than \$400 a week in wages and salaries); (ii) a complete coverage of Commonwealth and State government departments and semi-government authorities; and (iii) a sample of local government authorities. It related to certain specified industry groups only.

The object of the survey was to obtain estimates of the numbers and proportions of full-time adult male employees in various weekly earnings groups and a dissection of total weekly earnings paid to full-time adult males into: (i) overtime earnings; (ii) ordinary time earnings at 'award, etc. rates'; and (iii) ordinary time earnings in excess of those at 'award, etc. rates' (divided into (a) payment by measured result and (b) other) as defined. The survey also provided figures of average weekly earnings for full-time adult male and junior male employees. Separate details were obtained for (i) managerial, executive, professional and higher supervisory staff, and (ii) other full-time male employees. Results of this survey were published in detail in *Labour Report* No. 52, 1965 and 1966.

### Survey of weekly earnings (size distribution), May 1971

#### General

A survey of weekly earnings of adult male employees was conducted for the pay-period which included 12 May 1971. Some results of this survey are given in the following pages. Detailed results were published in the bulletin, *Survey of Weekly Earnings (Size Distribution)*, May 1971 (6.30) and in the *Labour Report*, No. 56, 1971 (pages 117-70).

The object of the survey was to obtain estimates of the numbers and proportions of full-time adult male employees (paid for a full week) in various total weekly earnings groups, average weekly total earnings for these employees, and a dissection of average weekly total earnings into average weekly overtime earnings and average weekly ordinary time earnings. Separate details were obtained for (a) male managerial, executive, professional and higher supervisory staff, and (b) other full-time adult male employees. Similar statistics were last obtained from a survey of weekly earnings in October 1965 (see above) but that survey did not have as wide an industry scope as this current survey. The 1971 survey excluded employees of private employers not subject to pay-roll tax; employees in rural industry and private domestic service; employees of religious, benevolent and other similar organisations exempt from pay-roll tax (other than public hospitals and government institutions); and waterside workers employed on a casual basis.

Because this survey was confined to full-time adult male employees *paid for a full working week*, and for other reasons, the average weekly earnings for private employees shown in the following tables are not directly comparable with the average earnings for full-time adult males obtained from the annual October surveys of weekly earnings and hours (*see* pages 259-65).

### Scope of survey

The survey was conducted by means of stratified random samples of (i) private employers subject to pay-roll tax (that is those, other than exempt employers, paying more than \$400 a week in wages and salaries), (ii) public hospitals, and (iii) local government authorities; and in addition a complete coverage of (iv) Commonwealth and State government departments, government authorities and semi-government bodies. In the published results 'private employees' refer to those covered by categories (i) and (ii) and 'government employees' refer to those covered by categories (iii) and (iv). There were 4,995 private employers surveyed. The survey results are representative of 2,212,600 full-time adult male employees made up of 1,500,600 full-time adult males in private employment and 712,000 in government employment.

The estimates of private and government employees do not correspond to the estimates of total male civilian employment in the specified industry groups published by this Bureau. This is mainly because the sample of private employers was restricted to those subject to pay-roll tax and these employers were generally classified to the industry group of their major activity, and because the information obtained in the survey related to full-time adult male employees (as defined).

As the private sector of the survey and the local government collections were based on samples, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability. For further information on sampling variability see the bulletin *Survey of Weekly Earnings (Size Distribution)*, May 1971 (6.30) mentioned above.

### Definitions

The following definitions refer to terms used in the survey and in the following tables.

*Adult males* include all male employees 21 years of age and over and those male employees who, although under 21 years of age, are paid at the adult male rate for their occupation. All other male employees under 21 years of age are excluded.

*Number of adult male employees* refers to all adult male employees (as defined above) who received pay for the pay-period which included 12 May 1971.

*Full-time adult male employees* are those adult male employees whose normal hours of work are 30 or more a week and who were paid for their full normal hours of work for the pay-period which included 12 May 1971. Included are full-time adult male employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period if they received pay for their full normal hours of work. Excluded are 'full-time' adult male employees on short-time; 'full-time' adult male employees who began or ceased work during the pay-period; and all adult male employees absent without pay (for any reason) during the pay-period.

Full-time adult males were classified according to whether they were *managerial, executive, professional and higher supervisory staff* (who were not further defined) or *all other full-time adult male employees* (i.e. other than managerial, etc. staff). The non-managerial employees include full-time adult male minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees.

*Private employees* are employees of private employers subject to pay-roll tax and of all public hospitals. *Government employees* are employees of Commonwealth and State government departments, government authorities and semi-government bodies, and of local government authorities.

*Total gross weekly earnings* refers to gross earnings of adult male employees before taxation and other deductions have been made, for the pay-period which included 12 May 1971. Included are over-time earnings, ordinary time earnings, shift allowances, penalty rates, commission and similar payments; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. Included are one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual and other leave taken during the specified pay-period; periodical payments under incentive, piecework, profit sharing schemes, etc.; commissions; annual or periodical bonuses, etc. Excluded are any retrospective payments.

Total gross weekly earnings for *All other full-time adult male employees* (i.e. other than managerial, executive, etc. staff) are dissected into overtime earnings and ordinary time earnings.

*Overtime earnings* refers to that part of total gross weekly earnings (as defined above) for man-hours paid for in excess of award, standard or agreed hours of work. (The figures of average overtime earnings shown in tables on pages 258-9 are not average overtime earnings of only those employees who worked overtime, but are averages for all employees in the specified category whether or not they worked overtime.)

*Ordinary time earnings* refers to that part of total gross weekly earnings (as defined above) for award, standard or agreed hours of work. Included in relation to these hours are shift allowances, penalty rates, commissions, bonuses and incentive payments, and payments for annual and other leave taken during the specified week.

Details of numbers of full-time adult male employees in various earnings groups were obtained only in relation to total weekly earnings (i.e. including overtime earnings).

### Surveys of weekly earnings and hours, October 1962 to October 1972

Sample surveys in respect of most private employers subject to pay-roll tax (i.e. those paying more than \$400 per week in wages and salaries) have been conducted as at the last pay-period in October during recent years. Some results of the 1972 survey for private employees and comparisons with earlier such surveys are contained in the following tables. Further particulars including averages for each State are published in the annual bulletin, *Survey of Weekly Earnings and Hours* (6.1) and in the appendix to the annual Labour Report (see No. 56, 1971 pages 394-414). Preliminary results of these surveys are published in the bulletin *Survey of Weekly Earnings and Hours* (Preliminary Results) (6.28) as soon as returns from a large percentage of respondents have been processed.

In addition to surveying private employees subject to pay-roll tax in each State, the 1972 survey also surveyed (a) non-government hospitals not subject to pay-roll tax; (b) Commonwealth and State government departments, government authorities and semi-government bodies; (c) local government authorities; and (d) employees in the Northern Territory and Australian Capital Territory. However, the results in the following tables do not include those relating to employees in the above categories.

In addition to obtaining data for the calculation of average weekly earnings, average weekly hours paid for, and average hourly earnings, information on overtime and ordinary time earnings and hours for full-time employees (other than managerial, etc. staff) was obtained from surveys beginning with the October 1966 survey. The figures of average overtime earnings and average overtime hours are the averages for *all* employees (in the specified category) represented in the survey whether or not they worked overtime. The survey figures do not show the average overtime earnings or hours of only those employees who worked overtime.

Figures of average weekly earnings, average weekly hours paid for, and average hourly earnings as at the selected pay-periods are presented for males and females (adult and junior) separately by industry groups and by States. They reflect the effects of differences (and of changes between points of time) in amounts paid for the various occupations; in amounts paid for the same occupations; in occupational structures within industries; in industry structure; in degrees of business activity (incidence of overtime, etc.); and in the incidence of incentive schemes, piecework and profit-sharing scheme payments, etc.

#### Scope of survey

The results shown in the following tables are based on returns from stratified random samples of private employers subject to pay-roll tax. Employees in rural industry and in private domestic service are excluded because most employers in these two industries are not subject to pay-roll tax. Also excluded from these survey results are: employees of government and semi-government authorities; employees of religious, benevolent and other similar organisations exempt from pay-roll tax; and all employees in the Northern Territory and the Australian Capital Territory. The earnings and hours of waterside workers employed on a casual basis are excluded because they are subject to wide fluctuations for short periods such as those covered by these surveys. Waterside workers on weekly hire employed under the new permanent employment scheme are included in the surveys.

Approximately 5,100 private employers were included in the October 1972 survey and the sample represented 1,810,000 males and 860,000 female wage and salary earners.

As the results shown in the following tables are based on a sample, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability. A technical note on sampling variability is included in the annual bulletin, *Survey of Weekly Earnings and Hours* (6.1).

#### Comparability of results

In addition to affecting the results of each sample survey, sampling variability also affects comparison between each year's results.

The industry classification adopted for these earnings and hours surveys from 1963 onwards (including the 1965 survey) is that used for the 1961 and 1966 population censuses.

The October 1965 Survey of Weekly Earnings was a special purpose survey on a different basis from the surveys compared in this section and, therefore, its results are not shown herein (*see* page 256).

The allocation of employees between 'Managerial, executive, professional and higher supervisory staff' and 'All other full-time employees' (as defined) depends upon the employers' interpretation of the definitions (*see* page 261).

## Definitions

The following definitions refer to terms used in the surveys and in the tables in this section.

*Employees* refers to male and female employees on the pay-roll and who received pay for the last pay-period in October.

*Adults* includes all employees 21 years of age and over and those employees who, although under 21 years of age, are paid at the adult rate for their occupation.

*Juniors* refers to those employees under 21 years of age who are not paid at the adult rate for their occupation.

*Full-time employees* refers to those employees who ordinarily work 30 hours or more a week and who received pay for the last pay-period in October. Included are 'full-time' employees on short-time; 'full-time' employees who began or ceased work during the pay-period; and 'full-time' employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the pay-period.

*Part-time employees* refers to employees who ordinarily work less than 30 hours a week and who received pay for the last pay-period in October. Employees on short-time who normally work 30 hours or more a week are classified as full-time employees.

*Other than managerial, etc. staff* includes minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees. It excludes *managerial, executive, professional and higher supervisory staff* who, for private employees, were not further defined.

*Weekly earnings* refers to gross earnings for the last pay-period in October before taxation and other deductions have been made. It includes ordinary time earnings, overtime earnings, shift allowances, penalty rates, commission and similar payments; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the pay-period. It includes one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual or other leave taken during the pay-period; periodical payments under incentive, piecework, profit sharing schemes, etc.; commissions; annual or periodical bonuses, etc. Retrospective payments are excluded.

*Overtime earnings* refers to that part of gross weekly earnings (as defined above) for hours paid for in excess of award, standard or agreed hours of work. Overtime earnings were not reported for managerial, etc. staff.

*Ordinary time earnings* refers to that part of gross weekly earnings (as defined above) for award, standard or agreed hours of work. It includes shift allowances, penalty rates, commissions, bonuses and incentive payments, and that part of paid annual and other leave, which relates to these hours.

*Weekly man-hours paid for* refers to the sum of man-hours for which payment was made. It includes ordinary time hours, overtime hours, paid stand-by or reporting time; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. For employees paid other than weekly, hours are converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the specified week, only the man-hours actually paid for are included. Where agreed hours of work are less than award hours, man-hours are based on agreed hours. Hours of work were not reported for managerial, etc. staff.

*Overtime hours* refers to hours in excess of award, standard or agreed hours of work.

*Ordinary time hours* refers to award, standard or agreed hours of work. It includes man-hours of stand-by or reporting time which are part of standard hours of work, and that part of paid annual leave, paid sick leave and long service leave taken during the specified week.

## Determination of wage rates in Australia

Before June 1967, the concept of a basic or living wage was common to wage rates determined by industrial authorities in Australia. Initially, the concept of a basic wage (for adult males) was interpreted as the wage necessary to maintain an average employee and his family in a reasonable state of comfort. However, it was later generally accepted that the basic wage should be fixed at the highest amount which the economy could sustain and that the dominant factor was the capacity of the community to carry the resultant wage levels. Basic wages were determined for adult females as well as for adult males.

In addition to the basic wage, secondary wage payments, including margins for skill, etc., and various kinds of loadings peculiar to the occupation or industry, were determined by industrial authorities. The basic wage and the secondary wage made up the minimum wage rate for a particular occupation.

In the following paragraphs is set out a brief history of the determination of wage rates in Australia by Commonwealth and State industrial authorities. For more detailed information including the history of basic wage determination in Australia see previous issues of the Year Book and the annual *Labour Report*.

### Commonwealth Basic Wages and Margins

For a brief history of Commonwealth basic wages and margins, see earlier issues of the Year Book and the *Labour Report*. As a result of a decision of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967, basic wages and margins were eliminated from Commonwealth awards and total wages were introduced to operate from the beginning of the first pay-period to commence on or after 1 July 1967.

For tables showing Commonwealth basic wage rates for adult males and adult females see the Appendix to *Labour Report* No. 56, 1971.

### Commonwealth total wages

In the national wage cases of 1964 and 1965 applications by employers that basic wages and margins should be deleted from Commonwealth awards and total wages introduced were rejected by the Commonwealth Conciliation and Arbitration Commission. However, in its decisions in the Basic Wage, Margins and Total Wage Cases of 1966 the Commission decided to defer the conversion of the wage structure to the basis of a single wage pending further consideration of the present structure of marginal rates and further argument. As a result of the National Wage Cases of 1967, in which the employers again applied for a total wage, the Commonwealth Conciliation and Arbitration Commission announced the elimination of basic wages and margins from Commonwealth awards and the introduction of total wages. The total wages were arrived at by adding an amount of \$1 a week to the weekly award wages for each adult male and adult female classification to operate from the beginning of the first pay-period to commence on or after 1 July 1967.

Trade unions unsuccessfully challenged in the High Court the abolition of basic wages and the adoption of total wages by the Commonwealth Commission.

As a result of its decision in the Basic Wage, Margins and Total Wage Cases of 1966, the Commonwealth Conciliation and Arbitration Commission, over the period September 1966 and November 1967, undertook a work value inquiry concerning classifications appearing in the Metal Trades Award. On 11 December 1967 the Commission issued a majority decision (Gallagher J. and Commissioner Winter, with Moore J. dissenting), granting increases to adult male classifications. Subsequently the Commission decided that these increases would operate in two stages, namely, from January 1968 and August 1968.

In its decisions in National Wage Cases, the Commonwealth Conciliation and Arbitration Commission increased total award rates of pay for adult male and female employees by \$1.35 a week in October 1968, by 3 per cent in December 1969, by 6 per cent in January 1971, and by \$2.00 a week in May 1972. Increases were also made to the minimum wage for adult males (see next page).

On 15 December 1972 the Commission issued its decision in the National Wage and Equal Pay Cases 1972. It decided that all matters in which national wage and minimum wage increases were sought be adjourned until 13 March 1973. The claim that the minimum wage for adult males be applied to adult females was rejected. The Commission decided to apply to all of its awards the principle of 'equal pay for work of equal value' for females (see page 267).

### Commonwealth minimum wage

In July 1966 the Commonwealth Conciliation and Arbitration Commission, in its decisions in the Basic Wage, Margins and Total Wage Cases of 1966, inserted in Commonwealth awards provisions for a minimum wage for adult males. The Commission said that it had given detailed consideration to lower paid classifications in the Metal Trades Award and had decided to grant some immediate relief to low wage earners. The Commission in its judgment said that it intended to insert a new provision in awards by which it would be prescribed that no adult male employee should be paid as a weekly wage for working the standard hours of work an amount less than the minimum wage, i.e. his appropriate basic wage rate plus \$3.75 a week. The minimum wage was prescribed for adult male employees only and was applied for all purposes of the award, for example, in calculation of overtime and other penalty rates, piece-work, casual employment, sick leave and annual leave. The Commission stated that the provision for a minimum wage for adult male employees was designed to meet the circumstances of employees in the lowest classifications who were in receipt of award rates and no more. It was not intended to affect the wage of any employee who was already receiving the prescribed minimum through over-award payment. The provision for a minimum wage for adult males operated from the beginning of the first pay-period to commence on or after 11 July 1966. The rates of minimum wage for adult males inserted in Commonwealth awards ranged from \$34.75 to \$37.25 a week for State capital cities. As a result of the decisions of the Commission in the National Wage Cases, the minimum wages for adult males were increased by \$1 a week in July 1967, by \$1.35 a week in October 1968, by \$3.50 a week in December 1969, by \$4.00 a week in January 1971, and by \$4.70 a week in May 1972.

### Equal pay

Two benches of the Commonwealth Conciliation and Arbitration Commission sat jointly from 25 February 1969 to 22 May 1969 to take evidence and hear argument on trade union claims for equal pay between the sexes in the Equal Pay Cases 1969. Both benches of the Commission reached a common conclusion and on 19 June 1969 published their decision and reasons for their decision. The Commission said it was prepared to implement the principle of equal pay for equal work by introducing into Commonwealth awards and determinations the principles contained in State acts on equal pay. The Commission stated that no increases should be granted to adult females without an examination of the work done. It also suggested a number of principles to be applied in deciding applications for equal pay. The Commission decided that implementation of equal pay should be spread over a period so that female rates of pay affected by this decision should become equal to the male rate from the beginning of the first pay-period to commence on or after 1 January 1972. For further details of the Commission's decision see *Labour Report* No. 56, 1971, pages 199–202.

On 15 December 1972 the Commonwealth Conciliation and Arbitration Commission, in its decision in the National Wage and Equal Pay Cases 1972, outlined the principle of 'equal pay for work of equal value' for adult and junior females, which is to be applied to all Commonwealth awards and determinations. The Commission stated that the principle meant the fixation of award rates of pay by a consideration of the work performed irrespective of the sex of the worker. The eventual outcome would be a single award rate for an occupational group or classification payable to both male and female employees. Female rates are to be determined by work value comparisons, where value of the work refers to worth in terms of award wage or salary fixation and not worth to the employer. The principle has no application to the minimum wage for adult males.

The Commission decided that implementation of the above principle be by agreement or arbitration, and generally take place by three equal instalments so that one-third of any increase is payable no later than 31 December 1973, half of the remainder by 30 September 1974, and the balance by 30 June 1975.

The Commission decided that the 1969 equal pay principles (see above) will continue to apply in appropriate cases.

For details of equal pay provisions under State awards, etc., see *Labour Report* No. 56, 1971, pages 210–11.

## Determination of wage rates in State awards, etc.

### New South Wales

The first determination of a standard living wage for adult male employees under New South Wales State awards operated from 16 February 1914, when the Court of Arbitration fixed the rate at \$4.80 a week for the metropolitan area. The first living wage for adult females (\$3.00 a week) was declared by the Board of Trade to operate from 17 December 1918.

Legislation operative from 1 January 1968 determined the basic wage for adult males at \$34.50 a week and the basic wage for adult females at \$26.10 a week. The legislation also provided for the adjustment of wage rates in State awards by the Industrial Commission subsequent to a decision of the Commonwealth Conciliation and Arbitration Commission to vary Commonwealth wage rates wholly or partly on economic grounds. Changes in the State basic wage for adult males shall not be more than the amount of increase in Commonwealth minimum wages for adult males, and the increase in the adult female basic wage not less than 75 per cent of the increase in the male basic wage. The Industrial Commission and Conciliation Committees were given power to include provisions for minimum wages for adult males or adult females in State awards.

Subsequent to decisions of the Commonwealth Conciliation and Arbitration Commission in National Wage Cases, the Industrial Commission of New South Wales increased the basic wages for adult males and adult females by \$1.35 a week in October 1968; the adult male basic wage by \$1.05 a week and the adult female basic wage by 85 cents a week in December 1969; the basic wage for adult males by \$2.20 a week and the basic wage for adult females by \$1.70 a week from 1 January 1971; and the basic wages for adult males and adult females by \$2.00 a week on and from 19 May 1972. Marginal rates of pay in State awards were increased by 3 per cent in December 1969 and by 6 per cent in January 1971.

Further information on New South Wales basic wages is published in the annual *Labour Report*. State basic wage rates for Sydney are published in the Appendix to *Labour Report* No. 56, 1971.

### Victoria

In Victoria, Wages Boards are constituted for industry groups or occupations from representatives of employers and employees with an independent chairman to determine rates of wages and conditions of work.

Subsequent to the decisions of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967 (see page 266), the Industrial Appeals Court decided that basic wages and margins for adult males and adult females should be deleted from Wages Board determinations and that wage rates expressed as total wages should operate from the beginning of the first pay-period in July 1967. At the same time total wages for both adult males and adult females were increased by \$1 a week.

Following decisions of the Commonwealth Conciliation and Arbitration Commission in National Wage Cases, total wages prescribed for both adult males and adult females in Wages Board determinations were increased by \$1.35 in October 1968, by 3 per cent in December 1969, by 6 per cent in January 1971, and by \$2.00 a week in May 1972. In December 1969 the Industrial Appeals Court ordered that a minimum wage for adult males of \$42.30 a week should operate in all determinations. In January 1971 the minimum wage for adult males was increased by \$4 a week and in May 1972 by \$4.70 a week.

For further information on the operation of Victorian Wages Board determinations see the annual *Labour Report*. Basic wage rates, general increases in total rates of pay, and rates of minimum wage for adult males are published in the Appendix to *Labour Report* No. 56, 1971.

### Queensland

The first formal declaration of a basic wage in Queensland determined a basic wage of \$8.50 for adult males and \$4.30 for adult females to operate from 1 March 1921. Prior to this declaration the rate of \$7.70 a week for adult males had been generally recognised in awards as the 'basic' or 'living' wage.

Since 1961 the full bench of the Industrial Conciliation and Arbitration Commission, consisting of not less than three Commissioners, has power to make declarations concerning the basic wage for males and females and the standard hours of work. The basic wage for adult males must be sufficient to maintain an employee, his wife, and family of three children in a fair and average standard of comfort. The basic wage for adult females should be not less than is sufficient to enable an employee to support herself in a fair and average standard of comfort. All persons interested must be given an opportunity to be heard before any general declaration regarding the basic wage is made, and the Commission must take into consideration any probable economic effect of such declaration.

Following the decision of the Commonwealth Conciliation and Arbitration Commission to increase total wages by \$1 a week in July 1967, the Industrial Commission increased all award rates of pay for both adult males and adult females by \$1 per week to operate from 3 July 1967. Subsequently the Commission decided that this \$1 increase would be absorbed in basic wage rates.

The Industrial Conciliation and Arbitration Commission increased the basic wages for adult males and adult females by \$1.35 a week in October 1968; the basic wage for adult males by \$1.10 a week, the basic wage for adult females by 80 cents a week and the marginal content of award rates of pay by 3 per cent in December 1969; and the basic wage for adult males by \$2.20 a week, the basic wage for adult females by \$1.70 a week, and the marginal content of award wages by 6 per cent in January 1971. The Commission further increased the basic wage for adult males by 95 cents a week and the basic wage for adult females by 75 cents a week in December 1971; the basic wage for adult males by 80 cents a week and the basic wage for adult females by 60 cents a week in March 1972; and the basic wage for adult males by 40 cents a week and the basic wage for adult females by 75 cents a week in May 1972. In February 1973, the Commission increased the basic wage for adult males by \$1.30 to \$42.30 a week for the Eastern District of the Southern Division (including Brisbane) and the basic wage for adult females by \$1.00 to \$32.85 a week for the same area.

A guaranteed minimum wage for adult males of \$42.80 a week for the Eastern District of the Southern Division (including Brisbane) was awarded in May 1970, increased to \$46.80 a week in January 1971, to \$51.50 a week in May 1972 and to \$52.80 a week in February 1973.

For other areas of the State, district allowances are added to these rates (*see Labour Report* No. 56, 1971, page 206).

For further particulars of basic wage determination in Queensland *see the annual Labour Report*. Tables of basic wages and rates of minimum wage for adult males are published in the Appendix to *Labour Report* No. 56, 1971.

### South Australia

The first declaration of a living wage for adult male employees in the metropolitan area was \$7.95 a week operative from 4 August 1921. The first adult female living wage of \$3.50 a week operated from 1 September 1921.

Following increases in rates of pay in Commonwealth awards, since 1967 rates prescribed in South Australian State awards have been increased as set out below. The State living wages for both adult males and adult females were increased by \$1 a week in July 1967 and by \$1.35 a week in October 1968. In December 1969 an 'economic loading' of 3 per cent of the sum of the living wage and margins was included in all awards. In January 1971, this 'economic loading' was absorbed in the living wage and margins, and these were further increased by 6 per cent. In May 1972 the State living wages for adult males and adult females were increased by \$2.00 a week.

A minimum wage for adult males of \$36.05 a week was introduced in September 1966. This wage was increased by \$1 a week in July 1967, by \$1.35 a week in October 1968, by \$3.50 a week in December 1969, by \$4 a week in January 1971, and by \$4.70 a week in May 1972.

For further information on South Australian living wages *see the annual Labour Report*. Tables of living wages and rates of minimum wage for adult males are published in the Appendix to *Labour Report* No. 56, 1971.

### Western Australia

The first declaration of the basic wage by the Court of Arbitration operated from 1 July 1926, when rates of \$8.50 for adult males and \$4.59 for adult females were fixed.

Legislation operative from 22 November 1968 fixed the State basic wage for adult males at \$35.45 and for adult females at \$27.08 a week. The legislation also provided for the Commission to review the basic wage at least every twelve months, the variations in the basic wage to take effect only after the expiration of twelve months from the last variation unless there were special reasons. The Commission was also required, upon application, to insert in awards provision for equal pay for male and female workers performing work of the same or like nature and of equal value. If application for equal pay was made before 30 June 1970 the difference in male and female basic wages would be removed not later than 1 January 1972. The equal pay provisions do not apply to persons engaged in work essentially or usually performed by female workers but upon which males may be employed.

The Western Australian Industrial Commission increased the basic wage for adult males by \$1.00 a week in November 1968, by \$2.00 a week in October 1970, by \$1.00 a week in October 1971, and by \$1.00 a week in June 1972; and the basic wage for adult females by 80 cents a week in November 1968, by \$1.52 a week in October 1970, by \$1.50 a week in October 1971, and by \$1.50 a week in June 1972.

The minimum wage for adult males of \$36.55 a week awarded in April 1967 was increased by \$1.00 a week in July 1967, by \$1.35 a week in October 1968, by \$3.50 a week in December 1969, by \$7.50 a week in October 1970, by \$2.50 a week in October 1971, and by \$2.00 a week in June 1972.

On 26 October 1970 the Commission decided that awards would provide for additions to award rates for adult males to raise their wage rates for ordinary hours of work to 110 per cent of the sum of the basic wage and margin. This provision would not apply to those adult males who were already in receipt of this amount by virtue of award provisions or otherwise. This provision would operate from the date of amendment of each award, the first such amendment being inserted into awards in October 1970.

More detailed information on State basic wages in Western Australia appears in the annual *Labour Report*. Basic wage rates and rates of minimum wage for adult males are published in the Appendix to *Labour Report* No. 56, 1971.

### Tasmania

Wages Boards are constituted for a number of industries from representatives of employers and employees with an independent chairman (common to all Wages Boards) with power to determine rates of wage in each industry.

Subsequent to decisions of the Commonwealth Conciliation and Arbitration Commission in National Wage Cases, Tasmanian Wages Boards varied their determinations as follows. The basic wages for adult males and adult females were increased by \$1.00 a week in either July or August 1967, and by \$1.35 a week in October 1968; the adult male basic wage was increased by \$1.05 a week, the adult female basic wage by 80 cents a week and the marginal content of award rates of pay by 3 per cent in December 1969; the basic wage for adult males was further increased by \$2.20 a week, the basic wage for adult females by \$1.70 a week and the marginal content of award rates of pay by 6 per cent in January 1971. The basic wages for adult males and adult females were increased by \$2.00 a week in May 1972.

A minimum wage for adult males of \$38.15 a week was introduced into Wages Board determinations in July 1967. This was increased by \$2.30 a week in October 1968, by \$2.55 a week in December 1969, by \$4 a week in January 1971, and by \$4.70 a week in May 1972.

Further details of basic wages in Tasmanian Wages Board determinations are published in the annual *Labour Report*. Basic wage rates and rates of minimum wage for adult males are published in the Appendix to *Labour Report* No. 56, 1971.

### Annual leave

The majority of employees in Australia at present receive at least three weeks' paid annual leave. In 1964 State government employees in New South Wales were granted four weeks' paid annual leave and in 1971 South Australian government employees also obtained this benefit. As from 1 January 1973 employees of the Commonwealth government were granted four weeks' annual leave.

In December 1971, the Commonwealth Conciliation and Arbitration Commission rejected claims by the unions for four weeks' leave, and for an extra week's pay while on leave. The decision on the claim for an increase in the award amount of weekly payment when on leave was deferred until after the hearing of the National Wage Cases 1971-72. On 7 June 1972 the Commission handed down its decision on this claim. It decided that, in general, payments for annual leave should include in addition to normal award rates of pay, over-award payments for ordinary hours of work, shift-work premiums, service grants, and certain allowances (industry, climatic, regional, etc., leading hand, first-aid, tool and qualification allowances). Generally speaking, employers paying an annual leave bonus would not be required to pay both the bonus and the above payments. Overtime payments, disability rates such as confined spaces and dirty work, and certain allowances (camping, travelling, car and meal allowances) should generally be excluded from annual leave payments. The provisions in each award are to be considered separately, together with the appropriate date of operation. For those awards under which the application was made in this case, the date of operation was set as 1 November 1972.

More detailed information on Commonwealth and State annual leave provisions appears in the annual *Labour Report*.

### Long service leave

Paid long service leave, i.e. leave granted to workers who remain with the one employer over an extended period of time, has been included in the provisions of Commonwealth and State industrial legislation and industrial awards. After fifteen years' continuous employment with the one employer, most employees in Australia are now entitled to at least thirteen weeks' paid long service leave. Some employees of Commonwealth and State governments and employees in certain industries are entitled to long service leave of a higher standard. In all cases the transfer of ownership of a business does not constitute a break in continuity of service with the same employer. Further information is contained in the annual *Labour Report*.

## INDUSTRIAL DISPUTES

Detailed information regarding industrial disputes involving stoppages of work is given in the *Labour Report*. A table showing statistics of industrial disputes for each year from 1913 is contained in the Appendix to *Labour Report* No. 56, 1971. Current statistics are published in the quarterly bulletin *Industrial Disputes* (6.6). Preliminary monthly figures are published in the bulletin *Industrial Disputes* (6.27).

Particulars of all disputes in progress during the year are included in the annual figures, whether the dispute commenced in that year or was in progress at the beginning of the year. Consequently, details of 'the number of disputes' and 'workers involved' in disputes which commenced in any year, and were still in progress during the following year, are included in the figures for both years.

The following table gives, for Australia as a whole, particulars of industrial disputes which were in progress during 1972, classified according to industry groups.

INDUSTRIAL DISPUTES(a): INDUSTRY GROUPS, AUSTRALIA, 1972

Industry group	Number	Workers involved ('000)			Working days lost ('000)	Estimated loss in wages (\$'000)
		Directly	Indirectly (b)	Total

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes communication; finance and property; wholesale and retail trade; public authority (n.e.i.); and community and business services.

\* Less than 50.

A graph on plate 25, page 272 shows, for the years 1960 to 1972, the working days lost as a result of industrial disputes in the main industry groups.

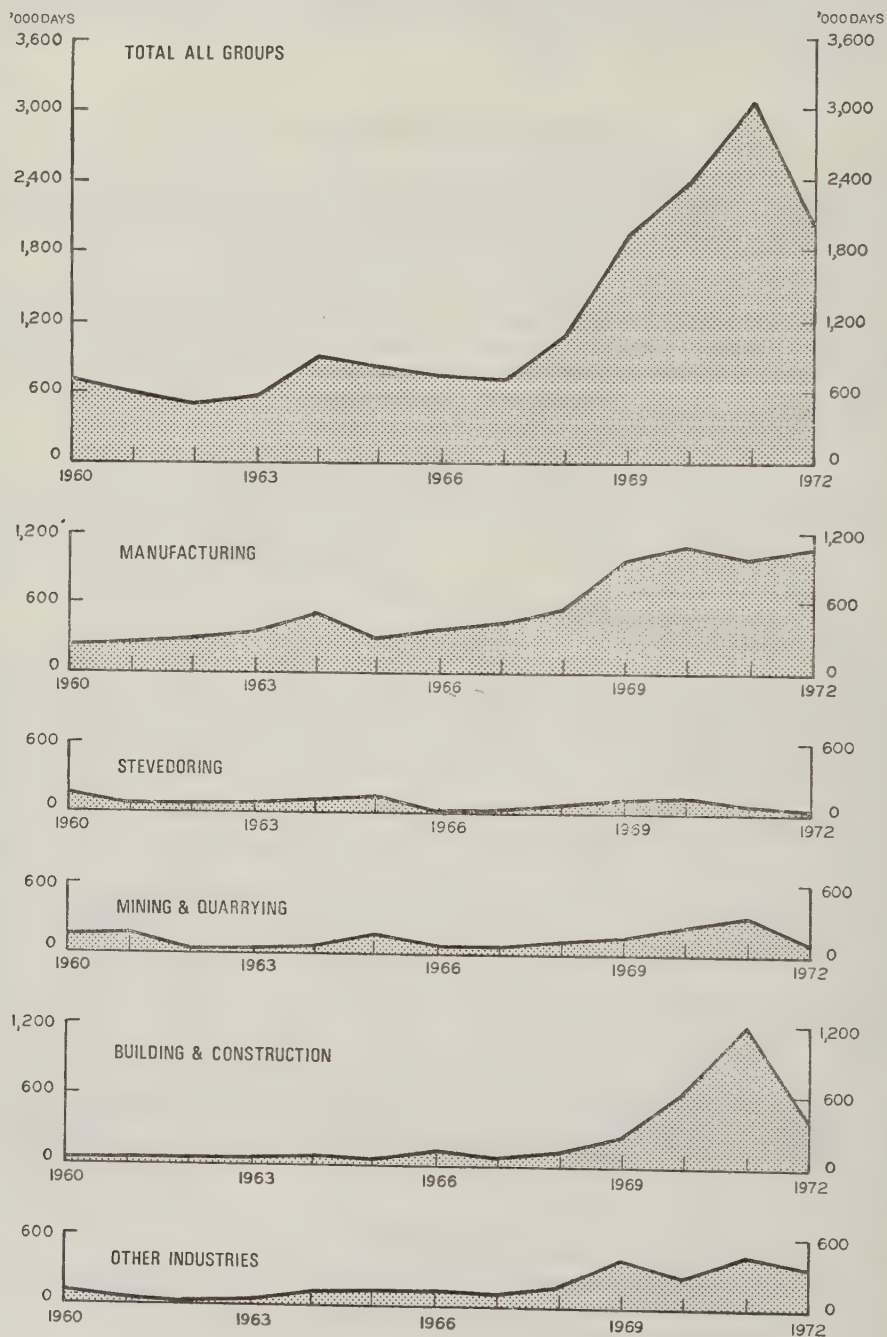

The next table, page 273, gives particulars of the number of industrial disputes in each State and Territory, together with the number of workers involved and the losses in working days and wages caused by disputes which were current during each of the years 1968 to 1972.

\* Less than 50.

## Duration of disputes

The duration of each industrial dispute involving a loss of work, i.e. the time between the cessation and resumption of work, has been calculated in working days, exclusive of Saturdays, Sundays and holidays, except where the establishment involved carries on a continuous process (e.g. metal smelting and cement manufacture).

The following table shows, for the year 1972, industrial disputes in coal mining, engineering, etc., stevedoring and other industries classified according to duration.

## INDUSTRIAL DISPUTES(a): DURATION, BY INDUSTRY GROUP, AUSTRALIA, 1972

Duration (working days)	Number	Workers involved(b)		Working days lost		Estimated loss in wages (\$'000)
		Number ( <sup>'000</sup> )	Proportion of total (per cent)	Number ( <sup>'000</sup> )	Proportion of total (per cent)	
COAL MINING						
Up to 1 day . . . . .	75	11.9	35.5	13.3	21.8	218.2

(b) Includes workers indirectly

## Causes of disputes

In the following table causes of industrial disputes (that is, the direct *causes of stoppages of work*) are analysed in four industry groups and grouped under the following headings.

*Wages*—claims involving general principles relating to wages, including combined claims relating to wages, hours or conditions of work. *Hours of work*—claims involving general principles relating to hours of work. *Leave, pensions, compensation provisions, etc.*—claims involving general principles relating to these provisions. *Managerial policy*—disputes concerning managerial policy of employers including computation of wages, hours, leave, etc. in individual cases; docking pay, etc.; dismissals, etc.; principles of promotion, etc.; employment of particular persons and personal disagreements; production limitations, etc. *Physical working conditions*—disputes concerning physical working conditions including safety issues; protective clothing and equipment, etc.; amenities; shortage of, or condition of, equipment or material; new production methods, etc.; arduous physical tasks, etc. *Trade unionism*—disputes concerning employment of non-unionists; inter-union and intra-union disputes; sympathy stoppages; recognition of union activities, etc. *Other*—disputes concerning protests directed against persons or situations other than those dealing with employer-employee relationship; non-award public holidays; accidents and funerals; no reason given for stoppage, etc.

For more information concerning these classifications of causes see the quarterly bulletin *Industrial Disputes* (6.6.).

\* Less than 50.

## Methods of settlement of disputes

The following table shows particulars of industrial disputes for 1972, classified according to method of settlement, in four industry groups. These statistics relate to the method directly responsible for ending the stoppage of work. For more information concerning this classification of methods of settlement see the quarterly bulletin, *Industrial Disputes* (6.6).

## WORKERS' COMPENSATION LEGISLATION

A conspectus of the principal provisions of Workers' Compensation Acts and Ordinances in force in Australia at 31 December 1971 is included in *Labour Report* No. 56, 1971, pages 295–307.

## LABOUR ORGANISATIONS

### Labour organisations in Australia

The figures shown in this section are prepared from a special collection of membership of labour organisations at 31 December each year. The affairs of single unions are not disclosed in the published results and this has assisted in securing complete information. The Bureau is indebted to the secretaries of trade unions for their co-operation in supplying information. More detailed statistics appear in the annual *Labour Report*. Current figures are published in an annual bulletin, *Trade Union Statistics: Australia* (6.24).

#### Trade unions

For the purpose of these statistics a trade union is defined as an organisation consisting predominantly of employees and whose principal activities include the negotiation of rates of pay and conditions of employment for its members.

The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organisation, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organisations: (a) the local independent, (b) the State, (c) the interstate, and (d) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organisation of interstate or federated unions vary greatly in character. In some unions the State organisations are bound together under a system of unification with centralised control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. Statistics relating to interstate or federated trade unions are shown in a table on page 279.

Returns showing membership by States and Territories at 31 December each year are obtained for all trade unions and employee organisations. The following table shows the position at the end of each of the years 1970 to 1972.

**TRADE UNIONS: NUMBER AND MEMBERSHIP, STATES AND TERRITORIES  
DECEMBER 1970 TO 1972**

State or Territory	Number of separate unions			Number of members ('000)			Percentage increase in membership(a)		
	1970	1971	1972	1970	1971	1972	1970	1971	1972
New South Wales . . . .	208	204	198	912.3	971.6	988.4	3.1	6.5	1.7
Victoria . . . . .	156	158	158	591.5	617.7	652.1	5.7	4.4	5.6
Queensland . . . . .	139	140	138	330.2	337.6	343.5	-1.8	2.2	1.7
South Australia . . . .	137	139	132	202.7	215.9	223.7	4.4	6.5	3.6
Western Australia . . .	155	154	151	168.6	178.3	184.8	4.0	5.7	3.6
Tasmania . . . . .	114	111	112	73.9	75.2	80.5	5.8	1.8	7.1
Northern Territory(b) .	45	51	55	6.6	8.1	11.1	(b)	(b)	(b)
Australian Capital Territory(b)	82	82	84	28.8	32.2	39.7	(b)	(b)	(b)
<b>Australia . . . . .</b>	<b>(c)305</b>	<b>(c)303</b>	<b>(c)305</b>	<b>2,314.6</b>	<b>2,436.6</b>	<b>2,523.7</b>	<b>3.4</b>	<b>5.3</b>	<b>3.6</b>

(a) On preceding year. (b) Some unions in the Territories are affiliated with State organisations and their membership is reported under the heading of that State. More accurate reporting of membership by location by trade unions over the years is reflected in the annual figures for the Territories and this affects their comparability over time. (c) Without interstate duplication—see below.

Minus sign (—) denotes decrease.

In the preceding table, under the heading 'Number of separate unions', a union reporting members in a State or Territory is counted as one union within that State or Territory. The figures do not add to the Australian total (shown in the last line) because a union represented in more than one State or Territory is included in the figure for each State or Territory in which it is represented, but is counted only once in the Australian total.

A table showing the number and membership of trade unions in Australia for each year since 1912 is included in the Appendix to *Labour Report* No. 56, 1971.

Information about the industry distribution of trade unions and their membership has been published in the Year Book in past years in the form of a table classifying trade unions and their members by industry groups. In cases where the members of a union were employed in a number of industries the union has been classified to the predominant industry for the union concerned. In recent years a number of trade unions have ceased to function individually by reason of amalgamation or merger. This has created problems of coding where the amalgamating unions have been classified to different industry groups. These amalgamations, etc., together with the imprecision of coding unions to their predominant industry group, result in an inaccurate analysis of the number and membership of trade unions by industry groups. Therefore the publication of the table showing industry groups has been discontinued.

*Number of trade union members and proportion of wage and salary earners.* The following table shows the approximate percentages of wage and salary earners in employment who are members of trade unions. The estimates of total wage and salary earners have been obtained by adding the number of employees in agriculture and in private domestic service recorded at the June 1966 population census to the estimates of employees in all other industries at the end of each year. For this reason, and also because the membership of trade unions includes some persons not in employment, the percentages shown in the table are approximations. The percentages shown in this table are not directly comparable with those shown in Year Book No. 55, 1969 and earlier issues because the present estimates are based on a new series of employment estimates as from June 1966 see Chapter 20, Employment and Unemployment. The difference is of most significance for female employees as the current employment estimates include a considerable number of part-time employees who had previously been excluded.

**TRADE UNIONS: NUMBER OF MEMBERS AND PROPORTION OF TOTAL WAGE AND  
SALARY EARNERS, AUSTRALIA(a), 1968 TO 1972**

End of December—	Number of members ('000)			Proportion of total wage and salary earners(a) (Per cent)		
	Males	Females	Persons	Males	Females	Persons
1968 . . . . .	1,691.1	499.5	2,190.7	59	36	51
1969 . . . . .	1,717.5	521.6	2,239.1	58	36	50
1970 . . . . .	1,750.6	564.1	2,314.6	57	36	50
1971 . . . . .	1,818.2	618.3	2,436.6	59	39	52
1972 . . . . .	1,827.4	696.2	2,523.7	58	43	53

(a) See text above.

*Interstate or federated trade unions.* The following table gives particulars of the number and membership of interstate or federated trade unions in 1972.

**INTERSTATE OR FEDERATED TRADE UNIONS(a): AUSTRALIA, DECEMBER 1972**

	Unions operating in—					Total
	2 States	3 States	4 States	5 States	6 States	
Number of unions . . . . .	10	5	17	29	79	140
Number of members ('000) . . . . .	22.0	62.4	96.7	339.0	1,803.0	2,323.1

(a) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory or the Australian Capital Territory or both.

**Employer and employee organisations registered under Industrial Arbitration Acts, etc.**

The Commonwealth *Conciliation and Arbitration Act* 1904–1972 and a number of State industrial arbitration acts provide for the registration of employer and employee organisations as outlined below. For further details see the annual *Labour Report*. In general, registration is necessary before an organisation may appear before the relevant industrial arbitration tribunal.

In Victoria and Tasmania where wages and conditions of work in the State sphere are determined by Wages Boards there is no provision in industrial arbitration legislation for registration of trade unions or employer organisations.

*Commonwealth.* At the end of 1972 the number of employers' organisations registered under the provisions of the *Conciliation and Arbitration Act* 1904–1972 was 77. The number of unions registered at the end of 1972 was 152, with membership of 2,129,097, representing 84 per cent of the total membership of all trade unions in Australia. Lists of organisations of employees and employers registered under this Act are contained in the *Industrial Information Bulletin*, Vol. 28 No. 1, January 1973 published by the Department of Labour.

*New South Wales.* At 30 June 1972 there were 130 employee unions and 286 employer unions registered under provisions of the Industrial Arbitration Act, 1940–1969, and 146 employee unions, 17 employer unions, and 1 other union registered under the Trade Union Act, 1881–1965. Lists of unions registered under these Acts are included in the *New South Wales Industrial Gazette* (see Vol. 186 Part 1 for details as at 30 June 1972).

*Queensland.* At 31 December 1972 there were 79 employee unions registered under the *Industrial Conciliation and Arbitration Acts*, 1961 to 1964, with a reported membership of 299,223. At the same date 40 employer unions with a reported membership of 39,761 employers were registered. Lists of registered employee and employer unions are published in the annual report of the President of the Industrial Court.

*South Australia.* At the end of December 1972 there were 2 employer associations and 52 employee associations registered under the provisions of the Industrial Conciliation and Arbitration Act 1972. Membership of these employee associations totalled 140,408.

*Western Australia.* At 30 June 1972 there were 94 unions of workers, with an aggregate membership of 152,812, registered under the provisions of the *Industrial Arbitration Act*, 1912–1971. At the same date there were 13 registered unions of employers with a reported aggregate membership of 1,908 employers. Lists of registered unions of workers and of employers together with membership figures are published in the *Western Australian Industrial Gazette* (see Vol. 52, pages 160–62, Appendix XIX).

**Central labour organisations**

*Trades and Labour Councils.* Delegate organisations, usually known as Trades Hall Councils or Labour Councils and consisting of representatives of a number of trade unions, have been established in the capital cities and in a number of other centres in each State. In the centres where these councils exist most unions or local branches operating in the district are affiliated. The district councils obtain their finance by means of a *per capita* tax on members of affiliated unions.

The following table shows, for each State and Territory, the number of trades and labour councils and the number of affiliated unions or branches of unions at the end of 1972. The figures for the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

**CENTRAL LABOUR ORGANISATIONS: NUMBER, AND UNIONS AND BRANCH UNIONS  
AFFILIATED, STATES AND TERRITORIES, DECEMBER 1972**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Total
Number of councils	11	8	13	7	3	2	..	1	45
Number of unions and branch unions affiliated	360	270	205	176	121	100	..	27	1,259

As well as trades and labour councils there are councils organised on trade lines and composed of delegates from separate unions whose members' interests are closely connected by reason of their occupations. Delegate councils of unions connected directly or indirectly with the metal trades, or with the building trades, are examples of such organisations.

*Australian Council of Trade Unions.* A central labour organisation, now called the Australian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the trade unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May 1927. The A.C.T.U. consists of affiliated unions and approved State Trades and Labour Councils and Provincial Councils. The State Trades and Labour Council in each State is the State Branch of the A.C.T.U. and it has the right to appoint one representative to act on the executive of the Council. In addition to the four A.C.T.U. officers and representatives of the State Branches of the A.C.T.U., seven delegates are elected by and from Congress, one from each, of the following industry groups: Building, Food and distributing services, Manufacturing, Metal Services, Transport, and the A.W.U. group. The President and Secretary are full-time officials and, with the two Vice-Presidents, are elected by and from the Australian Congress of Trade Unions. The ordinary meetings of Congress are held in alternate years. The 1971 Biennial Congress was held in August-September 1971. Special meetings of Congress are held whenever deemed advisable by decision of the executive, as approved by the majority of its branches, or by resolution supported by unions representing one-third of the total membership of the A.C.T.U.

For further particulars see the annual *Labour Report*.

*Other.* In addition to the A.C.T.U., other central labour organisations exist. These include the *Australian Council of Salaried and Professional Associations*, the *Council of Commonwealth Public Service Organisations*, and the *Council of Professional Associations*. Details of these councils will be found in *Labour Report* No. 56, 1971, pages 316-17.

### International Labour Organisation

The International Labour Organisation (I.L.O.) was established on 11 April 1919, as an autonomous institution associated with the League of Nations. Its original constitution was adopted as Part XIII of the Treaty of Versailles. With certain amendments this constitution remains the charter of I.L.O. to this day, bringing governments, employers and trade unions together to discuss international labour and social problems. A new definition of the aims and purposes of the I.L.O., known as the Declaration of Philadelphia, was added to the constitution at the 1944 Session of the International Labour Conference and this asserted the responsibility of I.L.O. in combating poverty and insecurity. In 1946 the Organisation became the first of the specialised agencies of the United Nations. Under the terms of agreement, the United Nations recognises the I.L.O. as a specialised agency having responsibility in the field defined by its constitution, which embraces labour conditions, industrial relations, employment organisation, social security and other aspects of social policy.

The Organisation has three basic parts. These are the International Labour Conference, its highest authority, which usually meets annually; the Governing Body its executive council, which usually meets three times each year; and the International Labour Office, which provides the Secretariat of the Organisation. The Conference is composed of delegations from the member States of the Organisation. At the end of 1972 there were 121 member States, each of which is entitled to be represented by four delegates—two representing the government, one representing employers and one representing workers, together with their advisers. Each delegate speaks and votes independently, so that all points of view in each country are fully expressed. The Governing Body consists of the representatives of twenty-four governments, and twelve employers' and twelve workers' representatives. Particulars are given in *Labour Report* No. 56, 1971 of the proceedings of International Labour Conferences up to the 56th Session, held in Geneva in June 1971. For details of I.L.O. conventions ratified by Australia, see *Labour Report* No. 56, 1971, pages 320-1.

## CHAPTER 11

# OVERSEAS TRANSACTIONS

This chapter includes statistics of overseas trade, balance of payments, and overseas investment by private investors, but because of limitations of space the statistics are, in the main, restricted to summarised form. For detailed information see the *Annual Bulletin of Overseas Investment, Australia* (5.20); and the other annual bulletins *Overseas Trade* (preliminary (8.15) (8.16) and final (8.11) ), *Australian Exports, Country by Commodity* (8.4), *Australian Imports, Country by Commodity* (8.19), *Imports Cleared for Home Consumption* (issued in two parts) (8.7) and the half-yearly bulletin *Balance of Payments* (8.1) Preliminary information is available in summary form in the statements *Balance of Payments—Quarterly Summary* (8.2), *Overseas Investment—Preliminary Bulletin* (annual) (5.21), *Australian Overseas Trade—Exports and Imports* (8.12) (monthly), *Overseas Trade—Exports by Commodity Divisions* (monthly) (8.18), and *Overseas Trade—Imports by Commodity Divisions* (monthly) (8.13). Current information is included in the *Quarterly Summary of Australian Statistics* (1.3), the *Monthly Review of Business Statistics* (1.4), the *Digest of Current Economic Statistics* (1.5), and in more detail in the *Monthly Bulletin of Overseas Trade Statistics* (8.9) (8.10). There are also the following additional mimeographed statements: *Exports of Principal Products of Australian Origin* (monthly) (8.5), *Imports of Assembled New Motor Cars* (monthly) (8.8), *Overseas Trade with Major Groups of Countries* (quarterly) (8.14), *Highlights of Overseas Trade* (quarterly) (8.23), *Exports by Mode of Transport* (quarterly) (8.25), *Exports and Imports by Commodity Division and Preliminary Estimates* (annually) (8.24), and *Trade of Australia with Eastern Countries* (annually) (8.17). Additional unpublished details of exports and imports can be supplied on request.

A subscription service is available from this Bureau to provide for the detailed requirements of individual users of overseas trade statistics. These special periodical returns are obtainable monthly or quarterly and show trade according to items of the Australian Export and Import Commodity Classifications or statistical key code dissections of Australian Customs Tariff items. A nominal charge is made which varies depending on the amount of detail required.

## OVERSEAS TRADE

### Constitutional provisions and legislation

#### Constitutional provisions

By the Commonwealth of Australia Constitution Act, Section 51 (1), the power to make laws with respect to trade and commerce with other countries was conferred on the Commonwealth Parliament. Under Section 86 of the Constitution, the collection and control of duties of customs and excise passed to the Executive Government of the Commonwealth on 1 January 1901. Other references to trade and commerce are contained in Sections 87 to 95 of the Constitution (see pages 17–18).

#### Commonwealth legislation

Commonwealth legislation affecting overseas trade includes: the Customs Act, the Customs Tariff and the Customs Tariff (Dumping and Subsidies) Act. The Customs Act is the administrative Act under which the Department of Customs and Excise operates. The Customs Tariff provides the statutory authority for imposing the actual rates of duty operative from time to time, while the Customs Tariff (Dumping and Subsidies) Act provides protection for Australian industry against various forms of unfair trading.

#### The Customs Tariff

The first Commonwealth Customs Tariff was introduced by Resolution on 8 October 1901, from which date uniform duties came into effect throughout Australia. The Australian Customs Tariff has been developed in conformity with the policy of protecting economic and efficient Australian industries and of granting preferential treatment to certain imports from countries of the Commonwealth and certain developing countries. Duties are imposed on some goods, generally of a luxury nature, for revenue purposes. Customs collections are a major source of revenue but in its protective character the tariff has an important influence on the Australian economy.

The present tariff provides for general and preferential rates of duty, and its structure is based on the 'Brussels Nomenclature' which has its origins in the Convention on Nomenclature for the Classification of Goods in Customs Tariffs, signed in Brussels on 15 December 1950. Australia has operated a 'Brussels-type' tariff since 1 July 1965.

*Preferential rates.* Preferential rates apply to goods the produce or manufacture of the United Kingdom, Ireland, Canada, New Zealand, and Papua New Guinea, and certain goods the produce or manufacture of specified countries, provided that such goods comply with the laws in force at the time affecting the grant of preference. With the termination on 1 February 1973 of the United Kingdom-Australia Trade Agreement existing preferential rates applicable to United Kingdom goods are under review.

The following are the rules of origin for preference purposes as defined in the Customs Act.

151.—(1.) For the purposes of this Act and the *Customs Tariff* 1966–1972 (other than section twenty of the last-mentioned Act), goods shall be treated as the produce of a country if they are unmanufactured raw products of the country.

(2.) For the purposes of this Act and the *Customs Tariff* 1966–1972 (other than section twenty or a direction under section thirty-three "c" of the last-mentioned Act), goods shall be treated as the manufacture of a country—

(a) if the goods were wholly manufactured in the country from materials of one or more of the following classes:

(i) unmanufactured raw products;

(ii) materials wholly manufactured in the country or in Australia, or in the country and in Australia; and

(iii) imported materials that the Minister has, in relation to the country, determined, by notice published in the *Gazette*, to be manufactured raw materials; or

(b) if the goods were partly manufactured in the country, the process last performed in the manufacture of the goods was performed in the country and—

(i) not less than three-quarters, or, in a case where the country is New Zealand, one-half, of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia;

(ii) in a case where the goods are goods of a class or kind not commercially manufactured in Australia, not less than one-quarter of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia; or

(iii) in a case where the country is New Zealand, not less than three-quarters of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of New Zealand and the United Kingdom or of New Zealand, Australia and the United Kingdom.

(3.) For the purposes of a direction under section thirty-three "c" of the *Customs Tariff* 1966–1972 goods shall be treated as the manufacture of a country if—

(a) the process last performed in the manufacture of the goods was performed in the country; and

(b) not less than one-half of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and one or more of the following countries, that is to say, Australia and countries that, at the time the goods are entered for home consumption, are less developed countries, other than a country that, by virtue of a direction under sub-section (2) of section eleven of the *Customs Tariff* 1966–1972 is not to be treated as a less developed country in relation to the class of goods in which the goods are included.

151A.—(1.) For the purposes of this Act and the *Customs Tariff* 1966–1972 (other than section twenty or a direction under section thirty-three "c" of the last-mentioned Act), goods shall not be treated as the produce or manufacture of the United Kingdom, Canada, New Zealand, Ireland, Malawi, Rhodesia, Zambia, the Territory of Papua or the Territory of New Guinea unless they have been shipped from that country to Australia and, except where the Collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(2.) The last preceding sub-section does not apply—

(a) to goods the produce or manufacture of a country other than New Zealand that are imported into Australia from New Zealand; or

(b) to goods the produce or manufacture of a country other than the Territory of Papua or the Territory of New Guinea that are imported into Australia from the Territory of Papua or the Territory of New Guinea.

(3.) For the purposes of a direction under section thirty-three "c" of the *Customs Tariff* 1966-1972, goods shall not be treated as the produce or manufacture of a country unless they have been shipped from that country to Australia and, except where the Collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(4.) For the purposes of this section—

(a) goods may be treated as having been shipped from the Territory of Papua or the Territory of New Guinea if they have been shipped from either of those territories; and

(b) goods may be treated as having been shipped from Malawi, Rhodesia or Zambia if they have been shipped from any of those countries or from Lourenco Marques or Beira in Mozambique.

*Declared preference countries, Customs Tariff.* 10.—(1.) The Minister may, by order published in the *Gazette*, declare that a country specified in the order is a declared preference country for the purposes of this Act.

(2.) An order under the last preceding sub-section has effect, or shall be deemed to have had effect, from and including such date (which may be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

(3.) The Minister may, by order, published in the *Gazette*, revoke an order under sub-section (1.) of this section.

(4.) An order under the last preceding sub-section has effect from and including such date (which shall not be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

(5.) Goods shall not be treated as the produce or manufacture of a declared preference country for the purposes of this Act unless, at the time the goods are entered for home consumption, the order under sub-section (1.) of this section in which the declared preference country is specified has effect or is deemed to have had effect.

Declared preference countries comprise:

Bahamas	Gambia, The	Nigeria, Federation of
Barbados	Ghana	St. Helena
Bermuda	Gibraltar	Seychelles
British Honduras	Gilbert and Ellice Islands	Sierra Leone
British Indian Ocean Territory	Colony	Singapore, Republic of
British Solomon Islands Protectorate	Guyana, Republic of	Sri Lanka, Republic of (formerly Ceylon)
British Virgin Islands	Hong Kong	Tanzania
Brunei	Jamaica	Tonga
Cyprus	Kenya	Trinidad and Tobago
Falkland Islands and Dependencies	Leeward Islands	Uganda
Fiji	Malaysia	Windward Islands
	Maldives Islands	
	Malta	
	Mauritius and Dependencies	

*Lesser developed countries, Customs Tariff.* 11.—(1.) The Minister may, by order published in the *Gazette*, declare that a country specified in the order is a less developed country for the purposes of this Act.

(2.) The Minister may, in an order under the last preceding sub-section, direct that a country that is a less developed country by virtue of the order shall not be treated as a less developed country in relation to a class of goods specified in the direction.

(3.) An order under sub-section (1.) of this section has effect, or shall be deemed to have had effect, from and including such date (which may be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

(4.) The Minister may, by order published in the *Gazette*, revoke an order under sub-section (1.) of this section.

(5.) An order under the last preceding sub-section has effect from and including such date (which shall not be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

Lesser developed countries comprise:

Afghanistan	Guyana, Republic of	Republic of Viet-Nam
Algeria	Haiti	Romania
Antigua	Honduras	Rwanda
Arab Republic of Egypt	India	St Helena
Argentina	Indonesia	St Christopher-Nevis- Anguilla
Bahamas	Iran	St Lucia
Bahrain	Iraq	St Vincent
Bangladesh	Israel	Saudi Arabia
Barbados	Ivory Coast	Senegal
Bermuda	Jamaica	Seychelles
Bolivia	Jordan	Sierra Leone
Botswana	Kenya	Singapore, Republic of
Brazil	Khmer Republic, The	Somali Democratic Republic
British Honduras	Kuwait	Spain
British Solomon Islands Protectorate	Laos	Sri Lanka, Republic of (formerly Ceylon)
British Virgin Islands	Lebanon	Sudan
Brunei	Lesotho	Surinam
Burma	Liberia	Swaziland
Burundi	Libya	Syria
Cameroon	Malagasy Republic	Taiwan
Cayman Islands	Malawi	Tanzania, United Republic of
Central African Republic	Malaysia	Thailand
Chad	Maldives Islands	Trust Territory of New Guinea
Chile	Mali	Territory of Papua
Colombia	Malta	Togo
Congo (Brazzaville)	Mauritania	Tokelau Islands
Cook Islands (including Niue)	Mauritius and Dependencies	Tonga
Costa Rica	Mexico	Trinidad and Tobago
Cuba	Montserrat	Tunisia
Cyprus	Morocco	Turkey
Dahomey	Netherlands Antilles	Turks and Caicos Islands
Dominica	Nepal	Uganda
Dominican Republic	New Hebrides Condominium	Union of Arab Emirates (Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al Qaiwain, Fujairah).
Ecuador	Nicaragua	Upper Volta
El Salvador	Niger	Uruguay
Ethiopia	Nigeria, Federation of	Venezuela
Falkland Islands and Dependencies	Pakistan	Western Samoa
Fiji	Panama	Yemen
Gabon	Paraguay	Yugoslavia
Gambia, The	Peoples' Republic of South Yemen	Zaire, Republic of
Ghana	Peru	Zambia
Gibraltar	Philippines	
Gilbert and Ellice Islands Colony	Pitcairn Island	
Greece	Portuguese Overseas Provinces	
Grenada	Qatar	
Guatemala	Ras Al Khaimah	
Guinea	Republic of Korea	

*General rates.* General rates apply to goods from all countries which do not qualify for preferential rates of duty under a particular tariff classification.

*By-law provisions.* Customs By-laws and Ministerial Determinations are instruments made by the Minister for Customs and Excise under the authority of sections 271 to 273D of the Customs Act by which goods may be admitted free of duty or at rates of duty lower than those normally applicable. By-laws and determinations may only be made under a tariff provision containing the words 'as prescribed by by-law'. Such a provision sets out the by-law duty rates which will apply to goods only when such goods are included in a by-law or determination made under that provision. A prerequisite for by-law admission is that generally, suitably equivalent goods be not reasonably available from Australian production. A by-law covers goods by general description with no limit on quantity and may be used by any importer of the goods. A determination generally covers a

specific quantity of particular goods and may be used only by the importer mentioned in the determination.

*Primage duties.* In addition to the ordinary duties of customs imposed by the Customs Tariff, *ad valorem* primage duties at rates of five per cent or ten per cent are charged on some goods according to the types of goods and origin thereof. Other goods are exempt from primage duty. Goods the produce or manufacture of New Zealand, Norfolk Island, Fiji, Cocos (Keeling) Islands, Christmas Island and Papua New Guinea are exempt from primage duty.

*Anti-dumping duties.* The *Customs Tariff (Dumping and Subsidies) Act* 1961–1965 provides protection for Australian industry against various forms of unfair trading. Under this Act dumping duty may be imposed on goods that are sold to Australian importers at a price which is less than the normal value of the goods, where this causes or threatens not insubstantial injury to an Australian industry. ‘Normal value’ under the Act means:

- (a) fair market value in the country of export;
- (b) price in the country of export to a third country;
- (c) fair market value in a third country; or
- (d) cost of production, plus f.o.b. charges, plus selling costs and profit.

The amount of dumping duty is the difference between the normal value and f.o.b. export price.

Countervailing duty may be levied on goods in respect of which any subsidy, bounty, reduction or remission of freight, or other financial assistance has been, or is being, paid or granted directly or indirectly upon the production, manufacture, carriage or export of those goods. The amount of the countervailing duty in respect of any goods is a sum equal to the amount of the subsidy, bounty, reduction or remission of freight or other financial assistance.

### Import controls—Customs (Import Licensing) Regulations

A comprehensive system of import licensing was introduced in Australia at the beginning of the second World War under the authority of the Customs (Import Licensing) Regulations. Following the gradual relaxation of the restrictions from the end of the War, import licensing was reimposed on 8 March 1952 and continued in force until 18 October 1962. From that date restrictions were removed from all commodities with the exception of some goods retained under control or subsequently brought under control for reasons associated with the protection of Australian industry. The goods subject to import licensing control as at 1 January 1973 are broadly described as used, second-hand or disposal earthmoving and construction equipment and four-wheel drive vehicles. Further information on import controls is given in Year Book No. 51, page 492.

### Export controls and incentives

*Export restrictions.* Section 112 of the Customs Act provides that the Governor-General may, by regulation, prohibit the exportation of goods from Australia and that this power may be exercised by: (a) prohibiting the exportation of goods absolutely; (b) prohibiting the exportation of goods to a specified place; and (c) prohibiting the exportation of goods unless prescribed conditions or restrictions are complied with. Goods subject to this export control are listed in the Customs (Prohibited Exports) Regulations.

*Exchange control—Banking Act* 1959–1967. As an integral part of the framework of exchange control, a control over goods exported from Australia is maintained under the provisions of Part III of the Banking (Foreign Exchange) Regulations, to ensure that the full proceeds of such goods are received into the Australian banking system and that these proceeds are received in the currency and in the manner prescribed by the Reserve Bank of Australia. This action is complementary to that taken under other parts of the Banking (Foreign Exchange) Regulations and under Part IV of the Banking Act to control the movement out of Australia of capital in the form of securities, currency and gold.

Export licences are issued subject to terms and conditions specified in the Banking (Foreign Exchange) Regulations, and may be subject to such further terms and conditions as are determined, or may be free from terms and conditions. On the receipt in Australia by the Reserve Bank, or by a bank acting as agent for that Bank, of advice that the foreign currency has been paid to the Reserve Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank, or an agent of the Bank, pays the licensee, or such other person as is entitled to receive it, an amount in Australian currency equivalent to the foreign currency received. In addition to commercial transactions involving exports, movements of personal effects are also controlled. Persons leaving Australia for overseas are required to obtain licences to cover their bona fide baggage, personal effects and household effects in any individual case where the gold content thereof exceeds \$1,000, or where jewellery and other articles of high intrinsic worth either exceed \$10,000 in value or those goods have not been the personal property of the passenger for at least twelve months.

*Export incentives.* The Commonwealth Government provides financial concessions as incentives to export. A special income tax allowance for export market development expenditure is designed to encourage firms to incur promotion expenditure in advance of export sales and to assist exporters and potential exporters to expand sales in existing markets and to enter new overseas markets. The allowance is in the form of a special deduction additional to the ordinary taxation deduction allowable in respect of specified expenses. Grants based on pay-roll tax are made to employers whose export sales of goods or property rights have increased above their average annual level in a base period. The grant is available in the first place to firms who are producers for export; but a producer for export may pass on grants to another firm who has supplied components embodied in the final product or to an export merchant.

### Trade descriptions

*The Commerce (Trade Descriptions) Act 1905-1966* gives power to require the application of a proper trade description to certain prescribed goods imported into or exported from Australia. Goods which must bear a prescribed trade description upon importation into Australia are specified in the Commerce (Imports) Regulations. As regards exports from Australia, marking requirements are prescribed in regulations issued under the Act and relating to specified export commodities.

## Government authorities

### Tariff Board

The *Tariff Board Act 1921-1972* provides for the appointment of a Tariff Board consisting of eleven members. Of these, two must, and a maximum of five may, be members of the Commonwealth Public Service at the time of their appointment (or first appointments in the case of re-appointments). Members of the Board are appointed for terms of not less than one year and not more than five years. The purpose of the Tariff Board is to advise the Government on matters relating to the protection and encouragement of Australian industry.

The Prime Minister is required to refer to the Board for inquiry and report the following matters: the necessity for new, increased, or reduced duties; the necessity for granting bounties and the effect of existing bounties; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods by charging unnecessarily high prices for his goods or acting in restraint of trade. In addition, the Prime Minister may refer the following matters to the Tariff Board for inquiry and report: the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws on the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and other matters affecting the encouragement of primary and secondary industries in relation to the Tariff. The Minister of State for Customs and Excise may refer to the Tariff Board for inquiry and report the following matters: the classification of goods in the Customs Tariff or Excise Tariff and matters in connection with the interpretation of these Tariffs; the question of the value for duty of goods; whether goods not prescribed in departmental by-laws should be so prescribed; and any matters in respect of which action may be taken under the *Customs Tariff (Dumping and Subsidies) Act 1961-1965*.

Where a matter of the necessity for new or increased duties on any goods has been referred to the Board for inquiry and report, the Board may, in its report, recommend the restriction of the importation of those goods for such period as is specified in the report.

Inquiries conducted by the Board relating to a revision of the Tariff, a proposal for a bounty, a question under the Customs Tariff (Dumping and Subsidies) Act, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods, are held in public, and evidence in such inquiries is taken in public on oath, unless the Board accepts evidence as confidential or in the form of a written statement by a witness on oath. The Board is required to make available to the public the contents of any such written statement except any matter which it accepts as confidential.

### Special Advisory Authority

The Prime Minister may also request a Special Advisory Authority to inquire into cases where urgent action appears necessary to protect an Australian industry against import competition pending receipt and consideration of a full report by the Tariff Board. The Special Advisory Authority's report must be submitted to the Prime Minister within thirty days of the making of the request. Temporary protection recommended by a Special Advisory Authority may be imposed, but may only operate for a period of up to three months after the date of receipt of the final report by the Tariff Board on the goods concerned.

## Trade agreements

### Multilateral—General Agreement on Tariffs and Trade

The General Agreement on Tariffs and Trade (G.A.T.T.), which came into force on 1 January 1948, is a multilateral trade treaty designed to facilitate trading relations between participating countries by reducing tariff and other barriers to the free interchange of goods. The Agreement provides a framework within which negotiations can be held to reduce barriers to trade, and a structure for embodying the results of such negotiations in a legal instrument. Features of the Agreement are the schedules of tariff concessions participating countries have negotiated with each other, the application of most-favoured-nation tariff treatment among the participants, the avoidance of other trade discrimination, and a code of agreed commercial policy rules for international trading. Each participating country retains the right (a) to impose new or increased duties for protective purposes, except in respect of particular products where rates of duty have been bound against increase in negotiations under the Agreement; (b) by negotiation to modify or withdraw concessions formerly agreed; (c) to impose import restrictions to protect the balance of payments; (d) to take emergency action where any industry is endangered by reason of any obligation incurred under the Agreement.

There have been six main tariff negotiations under the provisions of the Agreement, and a number of smaller scale negotiations preceding the accession of individual countries. As a result the tariff rates for a great many items entering into world commerce have been reduced and/or bound against increase. Australia has obtained tariff concessions from individual countries on a number of its principal or potential exports to them, as a result both of direct negotiation by Australia and of negotiation by other countries. In the latter case the benefits occurred through the operation under the Agreement of the most-favoured-nation principle. The latest series of trade negotiations, the Kennedy Round, was based on a plan for linear tariff cuts by industrial countries on all industrial products, with a minimum of exceptions, and on the reduction of non-tariff barriers to trade and the creation of acceptable conditions of access to world markets for agricultural products. It concluded in June 1967 after three years of negotiations. Concessions were negotiated on trade valued at over \$36,000 million. The average reductions in tariffs on industrial goods was roughly one-third, while in agriculture the most important item was the agreement reached on the basis for a new world grains arrangement. Overall results were substantial, but were unevenly spread in that efforts to reduce trade barriers were very much more successful for manufactures than for primary products. In the post-Kennedy Round period, therefore, Australia is placing particular emphasis on the work of the Committee on Agriculture, created in November 1967, to examine the problems in the agricultural sector.

Up to the end of 1972 the contracting parties had held twenty-eight sessions, nearly all in Geneva, to deal with matters arising from the administration of the Agreement. As a general rule the contracting parties meet once a year, although in a few instances they have met twice. In 1960 a Council of Representatives was established to undertake work, both of an urgent and of a routine character, between the regular sessions of the contracting parties. Some of the provisions of the Agreement were revised in 1954 and 1955. The revised Agreement contains tighter provisions on non-tariff barriers to trade, and allows more freedom for countries to revise individual tariff items which had been bound against an increase in tariff negotiations under the Agreement.

Since G.A.T.T. has not been accepted definitively by any country except Haiti, the Agreement is at present being applied provisionally pursuant to a Protocol of Provisional Application. On 1 January 1973, eighty-one countries, whose foreign trade represents well over eighty per cent of the total volume of world trade, were full contracting parties to the Agreement, one had acceded provisionally, and fifteen applied the Agreement on a *de facto* basis.

Increasing attention has been focused in G.A.T.T. on specific trade and development problems of developing countries, and in February 1965 a new Part IV of G.A.T.T., aimed at helping developing countries solve these problems, was introduced on a *de facto* basis. It entered legally into force in June 1966. The new Part IV embodies commitments to individual and joint action by contracting parties, aimed at ensuring that the developing countries can increasingly find the means to raise standards of living and promote rapid economic development through participating in international trade and achieving sustained growth of their export earnings.

As a means of helping to offset the competitive disadvantages faced by the new industries of the developing countries, and of putting these countries in a better position to compete with major industrial countries in the Australian market, Australia formulated in 1965 a system of tariff preferences for developing countries on a range of manufactured and semi-manufactured products, all of which had been nominated by developing countries as being of export interest to them. It was recognised that Australia's initiative might well give a lead to other countries which might wish to use preferences to assist developing countries, and so lead to a compounding of the benefits to the

developing countries. Before the Australian system could be introduced, it was necessary to obtain a waiver from the G.A.T.T. 'no-new-preference' provisions. Such a waiver was granted at the end of March 1966 and the first preferences for developing countries became effective in April 1966. The Australian system has been extended in scope from time to time and is successfully stimulating imports of the products concerned from developing countries. Features of the system are that it is non-reciprocal (in that Australia seeks nothing in return), that it contains safeguards for Australian industries and for the interests of third countries, and that it is subject to international supervision through the G.A.T.T.

### **Bilateral agreements**

*Britain.* The original United Kingdom/Australia Trade Agreement (Ottawa Agreement) came into effect on 20 August 1932. The provisions and history of the Agreement were published in Year Book No. 43, page 329. The latest Agreement, the United Kingdom/Australia Trade Agreement (U.K.A.T.A.) arose from the re-negotiation of the Ottawa Agreement to correct an imbalance in trade which had developed in Britain's favour. It came into effect on 9 November 1956 and superseded the Ottawa Agreement. (See also Year Book No. 51, page 495.)

Briefly, U.K.A.T.A. provided for duty-free access for most products and preferences on a range of Australian products imported into Britain, in return for commitments with regard to the setting of tariff levels and preferential tariff treatment for British goods imported into Australia.

Following British entry into the European Economic Community U.K.A.T.A. was terminated on 31 January 1973.

*Canada.* The existing agreement between Australia and Canada came into force on 30 June 1960, replacing an agreement signed on 3 August 1931. The Agreement provides for Australian goods to receive British Preferential Tariff rates, or better, upon entry into Canada, and for Canada to maintain margins of preference in favour of Australia on a range of commodities. The agreement specifies that Canadian goods, with some exceptions, shall receive the benefit of the British Preferential Tariff upon importation into Australia and that Australia shall maintain margins of preference in favour of Canada on a range of commodities. The agreement continues subject to six months notice.

*New Zealand.* The New Zealand/Australia Free Trade Agreement came into force on 1 January 1966. The agreement provides for free trade in certain scheduled goods. Provision is made for the addition of items to the schedule. The provisions of the 1933 Trade Agreement between Australia and New Zealand continue in force as part of the Free Trade Agreement, except as superseded or modified by it.

*Rhodesia.* A trade agreement was negotiated with the Federation of Rhodesia and Nyasaland in June 1955 and, following the dissolution of the Federation on 31 December 1963, was continued on a provisional basis with each of the three constituent territories Zambia (Northern Rhodesia), Rhodesia (Southern Rhodesia) and Malawi (Nyasaland). Zambia terminated the Trade Agreement with Australia on 30 June 1966 and the Agreement between Malawi and Australia lapsed on 1 January 1967 (although preferences continue to be exchanged in the case of Malawi). Following the unilateral declaration of independence by the Rhodesian Government in November 1965 the trade agreement became inoperative.

*Malaysia.* A trade agreement with the then Federation of Malaya became effective in August 1958. Under the agreement Malaya undertook to protect Australian wheat and flour from dumped or subsidised competition and to extend to Australia any tariff preferences it accords. Australia guaranteed free entry for natural rubber so long as the Papua New Guinea crop was absorbed, and assured the Federation that natural rubber would not be at a disadvantage compared with synthetic rubber in respect of tariff or import licensing treatment. The Agreement continues to apply between Australia and that portion of Malaysia known previously as the Federation of Malaya.

*Japan.* An Agreement on Commerce between the Commonwealth of Australia and Japan was signed on 6 July 1957, and formally ratified on 4 December 1957. It was provided that the Agreement would remain in force until 5 July 1960, and thereafter unless prior notice of termination should be given by either Government. The agreement provides that each country shall extend most-favoured-nation treatment to the other in respect of customs duties and similar charges, and import and export licensing. Japan is not entitled to claim the benefit of preferences accorded by Australia to Commonwealth countries and dependent territories. Japan also gave certain specific commitments on some important Australian export commodities.

Following a review of the agreement, a Protocol of Amendment was signed on 5 August 1963 and formally ratified on 27 May 1964. Under the Protocol Australia agreed to withdraw action against Japan under Article XXXV of the General Agreement on Tariffs and Trade, and thus a full G.A.T.T. relationship was established between the two countries.

The specific undertakings agreed in 1957 lapsed and the following commitments were entered into.

Japan has:

- (a) undertaken not to accord less favourable import treatment (apart from tariff) for raw wool than for raw cotton,
- (b) stated that it has no present intention of imposing a duty on wool,
- (c) undertaken to continue imports of Australian soft wheat at a stabilised level, and to purchase Australian hard wheat\* when necessary requirements are met,
- (d) stated that it will endeavour to expand opportunities for imports into Japan of Australian sugar, canned meat, leather, motor vehicles, butter, and cheese.

Australia has:

- (a) undertaken to consult Japan on temporary protection cases affecting Japanese products (in such consultations Japan will consider whether the need for temporary protection can be obviated by measures taken in Japan),
- (b) stated that equal opportunities of fair and equal competition are accorded to Japanese products in Australian Government purchases overseas.

The new agreement became effective for three years from the date of ratification (27 May 1964) and thereafter subject to three months' notice of termination by either Government.

*Indonesia.* The trade agreement between Indonesia and Australia came into operation on 1 July 1959. This agreement was re-negotiated in 1972. The new agreement signed on 14 November 1972 is a most-favoured-nation agreement, establishing the G.A.T.T. as the principle governing the conduct of bilateral trade, and covers support for A.S.E.A.N., and international commodity agreements, encouragement of Australian investment in Indonesia, protection of the interests of Australian consultants and contractors, and consultation on shipping matters.

*Philippines.* A trade agreement with the Philippines was signed in Manila on 16 June 1965. The agreement provides for an exchange of non-discriminatory treatment† while recognising existing preferences. The agreement operated for one year initially and will continue until one Government gives ninety days' notice of its intention to terminate it. The Philippines is not a member of G.A.T.T.

*Korea.* On 21 September 1965 a trade agreement was signed in Seoul between Australia and South Korea. Basically the agreement provides for an exchange of non-discriminatory treatment with allowances for existing preferences. The agreement ran for one year initially but has provision for automatic extension. Both Governments undertook to use their best endeavours to increase the volume of trade between the two countries.

*Eastern Europe.* Australia has signed trade agreements with seven East European countries: U.S.S.R. (15 October 1965), Poland (20 June 1966), Bulgaria (22 June 1966), Romania (18 May 1967), Hungary (5 December 1967), Yugoslavia (21 July 1970) and Czechoslovakia (16 May 1972).

These agreements provide basically for mutual exchange of most-favoured-nation treatment with provision for consultation on request by either party.

## Trade services

### Trade Commissioner Service

The stimulation of interest abroad in Australia's exports is an important government activity in which the Australian Trade Commissioner Service plays a prominent part. A brief account of the establishment and growth of the Trade Commissioner Service before the 1939-45 War is available in Year Book No. 51, page 496. Since the War the service has increased steadily, and by early 1973 there were 160 Trade Commissioners and Assistant Trade Commissioners in Australia and in 51 posts in 37 countries.

Trade Commissioners are responsible for commercial intelligence in their territories. Particular facilities provided for Australian exporters and export organisations include: surveys of market prospects; advice on selling and advertising methods; arranging introductions with buyers and agents; providing reports on the standing of overseas firms; advice and assistance to business visitors; helping to organise and carry through trade missions, trade displays, newspaper supplements, and other promotion and publicity media; providing information on import duties, import licensing, economic conditions, quarantine and sanitary requirements, and other factors affecting the entry and sale of goods; helping to attract desirable investment.

\* 'Soft' wheat is fair average quality wheat; 'hard' wheat is premium grade wheat similar to that grown in North America. † An agreement, with reservations, not to discriminate against each other with tariff or non-tariff barriers.

In some countries Trade Commissioners also participate in inter-governmental negotiations in the economic and commercial fields. In certain countries where there is no diplomatic or consular mission Trade Commissioners are called upon to act as the Australian representative.

Trade Commissioners and Assistant Trade Commissioners are drawn from either private enterprise or the public service, and applications for entry into the Service are invited periodically by public advertisement. Recruitment is generally at the Assistant Trade Commissioner level and persons selected are promoted to Trade Commissioner as experience and performance warrant. In the majority of posts the Trade Commissioner is supported by an Assistant Trade Commissioner.

The Trade Commissioner Service is administered by the Commonwealth Department of Overseas Trade (as distinct from the diplomatic and consular services administered by the Department of Foreign Affairs), but in countries where there is an Australian diplomatic or consular mission it is the practice for Trade Commissioners to be attached to the mission and to hold an appropriate diplomatic or consular rank (Commercial Counsellor, Commercial Secretary or Commercial Attaché).

The overseas trade representation is shown in the chapter International Relations.

### **Trade Missions**

Since 1954 the Australian Government has sent trade missions abroad as part of the campaign to increase exports. The experience acquired has indicated the need for flexibility in techniques to suit particular products or markets. At present the following types of trade missions are in use.

*Survey missions.* These are organised to obtain precise knowledge about the export trade potential for specific products in an overseas market. Such methods are used to explore export prospects in new or developing areas where commercial intelligence is not readily available or where a complex industry is involved and the industry requires special export knowledge.

*Specialised and general trade missions.* Arrangements are made for specific industries or groups of firms representing a number of industries to participate in a planned selling campaign in overseas markets with known sales potential. The mission visits the market, publicises its products and negotiates sales.

Up to the end of 1972 Australia has sent overseas 77 trade and survey missions and 5 trade ships.

### **Trade displays, fairs, exhibitions and store promotions**

For many years Australia has participated in numerous major trade fairs, exhibitions and displays in Africa, Asia, Europe, the Americas and the Pacific Area.

Initially the emphasis was on participation in general trade fairs directed at the public and the general commercial community. With the development of export promotion techniques and the greater diversity of goods available for export, greater emphasis is now being placed on individual Australian trade displays and participation in specialised trade shows directed almost entirely at the business community. In addition, display rooms in Trade Commissioner offices are currently in use in Singapore, Kuala Lumpur, Manila and Hong Kong.

### **Export of consulting services**

Australian professional consultants have been increasingly successful in obtaining overseas commissions and are contributing significantly to Australia's foreign exchange earnings.

The Australian Professional Consultants Council, consists of members of the Royal Australian Planning Institute, the Institute of Surveyors of Australia, the Royal Australian Institute of Architects, the Association of Consulting Engineers of Australia, the Institute of Quantity Surveyors, the Institute of Agricultural Science, the Snowy Mountains Engineering Corporation and the Australian Mineral Development Laboratories. The Council assists the members of the professions concerned to obtain overseas commissions. The Council also acts as a liaison body for the government in its efforts to promote the export of consulting services.

Most opportunities for Australian professional consultants arise through development projects financed by international aid and lending organisations such as the International Bank for Reconstruction and Development, United Nations Development Programme and the Asian Development Bank.

However, Australian consultants are continuing to have significant successes in securing commissions from the private sector, particularly in South-East Asia.

### Construction contracts overseas

The Australian Overseas Construction Council has been formed by the Master Builders' Federation of Australia and the Australian Federation of Construction Contractors to assist construction contractors to win contracts overseas.

Australian construction contractors have recently entered the South-East Asian market and are also operating more actively in the Pacific Area.

Some of the best opportunities have been found in the civil engineering field in the construction of highways, bridges and dry docks but there are also many contracts being let for the erection of multi-storey office and hotel buildings.

## Export Payments Insurance Corporation

The Export Payments Insurance Corporation was established by the Commonwealth Government in 1956 with the objective of encouraging exports by providing insurance against risks of non-payment of overseas accounts. The Corporation is charged to be self-supporting, i.e. over a period its income should be adequate to cover the expenses of operation and any payments of claims which may be incurred.

The main risks of loss against which the Corporation insures are the 'commercial' risks of the insolvency or protracted default of the buyer and 'political' risks. The latter include exchange transfer difficulties; the imposition of government regulations which prevent the import of the goods into the buyer's country; war, revolution or civil disturbance in the buyer's country. For most 'political' risks insurance cover is available to a maximum of 90 per cent of the amount of loss in the pre-shipment period and a maximum of 95 per cent in the post-shipment period. The rate of cover for 'commercial' risks is fixed at 90 per cent.

The Corporation may submit to the Government, for consideration in the national interest, applications for payment insurance which are commercially unacceptable to the Corporation. In considering such applications the Government takes account of both political and economic factors.

Several important amendments have been made to the Export Payments Insurance Corporation Act, each of which widened the scope of the Corporation's activities. An amendment in November 1964 authorised E.P.I.C. to issue guarantees of payments to commercial lending institutions on money raised for the purpose of financing exports. A further amendment in November 1971 permitted the Corporation to extend its guarantee facility to credit made available by lending institutions direct to the overseas buyer. The facility known as 'buyer credit facility' was intended to cater for the export of capital goods and services on extended repayment terms. It is designed to supplement supplier credits and thus widen the range of facilities available to Australian exporters.

Re-insurance facilities were introduced by E.P.I.C. following an amendment to the Export Payments Insurance Corporation Act in January 1972. The Corporation is now able to enter into re-insurance arrangements with its overseas counterpart institutions or export contracts with a substantial foreign content.

In addition to providing the above facilities, the Corporation insures, on behalf of the Commonwealth Government, eligible Australian investments in overseas countries against the main non-commercial risks associated with investing overseas, e.g. expropriation, exchange transfer difficulties, and war damage. For an investment to be eligible it must confer benefits on both Australia and the investment host country. At 30 December 1972, 101 policies had been written for 32 investments mainly in South-East Asia. The face value of these policies was \$49 million.

Since the first policy was issued in September 1957, Australian exporters have made increasing use of the facilities of E.P.I.C. At 30 December 1972 the Corporation had 1,090 policies current on its commercial account (i.e. not including Government business) with a face value of over \$686 million. The majority of transactions have been on a short or medium term basis using a supplier credit facility (i.e. insured credit being extended to the overseas buyer by the exporter with the financial support of private lending institutions). The Corporation has issued policies covering exports to 154 countries and has insured a wide range of Australian exports.

A Consultative Council, composed of eight leading figures in the fields of banking, commerce and industry, and two Government members advises the Corporation on its activities. The council meets two or three times a year and is appointed for a term of three years.

Further information on the Corporation is contained in Year Book No. 49, page 544. For particulars of its operations see Chapter 17, Private Finance of this Year Book.

## Collection and presentation of statistics

### Basic documents and scope of overseas trade statistics

Overseas trade statistics are compiled by the Commonwealth Bureau of Census and Statistics from copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise as required by the Customs Act. The statistics are not confined to goods which are the subject of a commercial transaction and all goods moving into or out of Australia are recorded, except for those exclusions listed below. Among the items included are exports and imports on government account including some items of defence equipment, and outside packages (that is, the outside package or outside covering of the goods). Outside packages are included as a separate item in the tabulation of imports but in exports the value recorded for each item includes the value of the outside package.

The following are excluded from overseas trade statistics:

- (a) Direct transit trade, i.e. goods being transhipped or moved through Australia for purposes of transport only.
- (b) Bunkers and stores supplied to vessels and aircraft. (However, a separate 'Ships' Stores' collection is made and details are shown on page 311.)
- (c) Those migrants' and passengers' effects for which a customs entry is not received.
- (d) Those parcel post exports and imports of small value for which customs entries are not received.
- (e) Certain materials for intergovernmental defence projects for which customs entries are not required.
- (f) The value of ores and concentrates exported and imported includes the value of the content of other metals (e.g. gold, silver). These unseparated metals are thus excluded from the value of gold, silver etc. exported and imported as such.
- (g) Vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries.
- (h) Vessels and aircraft purchased for use on overseas routes and any subsequent sales made of such vessels and aircraft.
- (i) Fish and other sea products landed abroad directly from the high seas by Australian vessels.

### Areas applying

The area to which all overseas trade statistics issued by this Bureau apply is the whole of the Commonwealth of Australia, comprising the six States, the Northern Territory and the Australian Capital Territory. Non-contiguous territories under Australian administration are treated as outside countries. Trade transactions between Australia and those non-contiguous territories are part of the overseas trade of Australia and are published separately in Australia's overseas trade statistics.

### Period covered by the statistics

Exports and imports are recorded statistically in the month in which the entries are passed by the Department of Customs and Excise. Normally this is within a few days of loading or discharge of cargo. Delays sometimes occur in the lodging of export entries and import entries may be cleared early using the Customs' check-to-arrive system.

### Containerised goods

Containerised goods forwarded interstate for export through a container terminal are statistically recorded as being exported from the port of location of the Customs House at which the entry was lodged and not necessarily from the port of loading in Australia. For example, containerised goods for which entries were lodged at the Customs House, Port Adelaide but forwarded interstate to Port Melbourne for export would be recorded statistically as exports from Port Adelaide, hence from South Australia and not Victoria. The same method of recording applies to imports of containerised goods forwarded interstate following discharge from an overseas vessel.

### Valuation

Commencing with the Bureau publications issued at the close of 1965 values in overseas trade statistics have been expressed in \$A. Prior to this values were expressed in £ (Aust.) except for imports into Australia which, up until 15 November 1947, were recorded in British currency values. Full explanatory notes on the methods of recording import values before and since 15 November 1947 were included in Year Book No. 37, page 396.

All values in overseas trade statistics are determined on a 'free on board (f.o.b.) port of shipment' basis. This means that all charges (in particular the cost of freight and insurance) incurred after the goods have been exported from the port of shipment are excluded. Only transport and service charges incurred, or usually incurred, prior to export are included in the determination of trade values.

The procedure adopted to value exports and imports is as follows:

*Exports.* The recorded value of goods exported includes the cost of outside packages and has been determined, since July 1937, as follows.

- (a) Goods sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent of the actual price at which the goods were sold.
- (b) Goods shipped on consignment are valued at the Australian f.o.b. port of shipment equivalent of the price paid for similar goods of Australian origin in the principal markets of the country to which they are despatched for sale.

An account of the bases of valuation in operation prior to July 1937 is given on page 396 of Year Book No. 37.

*Imports.* The recorded value of goods imported is the amount on which duty is payable or would be payable if the duty were *ad valorem*. Value for duty of any goods shall be the sum of (a) and (b) below, i.e.:

- (a) the higher of—
  - (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction ('special deduction' is defined as any discount or other deduction allowed to the Australian importer which would not ordinarily have been allowed to any and every purchaser at the date of exportation of an equal quantity of identically similar goods); or
  - (ii) the current domestic value of the goods ('current domestic value' is defined as the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country);
- and
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export.

In the case of goods consigned for sale in Australia the 'value for duty' shall be the amount which would be the value for duty if the goods were, at the date of exportation, sold to an Australian importer instead of being consigned for sale in Australia.

*Leasing arrangements.* The recorded value of goods exported, or imported under leasing arrangements is defined as the free on board value, i.e. not the value of the lease receipts or payment. However, for balance of payments purposes, large items of equipment under lease are normally excluded from export and import figures and, therefore, from the balance of trade since no change of ownership has occurred.

### Quantity data

Where quantities are shown they are generally, but not invariably, expressed in terms of the normal unit of quantity used in the appropriate industry. Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example, a statistical item which covers a number of commodities that cannot be recorded under a uniform unit of quantity).

### Statistical concepts of trade

*Trade systems.* There are two generally accepted systems of recording overseas trade statistics defined by the Statistical Office of the United Nations, that is 'special trade' and 'general trade'. The definitions for these are shown in Year Book No. 57 and earlier issues. This terminology is not usually employed in connection with Australian overseas trade statistics and the terms defined below are in customary use.

*Exports of Australian origin* are goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

*Re-exports* are goods, materials or articles originally imported which are exported either in the same condition in which they were imported or after undergoing repair or minor operations which leave them essentially unchanged. 'Minor operations' include blending, packaging, bottling, cleaning, sorting, husking and shelling.

*Total exports* are the aggregate of exports of Australian origin and re-exports.

*Import clearances* are imported goods cleared through Customs direct for domestic consumption plus goods cleared from bonded warehouses for domestic consumption (these are comparable to 'special trade').

*Imports* are the combined total of goods imported direct for domestic consumption and imports into bonded warehouses (these are comparable to 'general trade').

*Merchandise and non-merchandise trade.* Total trade is divided into merchandise and non-merchandise trade in accordance with international standards recommended by the United Nations. Merchandise trade is the equivalent of total exports or imports less certain items specified as non-merchandise. A complete description of the commodities included is contained in the *Australian Export and Import Commodity Classifications* (8.3, 8.6) published by the Bureau of Census and Statistics.

#### **Balance of trade and balance of payments**

The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis. Therefore the excess of the value of exports or imports as shown on the basis of total trade in the table on page 296 does not on these bases represent the balance of trade. Statistics of the balance of trade for balance of payments purposes are derived by making certain adjustments, relating both to scope and valuation, to statistics of merchandise exports and imports. Information on these statistics will be found in the section relating to the balance of payments, page 320.

#### **Country of consignment or origin**

'Country of consignment' referred to in export tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported 'For orders'. 'Country of origin' referred to in import tables means the country of production. Classification of imports according to country of shipment was discontinued after the year 1920-21. A brief account of the dual system of import classification by country operating prior to the year 1921-22 is given on page 500 of Year Book No. 51.

#### **Commodity classifications**

Exports and imports are classified according to the Australian Export and Import Commodity Classifications. These classifications are based on the Standard International Trade Classification, Revised (S.I.T.C.), which is closely related to the Brussels Tariff Nomenclature used in the Australian Customs Tariff.

#### **Pre-federation records**

In the years preceding federation each State recorded its trade independently and in so doing did not distinguish other Australian States from external countries. The aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, but the results obtained are subject to error, since past records of values and the direction of exports and imports were not on uniform lines. Exports and imports for years prior to federation may be found in early issues of the Year Book, particularly Year Book No. 2. On the introduction of the *Customs Act* 1901 the methods of recording values were made uniform throughout the States.

## VALUE OF EXPORTS AND IMPORTS: AUSTRALIA PROPORTIONS BY COUNTRY 1967-68 TO 1971-72

PLATE 27

### Total overseas trade

The following table shows the total trade of Australia with overseas countries from 1901 to 1971-72. The period 1901 to 1970-71 has been divided into five-year periods, and the figures shown represent the annual averages for the periods specified. Figures for the individual years were published in earlier issues, but figures for imports in issues prior to No. 37 were expressed in British currency.

#### OVERSEAS TRADE: AUSTRALIA, 1901 TO 1971-72 (f.o.b.)

Period	Exports	Imports	Excess of exports (+) or imports (-)	Value per head of population	
				Exports	Imports
	\$m	\$m	\$m	\$	\$
Annual average—					
1901 to 1905 . . . . .	102	71	+ 31	26.2	18.2
1906 to 1910 . . . . .	(a)139	94	+ 45	32.6	22.0
1911 to 1915-16 . . . . .	149	133	+ 16	30.8	27.6
1916-17 to 1920-21 . . . . .	230	183	+ 47	43.8	34.8
1921-22 to 1925-26 . . . . .	269	249	+ 20	45.8	42.2
1926-27 to 1930-31 . . . . .	263	239	+ 24	41.0	37.2
1931-32 to 1935-36 . . . . .	242	148	+ 94	36.2	22.2
1936-37 to 1940-41 . . . . .	315	247	+ 68	45.4	35.6

## Exports, by industrial group

The following table provides an analysis of Australian exports for the years 1969-70 to 1971-72. This analysis is designed to show fluctuations in exports of Australian produce dissected according to the main industry of their origin, although any such classification is necessarily somewhat conventional.

EXPORTS OF AUSTRALIAN PRODUCE, BY INDUSTRIAL GROUP  
1969-70 TO 1971-72

Industrial group	Value (\$'000 f.o.b.)			Proportion of value of exports of Australian produce (ex- cluding gold) (per cent)		
	1969-70	1970-71	1971-72	1969-70	1970-71	1971-72
<b>Agriculture, horticulture and viti- culture—</b>						
Unprocessed . . . . .	435,885	597,698	633,001	11.1	14.3	13.5
Processed . . . . .	222,068	274,644	328,799	5.6	6.6	7.0
<b>Total agriculture, etc. . . . .</b>	<b>657,953</b>	<b>872,342</b>	<b>961,800</b>	<b>16.7</b>	<b>20.9</b>	<b>20.5</b>

The items enumerated indicate how arbitrary is the line necessarily drawn between primary produce and manufactures in any classification of this kind. The value of processed primary products exported includes some element of value added by the simpler processes of manufacture, while the value shown for manufactures exported necessarily includes the value of raw materials (primary produce) used in those manufactures.

### Imports of merchandise, by economic class

The following table shows imports of merchandise into Australia during the years 1969-70 to 1971-72 classified according to economic classes of (i) purpose and (ii) degree of manufacture.

#### IMPORTS OF MERCHANDISE, BY ECONOMIC CLASS: AUSTRALIA 1969-70 TO 1971-72

	Value (\$'000 f.o.b.)			Proportion of value of imports of merchandise (per cent)		
	1969-70	1970-71	1971-72	1969-70	1970-71	1971-72
PURPOSE

(a) Owing to insufficient information, it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles, and all such machinery and replacement parts therefor are treated as capital equipment whether imported in an assembled or unassembled condition. (b) Excludes a percentage for piece-goods to be sold at retail, and paper to be used solely for wrapping, which are recorded in Finished consumer goods, All other; and Auxiliary aids to production, respectively. (c) See footnote (a). (d) Includes a percentage for piece-goods to be sold at retail; see footnote (b). (e) Excludes crude petroleum, which is included in Producers' materials, Manufacturing—Other. (f) Includes a percentage for paper to be used solely for wrapping; see footnote (b). (g) The class Fuels and lubricants consists of goods 'simply transformed', and the classes Capital equipment and Munitions and war stores entirely of goods 'more elaborately transformed'. The class Auxiliary aids to production is about equally divided between goods 'simply transformed' and 'elaborately transformed'.

## Direction of Overseas Trade

## Exports and imports, by country of consignment or of origin

The following two tables show the value and percentage of Australian exports and imports during each of the years 1951-52, 1961-62 and 1971-72 according to principal country of consignment or origin. The proportions of Australian exports and imports by country of origin or consignment are shown graphically on plate 27 on page 295.

AUSTRALIAN EXPORTS AND IMPORTS, VALUE BY COUNTRY OF CONSIGNMENT  
OR ORIGIN, 1951-52, 1961-62, 1971-72  
(\$'000 f.o.b.)

Ratio of duties collected to dutiable clearances . . . „	22.3	22.6	22.9	22.9	24.0

### Overseas trade in calendar years

For the purpose of comparison with countries which record overseas trade in calendar years, the following table has been compiled to show estimates of Australian exports and imports for each of the calendar years 1968 to 1972.

#### OVERSEAS TRADE IN CALENDAR YEARS, AUSTRALIA, 1968 TO 1972 (\$'000 f.o.b.)

Year	Merchandise		Non-merchandise		Total	
	Exports	Imports	Exports	Imports	Exports	Imports
1968 . .	3,036,221	3,443,943	112,227	45,143	3,148,448	3,489,086
1969 . .	3,615,710	3,573,713	155,469	52,800	3,771,179	3,626,513
1970 . .	4,129,782	3,999,393	129,616	56,529	4,259,398	4,055,922
1971 . .	4,471,998	4,085,975	126,825	53,149	4,598,823	4,139,124
1972 . .	5,303,919	3,826,249	128,185	50,809	5,432,104	3,877,058

## Excise

Although excise goods have no immediate bearing on overseas trade, the rate of excise duty is in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Customs and Excise, it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of customs and excise revenue are shown in the chapter Public Authorities Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1970-71 and 1971-72.

QUANTITY OF SPIRITS, BEER, TOBACCO, ETC. ON WHICH EXCISE DUTY  
WAS PAID: AUSTRALIA, 1970-71 AND 1971-72

Article	1970-71	1971-72	Article	1970-71	1971-72

(a) Excise duty paid up to 19 August 1970. (b) Includes supplies to Commonwealth Government on which excise was paid. During the years 1970-71 and 1971-72 refunds were made on 62,283,000 gallons and 61,181,000 gallons, respectively. (c) Excise duty collected from 19 August 1970.

## PRIVATE OVERSEAS INVESTMENT

Surveys of overseas investment have been conducted since 1947-48 to obtain particulars of certain types of private capital flows to and from Australia. The surveys, when supplemented by other information, provide statistics of overseas investment in companies in Australia and in Australian public authority securities repayable in Australian currency, as well as statistics of Australian investment in companies overseas and in foreign government securities. Particulars of investment income from most of those classes of investment are also obtained from the surveys.

Certain types of private overseas investment are not included in the statistics which follow. Investment in real estate (except when made through companies) and loans between Australian individuals and non-resident individuals are not covered. Nor are changes in short-term liabilities between exporters and importers in Australia and overseas covered, except in so far as they arise from exports and imports between branches or subsidiaries and their home offices. In this case they are included in the figures of investment in branches or subsidiaries.

In the tables which classify investment in Australia according to country of origin, the investment is shown as an inflow from the country which is the immediate source of the capital. Income payable overseas is classified on a similar basis, i.e. it is classified to the country to which it is directly payable.

Remittances between Australia and overseas by Australian life insurance companies are regarded as capital transactions made to bring assets located in overseas countries into line with commitments in those countries, and are included as a flow of investment between Australia and overseas. Similar considerations apply to overseas life insurance companies with branches in Australia.

The following are explanatory notes relating to some of the terms used in the tables.

*Overseas.* For the purpose of these statistics, Papua New Guinea and the other external territories under the control of Australia are regarded as overseas countries.

*Companies.* In these statistics the term 'companies' relates to both incorporated and unincorporated businesses.

*Australian branches.* Australian branches of companies incorporated overseas whose net liabilities to home office or whose net profit or loss exceeds \$10,000, or which maintain in Australia a branch register of shares, debentures or unsecured notes.

*Australian subsidiaries.* For the purpose of these statistics an Australian subsidiary is a company in which there is ownership of 25 per cent or more of the company's ordinary shares (or voting stock) by one company or a group of associated companies in one overseas country, or ownership of 50 per cent or more of the company's ordinary shares (or voting stock) by individual persons or individual companies in one overseas country.

*Direct investment.* For the purpose of these statistics direct investment is overseas investment made through a branch or subsidiary (as defined above) by the overseas persons or overseas companies which hold the specified proportions of ordinary shares (or voting stock) in the subsidiary.

*Portfolio investment and institutional loans.* This term relates to investment other than direct investment, including loans raised overseas from financial institutions and other companies which have no direct investment in the borrowing company.

*Undistributed profits.* This term refers, in the case of Australian subsidiaries, to the equity of the overseas parent in the net earnings for taxation purposes of the Australian company, less tax (or tax provision) and less dividends declared. In the case of overseas subsidiaries of Australian companies, this term represents the equity of the Australian parent in the book value of the net earnings of the subsidiary after tax, less dividends paid or payable.

*Unremitted profits.* For these statistics this represents the net earnings of branches during the year, after tax, less remittances by the branches to their home offices during the year of net earnings (irrespective of the period to which the earnings relate). 'Net earnings' of Australian branches of overseas companies are, in general, based on the value of their income for taxation purposes.

The annual bulletin *Insurance and Other Private Finance* (5.15) and the *Annual Bulletin of Overseas Investment* (5.20) contain additional figures relating to overseas investment, including a longer range of years covered, and also a more detailed description of the figures.

**Private overseas investment in companies in Australia and investment income payable overseas by companies in Australia.**

The inflow of private overseas investment in Australia since 1967-68 is shown in the next three tables.

### BALANCE OF PAYMENTS

Estimates of a country's balance of payments are prepared for the purpose of providing a systematic record in money terms of the economic transactions which take place over a period between that country and all other countries. Such records are essential to the examination of influences which external factors have on the domestic economy. The Australian economy is subject to fairly large fluctuations in export income, and it is also affected in important respects by variations in the level of foreign investment and the demand for imports. Consequently, these estimates have always assumed particular importance in this country.

Official estimates of Australia's balance of payments covering the period 1928-29 to 1930-31 were included in the Appendix to Year Book No. 24, 1931. Except for the war years (1939 to 1945), estimates have since been published annually. Detailed estimates are currently provided twice yearly in the form of a mimeographed publication *Balance of Payments* (8.1). This publication brings the estimates forward to the end of the most recent financial year or half-year and provides also a description of the various items included. A summarised statement of the principal current account items and capital movements is prepared and issued on a quarterly basis in the *Balance of Payments—Quarterly Summary* (8.2).

In the form of presentation adopted for the Australian balance of payments estimates a basic distinction is made between 'current account' and 'capital account' transactions. Current account transactions may be defined as those involving changes in the ownership of goods or the rendering of services between residents of Australia and the rest of the world and include such items as exports, imports, shipping freights, dividends, profits and interest, travel, and government expenditure. The current account also includes the value of transfers in the form of gifts in cash or kind made or received by residents of Australia, both private and government, to or from the rest of the world. Capital account transactions may be defined as those involving claims to money and titles of investment between residents of Australia and those of another country and include government loan-raising operations overseas, investment by overseas residents in Australian companies, the investment of Australian residents in companies overseas, and changes in the level of Australia's foreign reserves.

By definition, the balance of payments on current account and the balance of payments on capital account during a given period must exactly offset one another. Errors and omissions, however, occur in the estimation of the amounts involved in various items in both the current and capital accounts, and, in addition, there are differences in timing between the statistical recording of trade and invisible transactions and the corresponding foreign exchange transactions. It is therefore necessary to introduce into the estimates a 'balancing item' which allows the identity between the current and capital account balances to be preserved. The 'balancing item' is included in the capital account, but, as mentioned above, it includes discrepancies in the current account and does not, as is frequently supposed, include only errors, omissions and timing differences related to capital transactions.

Details of the estimates are assembled from a variety of sources of which the following are the more important: (i) statistics of exports and imports obtained from Australian trade statistics; (ii) details of the import valuation adjustment obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia; (iii) information on particular invisible current account items and capital movements obtained by regular inquiry from private organisations and government departments; (iv) details of receipts and payments of foreign exchange provided by the banking system; (v) information on profits remitted, undistributed income and private investment in companies provided by statistics of overseas investment collected by this Bureau; (vi) information on freight on imports and other items concerned with overseas transportation obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia and from a survey conducted by this Bureau of overseas shipping and airline operations; and (vii) information supplied by the Reserve Bank of Australia on gold and net foreign assets of official and banking institutions.

### Current account

The balance of payments on current account is arranged to show a series of items for each of which there is a credit and/or a debit entry. In most cases the credit entries represent transactions in goods and services, property income, and transfers, which result in receipts of foreign exchange, while the debit entries represent similar transactions which result in payments of foreign exchange. Some entries which do not entail movements of foreign exchange are also included, the principal examples being those for undistributed income and transactions, mainly in goods, in which the payments due are subsequently capitalised. These amounts are treated as credits or debits in the relevant sections of the current account, and as corresponding outflows or inflows in non-monetary items in the capital account. Transfers in kind provide a further example of transactions which do not require a movement of foreign exchange. The values of transfers received or provided in kind are shown as credits or debits respectively.

The largest items shown in the current account are exports and imports, and the difference between them represents the balance of trade. This is usually the most variable relationship in the balance of payments and is, therefore, a most important one. *For balance of payments purposes, certain adjustments are made to the recorded trade statistics.* Briefly, these adjustments are made to exclude those transactions for which there is no change of ownership between residents and non-residents of Australia and to include certain transactions for which there has been a change of ownership but for which customs entries are not required. In addition, a valuation adjustment is made to the recorded import statistics in order to remove the overstatement which results from the basis of valuation for customs duty. A full description of the adjustments was provided in the Appendix to the publication *Balance of Payments, 1968-69*. A full evaluation of the overall position on current account, however, occurs only after the invisible items have been taken into account. In value terms the most important of these are the transportation items. Entries appear on both the debit and credit sides, the principal component on the debit side being freight payable overseas on imports into Australia. The principal component on the credit side is expenditure by overseas carriers, which represents mainly overseas ships' expenditure for stevedoring, port charges, etc. incurred in loading and discharging goods at Australian ports, and stores purchased in Australia. The items next in importance are those

concerning income from property. Debit entries under this heading include dividends, profits, interest and royalties payable overseas, while the credit entries include similar details of amounts receivable by Australian residents. These items include undistributed income in respect of which, as mentioned above, no monetary movements occur. The remaining items are smaller than those mentioned above, and include travel, government transactions, transfers (including foreign aid made available by the Australian Government), and, on the credit side, the net value of Australian gold production.

### Capital account

In the capital account, transactions are recorded on a net basis; that is, according to the net effect of all debit and credit entries relating to each item. Thus entries on the credit side represent a net increase in non-residents' assets in Australia or a net decrease in Australian assets overseas, while debit entries represent a net decrease in non-residents' assets in Australia or a net increase in Australian assets overseas.

Capital account transactions are grouped according to the sector of the Australian party to the transactions. The government sector, therefore, includes all capital transactions of central, State, local and semi-government authorities with the exception of transactions of monetary institutions (which are included in the monetary sector), while the private sector covers transactions of all resident individuals and private institutions (again excepting monetary institutions). The monetary sector covers all banking institutions, including government-owned banks. Transactions of the monetary sector are further sub-divided into those of official and 'other' monetary institutions. Transactions of official institutions include changes in Australia's official reserve assets (consisting of gold, foreign exchange, the I.M.F. gold tranche and special drawing rights in the I.M.F.) and transactions between the Reserve Bank of Australia and foreign central monetary authorities and the I.M.F. Also included is an item, *18.4 Allocation of Special Drawing Rights*. This is the counterpart to the change in official reserve assets due to the allocation to Australia of S.D.R.s by the I.M.F. Such an entry is necessary in this case because without it there would be no corresponding credit to the increase in assets (debit) and the allocation would be reflected in an offsetting movement in the balancing item. 'Other' monetary institutions includes all other transactions of Australian monetary institutions.

In the government sector the most important items include transactions by non-residents in government securities domiciled overseas and in Australia and transactions involving changes in Australia's assets with and liabilities to international development institutions such as the International Bank for Reconstruction and Development and the Asian Development Bank. Other government transactions are largely a reflection of the net effect on the balance of payments of leads and lags between payments made overseas for items of equipment for the defence services or government airlines and the delivery of the equipment. In periods where payments exceed the value of deliveries a net debit results; in periods where the value of deliveries exceeds payments a net credit is recorded.

In the private sector the most important items are overseas investment in Australian companies, Australian investment overseas, and the transactions of marketing authorities. The figures for marketing authorities represent changes in the estimated value of commodity stocks held overseas by, or in amounts owed by overseas debtors to, the principal Australian marketing authorities.

In the monetary sector the most important item is that which shows the net change in Australia's official reserve assets.

The balancing item includes errors and omissions and timing differences, referred to on page 321.

### Tables—Balance of payments

The following tables show, for the three years 1969–70 to 1971–72, particulars of:

- (i) the balance of payments; and
- (ii) the balance of payments by regions

(a) The series shown for years prior to 1966-67 are not strictly comparable to the series shown from 1966-67 onwards (see the bulletin referred to in the headnote to these two tables). (b) These percentages may be used in analysing the contribution of each group to movements in the total index.

## CHAPTER 12

### TRANSPORT, COMMUNICATION AND TRAVEL

The statistics in this chapter relate in the main to the year 1971-72, with comparisons restricted to a few recent years. More detailed figures and particulars for earlier years are included in the annual bulletins, *Transport and Communication* (14.11), *Public Authority Finance—Commonwealth Authorities* (5.12), and *Public Authority Finance* (5.33), and in the annual mimeographed statement *Motor Vehicle Registrations* (14.1). Current information on subjects dealt with in this chapter appears in the *Quarterly Summary of Australian Statistics* (1.3), the *Monthly Review of Business Statistics* (1.4), the *Digest of Current Economic Statistics* (1.5), *Overseas Shipping Cargo* (monthly) (14.10), *Motor Vehicle Registrations* (quarterly) (14.2), two preliminary monthly statements *Registrations of New Motor Vehicles* (14.6) (14.8), two quarterly bulletins *Road Traffic Accidents involving Casualties* (14.9) (14.14), *Road Accident Fatalities* (monthly) (14.13), and *Overseas Arrivals and Departures* (monthly and quarterly) (4.3) (4.1). Greater detail on the latter subject is contained in the annual bulletin *Demography* (4.9).

Information additional to that contained in Bureau publications is available in the annual reports and other statements of the Department of Transport, the various harbour boards and trusts, the several Government railway authorities, the Department of Civil Aviation, the Postmaster-General's Department, the Overseas Telecommunications Commission, the Australian Broadcasting Control Board, and the Australian Broadcasting Commission.

### THE AUSTRALIAN TRANSPORT ADVISORY COUNCIL

In April 1946, the State and Federal Governments agreed to establish a co-ordinating and advisory committee at Ministerial level to review annually the various laws and regulations deemed necessary to safeguard the interests of the State Governments and road users generally and to consider matters of transport policy.

The Australian Transport Advisory Council (A.T.A.C.) thus established is comprised of the Australian Minister for Transport as Chairman, the Minister for the Australian Capital Territory and Minister for the Northern Territory and each State Minister for Transport.

The Council primarily considers policy matters relating to transport operations, co-ordination and development. Its functions are: to initiate discussion and report to the respective Governments as necessary on any matter raised by the Council, or any State or Commonwealth Government Authority; generally to exercise its purely advisory functions, and to report as necessary to the respective Governments concerned on any matter which will tend to promote a better co-ordination of transport development, while at the same time encouraging modernisation and innovation to meet changing needs; and to assist in maintaining continuous and comprehensive research in relation to transport development in Australia and abroad; such research to be carried out for the benefit of Australian Transport authorities and agencies.

The regulation of and the executive responsibility for transport is shared between the Commonwealth and State Governments. A.T.A.C. is the meeting ground of Commonwealth and States at a Ministerial level and provides an effective means for inviting discussion and reaching uniformity of approach towards transport administrative procedures and policy. It also provides a means for reviewing and discussing national solutions of transport problems and the rectification of transport deficiencies generally. The Council has been active in: the establishment of special committees and conferences to examine and report on specific problems such as road safety, motor vehicle standards and safety features, motor vehicle emissions, transport economic research, highway planning, level crossing accidents, blood tests for road users, driver improvement, pedestrian behaviour, etc.; the exchange of views and formulation of common policies on a wide range of transport matters; effecting at ministerial level Commonwealth-State and interstate co-operation on such matters as construction and operation of interstate railway links, collection of fines and fees interstate, policing of regulations, etc.; and the publication of comprehensive surveys of Australian transport.

Typical of matters A.T.A.C. has examined from time to time are the following: the effect of standardisation of railway gauges on other modes of transport; advanced national policies of road development and research; transport in relation to interstate tourist traffic; standardisation of traffic signs and road signs; standard and improved statistical data relating to transport of passengers and goods; uniform road traffic laws and standards for motor vehicle design and equipment; pipelines as a transport medium; and containerisation and the need for uniform legislation, particularly in relation to maximum weights of road vehicles.

#### Advisory Committees established by the Australian Transport Advisory Council

Some of the Council's most useful work has been accomplished through the agency of committees established by the Council from time to time. Some advisory committees are of a semi-permanent nature. They were established to initiate discussion and action on transport problems referred by member Ministers and other authorities and to undertake specialised work. These committees meet at regular intervals and report to A.T.A.C. through the Council's *Standing Committee of Advisers*, which comprises heads of Ministerial Departments or their deputies, under the chairmanship of the Secretary, Department of Transport.

The administration of the Council and its committees is the responsibility of the Department of Transport.

The general practice is that the Council convenes twice a year, and more frequently if the need arises. The meetings move successively from one State or Territory to another, and are usually held in one of the chambers of the State or Commonwealth Parliaments or the Northern Territory Legislative Council. Ministers are usually accompanied by officials and advisers.

Details of the advisory committees at present established, including their composition and function, are set out hereunder.

*The Advisory Committee on Safety in Vehicle Design* comprises an ergonomics expert, a medical practitioner, a traffic expert, a research engineer, a mechanical design engineer, a body design engineer, a production engineer, an officer from the Vehicle Structures Safety Branch of the Department of Transport, and a nominee of the Standing Committee of Advisers. The Chairman is an officer of the Department of Transport.

The Committee's function is to advise on safety standards in respect of motor vehicles. Recommendations to A.T.A.C. are submitted in the form of Australian design rules for motor vehicle safety, which set out detailed technical specifications of each safety feature, and include appropriate dates of implementations for various classes of vehicles.

Design rules endorsed by the Council up to February 1973 cover the following items:

Reversing signal lamps	Glare reduction in field of view
Door latches and hinges	Rear vision mirrors
Seat anchorages for motor vehicles	Demisting of windscreens
Seat belts	Windscreen wipers and washers
Seat belt anchorage points	Location and visibility of instruments
Direction turn signal lamps	Safety rims
Hydraulic brake hoses	Instrument panels
Safety glass	Head restraints
Standard controls for automatic transmissions	Anti-theft locks
Steering columns	Vehicle engine emission control
Internal sun visors	New pneumatic passenger car tyres
Fuel systems for goods vehicles	Tyre selection
	Motor vehicle noise

A publication *Australian Design Rules for Motor Vehicle Safety*, incorporating design rules endorsed by the Council, is issued by the Department of Transport. Amendments and additions are also issued by that Department.

*The Advisory Committee on Vehicle Performance* comprises a freight operator, a passenger operator, a motor vehicle design engineer, a private road user, an official of the Transport Worker's Union of Australia, a bus expert, nominees of the National Association of Australian State Road Authorities and the Society of Automotive Engineers (Australia), and an official from each State and Territory, nominated by the respective member Ministers of A.T.A.C. The Chairman is an officer of the Department of Transport.

The function of the Committee is to advise on the on-road standards and equipment of vehicles and their loads. Many of its recommendations to A.T.A.C. are in the form of draft regulations which detail minimum standards for most aspects of vehicle construction and operation, and are recommended for adoption in the legislation of the States and Territories.

A publication *Draft Regulations Defining Vehicle Construction, Equipment and Performance Standards for Road Vehicles*, incorporating provisions endorsed by the Council, is issued by the Department of Transport, which also provides an amendment service.

The *Advisory Committee on Road User Performance and Traffic Codes* comprises a transport operator, a private road user, a lawyer, a medical practitioner, a nominee of vehicle manufacturers, an official of the Transport Worker's Union of Australia, and an official from each State and Territory, nominated by the respective member Ministers of A.T.A.C. The Chairman is an officer of the Department of Transport.

The Committee's function is to review and advise on the ways of achieving improvement in road user performance and to advise on the uniform National Road Traffic Code. Many of the Committee's recommendations to A.T.A.C. are in the form of model traffic laws, which are recommended for adoption in the legislation of the States and Territories.

A document *The National Road Traffic Code*, incorporating model regulations endorsed by the Council, is published by the Department of Transport, which also provides an amendment service.

In addition to traffic laws proper, the Committee has dealt with allied subjects such as driver licensing, medical fitness standards, the uniform number plates scheme, the scheme for visiting motorists, United Nations Conventions on road traffic and uniform accident reporting.

The *Advisory Committee on the Transport of Dangerous Goods* comprises seven Commonwealth and eight State officials, as well as one nominee of the Australian Road Transport Federation, the Australian Chemical Industry Council, the petroleum industry and the Standards Association of Australia. The Chairman is an officer of the Department of Transport.

The function of the Committee is to advise on a uniform code relating to the transport of dangerous goods, and it has prepared a model code relating to the classification, labelling and transport of dangerous goods within Australia.

The *Committee on Motor Vehicle Emissions* comprises of nominees from the automobile and petroleum industries and appropriate Commonwealth and State departments. The Chairman is an officer of the Department of Transport. The function of the Committee is to advise on all aspects of the control of motor vehicle emissions including imposition of controls and their levels, technical developments, and liaison with industries and environmental authorities on these matters.

The *Publicity Advisory Committee on Education in Road Safety* comprises the Secretary/Managers of State and Territory Road Safety Councils. The Chairman is an officer of the Department of Transport.

The Committee's function is to advise on publicity and education in road safety. The Committee co-ordinates and makes recommendations on publicity and education campaigns throughout the States and Territories.

*Ad hoc advisory committees.* Advisory committees of an ad hoc nature are created as the need arises. Examples are: the Air Cushion Vehicle Committee and the Study Team on Transport Costs.

## SHIPPING

### Control of shipping

#### Commonwealth navigation and shipping legislation

For an outline of the development and scope of Commonwealth legislation, see Year Book No. 55, pages 366-7.

*Commonwealth Acts connected with shipping are:* the *Navigation Act 1912-1972*, the *Sea Carriage of Goods Act 1924*, the *Seamen's Compensation Act 1911-1972*, the *Seamen's War Pensions and Allowances Act 1940-1972*, the *Pollution of the Sea by Oil Act 1960-1972*, the *Pollution of the Sea by Oil (Shipping Levy) Act 1972*; the *Pollution of the Sea by Oil (Shipping Levy Collection) Act 1972*; the *Australian Coastal Shipping Commission Act 1956-1969*, the *Australian Coastal Shipping Agreement Act 1956*, the *Stevedoring Industry Act 1956-1971*, the *Beaches, Fishing Grounds and Sea Routes Protection Act 1932-1966*, the *Submarine Cables and Pipelines Protection Act 1963-1966*, the *Lighthouses Act 1911-1971* and the *Explosives Act 1961-1966*.

### Australian Coastal Shipping Commission

The Commission was established in 1956 for the purpose of maintaining and operating inter-state, overseas and territorial shipping services. It operates as The Australian National Line, a Commonwealth-owned merchant shipping service which at 31 December 1972 comprised twenty-eight ships. The total included one large bulk carrier on charter from a foreign owner.

The fleet included four vessels in overseas trading; the 14,082 ton (deadweight) vehicle deck/container ship, *Australian Enterprise*; the 26,420 tons (deadweight) cellular/container ship *Australian Endeavour*; the 26,097 tons (deadweight) cellular/container ship *Australian Exporter*; the 20,276 tons (deadweight) roll-on/roll-off ship *Allunga*; two vehicle deck passenger ships *Empress of Australia* 8,196 tons (gross) and *Australian Trader* 7,005 tons (gross); four vehicle deck cargo ships totalling 14,919 tons (deadweight); one container/ore carrier of 11,900 tons (deadweight) in the Darwin trade; three bulk carriers in the 50,000 tons (deadweight) class; thirteen other bulk carriers totalling 130,358 tons (deadweight); one 3,210 tons (deadweight) cellular/container ship.

During 1972, one of two vehicle deck steel carriers of 7,500 tons (deadweight) each ordered from an Australian shipyard was launched as the *Lysaght Enterprise*. The second is scheduled for launching in 1973.

To service the Australian National Line's vehicle deck ships and container/ore carriers, terminals have been established at fifteen ports: Adelaide in South Australia; Melbourne and Geelong in Victoria; Burnie, Devonport, Bell Bay and Hobart in Tasmania; Sydney and Port Kembla in New South Wales; Brisbane, Rockhampton (Port Alma), Mackay, Townsville and Cairns in Queensland; and Darwin in the Northern Territory.

In the year ended 30 June 1972 the vehicular passenger ships *Empress of Australia*, *Australian Trader* and *Princess of Tasmania* (which was sold late in 1972) carried a total of 128,919 passengers and 46,419 passenger and trade vehicles between the mainland and Tasmania. Over the same period over 7.8 million tons of cargo were carried by Australian National Line vessels.

### Australian Shipbuilding Board

Established in March 1941 as a wartime measure under the National Security (Shipbuilding) Regulations and constituted in 1948 under the *Supply and Development Act* 1939-1948, the Board consists of a Chairman, and four Members, one of whom is also a Member of the Naval Board. Members are appointed by the Minister for Transport.

The functions of the Board are to advise the Minister on matters concerning the shipbuilding industry including the consideration of tenders for ships to be built in Australia, the prices at which vessels may be purchased and sold on behalf of the Commonwealth, the levels of subsidy suitable for each project and the state and prospects of the industry generally.

To 31 December 1972 the Board had arranged for the construction of 233 vessels valued at approximately \$695 million. These vessels included specialised craft such as an oil drilling rig, dredgers of various types, off-shore drilling service vessels, floating cranes, as well as bulk carriers, oil tankers, container ships and roll-on/roll-off vessels.

Sixty of the vessels, ranging from Customs launches to survey and research vessels, landing craft and large lighthouse supply vessels, were built for the Commonwealth Government. The remaining 173 were built with Government subsidy for commercial shipowners.

There are five major Australian shipyards building merchant vessels—two in Queensland, two in South Australia, and one in New South Wales; and two shipyards engaged principally in naval shipbuilding—one in New South Wales and one in Victoria. There are also numerous small yards, situated in every State, building smaller steel, wooden, aluminium and fibre-glass working and pleasure craft.

*Shipbuilding subsidy.* The Australian shipbuilding industry has been subsidised since 1947. The Government on 31 May 1972 announced that all vessels over 200 tons gross ordered from any Australian shipyard after 1 June 1972 would attract subsidy at the rate of 25 per cent for vessels 200-1,000 tons gross, the rate increasing by 2½ per cent for each additional 1,000 tons gross to a maximum of 45 per cent, reducing to 35 per cent in 1976 and, subject to a further Tariff Board review in 1978, to 25 per cent in 1980. Previously, subsidy was applied only to vessels over 200 tons gross constructed at one of the six major ('recognised') yards and, to equate the price to the owner to the cost of building a similar vessel in the United Kingdom, to a maximum 33½ per cent of the construction cost. As in the past, all ships are prohibited imports, unless specific approval is granted by the Minister for Transport, except for certain classes where a 'general consent' applies.

### Australian Stevedoring Industry Authority

In March 1947 legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June 1949 legislation was enacted to abolish the Stevedoring Industry Commission, on which employers and employees were represented, and establish in its place a Stevedoring Industry Board of three members, to attend to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities. The industrial functions which previously came within the province of the Commission were assigned to a single Judge of the Commonwealth Court of Conciliation and Arbitration. In August 1956, following a Committee of Inquiry into the stevedoring industry, the Stevedoring Industry Board was replaced by the Australian Stevedoring Industry Authority of three members, including a representative of the management side of industry and a representative of the trade union movement. At the same time the judicial and non-judicial functions formerly exercised by the Commonwealth Court of Conciliation and Arbitration were divided between the Commonwealth Industrial Court and the Commonwealth Conciliation and Arbitration Commission respectively. Awards of the Conciliation and Arbitration Commission subsequently placed payment of sick pay, public holiday pay and annual leave under the administration of the Authority. Under amending legislation, which operated from 6 June 1961, the Authority became responsible for payment of long service leave to registered waterside workers, and its disciplinary powers were strengthened to reduce the time lost through unauthorised stoppages. Further amending legislation which operated from 8 October 1965 made the Authority responsible for the recruitment of waterside workers. In July 1970, by legislative amendment, the management and union positions on the Authority were abolished. The functions of the Authority are now exercised by one full-time Director.

In October 1965 the Government invited the Australian Council of Trade Unions, the Waterside Workers' Federation of Australia, the Association of Employers of Waterside Labour, the Australian Stevedoring Industry Authority and the Department of Labour and National Service to confer under the Chairmanship of Mr A. E. Woodward, Q.C., with the overall objective of improving the long-term conditions in the stevedoring industry. Following a series of meetings, the Conference, known as the National Stevedoring Industry Conference, published a General Report in April 1967 recording agreement between the parties on a number of matters. These included *inter alia* weekly hire for all registered waterside workers in major ports, together with a pension scheme and provision for reducing the statutory retirement age progressively from seventy to sixty-five years of age. Special arrangements have been agreed to cover any prospective redundancy problems. After the Report had been adopted by all the parties, including the Government, enabling legislation in the form of the *Stevedoring Industry (Temporary Provisions) Act 1967* was introduced to allow the changes to be implemented. Permanent employment was commenced in Sydney on 27 November 1967. In Melbourne, Port Kembla, Adelaide, Fremantle and Brisbane permanent arrangements were introduced on the following respective dates in 1968—8 January, 19 February, 4 March, 18 March and 12 August. Newcastle was brought into the scheme on 10 March 1969 and Whyalla on 6 July 1970. The operation of the *Stevedoring Industry (Temporary Provisions) Act* has been twice extended (in 1970 and 1972) and is currently due to expire on 1 July 1973.

In July 1970 the National Stevedoring Industry Conference was given statutory backing and re-designated the Stevedoring Industry Council. The Council is constituted along the same lines as the National Stevedoring Industry Conference. Its functions are primarily to advise the Minister for Labour on the operation of the existing employment arrangements, the development of new employment schemes and such other matters as the Minister refers to it. It is also required to endeavour to bring about amicable agreement in relation to industrial questions in the industry.

The statutory provisions relating to the industry are now contained in the *Stevedoring Industry (Temporary Provisions) Act 1967–1972* (and Regulations made thereunder), the *Stevedoring Industry Act 1956–1971*, Division 4 of Part III of the *Conciliation and Arbitration Act 1904–1972*, and the *Stevedoring Industry Act 1965*.

### Restrictive Trade Practices Act 1971-1972 (Part XII—Overseas Cargo Shipping)

The Overseas Cargo Shipping provisions of the Restrictive Trade Practices Act are administered by the Minister for Transport.

The legislation is an extension of similar provisions previously enacted under the *Trade Practices Act 1965–1969* (now repealed) and the *Restrictive Trade Practices Act 1971* (as amended).

The object of the Overseas Cargo Shipping provisions is the control of the operations of shipping conferences (associations into which shipowners have traditionally combined) and of individual shipowners in relation to the carriage of goods by sea from Australia to other countries. To achieve

that object the provisions are designed to facilitate negotiations between shipowners and 'The Australian Shippers' Council', an association, designated under the Act by the Minister, that represents the interests of shippers and producers of goods exported from Australia. The Council has taken over the separate roles of the 'shipper bodies' that were set up under previous legislation (one particular body for each of five trades) and is able to represent all shippers and producers in all outward trades.

Regarding shipping conferences, the provisions require certain agreements of a specified character between shipowners operating in the outward trades from Australia to be filed with the Clerk of Shipping Agreements. A shipowner who is a party to such an agreement may be requested, by the Minister, to give to the Minister an undertaking to negotiate with the Council with regard to the arrangements for, and the terms and conditions that are applicable to, cargo shipping to which the agreement relates. Whether such a shipowner has failed so to negotiate or whether the services provided pursuant to the agreement are adequate, efficient or economical, are matters that may be referred by the Minister for enquiry and report by the Trade Practices Tribunal. Certain powers are vested in the Governor-General to disapprove the agreement after consideration of a report by the Tribunal to the Minister. A probable effect of such a disapproval would be to force a shipowner party to the agreement to carry on its business in the absence of any agreement with other shipowners. The Governor-General may, however, in his discretion approve such a shipowner entering into another agreement.

Provisions, similar to the provisions in respect of shipping conferences, apply in respect of individual shipowners. In addition, an individual shipowner may, as a result of a declaration by the Governor-General, be prohibited from engaging in certain specified activities in carrying on its business, for example engaging in freight cutting with the object of substantially damaging the business of another shipowner.

The provisions also secure reasonable rights for Australian flag operators in respect of the operation of their vessels in trades from Australia.

## Collection and presentation of statistics

### Basic documents

From 1 July 1966 shipping statistics have been compiled by the Commonwealth Bureau of Census and Statistics from returns submitted by shipping companies or their representatives to Customs Houses at the various seaports throughout Australia. A return is required for the departure of a vessel from a port as well as for its arrival at that port and shows the following details:

- name of the port at which the return is submitted;
- name of vessel;
- type of shipping service (liner, tramp, bulkship, tanker);
- port registered;
- registered net tonnage;
- last port of call (arrival) or next port of call (departure);
- with cargo or in ballast;
- date of arrival or date of departure;
- ports of loading of cargo (arrival) or ports of discharge of cargo (departure);
- quantity of cargo for each port of loading or discharge.

Prior to 1 July 1966, returns were completed by officers of the Department of Customs and Excise at each port, the major differences then being that the system did not, in the main, rely on information supplied direct by shipping companies or their representatives, and the detail on returns did not include information on type of shipping service or ports of loading and discharge of cargo.

### Scope of the statistics

Arrivals and departures of vessels are treated separately in shipping statistics. Not all vessels are included in the statistics as returns are not required for (i) naval vessels; (ii) yachts and other craft used for pleasure; (iii) foreign fishing vessels that neither load nor discharge cargo; (iv) Australian registered fishing vessels operating from Australian ports; (v) geographical survey vessels, seismic survey vessels, oceanographic survey vessels; (vi) offshore oil drilling rigs and vessels servicing them; (vii) vessels of 200 registered net tons and under.

**Period covered by the statistics**

Monthly shipping statistics relate to vessels arriving at and departing from each port in a calendar month. Annual statistics are published on a financial year basis.

**Statistics of vessels**

Statistics of vessels are compiled in terms of registered net tonnages. Net tonnage is expressed in units of 100 cubic feet (i.e. 100 cu ft equals 1 ton) and represents the volume of enclosed space which can be utilised for cargo or passengers.

**Statistics of vessel movements**

Returns show the last or next port of call of a vessel according to whether an arrival or departure at a port is being reported. Each vessel is classified to either the overseas or the coastal fleets serving Australia. This information, supplemented by the voyage of the vessel indicated by ports it visits to load or discharge cargo, is the basis on which each vessel movement is allocated to one of the following classifications: overseas direct; overseas via other States; interstate direct; interstate via ports in the same State; intrastate.

**Cargo loaded or discharged**

Returns for arrivals show cargo discharged, and for departures cargo loaded, in terms of units of weight or in terms of units of measurement, depending on the basis on which freight is charged. A ton measurement is a unit of 40 cubic feet. Cargo statistics show separate figures for cargo recorded in tons weight and cargo recorded in tons measurement.

**Type of service**

Overseas shipping cargo statistics are classified by type of service. Coastal shipping cargo statistics, on the other hand, combine all service types.

For overseas shipping, cargo shipped in liners is shown separately from cargo shipped in tramps, bulkships and tankers. A liner is a vessel which, on the voyage on which cargo is loaded or discharged at an Australian port, is operated by a common carrier in providing services on a specified route on a relatively regular basis.

Statistics of cargo shipped in liner services do not necessarily provide a measure of cargo carried by ships operating under shipping conference arrangements. For example, liner services may be provided by shipping companies which are not parties to conference agreements. Cargo may also be shipped under shipping conference conditions in vessels operating on a voyage charter basis for specific cargo, and, in the statistics, such cargo is classified as cargo shipped in tramp vessels.

**Country of loading or discharge of overseas cargo**

In statistics of overseas shipping cargo, country of loading or discharge of cargo is the country of location of the port where the cargo was loaded on to, or is to be discharged from, a reporting vessel. The countries shown are not necessarily the countries of origin or ultimate destination of cargo because previous or subsequent transshipments of cargo are not taken into account. The statistics of cargo classified by the country in which it was loaded or discharged cannot therefore be compared directly with statistics of overseas trade classified by country of origin or consignment.

**Transshipments of cargo within Australia**

The State of loading or discharge shown in the statistics is the State in which cargo is loaded onto, or discharged from, reporting vessels. Cargo loaded in a given State can therefore include cargo previously shipped interstate, while cargo discharged can include cargo which would subsequently be shipped interstate.

## Overseas shipping

## Total movement

The following table shows the number of entrances and clearances (combined) of vessels from and to overseas countries, and the aggregate net tonnage, during each of the years 1967-68 to 1971-72.

**OVERSEAS SHIPPING: ENTRANCE AND CLEARANCES (COMBINED) OF  
VESSELS DIRECT, AUSTRALIA 1967-68 TO 1971-72(a)**

	1967-68	1968-69	1969-70	1970-71	1971-72
Number of vessels . . . . .	7,985	8,750	10,022	11,054	10,886
Net tonnage . . . '000 tons	60,387	72,578	89,058	102,219	106,636

(a) Excludes vessels of 200 net tons and under.

Particulars of the total overseas movement of shipping for each year from 1822 to 1920-21 were published in Year Book No. 15, page 507, those for each year from 1921-22 to 1950-51 in Year Book No. 40, page 97, while those for each year from 1944-45 are shown in the Statistical Summary of this Year Book.

## Total overseas shipping

The following table shows, for each State and the Northern Territory, the number of entrances and clearances of vessels direct from and to overseas countries, and the aggregate net tonnage, during the year 1971-72.

**OVERSEAS SHIPPING: ENTRANCES AND CLEARANCES OF VESSELS DIRECT, STATES  
AND NORTHERN TERRITORY, 1971-72(a)**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.
Entrances . . . number	1,420	532	1,114	289	1,754	117	213	5,439

Italy . . . . .	663	694	639	In cargo . . . . .	20,043	17,571	17,655
Japan . . . . .	9,640	11,868	14,780	Proportion of total % . . . . .	45.0	34.6	33.2
Liberia . . . . .	8,570	10,543	9,501	In ballast . . . . .	24,452	33,249	35,489
Netherlands . . . . .	1,280	1,078	1,086	Proportion of total % . . . . .	55.0	65.4	66.8
New Zealand . . . . .	330	337	325				
Norway . . . . .	4,277	4,617	4,582	Grand total . . . . .	44,495	50,820	53,144

(a) Excludes vessels of 200 net tons and under.

Australian registered tonnage which entered Australian ports from overseas during the year 1971-72 represented 0.99 per cent of the total tonnage entered.

## Interstate shipping

### Interstate movement

*Interstate direct.* The following table shows the number of entrances and the net tonnage of coastal vessels recorded into each State and the Northern Territory from any other State during 1971-72. The statistics below are not comparable with those for years prior to 1969-70 because the method of applying the classifications 'overseas' and 'interstate' has been changed. Before July 1969 movements of overseas vessels carrying cargo between two Australian States were classified as 'interstate direct' and were, therefore, included in these statistics. Since July 1969 overseas vessels carrying cargo between two Australian States have been classified as 'overseas via States' and are, therefore, excluded from these statistics. The difference in treatment arose from the practice of classifying movements between two Australian States on the basis of port of loading and port of discharge, whereas the current method classifies these movements on the basis of whether the vessel is considered to be an overseas or a coastal one. Total interstate movements by coastal and overseas vessels are shown in *Total interstate movements* below.

#### INTERSTATE MOVEMENT: ENTRANCES OF COASTAL VESSELS INTERSTATE DIRECT STATES AND NORTHERN TERRITORY, 1971-72(a)

		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.
Number of vessels	.	1,249	1,516	397	610	258	1,370	91	5,491
Net tonnage	'000 tons	7,890	7,027	2,606	3,674	2,231	3,285	309	27,021

(a) Excludes vessels of 200 net tons and under.

*Overseas via States.* The figures in the following table show the number and aggregate net tonnage of entrances and clearances of overseas vessels which, having arrived at an Australian port direct from an overseas port, continue their voyages from/to overseas countries via other Australian States. The statistics in the following table are not comparable with those prior to 1 July 1969 because of the change in method of classifying some overseas vessel movements referred to under *Interstate direct*, see above.

#### INTERSTATE MOVEMENT: ENTRANCES AND CLEARANCES OF VESSELS OVERSEAS VIA OTHER AUSTRALIAN STATES AND NORTHERN TERRITORY, 1971-72(a)

		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Aust.

### World shipping tonnage

At 1 July 1972 the total number of steamships and motorships 100 gross tons and upwards throughout the world was 57,391 with a gross tonnage of 268,340,145. Of those totals, steamships numbered 6,799 for 94,974,167 gross tons, and motorships 50,592 for 173,365,978 gross tons. This includes 6,462 oil tankers of 100 gross tons and upwards with a gross tonnage of 105,128,937. Australian steamships and motorships, 370 for 1,184,010 gross tons constituted 0.67 per cent and 0.44 per cent respectively of the total number and gross tonnage. This information has been derived from *Lloyd's Register of Shipping*.

### Vessels registered in Australia

The following table shows the number and gross tonnage of trading vessels of 200 tons and over registered in Australia at 30 June 1972, classified according to: (i) year of construction, (ii) type of trade in which the vessels were engaged and (iii) vessels built in Australian or in overseas shipyards.

## Miscellaneous

### Shipping freight rates

Lists of shipping freight rates for selected commodities are shown in the *Quarterly Summary of Australian Statistics*.

### Shipping casualties

Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1967-68 to 1971-72 are shown in the table below.

### SHIPPING CASUALTIES TO OVERSEAS AND INTERSTATE STEAM AND MOTOR VESSELS(a) AUSTRALIA, 1967-68 TO 1971-72

Year	Shipping losses			Other shipping casualties			Total shipping casualties		
	Vessels	Net tons	Lives lost	Vessels	Net tons	Lives lost	Vessels	Net tons	Lives lost

(a) Vessels over 50 net tons.

### Lighthouses; distances by sea; depth of water and tides at main ports

A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light will be found in *Transport and Communication*, Bulletin No. 62. (14.11).

The distances by sea between principal ports of Australia and some important ports in other countries which trade with Australia and the depths of water and tides at principal ports of Australia will be found in *Transport and Communication*, Bulletin No. 62.

## RAILWAYS

### Government railways

Government railways in Australia operate in all States and Territories and provide an important means of transportation. In 1971-72 a total of 87.3 million tons of freight were carried, an increase of 97.1 per cent over the 44.3 million tons carried in 1951-52. However, in the same twenty-year period the number of passengers carried (mostly within the suburban areas of Sydney and Melbourne) declined by 19.4 per cent from 501 millions in 1951-52 to 404 millions in 1971-72. The number of train miles run during 1971-72 (95.5 million) was only 2.2 per cent greater than in 1951-52, which is an indication of the trend towards heavier train loads with the more powerful motive power now available. Since the introduction of the first mainline diesel-electric locomotives in 1950 their numbers have increased greatly until at 30 June 1972 there were 1,360 throughout Australia. Diesel-electric locomotives during 1971-72 hauled 61 million train-miles, while steam locomotives hauled only 402 thousand train-miles.

### Railway development

The first steam-operated railway in Australia ran between Melbourne and Port Melbourne, a distance of two miles, and was opened on 12 September 1854. It was owned and operated by the Melbourne and Hobson's Bay Railway. Within a short time privately-owned railways opened in other States, but owing to the small volume of traffic available they were soon in financial difficulties and all were taken over by the respective State Governments. Under the policy of Government ownership and control the railway networks expanded until at 30 June 1941 there were 27,234 route-miles open for traffic in Australia. This was the greatest mileage ever recorded. Since the 1939-45

War many uneconomic branch lines have been closed. From 1 July 1948 to 30 June 1972 3,489 miles have been closed, the greatest lengths being in Western Australia (1,029 miles), Queensland (889 miles), and Victoria (623 miles). During this same period 1,338 miles of new railway were added to the networks. The following table sets out the route-miles of government railways in each State and Territory at various dates since 1855.

(a) At 31 December.

One feature of the Australian government railways is the variety of gauges to which they are built. There are three principal gauges, 'broad' (5ft 3in), 'standard' (4ft 8½in), and 'narrow' (3ft 6in). Extensive route-mileages of 3ft 6in gauge railway were built in areas where traffic volumes were initially known to be small and where it was imperative to minimise the costs of construction. The following table shows the mileages open in each State and Territory at 30 June 1972 according to gauge.

**GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, BY GAUGE  
STATES AND TERRITORIES, 30 JUNE 1972

(a) Portion of Victorian Railway system. (b) Excludes 202 route-miles of 5ft 3in gauge which almost parallels the 4ft 8½in gauge line between Melbourne and the Murray River. (c) Includes 29 route-miles of 4ft 8½in gauge line from Broke Hill to Cockburn owned and operated by the South Australian Government Railways. (d) Comprises 654 miles of the Trans-Australian and 217 miles of the Central Australia Railway systems and 217 miles from Port Pirie to Cockburn. (e) Includes 454 miles of the Trans-Australian Railway system. (f) Australian Capital Territory Railway system. (g) Includes 367 miles of the Central Australia Railway system. (h) Excludes 248 miles of 3ft 6in gauge line which parallels the 4ft 8½in gauge line and 75 miles of 3ft 6in/4ft 8½in dual gauge line which are included in the 4ft 8½in gauge line. (i) Comprises 173 miles of the Central Australia and 317 miles of the North Australia Railway systems.

### Government railway systems

There are six separate State Government railway systems and one Commonwealth railway system. As the Commonwealth system includes mileages in South Australia and Western Australia, and the Victorian system extends into New South Wales, the system route-mileages shown in the following table do not represent mileages within each State and Territory. These are shown in the previous table. The route-mileage of each system open for traffic, according to gauge, at 30 June 1972 is shown in the following table.

**GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, BY GAUGE AND SYSTEM**  
30 JUNE 1972  
(Miles)

System	Gauge					Total
	5ft 3in	4ft 8½in	3ft 6in	2ft 6in	2ft 0in

Victoria	(b)3,943	202	..	9	..	4,154
Queensland	..	69	5,841	..	30	5,940
South Australia	1,570	246	597	..	..	2,413
Western Australia	..	450	(c)3,350	..	..	3,800
Tasmania	..	..	500	..	..	500
Commonwealth	..	1,330	857	..	..	2,187
<b>Australia</b>	<b>5,513</b>	<b>8,358</b>	<b>11,145</b>	<b>9</b>	<b>30</b>	<b>25,055</b>

(a) Includes 270 route-miles which are electrified. (b) Excludes 202 route-miles of 5ft 3in gauge line which almost parallels the 4ft 8½in gauge line between Melbourne and the Murray River. Includes 262 route-miles which are electrified. (c) Excludes 248 miles of 3ft 6in gauge line which parallels the 4ft 8½in gauge line and 74 miles of 3ft 6in/4ft 8½in dual gauge line which are included in the 4ft 8½in gauge line.

The New South Wales system is based on Sydney and extends throughout the State. The Victorian system based on Melbourne radiates throughout the State, extending into areas of southern New South Wales. The Queensland system extends along the coast from Brisbane to Cairns in the north, while branch lines extend inland from Brisbane and the larger coastal cities of Rockhampton and Townsville. The main South Australian system is in the South-east of the State, but an isolated narrow-gauge system operates in the Eyre Peninsula area. The railway system in Western Australia is established in the south-western section of the State, but extends north to Meekatharra and east to Kalgoorlie and Esperance. In Tasmania the main line connects Hobart and Launceston, and there are branch lines along the northern coast.

The Commonwealth Railways comprises four separate railways. The Trans-Australian Railway, extending from Port Pirie to Kalgoorlie, is of 4ft 8½in gauge, as is that part of the Central Australia Railway from Port Augusta (Sterling North) to Marree. A further extension of this railway from Marree to Alice Springs is of 3ft 6in gauge, as is the North Australia Railway from Darwin to Birdum. The Australian Capital Territory Railway from Queanbeyan to Canberra is of 4ft 8½in gauge. In this chapter particulars of the four Commonwealth railways are combined; however, particulars for each railway are shown separately in the annual bulletin *Transport and Communication*.

A graph showing the route-mileages and traffic of all Government railways from 1870 to 1971-72 appears on plate 28 on page 347.

### Standardisation of railway gauges

Information about standardisation of railway gauges, completion and commencement dates of services and centres linked are given in Year Book No. 58, 1972, page 348.

GOVERNMENT RAILWAYS: AUSTRALIA, 1870 TO 1971-72  
ROUTE MILEAGE AND TRAFFIC

LOGARITHMIC GRAPH

NOTE - VERTICAL SCALE IS LOGARITHMIC, AND THE CURVES RISE AND FALL ACCORDING TO RATE OF INCREASE OR DECREASE ACTUAL NUMBERS ARE INDICATED BY SCALE

### Future developments in standardisation

The Commonwealth Government has announced its intention to finance a standard gauge connection between Adelaide and the new standard gauge railway. Details of the connection have yet to be decided. When this link is forged all mainland state capital cities will then be connected to the interstate standard gauge network. However, the direct link between Adelaide and Melbourne will still be broad gauge (5ft 3in).

A new standard gauge railway between Port Augusta and Whyalla (South Australia), 47 miles long, owned and operated by Commonwealth Railways was opened in October 1972. It connects Whyalla with the interstate standard gauge network. In addition to general goods and passenger traffic, it is used to transport considerable quantities of steel products to Melbourne and Sydney.

The Commonwealth Government has also approved a proposal for a new standard gauge railway, about 522 miles long, between Tarcoola on the Trans-Australian Railway, and Alice Springs to replace the existing narrow gauge railway between Marree and Alice Springs. Survey work has commenced.

The Western Australian Government has decided to convert to standard gauge the existing narrow gauge railway between Kalgoorlie and Esperance, a distance of about 258 miles.

### Operations of Government railway systems

Particulars of train-mileages, passenger-journeys, passenger-miles, freight tons carried, and freight ton-miles included in this section refer only to operations for which revenue is received.

#### Summary of operations

#### GOVERNMENT RAILWAYS: SUMMARY OF OPERATIONS, SYSTEMS, 1971-72

(a) Excludes salaries and wages paid to road motor staff. (b) Includes construction staff.

**Private railways**

Private railways are operated over a range of gauges and are to be found in each State of the Commonwealth. These systems service agricultural areas, mining ventures, industrial complexes and ports. A range of commodities are carried, including coal, iron ore, other minerals and manufactured products. In recent years there has been considerable growth in the total route mileage of private railways, from an estimated 300 route miles in 1965, to approximately 1,082 by December 1972. The construction of 686 miles of heavy duty railway for north-west Western Australia iron ore projects accounts for much of the increase.

In addition to the above, there are approximately 2,000 route miles of permanent privately owned sugar cane railways or 'tramways' along the north-east coast of Australia. The bulk of this is 2 ft 0 in gauge. Additional temporary lines are laid during the cane harvesting season. These lines connect 30 sugar mills to the Queensland Government Railway system. Other private railways exist within factory and industrial areas for the internal transport of goods and materials but at present no statistics are available as to the extent of the mileage involved and traffic task performed.

The carriage of passengers by private railways is now negligible; however, tonnages of freight carried are increasing as indicated in the following table.

**PRIVATE RAILWAYS: ESTIMATED DOMESTIC FREIGHT TRAFFIC TASK(a)**  
**1965-66 TO 1970-71**

(Source: Department of Transport)

<i>Year</i>	<i>Tons carried</i>	<i>Private as a percentage of total tons carried(b)</i>	<i>Ton-miles</i>	<i>Private as a percentage of total ton-miles performed(b)</i>
	'000	per cent	million	per cent
1965-66 . . .	30,752	32.3	427	3.7
1966-67 . . .	35,895	34.4	1,141	9.0
1967-68 . . .	43,273	37.8	2,008	14.1
1968-69 . . .	52,545	41.0	3,347	20.3
1969-70 . . .	65,591	44.3	5,715	28.0
1970-71 . . .	78,728	47.8	8,426	35.3

(a) Includes tons and ton-miles performed by sugar tramways, but excludes internal industrial plant railways. (b) Total equals government plus private.

During the period 1965-66 to 1970-71 tonnages of freight carried increased by 156 per cent. During the same period freight ton-miles performed increased almost twenty-fold. The extent of this growth has been such as to increase the private railway system's share of the total freight traffic task performed by all railways in Australia.

Mineral ores and concentrates are the predominant items of freight and, in contrast to the Government railways, carriage of general merchandise is of minor importance. The rapid growth of tons carried and ton-miles performed since 1964-65 reflects the growing traffic task performed by the Western Australian iron ore railways. In 1970-71 these railways alone carried 53 per cent of the total tonnage carried by all private railways, and accounted for 94 per cent of the ton-miles performed.

Details of location, ownership and operation of the major private railway systems is given in Year Book No. 56, 1970, page 364.

## TRAMWAY, TROLLEY-BUS, BUS, AND FERRY SERVICES

## Systems in operation

*Tramway and trolley-bus.* At 30 June 1972 tramway services were in operation in Melbourne, Victoria, and in Adelaide, South Australia. The last of the trolley-bus services ceased to operate in Australia with their replacement by buses in Perth, Western Australia on 29 August 1969. Tramway services ceased to operate in Ballarat on 19 September 1971 and in Bendigo on 16 April 1972.

In many parts of Australia private lines used for special purposes in connection with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways, and the traffic on them has nothing in common with that of the street tramways used for the conveyance of passengers, which are dealt with in this section. For further details, see page 354.

*Motor bus.* Services are operated by government or municipal authorities and private operators. Statistics are collected for government and municipal bus services located in all State capital cities; Canberra, Australian Capital Territory; Newcastle, New South Wales; Rockhampton, Queensland; Fremantle and the Eastern Goldfields area, Western Australia; Launceston and Burnie, Tasmania; Darwin, Northern Territory; and for country road services operated by the Western Australian Government Railways. Particulars of motor bus services under the control of private operators for the States of Victoria, Queensland, South Australia, and Western Australia are given in the annual bulletin *Transport and Communication* up to 1970-71.

*Ferry.* Ferry passenger services are operated in the following States: New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Mersey River at Devonport. Control is exercised by both government authorities and private operators. Particulars of the operations of these services are given in previous issues of this Year Book and in the annual bulletin *Transport and Communication*. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

## Government and municipal tramway, trolley-bus and bus services

Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway and trolley-bus services by motor bus services, it is not possible to obtain separate statistics for all phases of the activities of each form of transport, particularly financial operations.

Minus sign (—) denotes deficit.

## MOTOR VEHICLES

The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. Particulars of registration, licences, fees payable, etc., in each State and Territory at 30 June 1971 are shown in *Transport and Communication*, Bulletin No. 62, 1970-71.

Tables in this section include vehicles owned by private individuals, local government authorities, State Governments, and the Commonwealth Government (excluding those belonging to the defence services).

### Survey of Motor Vehicle Usage

A survey was conducted throughout Australia in late 1971 by the Bureau of Census and Statistics for the purpose of gathering information on the usage of motor vehicles. This survey was similar to one carried out in 1963. The owners of approximately 51,000 vehicles other than buses were approached for information relating to the usage of their vehicles over the twelve months ended 30 September 1971. In addition usage details of 800 bus fleets were sampled and collected for the twelve months ended 30 June 1971. The framework, from which the sample was drawn, was obtained from the motor vehicle registration authorities in all States and Territories. The survey was based on respondents' recollections of their usage of the selected vehicles/fleets over their period of ownership during the survey year.

The main purpose of the survey was to determine the total mileage travelled by vehicles, classified according to area and purpose of travel. Information was also obtained from the survey on: (i) ton-miles, (ii) average load carried, (iii) vehicle usage (i.e. for hire and reward, ancillary or other), (iv) fuel consumption, (v) road surface, (vi) occupant-miles, (vii) driver characteristics.

The following table shows, for Australia, total annual mileage for the twelve months ended 30 September 1971 according to area and purpose of travel. The percentage standard errors (S.E. %) indicate the extent to which the estimates can vary by chance because only a sample and not the total vehicle population was enumerated. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained from a comparable complete enumeration, and about nineteen chances in twenty that the difference will be less than two standard errors. For example, if an estimate of 3,000 million miles has a standard error of 5 per cent (i.e. 150 million miles), then there would be approximately two chances in three that a comparable complete collection would give a figure within the range of 2,850 million miles to 3,150 million miles, and about nineteen chances in twenty that the figure would be within the range of 2,700 million miles to 3,300 million miles.

**TOTAL ANNUAL MILEAGE(a) BY PURPOSE AND AREA OF OPERATION  
AUSTRALIA, TWELVE MONTHS ENDED 30 SEPTEMBER 1971**

Area of operation	Laden business		Unladen business		Total business(b)		Paid to and from work(c)		Unpaid to and from work		Private		Total

(a) Excludes mileage by buses. (b) Includes the total mileage of cars, station wagons and motor cycles for business purposes. The dissection of business miles into laden/unladen for these vehicles was not sought. (c) For the purpose of this survey 'Paid to and from work' mileage is not considered to be business mileage. (d) Includes centres (other than capital cities) having populations greater than 40,000 at the 1966 Census of Population and Housing. (e) Covers mileage by vehicles in all States other than that in which the vehicle was registered.

### Motor vehicles on register

Details of motor vehicles on the register are compiled by up-dating motor vehicle census data from information made available by the various motor vehicle registration authorities in the States and Territories. Censuses of motor vehicles have been conducted in respect of 31 December 1955, 31 December 1962 and 30 September 1971. At these census dates considerably greater information concerning the particulars shown in the tables following is available. Final detailed results of the 1971 census have been published in separate census bulletins for each State and Territory and for Australia.

A revised classification of motor vehicles has been adopted for publication of statistics of motor vehicle registrations from 1 January 1972. The principal differences between this classification and that which it replaces involve the categories light commercial type vehicles, trucks and other truck type vehicles. Consequently, figures shown from January 1972 for these categories are not strictly comparable with data for previous periods.

**MOTOR VEHICLES ON REGISTER, BY TYPE OF VEHICLE, 31 DECEMBER 1972

(a) Excludes tractors, plant and equipment.

**Registrations of new motor vehicles**

Particulars of registrations of new motor vehicles are shown by type, make, and horsepower of vehicle in monthly, quarterly and annual bulletins of Motor Vehicle Registrations.

In these statistics 'registrations' means registrations processed by the motor vehicle registration authorities in the States and Territories during the period.

A revised classification of motor vehicles has been adopted for publication of statistics of new motor vehicle registrations from 1 January 1972. The principal differences between this classification and that which it replaces involve the categories light commercial type vehicles, trucks and other truck type vehicles. Consequently, figures shown from January 1972 for these categories are not strictly comparable with data for previous periods.

**REGISTRATIONS OF NEW MOTOR VEHICLES, BY TYPE OF VEHICLE**

(a) Not directly comparable with figures subsequent to 1971.

**Drivers' and riders' licences**

At 30 June 1972 the numbers of licences in force to drive or ride motor vehicles were: New South Wales, 2,222,510; Victoria, 1,634,118; South Australia, 561,862; Western Australia, 493,431; Tasmania, 173,670; Northern Territory, 47,703; Australian Capital Territory, 109,165. Particulars are not available for Queensland.

**ROAD TRAFFIC ACCIDENTS****Compulsory fitting and use of seat belts and protective helmets in Australia**

Through the endorsement of the Australian Transport Advisory Council of Australian Design Rules for Motor Vehicle Safety, the fitting of belts in passenger cars and derivatives in each State was made mandatory for new motor vehicles for front seats from 1 January 1970 and for all positions from 1 January 1971.

The year 1973 saw the completion of laws requiring the compulsory wearing of seat belts, where fitted, in all motor vehicles, and the mandatory use of protective helmets by motor cycle riders and pillion passengers. The dates on which the laws came into effect were as follows:

	<i>Seat belts</i>	<i>Protective helmets</i>
New South Wales . . . .	1 October 1971	1 August 1971
Victoria . . . . .	22 December 1970	1 January 1961
Queensland . . . . .	1 January 1972	24 October 1970
South Australia . . . .	29 November 1971	31 December 1967
Western Australia . . .	24 December 1971	1 May 1971
Tasmania . . . . .	13 October 1971	19 December 1966
Northern Territory . . .	1 January 1972	8 November 1972
Australian Capital Territory .	1 January 1972	18 March 1973

The laws in force differ between States and Territories on matters such as exemptions and penalties. The exemptions for seat belts relate primarily to delivery men, persons reversing motor vehicles, the elderly, children under the age of 8 years, women in advanced stages of pregnancies, and persons exempted by a doctor's certificate. Exemptions for motor cyclists vary greatly and include persons exempted for religious reasons in New South Wales, passengers carried in side cars in Victoria and South Australia, and motor cyclists travelling at less than 15 miles per hour in South Australia.

Different types of belts fitted to vehicles include lap, diagonal, sash, lap and sash, harness and child restraints. Recent developments in seat belt design are aimed to improve their comfort to the wearer, their ease of adjustment and their effectiveness.

(a) Accidents reported to the police which occurred in public thoroughfares and which resulted in death within thirty days or in bodily injury to an extent requiring surgical or medical treatment. (b) Includes parked vehicles.

## ROADS

## Summary of roads used for general traffic

*Proclaimed or declared roads.* The table following is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30 June 1972. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and/or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points: availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; the value of the roads as connecting links between centres of population or business; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g. insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

**PROCLAIMED OR DECLARED ROADS: LENGTHS, STATES, 30 JUNE 1972**

(a) Includes only roads declared by the Country Roads Board. Does not include 8 miles of metropolitan freeways constructed by the Melbourne and Metropolitan Board of Works. (b) Main Roads Department revised series. (c) Includes 70 miles of freeways constructed by the Country Roads Board. (d) Metropolitan only. (e) Includes mining access roads, farmers' roads and tourist tracks. (f) Forest roads.

*Total roads.* The following table represents an attempt to classify all the roads open for general traffic in Australia, at the latest dates available, according to States and Territories and to certain broad surface groups. The figures in the table for the States are obtained from the Deputy Commonwealth Statistician in each State, and are derived mainly from local government sources.

Further information on roads, including financial particulars, is included in Chapter 18. Public Authority Finance.

### National Association of Australian State Road Authorities

The National Association of Australian State Road Authorities (N.A.A.S.R.A.) was established in 1934 under the title 'Conference of State Road Authorities of Australia', the present name being adopted in 1959. Initially the member authorities were the central road authority in each State but in 1949 this was extended to include the Commonwealth Department of Works. The present member authorities are: Department of Main Roads, New South Wales; Country Roads Board, Victoria; Main Roads Department, Queensland; Highways Department, South Australia; Main Roads Department, Western Australia; Department of Public Works, Tasmania; Commonwealth Department of Works.

These authorities are directly responsible for the construction and maintenance of the primary road system which comprises approximately 14 per cent of roads in Australia. The primary roads, generally termed 'main roads', include the principal routes between States, routes linking large cities and regions within the States and certain major arterial roads. The authorities also have a limited responsibility for some secondary roads serving primary and secondary industry, and tourist roads.

The Association's objectives are to provide a central organisation where, by co-operative effort, a uniform approach to the improvement, planning and development of the Australian road system can be achieved. This is done by gathering together experienced engineers and administrators from the member Authorities into a series of committees to develop national standards for road and bridge design, construction and maintenance and to improve methods of administration and financial control. The policies and standards published are widely used by local government authorities and by universities as standard textbooks for courses in road engineering. For structural design, road signs, manufactured items and standard laboratory test procedures it has been a long standing policy of the Association to participate with the Standards Association of Australia in the preparation of national codes of practice.

One item of continuing interest to the Association is road research and in 1959 the Association decided to establish and finance a separate national road research centre. This centre, the Australian Road Research Board (A.R.R.B.), was established in 1960 as a company controlled by a Board consisting of the N.A.A.S.R.A. members. The director and staff of A.R.R.B. regularly report to the N.A.A.S.R.A. executive and technical committees the results and progress of research undertaken for N.A.A.S.R.A. and the individual road authorities.

The Association also assists the Australian Government in a number of national and international projects. Within Australia direct grants are made for the construction of a number of roads and the Association has provided the basic data for the two Australian Roads Surveys. These surveys are conducted regularly in conjunction with the Commonwealth Bureau of Roads and form the basis for determining the Australian Government's policy on financial aid for roads. The Association also regularly confers with the Commonwealth Department of Transport, the Commonwealth Bureau of Roads and Australian Transport Advisory Council on major roading policies. As part of the Australian Government's external aid program and in conjunction with the Department of Foreign Affairs, member authorities of the Association conduct engineering training courses for experienced engineers from African and Asian countries.

The secretarial services of the Association are provided by a small staff located in Sydney. This office maintains contact with overseas road bodies and acts as a centre for the receipt and circulation of standards published by these organisations.

### Australian Road Research Board

The Australian Road Research Board was established by the road authorities of the Commonwealth and State Governments in 1960 as a national centre for road research. The Board was incorporated in January 1965 as a public company limited by guarantee, memoranda and articles of association being drafted in general conformity with the constitution which had been accepted in 1960. The company members are the Commonwealth of Australia, the commissioners of the central road authorities in New South Wales, Queensland, South Australia, and Western Australia, the Department of Public Works, Tasmania, and the Country Roads Board, Victoria. The Director-General of the Commonwealth Department of Public Works and the departmental heads of the other road authorities constitute the Board, which controls all policy and activities. Finance for all activities has been provided by the company members on an agreed basis.

The objectives of A.R.R.B. include planning an adequate program of research and development, arranging for individual projects to be carried out directly and by co-operating organisations, and providing conferences and publications to bring these and other advances to everyone interested in roads. Publications include *Proceedings* of biennial national research conferences commencing in 1962, the journal *Australian Road Research* issued four times a year, and separate reports and bulletins resulting from special research projects. The following list of possible subjects indicates

the range of studies provided for in the original constitution: road planning, location, design, safety, materials, construction, maintenance, structures, equipment, traffic and transport, economics, administration, financing, management, accounting, and any other matters affecting the provision, upkeep, use, protection, and development of roads. In planning a creative program the Board continues to look for those subjects which seem to offer the highest profit to road engineers and the community.

The work on research projects is carried out either directly by the Board's own staff, in many cases acting in co-operation with the road authorities of the various governments, or through co-operative projects established with universities. The Board has endeavoured to provide or sustain the additional staff required for these external projects, but university staff members furnish advice and co-operation in all parts of these studies.

As with most research organisations, the Board has made very full use of systematic consultation through various advisory groups. Members of these groups have been recruited from persons with the ability to contribute, who were prepared to serve as individuals and not as representatives of particular organisations. In an attempt to secure completely unfettered counsel, most of the members of the advisory groups were drawn from outside the Board and its staff. The various committees include a general Advisory Council and several particular types of specialist committees. In addition, the technical committees of the National Association of Australian State Road Authorities have, from the initiation of A.R.R.B., been a continuing and valuable source of advice and consultation. In this way, therefore, exceedingly valuable advice has been obtained from individuals drawn from the State road authorities, local authorities, C.S.I.R.O., Australian universities, several Commonwealth departments, and from private companies and consultants.

#### **Commonwealth Bureau of Roads**

The Commonwealth Bureau of Roads is a Statutory Authority established under the provisions of the *Commonwealth Bureau of Roads Act 1964*. The Bureau consists of a full-time Chairman and two part-time members appointed by the Governor-General and is served by a small secretariat. Broadly, the responsibilities of the Bureau are to advise the Commonwealth Government, through the Minister for Transport, on matters relating to roads and road transport and government financial assistance in this area.

## **CIVIL AVIATION**

#### **Department of Civil Aviation**

Control of civil aviation in Australia is exercised by the Department of Civil Aviation which was established in 1939 to take over from the Civil Aviation Board the regulation of civil aviation in Australia. The Department's jurisdiction covers not only Australia but also Papua New Guinea and areas of the Indian and Pacific Oceans. Year Books Nos 16, 19 and 38 trace the establishment of civil aviation control in Australia and the appropriate Acts of Parliament and Regulations under which this control is exercised. The present functions of the Department are shown in Year Book No. 51, pages 578-9, and further details about its operations are given in the annual reports to the Commonwealth Parliament by the Minister for Civil Aviation.

#### **Regular air services within Australia**

*Interstate services.* Scheduled interstate services with passenger and all-freight aircraft are provided by two airlines only, the private enterprise airline Ansett Airlines of Australia (a subsidiary of Ansett Transport Industries) and the Commonwealth-owned Trans-Australia Airlines. All principal routes are competitive, with both airlines providing equal capacities in accord with legislation passed by the Commonwealth Parliament. The two principal Acts which establish the legislative basis of this controlled competition are the *Airlines Agreement Act 1952-1961* and the *Airlines Equipment Act 1958*. The Airlines Equipment Act established the machinery for the achievement and maintenance of comparable, but not necessarily identical, aircraft fleets between T.A.A. and Ansett Airlines of Australia, and is designed to prevent the provision of excess aircraft capacity. The Airlines Agreement Act established the basis of control of the two-airline competitive system and extended this machinery to 1977.

In addition to purely interstate services, both Ansett Airlines of Australia and Trans-Australia Airlines operate routes to Papua New Guinea and non-competitive intrastate routes in Australia. The Ansett Airlines of Australia non-competitive routes radiate mainly from Melbourne, while those of Trans-Australia Airlines are located within Queensland. In addition, Trans-Australia Airlines operate services within Papua New Guinea in competition with Ansett Airlines of Papua New Guinea.

At 30 June 1972 the Ansett Airlines of Australia fleet included six Boeing 727's, twelve DC-9's, twelve Friendships, two Carvairs, one DC-4 and two helicopters. At the same date Trans-Australia Airlines operated a fleet of six Boeing 727's, twelve DC-9's, twelve Friendships and six Twin Otter DHC-6.

*Intrastate services.* In addition to the intrastate services operated by Ansett Airlines of Australia and Trans-Australia Airlines there are a number of smaller regional airlines operating from Sydney (Airlines of New South Wales and East-West Airlines), Adelaide (Airlines of South Australia), Perth (MacRobertson Miller Airlines), and Alice Springs (Connair). With the exception of Connair, which provides regular service to outback homesteads and communities, all of these are concerned primarily with traffic moving to and from the respective capital city. With the exception of the independently owned East-West Airlines and Connair, all regional airlines are subsidiaries of Ansett Transport Industries. The larger aircraft used by these regional airlines are Fellowships, Friendships and Convairs. Connair uses smaller aircraft types.

*Commuter services.* These are not airline services but regular flights by charter firms with small single and twin-engined aircraft operating to fixed and published timetables. They provide regular air links between many centres, towns and country areas which are either not served by the major airlines or have no direct air service with their capital or nearest major provincial city. The first commuter service approved was for Opal Air Pty Ltd, of Coober Pedy (S.A.), to operate between Adelaide and the South Australian opal fields. At 30 June 1972 twenty-one charter operators were operating commuter services in Australia. Details of the operations of these commuter services are excluded from the statistics shown in this section.

*Internal operations.* Particulars of the revenue operations of all regular internal air services during each of the years 1967-68 to 1971-72 are set out in the next table.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES  
AUSTRALIA(a), 1967-68 TO 1971-72**

	1967-68	1968-69	1969-70	1970-71	1971-72

Ton-miles(b) . . . . . '000	5,174	5,498	5,950	6,390	6,568

(a) Includes flights of all Australian-owned airlines, with the exception of those of Qantas Airways Limited, between airports located within the Commonwealth. (b) In terms of short tons.

*Internal passenger embarkations and disembarkations*

Traffic statistics have been compiled by aggregating for all individual airline flights the traffic loaded and unloaded at each airport. Flights between Australia and Papua New Guinea and Australia and Norfolk Island are included. At ports where different flights connect, figures are overstated to the extent of the through traffic transferring between flights.

### International activity

*International organisations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council, and the South Pacific Air Transport Council appeared in Year Book No. 37, and particulars of subsequent activity in the international field were included in No. 38. The International Civil Aviation Organization had a membership of 125 nations in June 1972. Australia has continued its position as a member of the Council, which it has held since I.C.A.O. was established in 1947. Further details will be found in Year Book No. 40 and earlier issues.

*International Agreements.* Australia had air service agreements in force with twenty-three countries at 30 June 1972. They were Austria, Britain, Canada, Ceylon, Egypt, France, Federal Republic of Germany, Greece, India, Indonesia, Ireland, Italy, Japan, Lebanon, Malaysia, Nauru, Netherlands, New Zealand, Philippines, Singapore, Republic of South Africa, Thailand, and the United States of America. Under these agreements Australia is granted rights to operate services between Australia to and through the countries in question; these rights are exercised by Australia's international airline Qantas. In return, the designated airlines of the other countries which are partners to these agreements are granted traffic rights in Australia. Australia also had air service arrangements granting traffic rights with eight other countries at 30 June 1972. These were Bahrain, Fiji, Iran, Mauritius, Mexico, Portugal, Syria and Turkey.

*International air services.* At 30 June 1972, twenty-two overseas international airlines were operating regular scheduled services to Australia. These are: Air-India (India), Air Nauru (Nauru), Air New Zealand (New Zealand), Air Pacific (Fiji), Alitalia (Italy), American Airlines (United States of America), British Overseas Airways Corporation (Britain), Canadian Pacific Air Lines (Canada), Cathay Pacific (Britain), Deutsche Lufthansa (Federal Republic of Germany), Garuda (Indonesia), Japan Air Lines (Japan), K.L.M. Royal Dutch Airlines (Netherlands), Singapore International Airlines (Singapore), Merpati Nusantara Airlines (Indonesia), Olympic Airways (Greece), Pan American World Airways (United States of America), Philippine Air Lines (Philippines), South African Airways (Republic of South Africa), Thai International (Thailand) and Union de Transport

Aeriens (France). Trans-Australia Airlines operates between Darwin and Portuguese Timor under charter to Transportes Aereos de Timor. Qantas, Australia's international airline, operates a fleet of twenty-nine aircraft of which twenty-one are Boeing 707-338C jet aircraft and four are Boeing 747B superjet aircraft. All the shares in Qantas Airways Limited are owned by the Commonwealth Government.

*International operations.* The table following shows particulars of international airline traffic during 1971-72 moving into and out of an area which embraces the Commonwealth of Australia, Papua New Guinea, and Norfolk Island. These figures do not include traffic between Australia and Papua New Guinea and Norfolk Island.

**CIVIL AVIATION: INTERNATIONAL AIRLINE TRAFFIC  
TO AND FROM AUSTRALIA(a), 1971-72**

<i>Type of traffic</i>	<i>Aircraft movements</i>	<i>Passengers</i>	<i>Freight</i>	<i>Mail</i>

PLATE 29

### General aviation

General aviation activity, which covers all non-airline operations such as charter, aerial work and private flying, has grown rapidly throughout Australia in the post-war period so that now it is an important sector of the Australian aviation industry. In 1972, hours flown totalled 1,013,000 compared with 565,000 hours flown by Australian airline aircraft. At 30 June 1972, aircraft employed in general aviation numbered 3,802.

### Aerodromes

The number of aerodromes throughout Australia and its External Territories at 30 June 1972 was 705. One hundred and fourteen were owned by the Commonwealth Government and 591 by local authorities and private interests. Capital expenditure on aerodrome and building construction was \$28.6 million in 1971-72. Maintenance expenditure on Commonwealth-owned aerodromes during 1971-72 was \$2.3 million, and development and maintenance grants to licensed aerodromes participating in the Local Ownership Plan totalled \$1.05 million.

### Airways facilities

A total of 407 navigational aids were in service at 30 June 1972. The total includes 229 non-directional beacons (NDB), 106 distance measuring equipment (DME), 20 visual-aural ranges (VAR), 33 VHF Omni-directional ranges (VOR), 17 instrument landing systems (ILS) and 2 twin locator approach systems.

One hundred and twenty-seven aerodromes are now equipped with night landing facilities and sixty-nine visual approach slope indicators (VASIS) are now operating comprising sixty-seven Australian designed 'T' systems and two Red-White systems.

Six long range surveillance radars are in operation.

**Civil aviation registrations, licences, etc., in force in Australia**

At 30 June 1972 there were 3,802 aircraft registered in Australia. There were also, at 30 June 1972, 28,214 pilots' licences in force of which 12,738 were private pilots' licences, 3,274 commercial pilots' licences, and 9,844 student pilots' licences. Flight radio-telephone operators' licences numbered 19,813.

**Accidents and casualties**

**CIVIL AVIATION: ACCIDENTS INVOLVING CASUALTIES(a)  
AUSTRALIA(b), 1967-68 TO 1971-72**

	1967-68	1968-69	1969-70	1970-71	1971-72
Number . . . . .	36	17	47	31	28
Persons killed . . . . .	47	47	49	48	37
Persons seriously injured . . . . .	29	20	41	24	23

(a) Accidents involving civil aircraft which resulted in death or serious injury. Excludes parachutists killed on contact with earth after an uninterrupted fall. (b) Excludes accidents outside Australia involving aircraft on the Australian register.

**POSTS: INTERNAL AND OVERSEAS TELECOMMUNICATION SERVICES  
RADIOCOMMUNICATION STATIONS**

In this division particulars for the Australian Capital Territory are included with those for New South Wales, and the South Australian figures include particulars for the Northern Territory, unless otherwise indicated. The Central Office of the Postmaster-General's Department is located in Melbourne, Victoria.

**Postmaster-General's Department—General**

Under the provisions of the *Post and Telegraph Act* 1901-1971 the Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia. The Postmaster-General's Department is also responsible for the provision and operation of the transmitters and technical facilities, other than studio equipment, required for broadcasting and television services by the Australian Broadcasting Commission (*see* pages 387-91), and, in conjunction with the Overseas Telecommunications Commission (*see* pages 385-7), with whom there is close co-operation, provides facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments including the collection of broadcast and television licence fees, war service and repatriation repayments, the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, the collection of land tax and the over-the-counter distribution of a variety of official forms.

**Research**

The Postmaster-General's Department maintains its own research facilities as part of the headquarters organisation in Melbourne. The P.M.G. Research Laboratories had an establishment in 1972 of 430 including 150 professional staff, mainly engineers, physicists, chemists and metallurgists. The main responsibilities of the laboratories are to conduct research and development in telecommunications theory and practice, particularly as applying to the Australian region; to appraise new developments in telecommunication equipment, and to design apparatus and systems required for special applications in the telecommunications and mail handling networks in Australia in cases where these needs could not be met from commercial sources.

**Postal facilities**

The following table shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30 June 1972.

(f) Not comparable with previous years due to revised methods of measuring mail statistics. (g) Comparable only with previous year.

During 1971-72 the cost of the carriage of mails, as disclosed by the Profit and Loss Statement of the Postal Service, was as follows: road, \$15,177,691; railway, \$4,292,597; sea, \$842,257; air—internal, \$4,202,394; overseas, \$10,364,745; total, \$34,879,684.

**Money orders and postal orders**

The issue of money orders and postal orders is regulated by Sections 74-9 of the *Post and Telegraph Act* 1901-1971. The maximum amount for which a single money order payable within Australia may be obtained is \$200, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent by any one person to a person or persons outside Australia is \$50 a week. A postal order is not available for a sum larger than ten dollars. The following table shows the number and value of money orders and postal orders issued in Australia in each of the years 1966-67 to 1971-72 and the income therefrom which has accrued to the Post Office.

**MONEY ORDERS AND POSTAL ORDERS: TRANSACTIONS, AUSTRALIA  
1967-68 TO 1971-72**

Year	Money orders(a)			Postal orders		
	Issued		Total commission received	Issued		Fee
	Number	Value		Number	Value	
	'000	\$'000	\$'000	'000	\$'000	\$'000
1967-68 . . .	(b)11,373	438,668	2,544	(c)12,364	22,149	657
1968-69 . . .	9,672	209,868	2,637	13,525	27,262	772
1969-70 . . .	9,153	175,446	2,640	14,866	31,431	861
1970-71 . . .	7,353	161,119	3,031	(d)16,732	44,961	1,193
1971-72 . . .	5,677	143,167	2,808	17,289	55,784	1,779

(a) Money orders issued for payment in Australia and overseas. (b) Includes official money orders used in bringing to account telephone accounts and collections on War Service Homes repayments. (c) Postal orders for \$5, \$6, \$7 and \$8 were introduced in October 1967. Until then the highest denomination was \$4. (d) Postal orders for \$9 and \$10 were introduced in October 1970.

Of the total money orders issued in Australia during 1971-72, 5,201,581 valued at \$137,832,976 were payable in Australia, and 475,274 valued at \$5,333,612 were payable overseas. Of the total money orders paid in Australia during 1971-72, 5,492,570 (\$141,554,526) were issued in Australia, and 210,064 (\$4,737,940) were issued overseas.

Of the total postal orders paid in Australia during 1971-72 (17,115,826 valued at \$55,281,054), 12,956,407 (\$44,798,117) were paid in the State in which issued, and 4,159,419 (\$10,482,937) were paid in States other than those in which issued.

### Internal telecommunication services

A brief history of the development of telecommunications in Australia is shown on pages 378-82. Internal telecommunication operations now comprise telephone, telegraph, and telegraph exchange (telex) services.

#### Wire and pole routes

At 30 June 1972 there were 26,330,802 single wire miles of cable and 1,015,505 miles of aerial wire used for telecommunication purposes in Australia. The aerial wires are mounted on 103,135 miles of pole routes.

#### Coaxial cable and broadband relay systems

In recent years trunk telephone, telegraph and television channels have been increasingly provided by coaxial cable and radio relay systems. Broadband radio relay systems and coaxial cables are an alternative means of providing transmission facilities, each radio bearer being similar in carrying capacity to a coaxial tube. At 30 June 1972 there were 18,055 tube miles of coaxial cable and 50,187 bearer miles of radio relays in operation.

#### Telephone services in operation

Increasing use of the telephone by the community has resulted in a demand for additional telephone services. The volume of internal telephone traffic has consistently expanded, trunk line calls having the fastest rate of growth.

The following table shows the number of services in operation in each State at 30 June 1972 classified according to type of service, type of exchange to which connected, and location. Telephone services connected to exchanges located within fifteen miles of the Sydney and Melbourne and ten miles of the Brisbane, Adelaide, Perth, and Hobart General Post Offices are defined as being within a metropolitan area.

**Definitions of terms used in the following table**

*Ordinary exchange services* are services which provide direct access to the exchange system by means of exclusive use of an exchange line.

*Duplex services* provide for two subscribers sharing a single exchange line, and preserve individual calling, separate metering and secrecy conditions. Duplex services are counted as two services.

*Party line services* are other shared services involving any number of subscribers, and are counted as one service for one exchange line.

*Private branch exchange services* are services which provide for any number of extension lines to operate through a switchboard (either automatic or manual) into the exchange system. The number of exchange lines (as distinct from extension lines) is the relevant figure (a service with six exchange lines and fifty extension lines is shown as six services).

*Public telephones* are telephones installed in public thoroughfares and other approved places for the use of the public generally (leased company coin telephones and 'red phones' are not included).

1971-72 . . . . .	2,996,000	1,024	248,700	85	3,244,700

Subscriber trunk dialling (S.T.D.) facilities were introduced during the year 1961-62 from Canberra to the Sydney network and from Warragul (Victoria) to Melbourne. At the end of June 1972 subscriber trunk dialling was in operation at 1,682 exchanges, connected to approximately 2,488,305 services.

## Internal telegraph traffic

Telegrams can be lodged at any post office, telephone office or from any public telephone equipped for multi-coin operation. In addition, telegrams can be despatched from any subscriber's telephone or telegraph exchange (telex) equipment. The number of telegrams of various types transmitted within the Commonwealth during the years 1967-68 to 1971-72 is set out below.

**INTERNAL TELEGRAPH TRAFFIC: AUSTRALIA, 1967-68 TO 1971-72**  
(<sup>'000</sup>)

Year	Ordinary (a)	Urgent	Press	Letter- grams	Meteoro- logical service	Service	Total telegrams

### Development of telecommunications in Australia

**Telegraphs**

The electric telegraph was first introduced into Australia for use by the public in the year 1854, when a line from Melbourne to Williamstown was opened. The first line in South Australia, from Adelaide to Port Adelaide, was opened in 1856, while the first line in New South Wales was brought into operation in 1858, when the line from Sydney to South Head, 6 miles in length, was opened. In Tasmania the first telegraph line was completed in 1857, while in the following year communication was established between Sydney, Melbourne, and Adelaide. The first lines to be constructed in Queensland were those between Brisbane and Ipswich, and Brisbane and Lytton, distances of 24 and 12 miles respectively, and in 1861 Brisbane was connected to Sydney by telegraph. In Western Australia the first telegraph constructed was from Perth to Fremantle, a distance of 12 miles, and was brought into use in 1869. In the same year the cable joining Tasmania with the mainland of Australia was completed, and in 1877 the intercapital link, Perth to Adelaide was established.

On 22 August 1872 the construction of the Overland Telegraph Line was completed. This line was the first telegraphic link to span Australia from coast to coast, stretching from Port Augusta in South Australia to Port Darwin in the Northern Territory, a distance of approximately 1,800 miles. The route of the telegraph line followed closely the path of the expeditions of John McDouall Stuart (1859-62), who had shown that there was a practicable route for an overland telegraph. The line joined the overseas cable terminating in Darwin, which was completed in November 1871, and enabled Australia to communicate with Europe by submarine cable by way of Singapore and Madras. For the first time in history Australia was in direct contact with the outside world.

Eleven repeater stations were established between Port Augusta and Port Darwin. The original Overland Telegraph Line consisted of a single galvanised-iron wire which for over 25 years carried the overseas telegraphic business of Australia. Increasing traffic necessitated the erection of a second line on the same poles as the first line in 1899. This time copper wire was used and as a result a relatively high-speed duplex circuit was provided. The Overland Telegraph Line was operated by the South Australian Government until 1901 when federation of the Australian colonies vested the responsibility for posts and telegraphs in the Commonwealth Government.

An article about the Overland Telegraph Line is contained in the South Australian Year Book No. 7, 1972, pages 526-31.

During the period from 1871 to 1891 great progress was made in telegraphic construction throughout Australia, with over 27,500 pole miles of line, exclusive of railway telegraph lines, being opened for use, making the total length of the line open at the end of 1891, 39,506 pole miles. In 1902 a submarine cable, touching only British territory on its way from Australia to Canada, provided an 'All Red' route, for a cable system between England and Australia. Between 1902 and 1923, further construction increased the length of telegraph line to 66,648 pole miles and by 1929 a further 26,589 pole miles had been constructed giving a total of 93,237 pole miles by the end of 1929.

Under the *Wireless and Telegraphy Act* 1905 the Commonwealth Postmaster-General was given exclusive control over establishing, erecting, maintaining and using stations and appliances for the purpose of transmitting and receiving messages by wireless telegraphy. The Act also empowered him to issue licences, inflict penalties, confiscate appliances unlawfully used, and take proceedings in courts of summary jurisdiction for offences under the Act.

In 1912 Sydney Radio, the first coastal radio station, commenced operation. In the same year radio telegraph services were commenced. The use of radio also enabled the economic establishment of an inland radio-telegraph system linking isolated settlements and homesteads with the ordinary land surface telegraph system.

By 1872 Australia had established an internal telegraph system based on Morse code and operated manually. In 1923 Morse Code was converted to machine operation on main telegraph routes.

In 1929 the telegraph system was extended to include the first picturegram service between Sydney and Melbourne. Further growth in the telegraph system was forestalled by the Great Depression, the number of telegram messages sent falling from 16 million in 1929–30 to 13 million in 1930–31. Prior to the 1939–45 War, Australians were at one time averaging more telegrams per head of population than in any other country in the world. However, following the war there was a large drop in usage. From a peak of nearly 30 million telegrams annually during the later war years (1942–45) and immediately after, the number fell and stabilized at about 20 million despite improvements in services and rapid population and economic growth. This was associated with an increased use of telephones, changing demands by major users for telegram transmission facilities and the increased use of private wire teleprinter services (originally introduced in 1933) which enabled users to hire direct lines on a 'permanent' basis and use their own teleprinters to send and receive a constant flow of telegraph messages.

In 1959, the Postmaster-General's Department introduced TRESS (Teleprinter Reperforator Switching System) and within the next three years it took over entirely from the Morse telegraph system. Whilst teleprinters had gradually been taking over from morse key and sound equipment in the busier post office telegraph offices, TRESS made possible the automatic transmission of telegrams through intermediate transit points, without manual handling, which greatly reduced transmission times.

The TELEX (Teleprinter Exchange) service was introduced for the first time in Australia in 1954 with 80 subscribers in Sydney and Melbourne. The system rapidly developed in other states with typical subscribers being motel organisations, banks, manufacturing companies, hotels and the news media. In 1972, there were more than 9,000 telex subscribers all over Australia.

In 1966 the Australian telex network was converted to automatic operation permitting subscribers to exchange calls direct with all other subscribers in Australia and to be charged on an actual time used basis similar to the Subscriber Trunk Dialing (S.T.D.) system in operation for long distance telephone calls. At the same time, this facility was extended to 20 of the 100 countries overseas with which the telex service was linked.

In the 1950s and 1960s there was growing demand for facsimile transmissions of photographic and other data and by 1966 newspaper printing could also be transmitted between capital cities by this method.

In 1969 the Postmaster-General's Department introduced its DATEL (Data Transmission) service to cope with growing demands on its telegraphic networks. Compared with the Morse code system by which one or two characters could be transmitted per second, data could now be transmitted at rates up to 4,500 characters per second by the use of coaxial cable or microwave transmission.

On private line services, the DATEL system was extended in January 1971, so that about 300 characters per second could be transmitted. This is in the medium range speeds. In June 1972, through the use of microwave transmissions, a special private line service operating at 4,500 characters per second, was opened to link a customer's computers in Sydney and Melbourne.

The growth and future potential of data transmission in Australia has been emphasized by the installation of 565 modems through the Commonwealth in the first 18 months of operation to June 1970. Modems (modulator/demodulator) translate signals, passed either by electric impulse or by radio waves, into a language that the receiving machine can reproduce. Thus a message sent from a telex with one language can be received by another telex with a different language through the use of modems. Any one modem can serve up to 200 transmission reception devices.

### Telephones

In 1878 two years after Alexander Graham Bell demonstrated the telephone in U.S.A. the first long-distance telephone call in Australia was conducted over a distance of 240 miles between Semaphore and Port Augusta, in South Australia. By 1880 exchanges were established as private businesses in Brisbane, Sydney and Melbourne, and in 1882 a Government-owned exchange was established in Sydney. Private exchanges were opened in Adelaide and Hobart in 1883, and in Perth in 1888. All private exchanges were eventually taken over by the colonial governments and operated by their respective Post and Telegraphs departments.

Telegraph Operating Room, G.P.O., Sydney, about 1902

The Central Manual Telephone Exchange, Lonsdale St., Melbourne, about 1908

*Photos by courtesy of the Postmaster-General's Department*

**PLATE 30**

On 1 March 1901, the six separate State Post and Telegraph departments were amalgamated and formed into the Commonwealth Postmaster-General's Department.

In 1902 the first interstate telephone trunk line service was opened—between Mt Gambier, South Australia and Nelson, Victoria and in 1907 the Sydney-Melbourne telephone trunk line service was completed. In 1912 the first automatic telephone exchange in Australia and the second only in the British Empire was opened in Geelong, Victoria.

In 1924 trunk-telephone operators in Victoria were able, for the first time, to dial some other distant exchanges direct. In 1926, two-way mobile radio telephone services were introduced. By 1929, the number of telephones connected reached the half million mark—and Australia, with an average of 7.93 telephones per 100 population had the sixth highest telephone density in the world.

The depression in the 1930s had a marked effect in reducing demand for communication services. In 1930–31, for the first time, cancellation of telephone services exceeded new connections and the number of instruments in service fell by 22,000. The volume of calls also declined, local calls falling by nearly 23 million from the preceding 1929–30 turnover of 420,600,000 and trunk line calls by over 5 million from 35,400,000. Nevertheless, there were many developments in telephone services in the 1930s. In 1930, the overseas radio-telephone service commenced between Australia and England. In 1933, the first Australian made handset telephone was introduced, and in 1936 the Tasmania–Mainland telephone service was opened through a submarine cable under Bass Strait. At the time, it was the longest submarine telephone communications cable in the world. By 1939, telephone connections had again reached the half million mark of 1929.

During the 1939–45 War the Postmaster-General's Department accepted responsibility for a great deal of specialised work on behalf of the Defence Forces, and this involved the diversion of large numbers of highly skilled technicians and other officers from their normal duties.

In the post-war years there was a dramatic increase in the number of telephone subscriber service connections. From 577,777 services connected in 1945 the number almost doubled to reach 1,152,930 in 1955, and almost doubled again to reach 2,010,124 in 1965. With this growth in demand came the problem of 'deferred applications', the installations which could not be met quickly or, in cases, within years. Deferred applications reached a peak of 128,000 in 1951 but declined progressively to about 13,000 in 1972. During the same period all figure numbering increasingly replaced the alpha-numeral system commonly in use.

Since 1945 the percentage of telephone subscriber services connected to automatic operation has been increasing. In 1945, just under 60 per cent of the 580,000 services were connected to automatic exchanges. The automation of the national telephone service gained impetus with the introduction of the Community Service Telephone Plan in May 1960, whereby the areas for many local call facilities were rearranged and extended and telephone calls which would previously have been short distance trunk calls became local calls. By 1972, services connected to automatic exchanges had reached 92 per cent in a total of 3 million services.

In 1951 the external circulation system was modified and direct communication was established between an increasing number of centres which were formerly sent through intermediate repeating centres. In 1953, the first 34-channel carrier system on trunk cable was introduced.

In 1956 the Postmaster-General's Department introduced direct trunk calling by subscribers in Australia—between Dandenong and Melbourne and St Mary's and Sydney—known as Subscribers Trunk Dialling (S.T.D.). By 1972, nearly 83 per cent or 2,488,000, of Australia's telephone subscriber's services had some measure of S.T.D. service and more than 57 per cent of all trunk calls were being dialled directly by the subscriber compared with less than 10 per cent in 1965. An added advantage to the S.T.D. caller, apart from speed and ease of operation, is that S.T.D. calls are charged on a metered basis for the actual time of the call, instead of the minimum 3 minute charge for trunk calls.

Until 1967, S.T.D. development in Australia had been limited to point to point operation, for example, Melbourne to Sydney. In 1967, however, the first automatic trunk switching centres were brought into operation in Sydney, Canberra, Newcastle, Geelong and Launceston. This enabled long distance calls to be automatically switched through without need for a direct line; for example, a subscriber in Launceston could now dial Newcastle direct without the need to go through any intermediate switching stations.

Other centres were progressively added to the network and by 1972, most areas in Australia could be dialled direct by the subscriber. The popularity of S.T.D. can be gauged by the fact that where the facility was available approximately 85 per cent of calls made in 1972 were dialled direct by callers.

Other recent advances in the telephone service include recorded information service, early morning and reminder call service, communication aids introduced to meet the needs of the partially

deaf, a highly sensitive transmitter to help telephone users with serious larynx problems, and an increase in the range of telephones available for customers' use. Also, private companies during the 1960s were licensed to install and operate, by financial agreement with the Post Office, public telephones in shops, banks and similar premises.

### Broadcasting and television

In 1923 the first radio broadcasting stations were established in Australia under the call signs 2FC and 2BL. Rapid development in broadcasting followed. In 1925, the Inland Wireless System began operating. In the same year, on 2 May, a radio broadcast in London was transmitted to radio listeners in Australia. In April 1929, the National Broadcasting Service was established, with the Postmaster-General's Department responsible for buildings, transmitter equipment and provision of program relay lines for its emerging radio networks systems. In 1932, the Australian Broadcasting Commission was constituted to administer the programs of the National Service. Since 1929, nearly 200 national and commercial, medium-frequency radio stations have been established throughout Australia. In addition the National Service operates the external, or international short-wave service created in 1940 and known as 'Radio-Australia'.

In 1950, the mobile radio-telephone service was first introduced by the Post Office in Australia. Today there are just over 120,000 mobile services authorised covering taxi services, ambulances and many other organisations.

In 1956, television was introduced into Australia with the Postmaster-General's Department becoming responsible for the provision and operation of the National Television Service transmitting stations and technical equipment for the purpose of television programs, and the issue of television viewers' licences and the policing of the provisions of the *Broadcasting and Television Act 1942-1956*. A Federal Government plan laid down a gradual expansion of T.V. services, both national and commercial throughout Australia for the following 10 years. While the commercial services have been set up and operated on a local studio and transmission basis the National Television Service has been established and operated on a more centralised basis, with direct relays of capital city programs to provincial and country stations. By the end of 1972 a total of 100 National Service and commercial T.V. stations were providing programs to an area containing 97 per cent of the population.

In 1972 a complementary group of 97 translator stations were in operation with more than one third of these having been established for the National Television Service. The function of the translator stations is to 'repeat' or reflect transmissions from the nearest master transmitter station to more geographically remote populated locations.

### Broadband systems

Broadband systems of either microwave radio or coaxial cable are operated on a broadband of radio frequencies and can provide thousands of trunk circuits for all manner of telecommunication transmissions including T.V. program relays. Compared with the first 34-channel carrier, some of the present broadband systems now have capacities of over 300 channels. In 1959 the first broadband trunk system was installed—a microwave radio system between Melbourne and Bendigo.

In 1962, a coaxial cable system was brought into operation between Melbourne and Sydney. Since then broadband systems have spread extensively over Australia so that by July 1972, inter-linked coaxial cable and microwave trunk systems had linked the major centres of population, and the route distance of the system was over 10,000 miles.

In 1972 new equipment was introduced on trunk routes to increase the capacity of a pair of coaxial cable tubes to 2,700 telephone circuits or 1,200 telephone circuits and a T.V. channel in each direction. The Postmaster-General's Department's broadband systems have also done much to make the spread of S.T.D. possible as they have the necessary large circuits capacity to cope with its peak demands. With S.T.D. the traffic demand cannot be regulated as it can by manual operation and the trunk system must be able to cater for hundreds of subscribers in Sydney and Melbourne, for example, making calls in either direction virtually at the same instant.

The broadband network is linked, in turn, with the COMPAC and SEACOM submarine cables which are the main trunk lines for all Australia's overseas telecommunications traffic. In 1967, a microwave link was established from Sydney to feed traffic through the Overseas Telecommunication Commission's earth station at Moree. This station handles incoming and outgoing traffic including television transmissions/receptions through the medium of the INTELSAT satellite system.

The use of INTELSAT III in 1969 to provide 24 circuits for trunk calling to and from Western Australia, pending completion of the East-West microwave link, was probably the first successful use by any country of satellites for domestic trans-continental trunk calling.

## TELEGRAPH PLANT, AUSTRALIA, 1872 TO 1971-72

1971-72 . .	26,330,802	1,015,505	27,346,307	103,135	18,055	(c)40,389	50,187

(a) Partly estimated. (b) Excludes details of submarine cable, morse cable and junction circuits. (c) After 1953-54, "conduits" cover only ducts and conduits of 2 inches and over internal diameter—prior to that those of diameters under 2 inches were also included.

NOTE. Although there have been several minor changes in the definition of items covered under each column heading, comparability over the last fifty years is not seriously affected. Prior to 1914, the reliability of "comparable" items is doubtful and for this reason, the figures above are more restricted in coverage before 1914.

TELEPHONE PLANT, AUSTRALIA, 1872 TO 1971-72  
(number)

## Overseas telecommunication services

The Overseas Telecommunications Commission (Australia) (O.T.C.) is the authority responsible for the establishment, maintenance and operation of telecommunication services between Australia and other countries, with ships at sea and to and between Australia's external Territories.

The Commission was established under the *Overseas Telecommunications Act 1946*. This Act implemented, in Australia, a recommendation of the 1945 Commonwealth Telecommunications Conference for national ownership of the external telecommunications services of the British Commonwealth countries concerned. (Details of overseas communication systems operating in Australia prior to 1946 and developments leading to the establishment of the Commission were published in Year Book No. 37, pages 220-4.)

With most other Commonwealth countries, the Commission is a member of the Commonwealth Telecommunications Organisation, the purpose of which is to promote the efficient exploitation and development of the Commonwealth external telecommunications system; it is a three-tier structure comprising the Commonwealth Conference on Telecommunications, the Commonwealth Telecommunications Council and the Commonwealth Telecommunications Bureau. The Commonwealth Telecommunications Council is the continuing management body of the Organisation with the role of promoting the purpose of the Organisation and carrying out the policies agreed by Governments. The Commonwealth Telecommunications Bureau is the Secretariat for the Organisation and functions under the control and direction of the Council.

The 1972 Commonwealth Telecommunications Conference reviewed the working of the Commonwealth Telecommunications Organisation in the light of experience and recommended new collaborative financial arrangements governing the use of the Commonwealth telecommunications systems. With the adoption of the recommendations of the 1972 Conference by member Governments, the Commonwealth Telecommunications Organisation Financial Agreement 1969 was replaced on 1 April 1973 by the Commonwealth Telecommunications Organisation Financial Agreement 1973.

In association with the Post Office within Australia and with communication carriers in other Commonwealth and foreign countries the Commission provides public message telegram, telephone, telex, phototelegram, leased circuit and switched data services to most countries and places throughout the world. International television programs are provided by means of satellite communication facilities with countries operating earth stations, while the switched data service is available to a number of countries.

To meet Australia's increasing demand for overseas communication channels, and because of limitations to performance and capacity inherent in telegraph cables and high frequency radio systems, the Commission, in partnership with the overseas telecommunications authorities of Britain, Canada and New Zealand, installed a large capacity telephone cable across the Pacific Ocean, connecting Australia, New Zealand and Canada via Suva and Honolulu. The cable (COMPAC) was opened in December 1963 and forms part of a British Commonwealth large capacity cable scheme, in which a complementary cable between Britain and Canada (CANTAT) was officially opened in December 1961. The two cable connections are linked across Canada by a microwave system. The Commonwealth cable system feeds into the United States of America network at Hawaii and into the European network at London.

The South-East Asia cable project (SEACOM), extending the large capacity telephone cable system from Sydney to Singapore and Kuala Lumpur via Cairns, Madang, Guam, Hong Kong, and Kota Kinabalu, was opened for service on 30 March 1967.

The Commonwealth Cable Management Committee, comprising representatives of Britain, Canada, Australia, New Zealand, Malaysia and Singapore, administers COMPAC and SEACOM.

In August 1964, Australia became a foundation member of the International Satellite Organisation (INTELSAT), a partnership of nations concerned in establishing a global communications, satellite system. Australia has an ownership share of 2.7 per cent making it the ninth largest contributor among the 82 INTELSAT member countries, and through the O.T.C. Australia is represented on the INTELSAT board of governors, which is the management board of INTELSAT.

The Interim Agreements under which INTELSAT has operated in the period since 1964 were superseded in February 1973 by permanent arrangements, which are embodied in two inter-related Agreements. The first, an inter-governmental agreement signed by the Australian Government, outlines the principles and objectives of the organisation and defines the basic organisational arrangements. The second, the Operating Agreement, signed by the O.T.C. as the designated Australian telecommunications entity, provides the basis for the operation and management of the INTELSAT system.

The INTELSAT system comprises satellites located over the Atlantic, Pacific and Indian oceans. At the beginning of 1973 these satellites were providing the equivalent of 3,763 two-way telephone circuits and on demand television service between 81 earth stations located in 49 countries.

In March, 1968, a satellite earth station at Moree, New South Wales, owned and operated by the Commission, commenced commercial communications, including a capability for television transmission/reception. This station, which operates to the Pacific Ocean INTELSAT satellite positioned in a stationary orbit 22,300 miles above the equator, was the first in Australia constructed as a 'standard' station of the INTELSAT network, and carries direct circuits between Australia and other countries in the Pacific region. The link with Japan, the first by satellite from Australia to an Asian country, was established for commercial operation on 14 March, 1969.

The completion of the new standard earth stations at Carnarvon (Western Australia) and Ceduna (South Australia) in 1969 and a significant expansion of facilities at the earth station at Moree (N.S.W.) provided increased telecommunication services via satellite.

The original non-standard station in Carnarvon (opened in 1967) is now used solely for telemetry, tracking and command (T.T. & C.) functions under contract with the INTELSAT organisation. The T.T. & C. function provides for four such stations to be spaced around the world so that any INTELSAT satellite can be viewed and controlled no matter where it may be. These stations keep a continuous check of the position of each satellite and its functioning by means of signals transmitted by the satellite. When required, signals are transmitted to a satellite to control the direction of its antenna and to change its orbital position. During launches, these stations transmit the commands which fire the satellite motor to place it in final orbit. The Interim Communications Satellite Committee selected the Carnarvon station for this purpose after calling competitive tenders from earth station owners in the coverage zone of the Indian Ocean and Pacific Ocean satellites.

The second Carnarvon station, operating via the Pacific Ocean INTELSAT satellite, provides a link for the National Aeronautics and Space Administration (NASA) between its Carnarvon space tracking stations and the United States. The earth station at Ceduna, operated through the Indian Ocean INTELSAT satellite, offers services to earth stations in the United Kingdom, Indonesia, India and other countries in the coverage area of the Indian Ocean satellite.

#### International telecommunication traffic

Particulars of the volume of international telegraph services, originating and terminating in Australia, during the years ended 31 March 1971 and 1972 are shown in the following table.

#### INTERNATIONAL TELEGRAPH SERVICES: AUSTRALIA, YEARS ENDED 31 MARCH 1971 AND 1972

### Coastal stations

The Overseas Telecommunications Commission operates fourteen coastal radio stations at points around the Australian coast, three on the Papua New Guinea coast and one at Norfolk Island. During the year ended 31 March 1972 the coastal radio service handled 6,345,837 paid words to ships and 4,212,574 words from ships. Ship calls over the radiotelephone service extended over 143,687 paid minutes.

### Radiocommunication stations authorised

At 30 June 1972 there were 165,063 civil radiocommunication stations authorised for operation in the Commonwealth and its Territories. Of these, 6,368 were stations established at fixed locations, 13,809 were land stations which were established at fixed locations for communication with mobile stations, 25 space and broadcasting stations, 138,339 were mobile stations and 6,522 amateur stations. Particulars of broadcasting stations and broadcast listeners' licences are shown on pages 388 and 390 respectively.

## BROADCASTING AND TELEVISION

Broadcasting and television services in Australia operate under the *Broadcasting and Television Act 1942-1972* and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service, and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board. Licence fees for commercial broadcasting and television stations are payable under the *Broadcasting Stations Licence Fees Act 1964-1966* and the *Television Stations Licence Fees Act 1964-1966* respectively.

Particulars of the composition, functions and responsibilities of the Australian Broadcasting Control Board are shown in Year Book No. 51, pages 594-5. The functions of the Board as shown therein were subsequently amended by repealing the Board's power to regulate the establishment and operation of networks. Pursuant to the *Broadcasting and Television Act 1942-1972*, the Australian Broadcasting Commission now consists of nine members, one of whom shall be a woman.

### Broadcasting services

#### The National Broadcasting Service

In sound broadcasting the programs of the National Broadcasting Service are provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department.

*Technical facilities.* At 30 June 1972 the National Broadcasting Service comprised eighty-one transmitting stations, of which seventy-five were medium frequency and six high frequency.

The medium-frequency transmitters operate in the broadcast band 530 to 1,590 kilohertz. The high-frequency stations, using frequencies within the band of three to thirty megahertz, provide services to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland.

Many of the programs provided by country stations are relayed from the capital cities, high-quality program transmission lines being used for the purpose. A number of program channels are utilised to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

At 30 June 1972 sixty-three of the Australian medium-frequency stations were situated outside the six State capital cities.

*Program facilities.* The programs of the Australian Broadcasting Commission cover a wide range of activities. The proportion of broadcasting time allocated to the various types of program during 1971-72 was as follows: classical music, 24.6 per cent; entertainment, 31.4 per cent; news, 9.0 per cent; sporting, 5.5 per cent; light music, 1.7 per cent; spoken word, 6.9 per cent; drama and features, 4.3 per cent; education, 3.2 per cent; Parliament, 4.7 per cent; religious, 2.8 per cent; young people's programs, 1.4 per cent; rural, 2.0 per cent; and presentation, 1.8 per cent. Further particulars of the operations of the Australian Broadcasting Commission in respect of music, drama and features, youth education, talks, rural broadcasts, news, and other activities are shown in Year Book No. 51, pages 596-7.

### The Commercial Broadcasting Service

Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is \$50 on the grant of the licence, and thereafter \$50 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Broadcasting Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

### Overseas Broadcasting Service

There are seven high-frequency stations at Shepparton and two at Lyndhurst, Victoria, and three repeater stations at Darwin, Northern Territory, which provide the overseas service known as 'Radio Australia'. As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department, and their programs are arranged by the A.B.C. The programs, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to South-East Asia and the Pacific. The overseas audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

Tables showing the call sign, location, frequency, and aerial power of national and commercial broadcasting stations in operation at 30 June 1971 are shown in *Transport and Communication*, Bulletin No. 62.

## Television services

### The National Television Service

The National Television Service is provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department. The first national station (ABN Sydney) commenced regular transmission on 5 November 1956. At 30 June 1972 fifty-two stations were operating, excluding thirty-eight translator stations.

The television programs provided by the Australian Broadcasting Commission cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30 June 1972 was as follows: drama, 23.7 per cent; public interest, 12.0 per cent; sporting 10.5 per cent; news, 5.9 per cent; variety and acts, 7.2 per cent; education, 27.4 per cent; musical performances, 0.4 per cent; religious, 1.7 per cent; rural, 1.0 per cent; special arts and aesthetics, 0.5 per cent; presentation, 6.0 per cent. The average weekly transmission time for the fifty-two national television transmitters was eighty-five hours during the year ended 30 June 1972.

### The Commercial Television Service

Commercial television stations are operated under licences granted and renewed by the Postmaster-General. The first commercial station (TCN Sydney) commenced regular transmission on 16 September 1956. At 30 June 1972 forty-eight television stations were operating.

The initial grant of a licence is for a period of five years and thereafter the licence is renewable annually. The fee payable is \$200 for the first year and thereafter \$200 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Television Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

### Colour television

The Government has announced that colour television will be introduced into Australia from 1 March 1975.

### Television stations

During the year ended 30 June 1972, four new national television stations commenced regular transmissions, namely ABMQ Channel 9, Mary Kathleen in Queensland, ABCNW Channel 7, Carnarvon in Western Australia, ABKT Channel 11, King Island in Tasmania and ABD Channel 6, Darwin in Northern Territory. Two new commercial television stations commenced regular transmission, ITQ Channel 8, Mt Isa in Queensland and NTD Channel 8, Darwin in the Northern Territory. The following table shows the number of television stations in operation at 30 June 1972.

TELEVISION STATIONS: STATES AND TERRITORIES

Tables showing the call sign, location, frequencies, polarisation, aerial power, and weekly hours of transmission of National and Commercial television stations in operation at 30 June 1971 are shown in *Transport and Communication Bulletin*, No. 62.

### Broadcast listeners' and television viewers' licences

Broadcast listeners', television viewers', and combined receiving licences are issued at post offices in accordance with the provisions of the *Broadcasting and Television Act 1942-1972*, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence or a television viewer's licence, whichever is appropriate, authorises the operation of any broadcast receiver or any television receiver, which is: (a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and is ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of that holder, or a member of his family, and is ordinarily kept at that address when not in use. A person who has both broadcast and television receivers at the one address may take out a combined receiving licence, provision for which was introduced by legislation effective from 1 April 1965.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school, and at a concession to certain classes of pensioners. Receivers provided for the use of inmates of an approved institution (including a hospital) are covered by an appropriate licence held by the institution. Persons residing in Zone 2 may also be granted a broadcast listener's licence at a reduced rate. Zone 1 is the area within 250 miles of specified broadcasting stations and Zone 2 is the remainder of Australia.

Each broadcast or television receiver let out on hire (except under a hire purchase agreement) must be covered by a hirer's licence held by the person or firm from whom the receiver is hired. The keeper of a lodging-house (which includes a hotel, motel, boarding-house, or any other premises where lodging or sleeping accommodation is provided for reward) must take out a lodging-house licence for each broadcast or television receiver provided by the proprietor in any room or part of the lodging-house occupied or available for occupation by lodgers.

The fees payable for the various classes of licence from 1 October 1972 are as follows.

#### BROADCAST LISTENERS' AND TELEVISION VIEWERS' LICENCES RATES

Licence		Ordinary rate	Pensioner rate
		\$	\$
Broadcast listener's licence and hirer's licence for a broadcast receiver . . . . .	Zone 1	8.00	1.00
	Zone 2	4.25	0.70
Lodging-house licence for a broadcast receiver . . . . .	Zone 1	8.00	..
	Zone 2	4.25	..
Television viewer's licence and hirer's licence for a television receiver . . . . .		19.00	3.00
Lodging house licence for a television receiver . . . . .		19.00	..
Combined receiving licence . . . . .		26.50	4.00

#### Numbers of broadcast listeners' and television viewers' licences

##### BROADCAST LISTENERS' LICENCES IN FORCE(a): STATES, 1968 TO 1972

30 June—	N.S.W.(b)	Vic.	Qld	S.A.(c)	W.A.	Tas.	Aust.
1968 . . . . .	934,877	724,711	371,637	290,051	181,356	77,228	2,579,860

1972 . . .	1,088,648	811,573	418,688	318,357	218,783	82,609	2,938,658

(a) Includes short-term hirers' licences and combined broadcast listeners' and television viewers' licences. (b) Includes Australian Capital Territory. (c) Includes Northern Territory.

The numbers of combined receiving licences included in both of the foregoing tables as at 30 June 1972 are: New South Wales, 891,832; Victoria, 699,652; Queensland, 335,199; South Australia 248,820; Western Australia, 174,798; Tasmania, 69,613; Australia, 2,419,914.

Television hirers' licences (including short term) (included above) at 30 June 1972 were: New South Wales, 104,704; Victoria, 38,845; Queensland, 41,956; South Australia, 49,553; Western Australia, 29,655; Tasmania, 6,411; Australia, 271,124.

## Revenue received from broadcast and television licence fees

The following table shows the revenue received from broadcast listeners' licence fees, television viewers' licence fees and from fees for combined licences during the years 1967-68 to 1971-72.

REVENUE RECEIVED FROM BROADCAST AND TELEVISION LICENCE FEES  
STATES, 1967-68 TO 1971-72  
(\$'000)

Year	N.S.W.(a)	Vic.	Qld	S.A.(b)	W.A.	Tas.	Aust.
1967-68 . . .	14,554	11,265	5,321	4,219	2,666	1,157	39,182
1968-69 . . .	16,700	12,747	6,306	4,930	3,127	1,314	45,125
1969-70 . . .	17,782	13,795	6,694	5,238	3,483	1,397	48,389
1970-71 . . .	17,912	14,023	6,921	5,586	3,689	1,429	49,562
1971-72 . . .	22,445	17,165	8,807	7,057	6,642	1,670	61,785

(a) Includes Australian Capital Territory. (b) Includes Northern Territory.

## TRAVEL

An article outlining the history and growth of travel and the structure of tourist organisations in Australia, prepared by the Australian National Travel Association, appeared in Year Book No. 52, pages 1158-84. The following pages contain statistics of travel to and from Australia, together with some descriptive matter. Current statistics on overseas travel are published in monthly, quarterly and annual mimeographed statements *Overseas Arrivals and Departures*.

## Overseas travel

Statistics about travellers to and from Australia are classified in the first instance by the actual or intended length of stay in Australia or in a country abroad; this classification distinguishes between permanent and temporary movement.

Statistics of permanent arrivals (immigrants) and permanent departures (emigrants) are shown in Chapter 7—Population.

## Traveller statistics (overseas visitors and Australian residents)

Statistics of temporary arrivals and departures which are in the nature of travel statistics are included in this chapter. They comprise two main categories.

- (i) *Short-term.* Those who intend to stay or have stayed in Australia (overseas visitors) or in a country overseas (Australian residents) for less than a year.
- (ii) *Long-term.* Those who intend to stay or have stayed in Australia (overseas visitors) or in a country overseas (Australian residents) for a year or more, but not permanently.

*Short-term* movement includes Australian troops, regardless of their length of stay abroad, and Australian residents who may be away for more than a year but whose actual or intended stay in any one country is less than a year. It excludes persons who arrive in and depart from Australia on the same ship's voyage or on the same flight (variously called direct transit or 'through' passengers) or who change flights without leaving the airport's transit area, passengers on pleasure cruises commencing and finishing in Australia (see page 397), and all crew. However, it includes persons who pass through the Customs barrier and declare the purpose of their visit to Australia to be 'in transit'. Short-term visitors are more numerous than long-term visitors and have come to be regarded as 'tourists' by many users of the statistics.

During the period October 1967 to December 1971, 276,885 United States troops came to Australia on rest and recreation leave. The last of them completed their leave in January 1972. For statistical purposes they were classified as short-term visitors travelling by air for holiday purposes and their country of residence and country of embarkation or disembarkation were shown as 'Asia—other'.

### TRAVELLER STATISTICS—SUMMARY, AUSTRALIA 1968 TO 1972

Year	Overseas Visitors				Australian Residents			
	Short-term		Long-term		Short-term		Long-term	
	Arriving in Australia	Departing from Australia	Arriving in Australia	Departing from Australia	Departing from Australia	Returning to Australia	Departing from Australia	Returning to Australia
1968 . . .	299,889	311,181	23,473	12,617	251,880	252,773	51,386	36,387
1969 . . .	361,277	372,747	26,867	15,602	288,805	288,990	59,027	38,308
1970 . . .	416,128	431,039	31,194	18,727	352,526	351,929	64,215	42,099
1971 . . .	432,393	450,022	30,500	21,433	413,917	412,598	67,699	47,782
1972 . . .	426,403	441,320	26,559	24,251	504,519	490,962	66,853	54,278

In addition to the basic classification of travellers shown above, certain other characteristics are ascertained. These characteristics are as follows.

- (i) For all travellers: sex, age, marital status, nationality, country of birth, occupation, intended and actual length of stay, purpose of journey and mode of transport.
- (ii) For arrivals: country of last residence, country of embarkation, State of intended residence and State of disembarkation.
- (iii) For departures: country of intended residence, country of disembarkation, State of residence in Australia and State of embarkation.

The categories shown in the previous table are cross-classified by the characteristics listed above and the resulting statistics are shown in considerable detail in the quarterly and annual bulletins *Overseas Arrivals and Departures* (4.1 and 4.23) and in the annual bulletin *Demography* (4.9). Certain unpublished information is available on request. Selected traveller statistics are shown in the following tables.

### Long-term travel

Many long-term travellers travel for business or education and intend to follow an occupation in the country visited during their stay in Australia or overseas. This is evident from the statistics shown in the table on page 394 which classify travellers according to the purpose of their journey. Statistics of the occupations of long-term visitors arriving in Australia and Australian residents departing overseas (long-term) are of general interest and are shown in the following table.

#### OVERSEAS VISITORS ARRIVING AND AUSTRALIAN RESIDENTS DEPARTING, BY OCCUPATION AND SEX: AUSTRALIA, 1972

Occupation group	Overseas visitors arriving			Australian residents departing		
	Males	Females	Persons	Males	Females	Persons
Professional, technical, and related workers .	2,431	1,979	4,410	5,433	5,385	10,818
Administrative, executive, and managerial workers . . . . .	958	104	1,062	1,725	223	1,948
Clerical workers . . . . .	519	1,908	2,427	2,158	6,124	8,282
Sales workers . . . . .	521	193	714	1,028	641	1,669
Farmers, fishermen, hunters, timber getters, and related workers . . . . .	444	15	459	499	32	531
Miners, quarrymen, and related workers . .	69	..	69	155	..	155
Workers in transport and communication .	508	105	613	975	247	1,222
Craftsmen and production-process workers .	2,620	218	2,838	6,593	883	7,476

Persons not in the labour force—						
Children and students . . . . .	3,892	3,132	7,024	8,869	8,489	17,358
Other . . . . .	318	3,455	3,773	618	10,083	10,701
<b>Total . . . . .</b>	<b>14,763</b>	<b>11,796</b>	<b>26,559</b>	<b>33,545</b>	<b>33,308</b>	<b>66,853</b>

(a) Labourers (so described), not elsewhere classified and freight handlers, including waterside workers.

### Direct transit travellers

As indicated on page 392, all the preceding figures in this section exclude persons who arrive in and depart from Australia on the same ship's journey or on the same flight or who do not leave the airports' transit area. Persons thus excluded are not normally considered visitors to Australia. For instance, settlers or other persons going to New Zealand, Papua New Guinea, or other neighbouring countries, or leaving such countries may travel through Australia on their way. On the other hand, all persons visiting Australia on cruise vessels, which may remain in Australian waters for a considerable time, are also treated as direct transit travellers and are thus excluded from the figures shown on previous pages. Information about direct transit passengers on ships calling at Australian ports is given in the next table.

#### OVERSEAS SHIPPING PASSENGERS IN DIRECT TRANSIT(a): AUSTRALIA, 1970 TO 1972

Approximate period from first to last Australian port (days)	1970		1971		1972	
	Passengers	Passenger days	Passengers	Passenger days	Passengers	Passenger days
Less than 3 . . . . .	3,942	5,057	3,965	6,316	5,066	8,267
3 and less than 5 . . . . .	4,701	14,924	2,429	8,592	3,752	12,211
5 and less than 7 . . . . .	6,516	37,445	2,402	14,397	2,944	17,348
7 and less than 9 . . . . .	3,745	28,107	7,568	56,586	7,483	54,718
9 and less than 11 . . . . .	3,362	30,668	3,964	37,000	3,155	29,418
11 and less than 22 . . . . .	2,267	26,304	580	7,765	263	3,615

<b>Total . . . . .</b>	<b>24,694</b>	<b>147,011</b>	<b>20,943</b>	<b>131,680</b>	<b>22,687</b>	<b>126,480</b>

(a) Persons who arrived in and departed from Australia on the same ship's voyage.

### Sea cruises from Australia

The foregoing statistics exclude passengers on pleasure cruises commencing and finishing in Australia on ships not then engaged in regular voyages, and to which modified documentation requirements apply. Until 13 June 1972 such cruises were restricted to a period not exceeding 30 days and to ports in the South-West Pacific. On that date the period was extended to 6 weeks and the ports visited to those adjoining the Pacific or Indian oceans but excluding those on the east coast of Africa or the west coast of the Americas. The numbers of cruises and cruise passengers during the last three years are shown in the following table.

SHORT PLEASURE CRUISES IN THE SOUTH-WEST PACIFIC  
AUSTRALIA, 1970 TO 1972

Duration of cruise in days(a)	1970		1971		1972	
	Cruises	Passengers	Cruises	Passengers	Cruises	Passengers
Less than 7 . . . . .	3	3,543	2	1,672	..	..
7 and less than 10 . . . . .	3	2,993	3	3,443	6	6,604
10 and less than 13 . . . . .	18	18,912	7	6,568	14	12,574
13 and less than 16 . . . . .	12	11,725	31	28,195	30	20,999
16 and less than 19 . . . . .	9	4,514	20	2,542	8	4,359
19 and less than 22 . . . . .	..	..	2	1,742	2	740
22 and less than 31 . . . . .	3	1,897	..	..	3	1,509
31 and over . . . . .	..	..	..	..	1	249
<b>Total . . . . .</b>	<b>48</b>	<b>43,584</b>	<b>65</b>	<b>44,162</b>	<b>64</b>	<b>47,034</b>

(a) The duration of a cruise is the period during which the ship is absent from Australia.

### Tourist organisation

The Australian Tourist Commission was established by the Commonwealth Government under the *Australian Tourist Commission Act* 1967. Its objectives are the encouragement of visits to Australia, and travel in Australia by people from other countries. The seven man Commission comprises a chairman appointed by the Commonwealth Government; two appointees to represent private industry, selected by the Commonwealth Government from a panel of names put forward by the Australian National Travel Association; two other voting members, at least one of whom is an officer of the Public Service of the Commonwealth; and two non-voting representatives nominated by the State Governments.

For 1971-72 the Commonwealth Government provided \$2,650,000 to the Commission, to be spent, mainly in overseas countries, on advertising campaigns and in associated promotional activities. The Commission brings to Australia travel agents, writers, photographers and other publicists to see at first hand what the country has to offer visitors. It takes no part in the detailed organisation of tourist activities in Australia but is a member of the Australia and New Zealand Government Tourist Conference and provides the secretariat for the Tourist Ministers' Council. The Minister for Tourism and Recreation is a member of the Tourist Ministers' Council together with Ministers in charge of tourism in the six States, the Northern Territory and Papua New Guinea. The Commission has its Head Office in Melbourne and branch offices in London, Frankfurt, New York, Chicago, Los Angeles, Auckland, Tokyo and Sydney.

The Australian National Travel Association, which is described on pages 1161-2 of the special article Travel and Tourism in Year Book No. 52, was formerly responsible, *inter alia*, for the promotion overseas of Australia as a tourist destination. Since the creation of the Australian Tourist Commission, the Association concentrates on the encouragement of the growth and development of travel and tourism within Australia, and the improvement of the standard and variety of facilities and services provided by private enterprise for the use of both domestic and overseas visitors. It acts as a co-ordinating body for its members, provides a clearing house for information, and conducts surveys into aspects of local tourist activity. The Association is governed by a Board representative of travel and tourist interests on which the Commonwealth Government is no longer represented. The Association's office is located in Sydney.

## CHAPTER 13

### WELFARE SERVICES

This chapter relates to welfare services other than those concerned specifically with education, health and repatriation. The latter are dealt with, in the main, in the relevant chapters of this Year Book. Apart from a summary of government expenditure on welfare services, the chapter is devoted to a description in some detail of the services provided by the Commonwealth. For information on the many important welfare services provided by State and local governments, especially in the fields of child and Aboriginal welfare, reference should be made to the Year Books or Statistical Registers of the States and the annual reports of the State departments concerned. Information on pension and superannuation schemes provided for government and semi-government employees, mine workers, parliamentarians, and employees of private business is included in the chapter Private Finance.

There are numerous welfare services provided by charitable and other non-government institutions and organisations. There are institutions providing shelter and care for needy, aged, infirm or handicapped persons, neglected children, destitute persons, wayward boys and girls, and the like. Many organisations, too, provide aid in kind (food, clothing, etc.), auxiliary medical and nursing services, and other assistance to relieve suffering and hardship. Considerable work is also done by such organisations in the rehabilitation or establishment in the community of various types of people such as prisoners and migrants, and in the prevention and alleviation of cruelty and maltreatment of any sort. A brief description of the activities of such organisations is included at the end of this chapter.

Further information on subjects dealt with in this chapter is included in the annual bulletins *Australian National Accounts* (7.1); *Public Authority Finance: Commonwealth Authorities* (5.12); *Public Authority Finance* (5.33); *Public Authority Finance: State Governments; Social Services* (5.37). Current and summarised information on Commonwealth social services is contained in the *Quarterly Summary of Australian Statistics* (1.3) and the *Monthly Review of Business Statistics* (1.4).

#### Commonwealth expenditure on welfare services

This section deals with various government payments for the relief of the aged, indigent, infirm, widowed and unemployed, assistance to families, Aboriginal welfare, etc. For summary statements of cash payments to persons made by public authorities under various functional heads, see *Public Authority Finance* and other annual bulletins mentioned above. Expenditure by State governments

(a) State totals for New South Wales and South Australia also include most of the unallocable expenditure on cash benefits to persons resident in the Australian Capital Territory and the Northern Territory respectively. (b) For details see Chapter 22, Rural Industry. (c) Expenditures on this item are unallocable and are included in total only.

on certain welfare services is shown on page 418. Commonwealth expenditure on welfare services is financed through the National Welfare Fund from general or special departmental appropriations, other trust funds, and specific purpose grants to the States. Outlay by Commonwealth Authorities on Aboriginal advancement is shown on page 417. Analyses of Commonwealth expenditure by function and economic type are given in Chapter 18—Public Authority Finance and, in more detail, in the bulletin *Public Authority Finance: Commonwealth Authorities*. The table on the previous page sets out details of welfare cash benefits to persons during the year 1971–72 and the following table shows details for the five years 1967–68 to 1971–72.

(a) For details see Chapter 22, Rural Industry.

### Commonwealth social services

Under the provisions of Section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:

'(xxiii) Invalid and old age pensions:

'(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:'.

The latter paragraph was inserted in the Constitution after being accepted by the electors at a referendum in 1946.

Before 1947, Commonwealth social service benefits were paid under various Acts. On 1 July 1947 with the passage of the *Social Services Consolidation Act 1947*, all Acts providing social service benefits were amalgamated. The Act is at present styled the *Social Services Act 1947–1972*.

### Reciprocal social services agreements with other countries

*New Zealand.* An agreement between the Governments of Australia and New Zealand for reciprocity in social services came into operation on 3 September 1943 and was amended from 1 July 1949. The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment, and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence. Residence in one country may be treated as residence in the other country in relation to entitlement to benefits in which a residential qualification applies. Persons from one country taking up a permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country. Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

*United Kingdom.* A reciprocal agreement on social services between the United Kingdom and Australia came into operation on 7 January 1954. Amendments became effective from 1 April 1958 and 1 October 1962. Under the current agreement residence in one country may be treated as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies. Australians going to the United Kingdom for permanent residence are treated in the United Kingdom as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits. There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

### Social service benefits provided

The social service benefits provided by the Commonwealth Government under the *Social Services Act 1947-1972*, and the date on which each came into operation, are:

Age pension . . . . .	1 July 1909
Invalid pension . . . . .	14 October 1910
Allowances for wife and first child of pensioners who are invalided . . . . .	8 July 1943
Allowances for second and subsequent children of pensioners who are invalided . . . . .	11 October 1956
Allowances for wife and children of other age pensioners	14 October 1965
Guardians' allowances for widowed and other unmarried age and invalid pensioners with children in their care	14 October 1965
Special payments to a surviving pensioner . . . . .	10 October 1968
Widows' pensions . . . . .	30 June 1942
Supplementary assistance (age, invalid and widows' pensions) . . . . .	15 October 1958
Supplementary allowance (long-term sickness benefit) .	28 September 1970
Widows' pensions—allowances for second and sub- sequent children . . . . .	2 October 1956
Funeral benefit . . . . .	1 July 1943
Maternity allowance . . . . .	10 October 1912
Child endowment . . . . .	1 July 1941
Child endowment—student children . . . . .	14 January 1964
Unemployment benefit . . . . .	1 July 1945
Sickness benefit . . . . .	1 July 1945
Sickness benefit (long-term) . . . . .	28 September 1970
Special benefit . . . . .	1 July 1945
Sheltered employment allowance . . . . .	30 June 1967
Commonwealth Rehabilitation Service . . . . .	10 December 1948
Training scheme for widow pensioners . . . . .	27 September 1968
Wife's pension . . . . .	5 October 1972

### Age and invalid pensions

Age pensions are payable to men, sixty-five years of age and over, and women, sixty years of age and over, who have lived in Australia continuously for at least ten years, which need not be immediately prior to the date of claim for a pension. If a person has completed five years, but not ten years, continuous residence, and has lived in Australia for periods which exceed a total of ten years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of ten years. Any periods of absence during which a person's home remains in Australia, and absences in certain other circumstances, are counted as residence, and any absence in an external Territory of the Commonwealth, while not counting as residence, does not interrupt continuity of residence in Australia. Residence in New Zealand or the United Kingdom may be treated as residence in Australia.

Invalid pensions are payable to persons, sixteen years of age and over, who have lived in Australia for a continuous period of five years (including certain absences) at any time, and who are permanently incapacitated for work to the extent of at least eighty-five per cent, or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, the residence qualification is the same as for an age pension.

A wife's pension is payable to the wife of a pensioner not entitled, in her own right, to an age, invalid or service pension. There is no residence qualification to be met.

*Current rates of pension.* The maximum standard rate was increased to \$1,040 per annum (\$20.00 a week) from 5 October 1972. This is payable to a single, widowed or divorced pensioner, or a married pensioner whose spouse is not receiving a pension or a tuberculosis allowance. The standard rate

may also be paid to each of a married pensioner couple who are living apart for an indefinite period due to illness or infirmity of either or both. The maximum rate for a married pensioner couple was increased to \$1,794 per annum (\$34.50 a week) from 5 October 1972, (i.e., \$897 per annum or \$17.25 a week each). For a married person whose spouse receives a tuberculosis allowance, or a service pension, the maximum rate is also \$897 per annum (\$17.25 a week).

Additional pension for each dependent child under 16 years is payable, subject to the means test, at the rate of \$234 per annum (\$4.50 a week). Widowed or other unmarried age or invalid pensioners with a dependent child may receive a guardian's allowance up to \$4 a week, or up to \$6 a week if the child is under 6 years of age or is an invalid child requiring full-time care. Guardian's allowance is also subject to the means test. Eligibility for the additional pension for children is extended to include a child over sixteen years until he reaches twenty-one years, provided he is wholly or substantially dependent on the pensioner and is receiving full-time education at a school, college or university. Supplementary assistance of up to \$4 a week, subject to a special means test, is available to pensioners receiving the maximum standard rate pension if they pay rent or pay for board and lodging or for lodging.

At 30 June 1972, 396,017 age and 96,745 invalid pensioners in the standard rate category were receiving a pension of \$18.25 a week or more and 162,300 age and invalid pensioners were in receipt of supplementary assistance. In the married rate category 241,306 age and 21,919 invalid pensioners were receiving a pension of \$16 a week or more.

On the death of one member of a married pensioner couple the surviving pensioner spouse becomes entitled to receive, for up to six fortnightly instalments, the equivalent of the two pensions that would have been paid if the spouse had not died. For the purpose of this provision the term 'pensioner' includes a person in receipt of age, invalid, wife's or service pension; a rehabilitation allowance; or a sheltered employment allowance.

A table showing the maximum rates of pension operating since 1 July 1909 at dates prior to 14 October 1965 is included on page 608 of Year Book No. 51. Details of the respective rates and allowances payable since 14 October 1965 are included in subsequent Year Books.

*Means test.* Age, invalid and wife's pensions (other than pensions paid to blind persons) are subject to a means test which applies to income and property. The rate of pension payable in any case depends on the claimant's *means as assessed*. When calculating means as assessed assets or property owned by the applicant are equated with income by treating each complete \$20 of assets above \$400 as equivalent to an income of \$2 a year. This amount is the property component. Means as assessed may consist entirely of the property component, entirely of income, or of various combinations of property component and income. The annual maximum rate of pension is affected when means exceed the allowable sum of:

For a single, widowed or divorced person . . . . .	\$1,040
For a married pensioner couple . . . . .	\$1,794 (\$897 each)

The effect of the means test in the case of a single, widowed or divorced person, is to reduce the annual maximum standard rate of pension by half of the amount of any means as assessed in excess of \$1,040. No pension is payable where the value of property is \$31,600 or more (\$35,760 or more if qualified for a guardian's allowance at the lower rate and \$37,840 if qualified for the guardian's allowance at the higher rate). Supplementary assistance is reduced by the amount by which means as assessed exceed \$52. For a pensioner couple, the combined maximum married rate of pension is reduced by half of any means as assessed in excess of \$1,794. No pension is payable where the value of property is \$54,640 or more.

Certain types of income are exempted. The main exemptions are: income from property; gifts or allowances from children, parents, brothers, or sisters; benefits from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organisations. A pensioner's income may also be reduced by up to \$312 per annum (\$6 a week) for each dependent child under sixteen years (twenty-one years if a full-time student).

A special concession is made available to recipients of superannuation pensions and annuities, the annual rate of such payments being converted to a property equivalent for means test purposes by reference to a specific conversion factor. This conversion is to the pensioner's advantage in the majority of cases but where this is not so, the payments continue to be treated as income.

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to \$1,500) of life insurance policies, the capital value of annuities or contingent interests, and the value of reversionary interests.

For the purposes of the means test the income and property of a married person are considered to be half the total income and property of the husband and wife unless they are legally separated or in other special circumstances.

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes allowances and supplementary assistance. (c) Includes supplementary assistance, additional pensions for children, and guardian's allowance, where applicable. (d) The 1967-68 figures are adjusted by reducing the number of invalid pensioners by 3,178 and increasing the number of age pensioners by 1,485 following the introduction of computer processing in New South Wales. (e) The 1968-69 figures are adjusted by reducing the number of invalid pensioners by 1,583 and increasing the number of age pensioners by 1,223 following the introduction of computer processing in Victoria.

**Widows' pensions**

*Rates and conditions.* Widows' pensions are payable according to the following classes. The rates shown are those payable from 10 October 1972 when widows' pensions were increased.

**Class 'A'.** A widow who has the custody, care and control of one or more eligible children under the age of sixteen years or eligible student child—The maximum amount payable is the standard rate pension of \$1,040 per annum (\$20 a week) and a mother's allowance of up to \$208 per annum (\$4 a week) which is increased to \$312 per annum (\$6 a week) if caring for a child under six years of age or an invalid child requiring full-time care. In addition, extra pension of \$234 per annum (\$4.50 a week) for each child under sixteen years is payable subject to the means test. Payment may be made for a child over sixteen years until he or she reaches twenty-one years, if he or she is wholly or substantially dependent on the widow and is receiving full-time education at a school, college or university.

**Class 'B'.** A widow who has no eligible children under sixteen years of age or full-time student children in her custody, care and control, and who is not less than fifty years of age or who, after having attained the age of forty-five years, ceased to receive a Class 'A' widow's pension because she no longer had the custody, care and control of a child—The maximum amount payable is \$897 per annum (\$17.25 a week).

**Class 'C'.** A widow who is under fifty years of age and has no eligible children under the age of sixteen years, or full-time student children, in her custody, care and control, but is in necessitous circumstances within the twenty-six weeks after the death of her husband—\$17.25 a week for not more than twenty-six weeks after the death of her husband. If the widow is pregnant this period may be extended until the child's birth. She may then become eligible for a Class 'A' widow's pension.

Widow pensioners may receive supplementary assistance of up to \$208 per annum (\$4 a week), subject to a special means test, if they pay rent or pay for board and lodging or for lodging.

For classes 'A' and 'B' the term 'widow' includes a wife who has been deserted by her husband without just cause for a period of at least six months; a divorcee; a woman whose husband has been imprisoned for at least six months; and a woman whose husband is in a mental hospital. Certain dependent females also may qualify for 'A', 'B' or 'C' Class pensions.

A period of residence in Australia before claiming pension is not required if a woman and her husband were residing permanently in Australia when she became a widow. In other circumstances, five years continuous residence immediately preceding lodgment of the claim is required, but this is waived in the case of a woman whose husband has died overseas if she has resided continuously in Australia for ten years at any time and returns to Australia to live.

A widow's pension is not payable to a woman receiving an age or invalid pension, a sheltered employment allowance, a tuberculosis allowance, a war widow's pension, nor to a deserted wife or a divorcee who has not taken reasonable action of obtain maintenance from her husband or former husband.

*Means test.* Widows' pensions are subject to a means test on income and property. The rate of pension payable in any case depends on the claimant's *means as assessed*. When calculating the means as assessed of a claimant for Class 'A' widow's pension, no amount in respect of property is taken into account where the value of the widow's property is \$4,500 or less. If the value of property exceeds \$4,500 the widow's total assets or property are equated with income by treating each complete \$20 of assets above \$2,000 as equivalent to an income of \$2 a year. This amount is the property component. Means as assessed may consist entirely of the property component, entirely of income, or of various combinations of the property component and income. The method for calculating the means as assessed of a claimant for Class 'B' widow's pension is the same as for single, widowed or divorced claimants for age or invalid pension (see page 402). In the case of a Class 'A' widow the maximum rate of pension plus the appropriate mother's allowance and additional pension for children, are affected when the widow's means as assessed exceed the allowable sum of \$1,040. The annual maximum standard rate of pension plus the allowances mentioned above are reduced by half of the amount of any means as assessed in excess of \$1,040. No pension is payable where the widow has property valued at \$37,360 or more, or if caring for a child under six years of age or an invalid child requiring full-time care, where she has property valued at \$39,440 or more. For a Class 'B' widow the annual maximum rate of pension is reduced by half of the amount of any means as assessed in excess of \$1,040. No pension is payable where the widow has property valued at \$28,740 or more. There is no specific means test for the Class 'C' pension, which is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions. Supplementary assistance is reduced by the amount by which *means as assessed* exceed \$52.

The average age of new widow pensioners admitted during 1971-72 was: Class 'A', 36.0 years; Class 'B', 57.2 years; Class 'C', 43.0 years; and for all classes, 43.8 years.

(d) During 1967-68, a reduction of 769 Class 'A' and 233 Class 'B' pensioners was made following the introduction of computer processing in New South Wales.

For details of training scheme for widow pensioners, see page 413.

**Funeral benefits**

A benefit of up to \$40 is payable to an eligible age, invalid or widow pensioner who is liable for the funeral costs of another such deceased pensioner, a deceased child or a deceased spouse; a benefit of up to \$20 is payable to any (other) person liable for the funeral costs of a deceased age or invalid pensioner in respect of whose burial a funeral benefit may be granted.

Total cost of funeral benefits granted during 1971-72 was \$1,582,781.

**Maternity allowances**

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth health scheme. They are not subject to a means test.

A maternity allowance is payable to a woman who gives birth to a child if she resides, or intends to reside permanently in Australia and gives birth to the child in Australia, and to a woman who gives birth to a child on board a ship travelling to Australia if she intends to reside permanently in Australia, provided she receives no benefit similar to a maternity allowance from the country from which she came. A woman who gives birth to a child during a temporary absence from Australia may also be eligible. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia permanently. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least five and a half months.

*Rates of allowance.* The allowance is \$30 if the mother has no other children under sixteen, \$32 if she has one or two other children under sixteen, and \$35 if she has three or more other children under sixteen. In the case of multiple births the allowance is increased by \$10 for each additional child born. An advance payment of \$20 may be made four weeks before the expected date of birth. The balance is payable immediately after the birth.

**MATERNITY ALLOWANCES: CLAIMS PAID AT EACH RATE**

**Child endowment**

A person who is resident in Australia and has the custody, care, and control, of one or more children under the age of sixteen years or of a full-time student child over sixteen but under twenty-one years, or an approved institution of which children are inmates, is qualified to receive an endowment in respect of each such child. Full-time student children are those receiving full-time education at a school, college or university and who are not in employment or engaged in work on their own account. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months residence in Australia is required if the claimant and the child were not born here, but this requirement is waived if the Department of Social Security is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia. Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas.

*Rates of endowment.* Since 12 October 1971 the weekly rates have been: children under sixteen years—50 cents for the first or only child; \$1.00 for the second; \$2.00 for the third; and then increases of 25 cents for each subsequent child, making \$2.25 for the fourth, \$2.50 for the fifth and so on. For each eligible student child the rate is \$1.50. The rate payable for each child under sixteen years in an approved institution is \$2.00 a week.

*Number of claims and endowed children—children under sixteen years.* The number of families receiving child endowment at 30 June 1972 in respect of children under sixteen years was 1,843,478 an increase of 45,850 or 2.55 per cent during the year.

(a) All institutions approved for receipt of endowment.

The following table shows, as at 30 June 1972, the number of claims in force and the number of endowed children under sixteen years in family groups, classified according to the number of endowed children in the family group. The families included in the table are not necessarily made up entirely of the children of one marriage, but may include step-children, foster children, adopted children, and any other children in the custody, care and control of the claimant.

1970-71 . . . . .	1,797,628	196,999	469	4,155,930	207,499	198,467
1971-72 . . . . .	1,843,478	209,466	485	4,234,500	234,972	216,610

(a) Claims by families with children under sixteen and student children are shown in both columns. Information on the number of families having such dual claims is not available. (b) A number of endowments are paid every twelve weeks. During two years out of every three there are four such payments but every third year there are five. Figures for annual liability therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments. (c) Expenditure for this year includes five twelve-weekly payments for endowed children under 16 years.

**Unemployment and sickness benefits**

Unemployment and sickness benefits are paid to males over sixteen and under sixty-five years of age, and females over sixteen and under sixty years of age, who are unemployed or who are temporarily incapacitated for work and thereby suffer loss of income. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. There is a means test on income. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the *Repatriation Act 1920-1972* or a tuberculosis allowance, is ineligible to receive a benefit.

For unemployment benefit purposes, a person must establish that he is unemployed, that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration for employment with the Commonwealth District Employment Office is necessary. For sickness benefit purposes, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income. A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances.

*Rates of benefit.* The maximum weekly rates of unemployment and sickness benefit payable and the permissible income in respect of benefit periods which commenced on or after 19 February 1972 are as follows.

	<i>Maximum weekly rate</i>	<i>Permissible weekly income</i>
	\$	\$
Adult (21 and over) or married minor . . . .	17.00	6.00
Unmarried person, aged 18-20 years . . . .	11.00	3.00
Unmarried person, aged 16-17 years . . . .	7.50	3.00

The adult rate of benefit is payable to unmarried minors having no parent living in Australia.

Additional benefit of \$8 a week may be paid for a dependent spouse and \$4.50 a week for each child under sixteen years of age in a beneficiary's care. Additional benefit, at the same rate as that for a dependent spouse, may be paid where a woman is keeping house for a claimant who has one or more children under sixteen years of age in his care. It may be granted only if no such benefit is payable for his wife, and the housekeeper is substantially dependent on him but not employed by him.

After six consecutive weekly payments, sickness benefit may be increased to the appropriate long-term rate shown in the table below if the person receiving benefit is not in hospital, or is in hospital but has one or more dependants. The rates of benefits shown, have applied since 27 September 1972.

	<i>Maximum weekly rate</i>	<i>Permissible weekly income</i>
	\$	\$
Adult (21 and over) or married minor or unmarried minor with no parent in Australia . . . .	20.00	6.00
Unmarried person, aged 16-20 years . . . .	13.00	3.00

Additional benefit for dependants continues at the same rate as ordinary sickness benefit and a supplementary allowance of up to \$4.00 a week may be paid to beneficiaries if they pay rent or pay for board and lodging or for lodging.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount of permissible income. For unemployment benefit purposes the income of the spouse is also taken into account unless the claimant and his spouse are permanently separated. For sickness benefit purposes the income from an approved friendly society, or other similar approved body, in respect of the incapacity for which sickness benefit is payable is disregarded. 'Income' does not include child endowment or other payments for children, Commonwealth health benefits and payments from registered benefit organisations, a tuberculosis allowance, or an amount paid in reimbursement of medical, dental or similar expenses. The supplementary allowance is reduced by the amount by which a beneficiary's other income exceeds \$1.00 a week.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days during which unemployment or sickness benefit is not payable, but this waiting period is not required more than once in any period of thirteen weeks.

### Special benefit

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension, a service pension or a tuberculosis allowance and who, because of age, physical or mental disability or domestic circumstances, or for any other reason, is unable to earn a sufficient livelihood for himself and his dependants. Recipients of special benefits include, among others, persons caring for invalid parents, and persons ineligible for age, invalid or widow's pensions because of lack of residence qualifications.

Special benefits are also paid to immigrants who are in Commonwealth centres or hostels awaiting their first placement in employment in Australia. During this time they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

No means test or residence requirement is laid down but there is an overriding requirement that a person must be suffering hardship to be granted a special benefit.

The maximum rate of special benefit is the same as for unemployment benefit.

(a) Includes immigrants in Commonwealth centres or hostels awaiting their first placement in employment in Australia.

(b) Since June 1968, special benefits instead of sickness or unemployment benefits, became payable for confinement cases.

### Sheltered employment allowance

This allowance was introduced on 30 June 1967 as an alternative to an invalid pension. It is available to disabled employees engaged in approved sheltered employment who have been receiving invalid pension or are likely to become medically qualified for such pension if not provided with sheltered employment.

The maximum rate of the allowance is the same as the maximum rate of invalid pension. Additional benefits such as wife's pension and additional pension for children that would be paid if the person were an invalid pensioner are added to the sheltered employment allowance to form one composite payment. The means test is the same as for invalid pensions.

In the year ended 30 June 1972, one workshop was approved under the *Social Services Act 1947-1972* to pay sheltered employment allowances on behalf of the Department of Social Security. At 30 June 1972 thirteen workshops were paying the allowances to 923 disabled employees. Employees in other sheltered workshops continued to receive invalid pensions. Expenditure during the year 1971-72 was \$741,637.

### Commonwealth Rehabilitation Service

The Commonwealth Rehabilitation Service was set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The service is available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, national servicemen who are disabled at time of discharge but are ineligible for rehabilitation assistance from the Repatriation Department, persons receiving tuberculosis allowances, and persons aged fourteen or fifteen who, without treatment and training, would be likely to qualify for an invalid pension on reaching the age of sixteen years. During treatment, payment of pension or benefit continues. When vocational training begins the pension or benefit is suspended and a rehabilitation allowance, together with a training allowance of \$4.00 a week, is paid instead. With an invalid pensioner, or a sickness, unemployment, or special beneficiary, the rehabilitation allowance is equivalent to and calculated in the same manner as an invalid pension. For a widow pensioner the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connection with treatment, training or attendance for an interview or for medical examination may also be paid. Necessary artificial replacements, surgical aids and appliances may be provided, free of charge, to a person receiving treatment and training or who needs them to assist him to engage in a suitable vocation after the discontinuance of his treatment and training or who needs them otherwise to assist in his rehabilitation. He may also be provided with books, equipment and tools of trade costing up to \$80 in any period of twelve months. Where books, equipment and tools of trade provided to assist a person to engage in a suitable vocation are retained by him, he is liable to repay the cost but is not required to make repayment until after he has commenced employment. The repayment may be made by instalments. If the treatment or vocational training does not result in the trainee being able to engage in employment, he receives the pension or benefit to which he is entitled.

People who become disabled while working for the Commonwealth Government and who are covered by the Compensation (Commonwealth Employees) Act also qualify for a rehabilitation service. Disabled persons who cannot qualify for the free service may pay for rehabilitation themselves or they may be sponsored by State Government or private organisations.

*Numbers dealt with by the service***COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1971-72**

(a) Does not include applicants for invalid pension where pension eligibility is not determined; there were 6,605 cases in 1971-72. (b) Persons receiving invalid pensions, etc., when accepted for rehabilitation and who, on becoming ineligible for the pension, etc., are provided with rehabilitation on payment of the cost. (c) Persons provided with rehabilitation on payment of the cost by another authority.

Of the 1,672 persons accepted during 1971-72, 76 per cent were under forty years of age. The average number undergoing rehabilitation at the end of each month during the year was 1,117.

**Training scheme for widow pensioners**

In September 1968 a scheme was introduced to help widow pensioners acquire vocational skills which will enable them to undertake gainful employment. Training may take the form of refresher courses or it may involve training for new skills. During training the widow continues to receive her pension for as long as she remains eligible. In addition to pension, she may qualify for a training allowance of \$4 a week and a living-away-from-home allowance of \$5 a week. The cost of tuition fees and fares may also be met; and books, equipment, appliances and tools of trade necessary during training may be supplied free of charge up to the value of \$80 in any period of twelve months. A loan of up to \$400 is available in certain circumstances to enable equipment to be purchased for employment at home. Of the 2,300 applications received during 1971-72, 1,702 were accepted for training and of this number 1,512 commenced training. During the year 1,390 completed training and 862 were placed in employment. Expenditure during the year was \$656,195.

**Commonwealth assistance to welfare organisations**

*The Aged Persons Homes Act 1954-1972* is designed to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under the Act an organisation must be:

- (a) carried on otherwise than for the purposes of profit or gain to the individual members; and
- (b) a religious organisation, an organisation of which the principal objects or purposes are charitable or benevolent, an organisation of former members of the defence forces established in every State or a State branch of such an organisation, an organisation approved by the Governor-General for the purposes of the Act, or a local governing body.

An organisation conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State is not eligible for assistance under the Act.

The Director-General of the Department of Social Security may make a grant of money to an organisation as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a basis of \$2 for each \$1 raised by the organisation (\$1 for each \$1 from 1954 to 1957), not counting money which the organisation received from a governmental body (other than a local governing body) or borrowed.

Before a grant is made the Director-General must be satisfied that the sum of the money expended and the money at present available for expenditure by the organisation towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home.

The following table gives information regarding grants approved during 1971-72. The amounts granted include new grants approved in 1971-72 together with adjustments made during the year in respect of grants originally approved in earlier years.

**AGED PERSONS HOMES: GRANTS AND AMOUNTS APPROVED, AND BEDS PROVIDED, STATES AND TERRITORIES, 1971-72**

		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Total

The following table gives information regarding grants approved for each of the years 1967-68 to 1971-72. The amounts granted in each year include new grants approved in that year together with adjustments made during the year in respect of grants originally approved in earlier years.

**AGED PERSONS HOMES: GRANTS AND AMOUNTS APPROVED, AND BEDS PROVIDED  
AUSTRALIA 1967-68 TO 1971-72**

Year	Grants approved		Beds provided
	Number	Amount (\$'000)	Number
1967-68	170	10,220	2,831
1968-69	193	12,704	3,342
1969-70	184	13,576	3,305
1970-71	235	18,972	4,136
1971-72	241	23,792	4,760

Since the commencement of the Act in December 1954, 2,511 grants amounting to \$148,762,411 have been approved, and accommodation has been provided for 44,818 aged persons.

The Aged Persons Homes Act also provides a *personal care subsidy* of \$10 a week for persons of eighty years of age or over who receive approved personal care while living in hostel type accommodation provided by organisations eligible under the Aged Persons Homes Act. The following table gives details of the premises approved, payments made and number of residents aged eighty years or over residing in the approved premises, at 30 June 1972.

**AGED PERSONS HOMES GRANTS, PERSONAL CARE SUBSIDY: STATES, 30 JUNE 1972**

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

Number of qualified residents	1,549	2,094	1,278	1,035	441	260	3	5	6,665
Subsidy paid	\$ 449,840	525,000	359,380	284,840	143,780	65,320	740	680	1,829,580

The *Sheltered Employment (Assistance) Act* 1967-1970 superseded the *Disabled Persons Accommodation Act* 1963. Under the latter Act, which was in operation from 25 November 1963 to 30 June 1967, total grants of \$372,118 had been approved. The new Act, which came into operation on 30 June 1967 and was amended on 26 October 1970, provides for subsidies of \$2 for \$1 to eligible organisations towards the capital cost of sheltered workshops, the equipment for them, and accommodation for disabled people employed in sheltered workshops or in normal industry. The Act covers

the erection of buildings and the purchase of existing buildings. In both cases the cost of land is included in the capital cost as is the cost of any necessary conversion or extension of an existing building. The subsidy may also be paid towards the rental, for up to three years, where rented premises are used to provide sheltered employment. A training fee of \$500 is payable to sheltered workshop organisations in respect of each handicapped person who enters and remains in normal employment for twelve months following a period of at least six months training provided by the organisation. In addition, a subsidy of up to \$1 for \$1 is payable towards the salaries of certain sheltered workshop accommodation unit staff (such as supervisory staff, doctors, social workers and counsellors). Organisations eligible for grants under the Act are the same as those specified under the Aged Persons Homes Act.

A substantial number of the people employed in the sheltered workshop must be medically qualified for an invalid pension, or be likely to become so qualified if not provided with sheltered employment, and must receive payment for their work before the organisation can qualify for assistance under the Act.

During 1971-72 training fees were approved in respect of 72 handicapped workers who had graduated to open employment, at a cost of \$36,000, while a total of 1,037 approved staff positions received salary subsidy amounting to \$755,245.

The following table gives details of capital grants approved during the last financial year in each State and compares these figures with the situation obtaining throughout Australia for each of the preceding four years.

(a) Includes adjustment to grants originally approved under the Disabled Persons Accommodation Act.

The *Handicapped Children (Assistance) Act* 1970 came into operation on 17 June 1970. The Act provides for subsidies of \$2 for \$1 to be paid to eligible organisations towards the capital cost of premises to be used for the training of handicapped children; the cost of equipment for such training; and the capital cost of residential accommodation for handicapped children receiving training. Organisations eligible for grants under the Act are the same as those specified under the Aged Persons Homes Act. At 30 June 1972 the subsidy had been extended to 92 premises to be used for training purposes and to 24 residential centres. The total amount approved under the Act by way of grants towards the cost of training centres, residential units and training equipment was \$3,354,658.

The *Delivered Meals Subsidy Act* 1970 came into operation on 15 April 1970. Its purpose is to help organisations to establish, maintain, expand and improve 'meals-on-wheels' services. The subsidy is at the rate of \$1.50 for every ten meals provided by approved organisations. At 30 June 1972, 316 organisations had received a total subsidy of \$874,098 under the Act. Organisations eligible for grants under the Act are the same as those specified under the Aged Persons Homes Act.

#### Commonwealth assistance to States

The *States Grants (Deserted) Wives Act* 1968 came into operation on 21 June 1968 with retrospective effect from 1 January 1968. The Act provides for assistance to be given by the Commonwealth to the States in respect of aid for needy mothers with children where there is no bread-winner and the mothers are not eligible for benefits under the Social Services Act. Broadly, these include deserted wives during the first six months of desertion, wives during the first six months of the husband's imprisonment, deserted de facto wives, de facto wives of prisoners, and unmarried mothers.

The type of assistance attracting a Commonwealth grant may be provided in the form of cash, food or clothing. The grant is made by the Commonwealth to the States on the basis of half the cost of the approved assistance paid to the mother or half the amount of Class 'A' widow's pension, which would have been payable had she been qualified to receive it, whichever is the lesser.

All States are now receiving assistance under the scheme. In 1971-72 payments by the Commonwealth amounted to \$5,876,257 compared with \$3,691,217 during 1970-71.

The *States Grants (Home Care) Act* 1969 provides that the Commonwealth will share with participating States on a \$1 for \$1 basis, the cost of developing approved housekeeping or other domestic assistance provided wholly or mainly for aged persons in their homes. The Commonwealth will also share on a \$1 for \$1 basis with participating States up to a maximum of one-third of the capital cost of approved senior citizens' centres as well as meeting on a \$1 for \$1 basis with the States the cost of a salary of a welfare officer employed by such a centre. All States participate in this scheme.

The following table shows the total payments made to the States to 30 June 1972.

PAYMENTS TO STATES FOR HOME CARE, SENIOR CITIZENS' CENTRES, AND WELFARE OFFICERS TO 30 JUNE 1972  
(\$)

State	Home Care Services	Senior Citizens' Centres	Welfare Officers	Total

<b>Total</b>	<b>839,938</b>	<b>368,637</b>	<b>15,148</b>	<b>1,223,723</b>

The *States Grants (Dwellings for Aged Pensioners) Act* 1969 enables the Commonwealth to make grants, amounting to \$25,000,000 over a five-year period commencing from 1 July 1969, to the States for the purpose of carrying out approved building schemes in connection with the provision of self-contained accommodation for single aged pensioners with little means.

DWELLINGS FOR AGED PENSIONERS: ASSISTANCE TO STATES

#### Telephone rental concessions

Effective from 1 October 1964 an amendment to the Telephone Regulations of the Post and Telegraph Act provided that a telephone service for blind persons and for qualified age, invalid and widow pensioners is available at an annual rental equal to two-thirds of the amount otherwise payable. The Department of Social Security re-imburses the Postmaster-General's Department for the cost of the scheme including administrative costs. Expenditure during 1971-72 was \$3,805,651, plus administrative costs amounting to \$107,069.

**Compassionate allowances**

These allowances are paid by the Commonwealth on a discretionary basis to certain people who are unable to qualify for pensions or other benefits under the provisions of the Social Services Act. Expenditure on compassionate allowances and payments of a similar nature during 1971-72 was \$60,387.

**Northern Territory and Australian Capital Territory welfare services**

Provision of general welfare services in these two Territories is the responsibility of the Commonwealth. In so far as welfare items can be identified for territorial accounting purposes, the following table shows the cost of providing these services for each of the years 1967-68 to 1971-72.

(a) Includes expenditure on aboriginal affairs.

(b) Expenditure on fixed assets and increase in stocks.

**Aboriginal welfare**

The Aboriginal population as defined at the 1971 Census of Population and Housing includes persons who, at the Census, stated themselves to be of Aboriginal origin. Persons of mixed descent were invited to indicate the race with which they identified. The number enumerated at the 1971 Census was 106,288 persons. In addition, 9,663 persons identified themselves as Torres Strait Islanders, making a total of 115,951.

The Aboriginal population is increasing at a rate faster than the Australian average. Few Aborigines still live a nomadic life; many live a settled, but in many other ways, traditional life. There are others at all stages between this and full participation in the life of the Australian community.

A referendum in May 1967 led to the repeal of Section 127 of the Constitution which provided that in reckoning the numbers for census purposes, Aborigines should not be counted; and to the deletion of the words 'other than the Aboriginal race in any State' from Section 51 (xxvi) which relates to the power of the Commonwealth Parliament to make laws with respect to people of any race. The Federal Government, whose aim is to help the Aborigines to become an integral part of Australian community life, while at the same time preserving and developing their own distinctive culture, languages, traditions and arts, now shares with the States power and responsibilities for the advancement of Aborigines. The Commonwealth Government has created a Department of Aboriginal Affairs, in Canberra, as the agency co-ordinating national policies affecting Aborigines and responsible also for Aboriginal affairs in the Northern Territory. The Department also serves the Council for Aboriginal Affairs, comprising a Chairman and two members, which advises on the framing of national policies for the Aboriginal citizens of Australia.

In recent years the Commonwealth, State and Northern Territory legislatures have been active in progressively removing all discriminatory legislation from the relevant Acts of the Commonwealth and State Parliaments and from the relevant Ordinances of the Northern Territory. In the legal and formal sense none of the opportunities open to Australians generally is closed to Aborigines. However

the States continue to maintain a number of programs specifically for Aboriginal welfare and development, and since the establishment of the Office (now Department) of Aboriginal Affairs in 1968, the Commonwealth Government has increased its involvement. Outlays by Commonwealth authorities which have been identified as specifically relating to Aboriginal advancement are shown for 1968-69 to 1971-72 in the following table.

### State expenditure on certain welfare services

The following table shows net expenditure from State government funds on certain welfare services. The figures exclude expenditure on unemployment, bush fire, flood, etc., relief, Aboriginal welfare, and some other items which are excluded because information cannot be obtained for all States. Loan fund expenditure is excluded also. Because of differences in organisation and accounting methods, the information shown for both items is not on exactly the same basis for all States; it may also be incomplete because particulars of some activities are not separately recorded and are therefore excluded. The expenditure shown is 'net' in the sense that receipts for services rendered have been deducted from gross expenditure.

### Surveys by the Commonwealth Department of Social Security

#### Survey of age, invalid and widow pensioners in New South Wales and Victoria, March 1971

Details of the survey of the characteristics of age, invalid and widow pensioners in New South Wales and Victoria, covering approximately two-thirds of all such pensioners in Australia, carried out by the then Commonwealth Department of Social Services in March 1971, are shown in Year Book No. 58, pages 411-15.

#### Morbidity surveys of invalid pensioners in New South Wales and Victoria

Details of the two separate surveys of the major disabilities of invalid pensioners in New South Wales and Victoria undertaken during 1970 by the then Commonwealth Department of Social Services are shown in Year Book No. 58, pages 415-16.

#### Morbidity survey of new invalid pensioners

A survey of the major causes of disabilities of new invalid pensioners was undertaken in Queensland, South Australia, Western Australia and Tasmania during the year 1972-73 by the then Commonwealth Department of Social Services. The table below classifies persons granted invalid pension according to age and major cause of disability.

#### NEW GRANTS OF INVALID PENSIONS: MAJOR CAUSE OF DISABILITY BY FIVE YEAR AGE GROUPS JULY TO DECEMBER 1971

(a) Causes of invalidity have been classified according to the eighth (1965) revision of the World Health Organisation's International Classification of Diseases. (b) Excluding diseases of oral cavity, salivary glands, and jaws.

**Social service pensioners receiving war pension**

A survey of social service pensioners in New South Wales and Victoria receiving Repatriation war pension was carried out by the then Commonwealth Department of Social Services at 30 June 1971. Estimates based on the results obtained from the survey indicate that nearly 69,000 social service pensioners in Australia (i.e. about 6.6 per cent of the total) were also in receipt of war pension at the end of June 1971.

The tables below show the age, invalid and widow pensioners classified by means as assessed and the rate of war pension. When evaluating the tables it should be noted that the war pension is included in income when calculating a pensioner's 'means as assessed'.

### The role of voluntary agencies in Australian social welfare

Voluntary agencies have played an important role in the provision of social welfare services in Australia since the earliest days of settlement. The oldest voluntary organisation in Australia is the Benevolent Society of New South Wales, founded in 1818, 'to relieve the poor, the distressed, the aged and the infirm'. During the 19th century voluntary agencies were active in all States providing homes for orphan and abandoned children; industrial schools for older boys and girls often rescued from total destitution in the streets; relief in food and clothing for widows, old people and families of the unemployed; hospitals for the sick poor; and institutions for the aged and invalid.

Although in this century Commonwealth and State Governments have taken over many tasks formerly carried out by voluntary agencies, this has not led to any diminution in voluntary activity. The voluntary sector is probably more active today than it has ever been, not only carrying out its traditional role, but in opening up new fields of activity.

In caring for the aged, voluntary agencies are providing nursing home beds in 334 nursing homes. Accommodation for aged persons is provided, under the Aged Persons Homes Act, in hostels, aged persons homes and retirement villages, the great majority of which are run by voluntary agencies of various kinds.

In addition to the provision of residential care, voluntary agencies are concerned with providing many domiciliary services to enable the aged to remain independent as long as possible, and this is an area of increasing activity.

In 1972 voluntary agencies provided 3.3 million meals to aged and invalid persons in their own homes or at senior citizens centres. Home nursing services are provided in many areas together with home help services to assist the frail aged. Some voluntary agencies also operate friendly visiting services to alleviate the loneliness of the aged and to ensure that their needs are known, and others assist with services in senior citizens clubs.

The same pattern of activity is seen in services for the mentally and physically handicapped. Voluntary agencies provide day and residential schools for handicapped children, sheltered workshops for those able to undertake some employment and hostels for the handicapped in both sheltered and open employment. Many organisations provide home visiting services and occupational therapy for the home-bound, special training centres for various forms of rehabilitation, and recreational programs for those unable to participate in general community activities. The handicapped field is also noted for its activities in bringing together self help groups of the handicapped and their families to promote the well being of the handicapped and to encourage study and research into both prevention and rehabilitation.

Both the aged and handicapped services receive various forms of assistance from Governments in developing their services.

Besides the various forms of health services described above, many major hospitals are provided by the voluntary sector. Of 1,089 approved hospitals in Australia, 156 or almost 15 per cent are run by voluntary organisations. Such hospitals cover a wide range of needs and in addition provide nursing training which may ultimately be of service to the full range of hospitals and nursing homes.

Family and child welfare has long been an important area for voluntary activity. Children's homes provide for children deprived of normal home life because of serious problems within the family, in a wide variety of units ranging from the small family group home in an ordinary house in the suburbs, to the large unit of cottage homes grouped together. As with other services, recent years have shown a marked emphasis on preventive services through family welfare agencies and to greater use of substitute families in adoption and foster care programs.

Within the modern family welfare agency, assistance is given not only with money and food, as in the last century, but with marriage guidance, parental counselling and home-maker services, all designed to keep the family together as a unit. Other voluntary agencies run services for the single mother or provide day-care services to assist working mothers, in particular the one parent family or the family under special strain.

The well-being of Australian youth is also a matter of concern to the voluntary sector which runs youth activities of many varieties, offers adolescent counselling services and is showing a growing concern for the seriously emotionally disturbed and those becoming addicted to drugs.

As well as these general community services, special services for Aborigines have been a feature of voluntary activity. Formerly these were mainly concerned with the mission area but of late many agencies have been formed, often run primarily by Aborigines, to assist urban dwellers. Legal aid services, head start programs, nutrition programs and many others are now being made available through voluntary effort.

The care of immigrants is also a significant activity and again much of this work is now undertaken by settled immigrants in conjunction with longer established Australians.

Prisoners and ex-prisoners also receive their share of attention. Organisations exist to visit prisoners and assist their families. These will also assist prisoners on discharge, to re-settle in the community, either at home, in lodgings or in hostels provided by the agency. Other agencies concern themselves with alcoholics, homeless men and women and others temporarily destitute.

The list of activities by no means covers all the work done by the voluntary sector. New and experimental services such as Lifeline and Samaritans, drug contact centres, drop-in coffee houses, street workers for alienated youth and many others, are evidence of the continued ability of the voluntary sector of social welfare to develop and meet new social needs.

Another area of developing interest involves the participation of various kinds of citizen groups in social welfare services. These include Community Information Centres and Community Aid services largely manned by volunteers; groups of clients of social welfare services who provide both a service for their members and liaise with Departmental services on questions of the way service is offered to people in need; and Resident Action groups who are concerned to participate in any replanning of their neighbourhood. This area of citizen involvement can be expected to become more and more important over the next few years.

Studies of social needs and of the quality and the adequacy of present services are a continuing concern of the voluntary sector which has joined together with the statutory sector in Councils of Social Service at the State and the national level to promote the well-being of the deprived and disadvantaged sections of the community and the general social development of Australia.

## CHAPTER 14

### PUBLIC HEALTH

This chapter is concerned with the activities of the Commonwealth Department of Health, including quarantine, national health benefits, and Commonwealth grants for health purposes (the administration of hospital and medical benefits was transferred to the Department of Social Security on 20 December 1972); activities of the State health departments; statistics of hospitals and nursing homes, hansenide hospitals, and mental health institutions; statistics of notifiable diseases; and cremations. Statistics relating to causes of death are presented in Chapter 8, Vital Statistics (Pages 183-9).

Further information about the administration of public health services is contained in the annual reports of the Commonwealth Director-General of Health; the annual reports of the State health authorities; and in the Year Books and Statistical Registers published by the State offices of the Bureau of Census and Statistics. For more detailed statistics of in-patient institutions, see the Bureau of Census and Statistics annual bulletin *Hospitals and Nursing Homes* (Reference No. 16.1).

#### COMMONWEALTH GOVERNMENT ACTIVITIES

At the time of federation the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. Following on the passing of the *Quarantine Act* 1908 a branch of the Department of Trade and Customs, under the control of a Director of Quarantine, was created on 1 July 1909. The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. All of these matters were administered by the Department of Health until 20 December 1972 when the responsibility for hospital and medical benefits was transferred to the Department of Social Security. The Commonwealth Government also has used its powers under section 96 of the Constitution to make grants to the States for health purposes. In addition the Commonwealth Government gives financial assistance to certain organisations concerned with public health matters. A number of Commonwealth health organisations have been established; detailed information on the functions and operations of these organisations is given in Year Book No. 53, pages 561-6, and in the annual reports of the Commonwealth Director-General of Health.

#### Quarantine

The *Quarantine Act* 1908-1969 is administered by the Commonwealth Department of Health and has three sections of disease control, as follows: (i) human quarantine, which ensures that persons arriving from overseas are free of quarantinable disease; (ii) animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States, and in general the administration of interstate movements of animals and plants is left in the hands of the States.

##### Human quarantine

With a few exceptions, which concern persons who have spent at least 14 days in areas adjacent to Australia (e.g. New Zealand, Papua New Guinea, Fiji and Lord Howe Island) all passengers and crews arriving in Australia from overseas, whether by air or sea, are subject to medical inspection for the purpose of preventing the introduction of disease into Australia. At the major ports full-time quarantine officers carry out the work, but in the minor ports local doctors act as part-time quarantine officers. Quarantine activities are controlled by the Commonwealth Directors of Health in each State who are senior medical officers of the Commonwealth Department of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague, and typhus fever. These diseases are not endemic to Australia and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken-pox, mumps, scarlet fever, and measles are directed to appropriate care and placed in isolation where necessary.

Valid International Certificates of Vaccination are required of travellers to Australia as follows:

*Smallpox.* All arrivals from all countries except American Samoa, Antarctic Territories, Canada, Christmas (Indian Ocean), Cocos (Keeling) and Cook Islands, Fiji, French Polynesia, Gilbert and Ellice Islands Colony (including Ocean and Fanning Islands), Lord Howe Island, Nauru, New Caledonia, New Hebrides, New Zealand, Niue and Norfolk Islands, Papua New Guinea, Solomon and Tokelau Islands, Tonga, United States of America, Western Samoa, provided travellers have not been outside these areas for at least fourteen days before arrival and that these areas are free from smallpox. Australia reserves the right, in respect of arrivals from other countries, to isolate any person who arrives by air without a smallpox vaccination certificate and refuses to be vaccinated. Children under one year of age are exempt. For passengers arriving in Australia by sea, exemption is granted to infants under twelve months of age and to persons who hold religious convictions against vaccination or who are suffering from a medical condition certified by a medical practitioner to contra-indicate smallpox vaccination.

*Cholera.* All arrivals from countries with locally infected areas. No certificate is required in respect of children under one year of age.

*Yellow fever.* All arrivals from yellow fever endemic zones.

All passengers, whether they arrive by sea or air, are required to give their intended place of residence in Australia, so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

*Isolation.* Under the Quarantine Act, airline and shipping operators are responsible for the expenses of isolation of all travellers who disembark either (i) having been in a country with locally infected areas, within 5 days of arrival and not possessing a cholera vaccination certificate; or (ii) having been in an endemic zone within 6 days of arrival and not possessing a yellow fever vaccination certificate; or (iii) having arrived by air without a smallpox vaccination certificate and refusing to be vaccinated on arrival.

The numbers of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of overseas vessels and aircraft calling at Australian ports during 1971-72 and during the preceding four years are shown in the following tables.

**HUMAN QUARANTINE: CASES OF INFECTIOUS

The provisions of the State Health Acts with regard to the compulsory notification of infectious diseases and statistics of cases notified in 1972 are dealt with on pages 449-51 of this chapter.

#### Animal quarantine

Animal quarantine, authorised by the provisions of the *Quarantine Act* 1908-1969, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Of the domesticated animals, only horses, dogs and cats, are admitted from a limited number of countries depending on diseases being absent in the country of origin. All must be accompanied by health certificates which may include prescribed tests. Dogs and cats, except those from New Zealand, are subject to quarantine detention on arrival in Australia. Zoological specimens are imported into registered zoos, where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, types of wool, skins, and hides are specially treated under quarantine control. Such items as raw meat, which cannot be sterilised, are admitted only from New Zealand. Other items may be treated to destroy any possible infection. Special attention is given to the importation of biological substances of animal origin. The Animal Quarantine Service is also responsible for the health certification of animals for export overseas in accordance with the requirements of the various countries.

The Division of Animal Quarantine was created in 1926. The central administration is situated within the Health Department in Canberra, with an Assistant Director-General and veterinary officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of that State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each State capital.

The Division participates in world-wide international notifications of the more serious contagious diseases of animals and maintains a register of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions. In matters of policy and the quarantine control of imports there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the General and Plant Divisions of the quarantine service. Many diseases of animals are communicable to man, and for this reason animal and general quarantine administration are in some respects inseparable. Similarly the interests of animal and plant divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

#### Plant quarantine

Australia is free of many of the pests and diseases of agriculture which occur in other parts of the world. Since 1 July 1909 the importation into Australia of plant materials has been subject to an increasingly stringent quarantine; some materials are admitted only under certain conditions while others are prohibited altogether. The quarantines are designed to keep out of the country any additional pests and diseases which, while not a danger in their natural habitat, may thrive in the Australian environment and, if introduced, bring about serious economic losses to Australian agriculture.

The quarantine of plants and plant material entering Australia is the responsibility of the Federal Government; the State Governments provide co-operation in the operation of the plant quarantine service. The movement of specified fruits and other plant materials within Australia is the responsibility of the State Governments.

The Commonwealth regulations governing plant quarantine apply to all plants or parts of plants, whether living or dead, and include seeds and fruits as well as timber, soil, living insects, cultures of organisms, containers, machinery, vehicles, furniture, packing materials and some foods, toys, sporting goods or tools of trade. All such goods must be declared whether they are imported as commercial consignments or as personal effects, curios, souvenirs and unprocessed food carried in luggage or on the persons of tourists, immigrants or other travellers. Heavy penalties are laid down for evasion of the regulations.

Under the *Quarantine Act* 1908-1969, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material which is not considered to be a danger to agriculture or for which prior approval to import has been obtained. Any material found to be carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment, the cost of which is met by the importer. All bamboo, cane and rattan articles are automatically fumigated. Destruction may be ordered where treatment or return to sender is impracticable, or no prior approval has been obtained, or the goods are prohibited imports.

Certain material, such as nursery stock and some seeds, may be imported only with special permission, and then in small quantities sufficient merely to establish a variety or strain. Arrangements must be made for this material to be grown in post-entry quarantine in Australia at a nursery registered by the Australian authorities. Application to import goods of this nature must be lodged in advance with the Chief Quarantine Officer (Plants) of the State Department of Agriculture in the capital city of the State of destination or with the Director of Quarantine in Canberra. Other restricted seeds or materials of plant origin for use as human or animal food or for manufacturing purposes, may have to be processed under quarantine supervision, and imports of this description also require prior approval.

Strict supervision by way of inspection and treatment, where necessary, is exercised over the timber components as well as the contents of containers and unit cargo; packing materials of straw, raw cotton, rice hulls or rice straw are prohibited imports which will be destroyed at the port of entry. Cases or cartons which have previously contained fruit or plant materials are prohibited imports, while dunnage and scantlings used in containers or cargo holds are subject to quarantine. All timber, including logs or sawn timber, is carefully inspected to ensure that it does not contain insects which could spread to forests or timber constructions.

Additional information concerning Australian plant quarantine regulations, treatments and lists of prohibitions and restrictions, may be obtained from Australian consular offices abroad, the Director of Plant Quarantine with the Commonwealth Department of Health in Canberra or from the Chief Quarantine Officer (Plants) with the respective State Departments of Agriculture in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart.

## National health benefits

### Health, cash benefits to persons and other services

For an analysis by function and economic type of expenditure by all Commonwealth authorities see Chapter 18, Public Authority Finance.

Most Commonwealth health benefits are financed through the National Welfare Fund. The following two tables show cash benefits to persons by Commonwealth authorities on a State basis for 1971-72 and for the years 1967-68 to 1971-72.

Descriptions of each of the cash benefits to persons shown in the above tables are included in the following sub-sections.

**Hospital, nursing home, domiciliary nursing care and handicapped children's benefits**

*Patients in approved hospitals.* A basic principle of the provision of benefits for patients in approved hospitals is the Commonwealth support of voluntary insurance against the costs involved. Insured patients in approved hospitals receive a Commonwealth hospital benefit of \$2 per day which is paid through the contributors' registered hospital benefits organisations.

During 1971 and 1972 the hospital benefits tables were rationalised, in conjunction with the new charges adopted by the public hospitals in each State, as shown in the table, page 430. Pensioners enrolled in the Pensioner Medical Service are generally treated free of charge and, in some States, other pensioners may also be treated without charge. In addition to the following schedule registered organisations in some States operate a table to cover the cost of private hospital accommodation.

*Expenditure on hospital, nursing home, and handicapped children's benefits.* The following table shows the amount of these Commonwealth benefits paid during 1971-72. This does not include expenditure on mental hospitals (see page 439) or domiciliary nursing care which did not come into effect until 1 March 1973.

**COMMONWEALTH HOSPITAL, NURSING HOME, AND HANDICAPPED CHILDREN'S**

Handicapped children (\$1.50) . . . . .	167	87	37	82	41	21	3	1	438
<b>Total . . . . .</b>	<b>50,783</b>	<b>25,460</b>	<b>20,208</b>	<b>10,728</b>	<b>11,416</b>	<b>4,227</b>	<b>320</b>	<b>348</b>	<b>123,489</b>

(a) Excludes payments of \$30,986,000 towards special accounts deficits, \$518,000 towards Subsidised Health Benefits Plan management expenses and \$7,407,000 towards Subsidised Health Benefits Plan fund benefit re-imbursements.  
 (b) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth hospital benefit and fund benefit through membership of an organisation registered in one of the States, and payments to them are included in the respective States. (c) Increased from \$2 to \$3.50 per day from 21 October 1971.  
 (d) South Australia includes Northern Territory.

*Public hospital fees, family contribution and benefits.* The daily rates of fees charged by public hospitals, the weekly family contribution to major hospital benefits organisations and the daily rates of combined Commonwealth and hospital fund benefits paid are shown in the following table

**DAILY RATES OF FEES CHARGED BY PUBLIC HOSPITALS AND TABLES OF BENEFITS, 1973**

		private	26.30	1.52	26.00

(a) Fund benefits are not paid in excess of the hospital charge. (b) No charge. (c) Not applicable to 53 country hospitals to which Part IV of the South Australian Hospitals Act applies. These hospitals are controlled by the local councils and are not subject to direction by the State Government as far as fees are concerned. The fees for these hospitals vary. (d) Covered by differing public or standard ward tables in other States.

Public hospitals in all States now charge comprehensive daily rates of fees. Separate charges are not raised for miscellaneous hospital services. In Queensland where there is no charge for public ward accommodation, contributors insured in the intermediate and private ward tables receive a fund benefit of \$4 a day if they or their dependants occupy a free public ward bed.

A Commonwealth benefit of \$2 per day is payable to hospitals for patients hospitalised free of charge.

During the waiting period of two months after joining an organisation the Commonwealth benefit is payable at the rate of 80 cents per day, unless the organisation pays fund benefits, in which case Commonwealth benefit is payable at the higher rate of \$2 per day. While a member is in arrears with his contributions and fund benefits are not payable, the Commonwealth benefit is payable at the rate of 80 cents per day.

Contributors who would have been excluded from fund benefits because of organisations' rules covering pre-existing ailments, chronic illnesses or maximum benefits are assured of hospital fund benefits by the provisions of the special account plan. Since 1 January 1969 such a contributor has been entitled to receive benefit at his full insured rate, provided total benefits do not exceed the amount of the hospital charge. Benefit is paid either from the ordinary account or from a special account guaranteed by the Commonwealth. If the payments from the special account exceed contributions credited to the account, the amount of deficit is reimbursed by the Commonwealth.

A person who joins a registered hospital benefits organisation within eight weeks of being discharged from an approved nursing home is entitled to immediate Commonwealth benefit of \$2 a day and to fund benefits without having to serve a waiting period. From 26 November 1968 persons ceasing to be entitled to the benefits of the Pensioner Medical Service who join a registered organisation within two months before or within three months after ceasing to be a pensioner are not required to serve the normal waiting period before becoming eligible for fund benefits. This new provision also enables such contributions to be transferred to the special account. If a qualified patient in an approved hospital is not insured (i.e. not a member of a hospital benefits organisation), a Commonwealth benefit of 80 cents a day is deducted from his account by the hospital. The Commonwealth subsequently reimburses the hospital. Under arrangements made under the National Health Act public hospitals generally provide free public ward treatment to pensioners enrolled in the Pensioner Medical Service who are classified as public ward patients. The Commonwealth pays the hospitals a benefit of \$5 a day for each pensioner patient. The hospital and medical insurance provisions were changed in 1969 to allow free insurance under certain circumstances and, from 1 July 1970, these provisions were extended to provide partial assistance with insurance to certain groups of persons. Details of this Subsidised Health Benefits Plan are set out on page 433.

*Patients in approved nursing homes.* By amendment to the National Health Act in 1972 new nursing home benefits were introduced with effect from 1 January 1973 (*see* (iii) and (iv) below). The benefits now available in respect of qualified nursing home patients are:

- (i) *Ordinary Care Benefit*, currently payable at the rate of \$3.50 a day, is paid in respect of all qualified nursing home patients in institutions which have been approved as nursing homes under the National Health Act.
- (ii) *Supplementary Benefit*, introduced on 1 January 1969 to provide for the payment of \$3.00 a day in respect of patients who require and receive intensive nursing home care as defined in the National Health Act. This benefit is payable in addition to the ordinary care benefit making a total of \$6.50 a day for approved patients. Both the ordinary care benefit and the supplementary benefit are paid by the Commonwealth direct to nursing home proprietors who are required to deduct such amounts from the accounts issued to patients.
- (iii) *Additional Benefit for Pensioner Patients*, introduced from 1 January 1973 in respect of patients who hold Pensioner Medical Service entitlement cards is payable direct to nursing home proprietors in the same manner as the basic Commonwealth nursing home benefits referred to above. Eligible pensioners are not required to take out health insurance coverage to receive this benefit which is payable in addition to the preceding benefits. The rates of benefit payable differ from State to State and are set out below.
- (iv) *Insurance Benefit for Non-pensioner Patients*. Patients who are not qualified pensioners for the purpose of receiving the additional pensioner benefit can receive the same rate of additional benefit but must insure with a registered hospital benefits organisation to obtain the benefit. This benefit is paid by the registered hospital benefit organisation direct to the nursing home.

The new benefits (in (iii) and (iv) above) are based on a 'patient participation' of \$2.55 a day as provided for in the National Health Act as being an amount approximating three-quarters of a single pensioner's maximum pension including the supplementary allowances payable as at 1 January 1973.

The following table shows the maximum level of new benefits which are payable in each State.

**NURSING HOME BENEFITS (NEW): MAXIMUM  
PAYMENTS: STATES, 1973**

	<i>Maximum benefits payable</i>	
	<i>Weekly</i>	<i>Daily</i>
	\$	\$
New South Wales . . . . .	10.50	1.50
Victoria . . . . .	22.40	3.20
Queensland . . . . .	10.50	1.50
South Australia . . . . .	14.00	2.00
Western Australia . . . . .	11.20	1.60
Tasmania . . . . .	10.50	1.50

Where the fees charged by a nursing home are in excess of the combined total of basic Commonwealth benefit (either \$3.50 or \$6.50 a day) plus the patient contribution (\$2.55 a day) plus additional new benefit (to maximum shown in table above), the difference must be met by the patient. Conversely, where the nursing home fee is less than this combined total, the new benefit (whether fund benefit or Commonwealth benefit for pensioners) is reduced by that amount.

*Aged patients at home.* A new domiciliary nursing care benefit became effective from 1 March 1973. In general terms it is payable, at the rate of \$14 a week, to persons who are willing and able to care, in their own homes, for aged parents or immediate relatives who would otherwise qualify for nursing home benefits. The basic criteria for the payment of the benefit are that the patient must be aged 65 years or over and be in need of continuing nursing care and receive regular visits by a registered nurse. This benefit is not subject to a means test and is payable, under the National Health Act, in addition to any entitlements that persons may have under the Social Services Act or the Repatriation Act for pensions or other supplementary allowances.

*Handicapped children in approved handicapped persons homes.* Since 1 January 1969, handicapped children who are under sixteen years of age and who are accommodated overnight in an approved handicapped persons home have been entitled to a Commonwealth benefit of \$1.50 per day. The benefit is paid direct to the approved handicapped persons home and an equivalent amount is

deducted from any charge raised by the home in respect of the handicapped child. The benefit applies to both physically and mentally handicapped children and is payable to homes conducted by charitable and religious organisations. It is not payable to homes conducted by a State Government or those conducted by a person or organisation for profit. There is no necessity for handicapped children in an approved handicapped persons home to be insured with a registered benefits organisation.

*Australians overseas.* Australian residents who receive hospital treatment in recognised hospitals in overseas countries, while temporarily absent from Australia, are eligible to receive the Commonwealth and fund benefits to which they would be entitled if the treatment were given in Australia.

*Registered hospital benefits organisations.* The following table shows the number of registered hospital benefits organisations, the membership at 30 June 1972, and fund benefits paid during 1971-72. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital insurance is considerably higher than the number of members.

HOSPITAL BENEFITS: ORGANISATIONS AND FUND BENEFITS, STATES, 1971-72

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
Registered organisations at 30 June 1972(a)	34	23	8	9	7	10	91
Membership at 30 June 1972 '000	1,625	1,213	393	433	360	131	(b)4,154
Fund benefits paid(c) \$'000	81,239	56,482	14,708	21,284	17,594	5,354	(b)196,661

(a) Excludes interstate branches. (b) Members who live in the Northern Territory or the<sup>a</sup>Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States, and payments to them are included in the respective States. (c) Includes \$3,726,000 ancillary benefits, and also includes \$7,407,000 fund benefits reimbursed to the organisations under the Subsidised Health Benefits Plan.

### Medical benefits

A medical benefits scheme has operated since July 1953, being authorised firstly by the National Health (Medical Benefits) Regulations and then by the *National Health Act* 1953-1972. The basic principle of the scheme is Commonwealth support of voluntary insurance towards meeting the costs of medical attention. The benefits under the scheme relate primarily to medical attention on a fee-for-service basis, although provision is made for a Commonwealth subsidy to organisations arranging for medical service on a contract basis.

In order to qualify for a Commonwealth fee-for-service benefit a person is required to be insured with a registered medical benefits organisation. The organisation pays the Commonwealth benefit to the contributor, usually at the time it pays its own benefit. Reimbursement of the Commonwealth benefit is subsequently made to the organisation by the Commonwealth.

On 1 July 1970 the scale of benefits paid was considerably revised. Details of benefits are set out in the schedules to the *National Health Act* 1953-1972. There is one scale of benefits for each State. Standard weekly contributions to medical benefits organisations range from 25 cents to 42 cents for a single person and from 50 cents to 84 cents for a married contributor. The level of benefits has been set so that a contributor is required to pay 80 cents of the 'most common fee' charged for a general practitioner consultation, and up to \$5 for the more costly operations where the 'most common fee' is charged. In fixing the scale of 'most common fees', differential rates have been determined for certain medical services which are customarily performed by either a general practitioner or a specialist. To qualify for the higher (specialist) rate of benefit the patient must be formally referred to the specialist by another medical practitioner by means of a Notice of Referral. Higher benefits are also payable where the patient is referred to a specialist by a dentist for a service arising from a dental service, or by an optometrist or optician to an ophthalmologist.

In addition to the professional services normally rendered by a qualified medical practitioner, the schedules now cover certain prescribed medical services rendered in the operating theatre of an approved hospital by a legally qualified dentist or dental practitioner approved for this purpose by the Director-General of Social Security.

Contributors who would otherwise be excluded from fund benefits because of organisations' rules covering pre-existing or long-term ailments receive full fund benefits, with the Commonwealth re-imbursing the organisations for any deficits incurred in providing benefits in such cases.

Australian residents temporarily absent from Australia who receive medical attention by registered medical practitioners in the country they are visiting are entitled, if insured, to the Commonwealth benefit and the medical fund benefit to which they would be entitled if the service were rendered in Australia.

*Expenditure on medical benefits.* The following table shows the number of registered medical benefits organisations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organisations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical insurance is considerably higher than the number of contributors. At 30 June 1972 the estimated number of persons covered by contributory medical insurance was 10,134,000.

MEDICAL BENEFITS: SUMMARY, STATES, 1971-72

		N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.(a)
Registered organisations(b)(c)	No.	29	19	8	7	8	10	81
Members(c)	'000	1,562	1,155	402	420	358	131	4,028
Medical services	'000	16,736	11,475	4,781	5,262	3,814	1,202	43,271
Commonwealth benefit(d)	'000	50,952	33,146	12,753	15,074	11,652	3,484	127,061
Fund benefit(e)	'000	46,334	28,980	9,761	9,686	7,130	2,206	104,097

(a) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States, and details for these members are included in the respective States. (b) Excludes interstate branches. (c) At 30 June 1972. (d) Excludes payments of \$3,787,000 towards special accounts deficits and \$228,000 towards management expenses of the Subsidised Health Benefits Plan. (e) Includes \$2,806,000 ancillary fund benefits and also includes \$1,498,000 fund benefits reimbursed to the organisations under the Subsidised Health Benefits Plan.

### Subsidised Health Benefits Plan

As from 1 January 1970 certain low income families, persons in receipt of unemployment, sickness or special benefits under Social Services legislation, and migrants during the first two months after their arrival in Australia, have been eligible for free medical benefits and hospital benefits up to the public standard ward charge. On 1 July 1970, the Plan was extended to provide certain families whose incomes were slightly in excess of the eligible limit for free insurance, with health insurance at reduced contribution rates. The income eligibility level for free insurance in these cases, effective from 5 June 1972, was \$51.50 per week, while families with incomes exceeding \$51.51 but not exceeding \$57.50 a week pay reduced contributions. From 1 November 1971 the Plan, formerly known as the Subsidised Medical Services Scheme, was renamed the Subsidised Health Benefits Plan and a pharmaceutical concession was introduced whereby all beneficiaries were entitled to purchase drugs and medicines dispensed under the Pharmaceutical Benefits Scheme for 50 cents per prescription instead of the usual \$1.00.

### Pensioner Medical Service

The Pensioner Medical Service, which commenced in 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations made under the provisions of the *National Health Services Act* 1948-1949. The service has been continued under the provisions of the *National Health Act* 1953-1972.

Persons eligible to receive the benefits of the Pensioner Medical Service are those who receive an age, invalid or widow's pension, or a sheltered employment allowance, under the *Social Services Act* 1947-1972, or a service pension under the *Repatriation Act* 1920-1972, and who are able to satisfy the means test in force immediately prior to 1 October 1969; and their dependants. Also eligible are persons in receipt of an allowance under the *Tuberculosis Act* 1948, and their dependants.

The benefits provided to eligible persons consist of free medical service of a general practitioner nature such as that ordinarily rendered in the surgery or at the patient's home, including treatment at home following an operation. Patients may be charged a small fee by doctors for travelling and for attendance outside normal surgery or visiting hours. General practitioners enrolled in the scheme are paid on a fee-for-service basis by the Commonwealth Government.

Qualified persons are entitled to a wide range of medicines without charge at any pharmacy, on presentation of a doctor's prescription. Free hospital treatment is also provided for public, standard or general ward patients in public hospitals.

At 30 June 1972 the total number of pensioners and dependants enrolled in the Pensioner Medical Service was 1,254,554, while the number of doctors participating in the scheme at that date was 6,817. During 1971-72 doctors in the scheme provided 10,272,084 services (visits and surgery consultations) for persons enrolled in the scheme. For these services they were paid \$27,803,574. The average number of services rendered by doctors to each enrolled person was 8.32.

#### Free milk for school children scheme

The *States Grants (Milk for School Children) Act* 1950 was passed with the object of improving the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending government or non-government primary schools, including nursery schools, kindergartens, creches and missions for Aborigines, are eligible to receive free milk. The cost of the milk and half the capital or incidental costs, including administrative expenses of the scheme, are reimbursed by the Commonwealth to the States. All States participate in the scheme. At the end of 1971 approximately 1,922,000 children were entitled to receive free milk under this scheme. Expenditure by the Commonwealth Government during the years 1967-68 to 1971-72 was as follows.

COMMONWEALTH EXPENDITURE ON MILK FOR SCHOOL CHILDREN SCHEME  
STATES AND TERRITORIES, 1967-68 TO 1971-72  
(\$'000)

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1967-68	3,357	2,628	1,376	955	853	511	75	106	9,861
1968-69	3,380	2,641	1,549	1,065	800	431	110	109	10,085
1969-70	3,458	2,650	1,570	910	800	476	95	124	10,083
1970-71	3,497	2,350	1,697	895	838	682	115	126	10,199
1971-72	3,662	3,501	1,869	1,065	1,001	516	127	153	11,894

The figures in the foregoing table represent amounts reimbursed to the States in each financial year for cash benefits to persons and other related expenditure and are not the actual State expenditures in that year.

#### Pharmaceutical benefits

All persons receiving treatment from a medical practitioner registered in Australia are eligible for benefits on a comprehensive range of drugs and medicines when supplied by an approved pharmacist upon presentation of a prescription, or by an approved hospital to patients receiving treatment at the hospital. Special arrangements exist to cover prescriptions dispensed at locations outside the normal conditions of supply e.g. in remote areas.

Until November 1971, patients other than eligible pensioners and their dependants paid 50 cents of the cost of each benefit prescription supplied. In November 1971 the patient contribution was increased from 50 cents to \$1.00 for each benefit prescription provided to patients other than eligible pensioners and their dependants and those covered by provisions relating to the Subsidised Health Benefits Plan. Patients qualifying under the Subsidised Health Benefits Plan continue to contribute at the rate of 50 cents for each benefit prescription supplied.

Total Commonwealth expenditure on pharmaceutical benefits in the year 1971-72 was \$173,268,448.

The following table sets out the number of prescriptions and expenditure on the more frequently prescribed therapeutic preparations under the Pharmaceutical Benefits Scheme for 1970-71 and 1971-72. The expenditure for both years includes patient contributions, which totalled \$35,466,642 in 1971-72. Prescriptions issued free to pensioners are included, and these amounted to \$52,005,350 in 1971-72. Benefits dispensed by hospitals and those covered by special arrangements are not included, these amounted to \$31,201,229 in 1971-72.

**PRESCRIPTIONS DISPENSED UNDER THE PHARMACEUTICAL BENEFITS SCHEME<sup>(a)</sup>  
1971 AND 1972**

Therapeutic category	Year ended 30 June			
	1971		1972

<b>Total . . . . .</b>	<b>71,487</b>	<b>157,741</b>	<b>72,442</b>	<b>177,534</b>

(a) Excludes benefits dispensed by hospitals and those covered by special arrangements.

### Anti-tuberculosis campaign

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds maintenance expenditure for the year 1947-48. Thus the States carry out the physical or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating, and financial capacity. An advisory council, known as the National Tuberculosis Advisory Council, has been set up to advise the Minister with respect to the running of the campaign. There are twelve members, the chairman being the Commonwealth Director-General of Health.

To reduce the spread of infection the Commonwealth Government pays allowances to persons suffering from infectious tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13 July 1950 and the current rates payable with effect from 14 December 1972 are shown in the following table. Persons eligible for the 'married persons' rate comprise only those with a dependent spouse; 'single persons' include widowers, divorcees and married persons without a dependant spouse.

### RATES OF TUBERCULOSIS ALLOWANCE: AUSTRALIA, 1972 (\$)

Classification	Weekly allowance
Married person rate . . . . .	43.75
Single person rate—	
Where there are dependent children . . . . .	29.50
Where there are no dependent children . . . . .	(a) 24.75

(a) Reduced to \$21.50 where treatment is received free of charge in an institution.

In addition to the above rates there may be payable a mother's or guardian's allowance of \$2.00 a week or supplementary assistance of up to \$2.00 a week. An allowance of \$4.50 a week is payable in respect of each dependent child of a sufferer.

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a person receiving the married person rate, \$34.50 a week; a person who is without a spouse or dependent female and is entitled to a 'single person' rate, \$20.00 a week; and a person with a spouse but who is not entitled to a 'married person' rate, \$17.25 a week.

*Commonwealth expenditure.* Expenditure by the Commonwealth Government on its anti-tuberculosis campaign is set out in the following tables.

**COMMONWEALTH EXPENDITURE ON ANTI-TUBERCULOSIS CAMPAIGN  
STATES AND TERRITORIES, 1971-72**  
(\$'000)

(c) Includes administrative costs.

### Mass immunisation campaigns

*Poliomyelitis.* An anti-poliomyelitis campaign, using Salk vaccine, was commenced in 1956. This campaign continued until 1967 when, following a recommendation by the National Health and Medical Research Council, a campaign using Sabin vaccine was commenced in all States, the Northern Territory and the Australian Capital Territory. The Sabin vaccine is taken orally and a course of treatment consists of three doses. These are given at intervals of eight weeks. In the five years prior to 1972 seven new cases of poliomyelitis were notified, one of them being in 1971. During 1972 seven new cases were notified, three from Victoria and four from Western Australia.

*Measles.* As a result of a recommendation by the National Health and Medical Research Council in May 1969, campaigns against measles commenced in early 1970 and during 1972 were in operation in all States, the Australian Capital Territory and the Northern Territory. The vaccine being used is derived from the Schwarz virus strain which is a live attenuated virus. It is administered by intramuscular injection to children in their second year of life. A course of treatment consists of one dose. A total of 190,090 doses was distributed through the Commonwealth Serum Laboratories during 1972.

*Rubella.* In 1969, the National Health and Medical Research Council recommended that the Cendehill rubella vaccine be used in anti-rubella (German measles) campaigns in Australia. Consequently, the Commonwealth agreed to make this vaccine available to the States on the same basis as poliomyelitis and measles vaccines. By December 1970 all States had indicated that they would accept this offer. Immunisation campaigns have been conducted in all States, the Northern Territory and the Australian Capital Territory since 1971 amongst girls in the twelve to fourteen years age group. The vaccine is available from health departments and, through them, from private practitioners to other women at risk. A course of treatment with rubella vaccine, given intramuscularly, is one dose.

### Commonwealth health services organisations

*The Commonwealth Health Laboratory Service* was established under provisions of the *National Health Act* 1953-1972. The laboratories provide diagnostic and investigational facilities at sixteen locations, principally in country areas, throughout Australia. Health laboratories are situated in Albury, Alice Springs, Bendigo, Cairns, Canberra, Darwin, Gove, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba and Townsville. Their primary role is to assist medical practitioners in the diagnosis of illness and disease and to provide facilities for investigations into public health and aspects of preventive medicine. During 1971-72, the laboratories carried out approximately 3.1 million pathology tests and investigations in respect of 994,303 patient requests. The work of the laboratory at Gove is not included in these figures as it had not commenced operations during 1971-72, specimens being referred to Darwin for investigation.

The *Commonwealth Serum Laboratories (CSL)* are controlled by the Commonwealth Serum Laboratories Commission, a corporate body established under the *Commonwealth Serum Laboratories Act* 1961-70. CSL is Australia's leading centre for the production and supply of biological products for human and veterinary use and one of Australia's foremost scientific institutes.

Its main functions are to produce and sell prescribed biological products used for therapeutic purposes and to ensure the supply of prescribed essential biological products in accordance with national health needs. The functions include research and development relating to the range of products in its charter and allied fields and the maintenance of potential production capacity for use in emergencies. Located at Parkville, Melbourne, CSL's research laboratories and manufacturing and storage buildings now cover most of the 27-acre site of Crown Land granted in 1918.

For several decades, CSL has been Australia's chief supplier of biological medicines, insulins, vaccines, penicillins, human blood fractions, BCG and an ever-increasing range of veterinary biological products needed by Australia's sheep, cattle, pig and poultry industries.

In addition, biological research into many kinds of human and veterinary disease is carried out, covering the fields of bacteriology, biochemistry, immunology and virology.

The Laboratories employ more than 1,000 people, including medical officers, veterinarians, bacteriologists, biochemists, physicists, engineers, accountants, laboratory assistants and skilled tradesmen.

*The Commonwealth Radiation Laboratory* was originally established in 1929 as the Commonwealth Radium Laboratory, and has served from that time as the Commonwealth centre for radiological physics and as custodian of all Commonwealth-owned radium used for medical purposes. The laboratory's functions have expanded over the years to include the physical aspects of X-rays; the distribution of all radio-isotopes used in Australia for medical purposes; the maintenance of facilities for radio-chemical investigation; the assay of radioactive substances in the Australian environment; and the maintenance of a whole-body monitor. National standards for the measurement of X-rays and of radio-isotopes are also maintained. The laboratory provides assistance in matters relating to protection against ionising radiations and operates a film-badge service to monitor the radiation exposure of those who work with such radiation. The advisory service on protection has recently been extended to include the hazards associated with the use of microwave and laser radiations. In 1971-72 there were 12,341 deliveries of radio-isotopes, comprising 41 different isotopes, procured for use in medicine and medical research. Of these 10,922 deliveries were obtained from the Australian Atomic Energy Commission. Free issues for medical diagnosis and therapy supplied for patients throughout Australia were 246,467, the cost of \$925,097 being met from the National Welfare Fund. Film badges, numbering 74,345 were processed, assessed, and reported on. The Laboratory also supplies radon to approved hospitals and private practitioners in Australia and New Zealand. In 1971-72, 24,078 millicuries of radon were issued. Administrative costs for 1971-72 were \$401,778 and \$28,901 was expended on plant and equipment.

The *Commonwealth Acoustic Laboratories* were established under the *Acoustic Laboratories Act* 1948 to undertake scientific investigations into hearing and problems associated with noise as it affects individuals. The Laboratories' functions also include research into medical applications of ultrasound and advice to the Armed Forces and Commonwealth Departments and instrumentalities on hearing conservation and the reduction of noise. Audiological services are provided in major centres throughout Australia to assist children, ex-servicemen and pensioners with hearing problems. Hearing aids are supplied and serviced free of charge to persons under 21 years, and to pensioners and their dependants for a hiring fee of \$10. Hearing aids are also provided and maintained on behalf of the Repatriation and other Commonwealth Departments. During 1971-72 the number of new cases examined at the laboratories was 29,284 including 11,322 children, 5,586 repatriation cases, 877 members of the defence forces, 8,765 pensioners and 806 civil aviation referrals; 15,245 calaid hearing aids were fitted and 72,489 were on loan at the end of the year. The cost of supply and maintenance of hearing aids to persons under twenty-one years of age and pensioners was \$643,959. Administrative costs of the laboratories were \$1,311,024 and expenditure on plant and equipment \$83,262.

The *Home Nursing Subsidy Scheme*, under the *Home Nursing Act* 1956, provides for a Commonwealth subsidy to assist in the expansion of home nursing activities. Organisations eligible for the subsidy are those which are non-profit making, employ registered nurses, and receive assistance from a State Government, local government body or other authority established by or under State legislation. During 1971-72 subsidies totalling \$1,835,215 were paid to 115 organisations providing home nursing services in the States. Home nursing services in the Northern Territory and the Australian Capital Territory are provided by the Commonwealth Department of Health.

### Other Commonwealth health organisations

The *National Health and Medical Research Council* was established in 1936 to replace the National Health Council. Its main functions are to advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public, and on medical research. It also advises the Commonwealth and State Governments on the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition. The Council advises the Commonwealth Minister for Health on the application of expenditure from the Medical Research Endowment Fund which was established under the *Medical Research Endowment Act* 1937 to provide assistance to departments of the Commonwealth or of a State engaged in medical research; to universities for the purpose of medical research; to institutions and persons engaged in medical research and in the training of persons in medical research. The Commonwealth makes a triennial appropriation for the Fund, that for 1973 to 1975 being \$13,500,000.

The *School of Public Health and Tropical Medicine* was established in 1930 by the Commonwealth Government at the University of Sydney under an agreement with that University. It provides, for medical graduates and certain undergraduates, training in public health and tropical medicine in addition to carrying out research and consultative activities in these and allied fields. During 1972, thirteen diplomas were awarded in Public Health and seven in Tropical Medicine and Hygiene. Costs met by the Commonwealth during 1971-72 were \$764,556 for administration and \$16,060 for plant and equipment.

The *Institute of Child Health* is associated with the School of Public Health at the University of Sydney and with the Royal Alexandra Hospital for Children at Camperdown. Its activities include research into medical and social problems of childhood, undergraduate and postgraduate teaching at the University of Sydney, collaboration with other national and international organisations concerned with child health and disease, and the training of United Nations and Colombo Plan Fellows. Costs of the Institute paid by the Commonwealth during 1971-72 were \$185,399 for administration and \$34,464 for plant and equipment.

The *Commonwealth Bureau of Dental Standards* operates under Section 9 of the *National Health Act* 1953-1972. It is part of the Commonwealth Department of Health and is concerned with research and testing related to dental and allied materials, instruments and processes. It assists in the preparation of recognised standards for materials and instruments through the Standards Association of Australia and co-operates with the Australian Dental Association in its programme of accreditation of products. Its functions include the provision of a consultative service and testing facilities for public instrumentalities, the dental profession, and manufacturers and distributors of dental products. The number of these products tested during 1971-72 was 404. Regular surveys are made of dental products on the market and the results are made available to the profession. Expenditure on plant and equipment for 1971-72 was \$5,070 and administrative expenses including salaries were \$71,850.

*The Australian Institute of Anatomy* is administered by the Australian Capital Territory Health Services Branch of the Commonwealth Department of Health. Its prime function is the maintenance of two museums which are open to the general public and contain exhibits of an educational nature. One museum contains anatomical and biological displays while the other is devoted to the display of items from the National Ethnographic Collections which are held in trust by the Institute until a museum is erected to house them. In this section particular emphasis has been placed on the life and culture of the Australian Aborigines.

*The National Biological Standards Laboratory* was set up under the *Therapeutic Substances Act* 1953-1959 which empowers the Commonwealth to ensure that therapeutic substances used for the prevention, diagnosis, and treatment of disease in man and animal are safe, pure, and potent. The *Therapeutic Goods Act* 1966, was proclaimed on 12 November 1970. This Act repealed the *Therapeutic Substances Act* 1953-1959 and extended the Commonwealth's power to cover therapeutic goods such as surgical dressings and containers of substances for therapeutic use. The Commonwealth Director-General of Health is authorised under the Act to set up laboratories to test such substances. Of the 2,041 samples examined by the Laboratory during 1971-72, 227 failed to meet the required standards. In addition, 1,965 safety tests were performed, 13 were failed, and 47 were indeterminable. Administrative costs for 1971-72 were \$896,640 and \$108,164 was expended on plant and equipment.

*The Drug Evaluation Committee* was formally set up in June 1963 to advise on the importation of new and existing drugs and toxicity of drugs already available on the Australian market. It has power to co-opt and seek advice from specialist medical colleges and associations, and from the medical and allied professions, the drug manufacturers and other sources. The Committee's reports and resolutions have resulted in the establishment of a Register of Adverse Drug Reactions and amendments to the Customs (Prohibited Imports) Regulations implemented on 1 August 1970 to provide control on importation of new drugs. During 1971-72, 138 applications for general marketing were received, an increase of 5 over the previous year. In addition, 74 applications for clinical trials were submitted.

*The Hospital and Allied Services Advisory Council* was created by agreement at the 1970 Australian Health Ministers Conference to provide the Ministers with advice on the co-ordination of the various matters connected with hospital and allied services through the operation of five sub-committees. The five Committees of Council are the Uniform Costing Committee, the Research Committee, the Computer Committee, the Hospital and Allied Services Construction Planning Committee and the Post-graduate Accreditation Committee.

## Commonwealth grants to States

### Grants for mental health institutions

Following a survey of the mental health facilities and needs in Australia made in 1955, the Commonwealth made an offer of \$20 million to the States as part of a capital expenditure programme of \$60 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer. By 1963 more than three-quarters of the total grant under the *States Grants (Mental Institutions) Act* 1955 had been distributed and the Commonwealth Government announced in November 1963 its intention of continuing assistance to the States towards capital costs on a similar basis, but without overall limit, for a period of three years. In May 1964 the *States Grants (Mental Health Institutions) Act* 1964 was passed to implement that policy. This Act provided for the continuation of Commonwealth aid of \$1 for every \$2 of capital expenditure by the States in connection with the buildings or equipment of mental health institutions for the three-year period ending 30 June 1967. With the passing of amending Acts in 1967 and 1970 this period has been extended firstly to 30 June 1970 and then to 30 June 1973. The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government from 1967-68 to 1971-72.

EXPENDITURE ON MENTAL HEALTH INSTITUTIONS BY THE COMMONWEALTH GOVERNMENT: STATES, 1967-68 TO 1971-72  
(\$'000)

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
1967-68.	2,095	1,381	196	63	148	358	4,243
1968-69.	1,925	1,200	323	433	375	399	4,655
1969-70.	2,305	947	602	1,299	241	108	5,501
1970-71.	1,414	798	464	909	395	219	4,199
1971-72.	1,325	828	1,169	246	454	185	4,207

### Paramedical services

The *States Grants (Paramedical Services) Act* 1969 provides for the Commonwealth to share on a \$1 for \$1 basis with participating States the cost of approved paramedical services, such as chiropody, occupational therapy, physiotherapy and speech therapy, provided wholly or mainly for aged persons in their homes. Matching grant payments during 1971-72 amounted to \$6,925.

### Commonwealth grants to organisations associated with public health

In addition to providing the services mentioned on pages 425-39, the Commonwealth Government gives financial assistance to certain organisations concerned with public health. Examples of organisations included in this category are given in the following text. More detailed information on their operations and functions is given in Year Book No. 53, pages 570-3.

*The Commonwealth Council for National Fitness* operates under the *National Fitness Act* 1941. Its main function is to advise the Minister for Health concerning the promotion of national fitness. The Act also provides for the establishment of a trust account, known as the National Fitness Fund, to assist in financing the movement. During 1971-72 the Commonwealth's contribution to the Fund was \$418,000, of which \$68,000 was for assistance towards capital expenditure. Expenditure from the Fund during 1971-72 was \$437,391, distributed as follows: State National Fitness Councils, \$270,308; State Education Departments, \$34,000; State Universities, \$24,800; Australian Recreation Leadership Course, \$6,600; capital expenditure on national fitness projects, \$87,391; grants to Australian Capital Territory organisation, \$7,500; and administration, \$6,792. With the transfer of responsibility for the *National Fitness Act* 1941 from the Department of Health to the Department of Tourism and Recreation, the National Fitness section of the Department of Health ceased to function in December 1972.

*The Royal Flying Doctor Service* is a non-profit organisation providing medical services in remote areas of Australia. It is distinct from, but co-ordinates with, the Aerial Medical Services operated by the Commonwealth Department of Health from Darwin and Alice Springs in the Northern Territory. The Royal Flying Doctor Service is financed mostly from donations and government contributions. During the triennium ended 30 June 1974 the Commonwealth Government is contributing at the rate of \$485,000 per annum—\$170,000 capital assistance and \$315,000 towards operational costs. In addition, payments of \$131,596 have been made up to 30 June 1972 towards the cost of the changeover of twelve radio base stations to single side band operation. The Service made 3,543 flights during 1971-72, travelling 1,648,333 miles and transporting 4,219 patients. In the same period medical staff conducted a total of 84,664 consultations and dental treatment was given to 1,625 patients. The radio network of the Service handled 277,469 telegrams.

*The Red Cross Blood Transfusion Service* is conducted by the Australian Red Cross Society throughout Australia. The operating costs of the service in the States are met by the State Governments paying 60 per cent; the Commonwealth, 30 per cent; and the Society, 10 per cent. In the Northern Territory and Australian Capital Territory the Commonwealth pays 90 per cent and the Society 10 per cent. Commonwealth expenditure for each State and Territory during 1971-72 was as follows: New South Wales, \$254,500; Victoria, \$268,545; Queensland, \$191,550; South Australia, \$139,488; Western Australia, \$106,057; Tasmania, \$29,805; Northern Territory, \$36,200; and the Australian Capital Territory, \$23,000, making a total of \$1,049,145.

*The National Heart Foundation of Australia* is a private national organisation established to promote research in cardiovascular disease, to rehabilitate heart sufferers and to foster the dissemination of information about heart diseases. The foundation was formed in 1960 as a result of a public appeal yielding \$5 million to which the Commonwealth Government contributed \$20,000. A further appeal in 1969 raised \$1.6 million and the Foundation now has an annual income from public donations of over \$600,000. In 1972 the Commonwealth Government made a grant to the Foundation of \$250,000. Expenditure in 1972 came to almost \$1 million of which about half was devoted to supporting research into cardiovascular disease. This is the single most important function of the Foundation and from its inception to the end of 1972 it has allocated well over \$5 million for grants-in-aid towards research in university departments, hospitals and research institutes; research fellowships tenable in Australia and overseas; and overseas travel grants for study purposes.

*The World Health Organisation (WHO)*, founded during 1948, is a specialised agency of the United Nations having as its objective the attainment by all peoples of the highest level of health. It functions as the directing and co-ordinating authority in international health work; provides consultative and technical assistance to governments and special groups; examines all aspects of health including preventive and curative medicine and research; sets international standards with respect to food, biological, pharmaceutical and similar products; and determines regulations for

the control of quarantinable diseases. The organs of WHO are the World Health Assembly and the six Regional Committees which meet annually and the Executive Board which meets twice a year. Australia is assigned to the Western Pacific Region the headquarters of which is at Manila, and was represented at both the 25th World Health Assembly in Geneva in May and the Regional Committee Meeting in Guam in September 1972. Australia's contribution to WHO for 1971-72 was \$A933,665.

The *International Agency for Research on Cancer* was established by the 18th World Health Assembly in 1965 within the framework of the World Health Organisation. The headquarters of the Agency are located in Lyon, France. The objectives and functions of the Agency are the provision for planning, promoting and developing research in all phases of the causation, treatment and prevention of cancer; collection and dissemination of information on epidemiology and cancer research throughout the world; education and training of personnel for cancer research; and the encouragement of, and assistance at national level if necessary by the direct establishment of, research organisations. Participation in the Agency is subject to membership of the World Health Organisation and, at the determination of the Governing Council, the ability of the State to contribute effectively to the scientific and technical work of the Agency. Australia became a Participating State within a few months after the establishment of the Agency. At present there are 10 Participating States namely: Australia, Belgium, France, the Federal Republic of Germany, Italy, Japan, The Netherlands, The Union of Soviet Socialist Republics, the United Kingdom and the United States of America. Australia's contribution to the I.A.R.C. for 1971-72 was \$A148,211.

## Commonwealth Parliamentary Committees concerning Public Health

### Senate Select Committee on Drug Trafficking and Drug Abuse

On 25 November 1969, the Senate resolved that a Select Committee of the Senate be appointed to inquire into and report upon drug trafficking and drug abuse in Australia and, in particular, (a) the incidence, distribution and causes of drug abuse; the extent, organisation and methods of drug trafficking, including the sources of supply; the adequacy of existing Commonwealth and State legislation and administration; the adequacy of present educational programmes against drug abuse; the adequacy of existing international agreements affecting Australia; the effectiveness of existing international law enforcement agencies and methods in regard to Australia, and (b) to make such recommendations as it may think fit, on legislative and administrative measures by the Commonwealth to prevent and deal with drug trafficking and drug abuse; the desirability of further international agreements or improvements in existing international law enforcement agencies and methods so far as they affect Australia; and the treatment and rehabilitation of persons dependent on drugs. The report of this Committee was tabled on 6 May 1971. For information on drug detection and offences see Chapter 15, Law, Order and Public Safety.

### House of Representatives Select Committee on Pharmaceutical Benefits

On 16 September 1970, the House of Representatives resolved that a Select Committee be appointed to inquire into and make recommendations on all aspects of the provision of, and arrangements for the supply of, pharmaceutical benefits under the *National Health Act* 1953-1970, with particular reference to the scope of the scheme; all factors contributing to the cost of the scheme; and the effects of the scheme on the health and welfare of the community. The report was tabled on 25 May 1972.

### Senate Standing Committee on Health and Welfare

On 11 June 1970, the Senate created the Standing Committee on Health and Welfare. On 2 September 1970, the Senate resolved to refer to this Committee the problems of, and the provisions for assistance to, mentally and physically handicapped persons in Australia. The report of this Senate Standing Committee was tabled on 5 May 1971.

## STATE GOVERNMENT ACTIVITIES

(Includes activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory)

### Public health legislation and administration

For a comprehensive account of the administration of health services prevailing in 1966 in each State, the Northern Territory and the Australian Capital Territory, *see* pages 543–50 of Year Book No. 53. For details of legislation and administrative changes in subsequent years *see* Year Book Nos. 54 to 58. The following paragraphs refer briefly to recent developments.

In *New South Wales*, as part of the planning for complete regionalisation of hospital services, all public hospitals have been tentatively allocated to seven country and three metropolitan regions. Regional offices of the Hospitals Commission have been established and are fully operational for all regions.

The Health Commission Act, 1972, was assented to on 23 November 1972 to constitute the Health Commission of New South Wales and to define its powers, authorities, duties and functions; to dissolve the Hospitals Commission of New South Wales and the Board of Health and to abolish the Department of Health; to amend the Public Health Act, 1902, the Public Hospitals Act, 1929, and certain other Acts. A date has not yet been proclaimed for the Act to commence.

The Clean Air (Amendment) Act, 1972, was introduced and empowers the Minister to prohibit, by order, burning in open fires of any matter except for certain purposes such as recreational, domestic and agricultural purposes. Also, the Clean Air (Further Amendment) Act, 1972, was introduced and prohibits the sale or use of motor vehicles that emit excessive air impurities, to enable regulations to be made requiring that motor vehicles be fitted with prescribed antipollution devices. Both these Acts amend the Clean Air Act of 1961.

The Clean Waters Act, 1970, and Regulations became effective from 3 November 1972, giving the State control over the pollution of waterways.

The Cigarettes (Labelling) Act, 1972 was introduced to prohibit the sale or use of cigarettes in New South Wales except in packages marked with the prescribed health warning.

The Medical Practitioners (Amendment) Act 1972 was introduced, to vary the constitution of the New South Wales Medical Board; to make further provisions with respect to the registration of medical practitioners and the powers, authorities, duties and functions of the Board, the investigating committee and the disciplinary tribunal; to establish a Register of Specialists for New South Wales and to provide for the registration of certain persons.

The Blacktown Health Centre situated in the grounds of Blacktown District Hospital was opened on 26 May 1972. This Centre represents the latest development in the changing attitude to community health services in its location and close association with a public hospital. The Centre provides child health, mental health and health education facilities.

The King George V and Queen Mary Maternal and Infant Welfare Research Laboratories located in the grounds of the Royal Prince Alfred Hospital were opened on 15 September 1972. The laboratories, constructed from the resources of the King George V and Queen Mary Maternal and Infant Welfare Foundation, the Royal Prince Alfred Hospital and the Government, will provide endocrine assays in respect of patients of all obstetric units in the metropolitan area.

In *Victoria* the establishment of the Alcoholics and Drug Dependent Persons Services Branch of the Health Department is nearing completion and the drug education facilities are continuing to expand under the Commonwealth-States arrangement.

A *Dental Technicians Act* 1972 has been introduced to control the training, registration and practice of dental technicians.

A general amendment of the Health Act was introduced to provide for better control of private hospitals but incorporating a number of necessary amendments relating to the control of dangerous substances, the supervision of tents and amusement structures used by the public; the supervision of food premises and the adoption from time to time of new issues of the British Pharmacopoeia.

An amendment of the *Medical Practitioners Act* 1970 provides for a compulsory twelve month period as an intern in a hospital for all persons registered by the Medical Board of Victoria after 1 October 1973.

Other amendments passed by the Parliament related to: the *Chiropodists Act* 1968—an extension of time from one to two years in which persons in practice at the commencement of the *Chiropodists Act* 1968 may seek registration; the *Medical Health Act* 1959—members of the police force were authorised to take patients to a psychiatric hospital on the request of a relative or friend seeking to arrange the patient's admission; and the *Nurses Act* 1958, and *Opticians Registration Act* 1958—increased fees for registration, etc.

A Joint Select Committee of the Parliament was established by special Act to inquire into and report upon the activities of Osteopaths, Chiropractors and Naturopaths and to make recommendations for future forms of control of these practices.

In *Queensland*, the *Medical Act Amendment Act* of 1971 was passed to enable medical practitioners who hold satisfactory qualifications gained in Canada to become eligible for registration in Queensland without further examination.

The *Health Act Amendment Act* of 1971 increased the area and power of authority to control illicit and illegal use of dangerous drugs, prohibited plants, and implements used in connection with the drugs of addiction, with the important provision of an offence for trafficking in dangerous drugs, as distinct from possession of these drugs. Emphasis was given to this trafficking offence with the declaration of harsher penalties including imprisonment.

In *Western Australia* the *Dentists Act Amendment Act*, 1972 was assented to on 6 December, 1972, making provision for the training and employment of Dental Therapists as well as establishing a committee to be known as the Dental Charges Committee with power to investigate fees or remuneration payable to a dentist for dental service.

The *Noise Abatement Act*, 1972 was also assented to on 6 December, 1972 which allows for the appointment of a Noise and Vibration Council which, with the assistance of an Advisory Committee, may make regulations or model by-laws to initiate the means of preventing, abating or mitigating the nuisance arising from noise and vibration.

### Supervision and care of infant life

Because the health of mothers and infants depends largely on pre-natal attention as well as after-care government, local government and private organisations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by infant welfare centres, baby clinics, creches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. (Information about infant mortality will be found in Chapter 8, Vital Statistics.) Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons.

Under the provisions of the *Social Services Act* 1947–1972 maternity allowances provide financial assistance towards the expenses associated with the birth of children. Information about maternity allowances is given in Chapter 13, Welfare Services.

#### Nursing activities

Several State Governments maintain centres which provide advice and treatment for mothers and children and, in addition, subsidies are granted to various associations engaged in welfare work.

*Infant welfare centres.* The following table gives particulars of the activities of infant welfare centres for the year 1972. The figures relate to all centres, whether permanently staffed or on a temporary or part-time basis. Centres may be located at accommodation specially provided for this purpose, or at halls, schools, etc.

INFANT WELFARE CENTRES: STATES AND TERRITORIES, 1972

	N.S.W.	Vic.	Qld(a)	S.A.(a)	W.A.	Tas.	N.T.(a)	A.C.T.	Aust.
Number of centres(b)	439	738	288	297	86	111	20	51	2,030
Attendances at centres	1,215,612	1,587,636	560,952	319,734	273,226	164,762	34,881	84,146	4,240,949

Nurses' hospital-visits(d)	63,783	24,983	32,076	n.a.	18,909	n.a.	1,994	104	n.a.

(a) Year ended 30 June 1972.

(b) At end of year.

(c) Pre- and post-natal.

(d) Post-natal.

Mobile units are used to service centres in some States. In 1972, the numbers of units and centres served, included in the above table, were as follows: Victoria, 4 and 14; Queensland, 3 and 34; South Australia, 2 and 28; Western Australia, 4 and 42. The number of centres for Tasmania includes 13 areas visited by sisters in cars. The number of centres for the Australian Capital Territory includes 5 areas covered by home visits.

Since 1930, the number of attendances at the infant welfare centres has increased more than four-fold. The numbers of attendances at ten year intervals since 1930 were as follows: 1930, 919,893; 1940, 2,035,299; 1950, 3,049,375; 1960, 3,482,383; and 1970, 4,010,906.

*Bush Nursing Associations.* Treatment for mothers and children is also provided by the Bush Nursing Associations. The numbers of centres maintained by the Associations in 1972 were: New South Wales, 11; Victoria, 58; Queensland, 5; South Australia, 39; and Western Australia, 11. In Tasmania, all of the district nursing centres have been taken over by the nearest public hospital and are no longer distinct entities.

### Medical and dental inspection of school children

For details of the administration of school health services in each State, the Northern Territory, and the Australian Capital Territory, see Year Book No. 55, pages 458-61. Further information about the operation of the school medical and dental services is given in State Year Books. The following paragraphs summarise features common to most States.

Medical and dental inspection of school children is carried out in all States under the control of State health departments, and in the Northern Territory and the Australian Capital Territory under the control of the Commonwealth Department of Health. The school health services are available to both government and non-government schools in metropolitan areas and larger country towns. In some States, special arrangements are made for children attending schools in more remote country areas.

The aim of the school medical services is to medically examine all children at least once during their school careers, usually on entry into primary school. Review examinations or, in some States, tests of vision and hearing by school nurses, are conducted in upper-primary and lower-secondary grades. Parents or guardians are notified of any departure from normal health and advised to seek further attention if necessary.

The aim of the school dental services is to examine and give regular dental treatment to children. Usually, acceptance for treatment is limited to children in primary schools. Some school children are treated at hospital dental clinics. Aboriginal missions and orphanages are also visited by school dentists. The consent of a parent or guardian is necessary before treatment can be given. In some States, priority is given to children who live in areas beyond the easy reach of other dental services. Treatment in remote areas is facilitated by the use of travelling dental clinics.

The following table summarises school health services in the States and Territories. Uniform concepts and definitions have not been developed, so Australian totals have not been shown.

SCHOOL HEALTH SERVICES: STATES AND TERRITORIES, 1972

	N.S.W.	Vic.	Qld(a)	S.A.	W.A.	Tas.	N.T.(a)	A.C.T.

(a) Year ended 30 June 1972. (b) Full-time and part-time. (c) Excludes some children tested for hearing and vision by school sisters. (d) Includes pre-school children. (e) Number of defects found. (f) There is also a dental team with the Royal Flying Doctor Service (based at Broken Hill). (g) In addition, portable dental equipment is possessed by 13 dental officers who function from departmental vehicles. (h) Only children who reside in more remote areas.

## HOSPITALS AND OTHER STATISTICS

This section provides statistical information on hospitals and nursing homes; notifiable diseases; a survey of chronic illnesses and impairments; and cremations. The institutions referred to under this heading are classified into the following groups: public hospitals and nursing homes; private hospitals and nursing homes; repatriation hospitals; Hansen's hospitals; and mental health institutions. Statistics of quarantine stations, and of hospitals maintained by the Armed Services, are not included.

## Public hospitals and nursing homes

The statistics shown for public hospitals and nursing homes refer to the following institutions: *New South Wales*—all in-patient institutions under the authority of the New South Wales Hospitals Commission, and which receive a government subsidy during the year, and the six State hospitals and nursing homes under the control of the Department of Public Health; *Victoria*—all subsidised institutions under the authority of the Victorian Hospitals and Charities Commission, one tuberculosis sanatorium, and the Peter MacCallum Clinic, but not the exotic diseases block at the Fairfield Hospital; *Queensland*—all hospitals and nursing homes open to all sectors of the public and administered by the State Government or by District Hospital Boards or those which are approved by the Commonwealth Health Department as public and have all of their beds approved as public; *South Australia*—all hospitals controlled and maintained by, or which receive a regular annual grant or subsidy for maintenance purposes from, the State, local government or semi-government authorities; *Western Australia*—all departmental and subsidised board hospitals, including Perth Dental Hospital; *Tasmania*—all public hospitals designated as such by the Director-General of Health Services, together with three homes for the aged, and one chest hospital; *Northern Territory*—departmental hospitals at Darwin, Alice Springs, Tennant Creek, and Katherine; *Australian Capital Territory*—the Canberra Hospital and the Queen Elizabeth II Coronation Home for post-natal care.

A number of institutions classified by the Commonwealth Department of Health as 'public' hospitals or nursing homes are not included in the statistics of public hospitals and nursing homes: there were 86 such institutions at June 1971, with an approved bed capacity of 4,154.

## Number, staff and accommodation

## PUBLIC HOSPITALS AND NURSING HOMES: NUMBER, STAFF AND ACCOMMODATION, STATES AND TERRITORIES, JUNE 1971

(a) Includes honorary and visiting medical officers who may hold appointments at more than one hospital. (b) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides, and nursing aide trainees.

## In-patients treated

The following table gives particulars of in-patients treated. The figures shown refer to cases, that is to say, a person who is admitted to hospital or nursing home twice during a year is counted twice. Newborn babies are excluded unless they remain in hospital or nursing home after their mothers' discharge.

In-patients at end of year—									
Males . . . . .	10,038	n.a.	3,792	1,726	2,394	1,014	274	n.a.	n.a.
Females . . . . .	13,696	n.a.	4,546	2,180	2,973	1,210	298	n.a.	n.a.
Persons . . . . .	23,734	14,242	8,338	3,906	5,367	2,224	572	604	58,987
Average daily number resident	21,630	13,445	7,917	3,779	5,113	2,133	576	563	55,156

In addition to those admitted to the hospitals and nursing homes, there are large numbers of out-patients treated. During 1970-71 there were approximately 2,242,800 out-patients treated in New South Wales, 959,000 in Victoria, 969,000 in Queensland, 202,000 in South Australia, 417,000 in Western Australia, 149,000 in Tasmania, 80,000 in the Northern Territory (includes two clinics) and 40,000 in the Australian Capital Territory, making an estimated total for Australia of 5,058,000. The figures quoted refer to cases, as distinct from persons and attendances.

### Revenue and expenditure

Details of revenue and expenditure for the year 1970-71 are shown in the next table. 'Government aid' includes municipal aid which was shown as a separate revenue item for some States in previous Year Books. Commonwealth pharmaceutical benefits and tuberculosis allowances paid direct to the institutions have also been included as 'government aid'.

Commonwealth hospital and nursing home benefits paid direct to public hospitals and nursing homes (in either full or part payment of fees incurred by pensioners and other uninsured patients) are treated on the same basis as Commonwealth benefits used to reimburse insured patients, and included in the amounts shown for 'fees'. Details of Commonwealth expenditure on each of the different categories of hospital benefits are shown on page 429.

For some States, expenditure on capital items out of hospitals' own funds are not included in the figures shown. Comparison between the States should therefore be made with caution.

(a) Includes honorary and visiting medical officers, who may hold appointments at more than one hospital.

(b) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides, and nursing aide trainees.

(c) Estimated.

**Private hospitals and nursing homes**

The figures shown in the following table refer to those private hospitals and nursing homes which have been approved for the payment of Commonwealth hospital benefits under the *National Health Act* 1953-1972. A small number of institutions classified as 'private' by the Department of Social Security are included in public hospital statistics, and these have been omitted from the following two tables. Statistical information about patients, staff and finance of these institutions is not available on a uniform Australia-wide basis.

**PRIVATE HOSPITALS AND NURSING HOMES: STATES, 1967 TO 1971**

State	30 June—				
	1967	1968	1969	1970	1971

Australia . . . . .	36,178	38,150	40,301	43,249	47,368

(a) Includes two institutions in the Australian Capital Territory. There were no institutions of this nature in the A.C.T. prior to 1970. (b) Includes one institution in the Northern Territory.

## Repatriation hospitals

The medical care of eligible ex-servicemen and dependants of deceased ex-servicemen is a major function of the Commonwealth Repatriation Department, which provides a comprehensive service.

In-patient treatment is provided at the six Repatriation General Hospitals (one in each State) and at seven auxiliary hospitals and sanatoria. In-patient treatment may also be provided in country hospitals at the Department's expense in certain circumstances. Mental patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Department in mental hospitals administered by the State authorities.

Details of patients, staff and expenditure on Repatriation institutions and other medical services are given in Chapter 5, Repatriation.

## Hansenide hospitals

There are three isolation hospitals in Australia for the care and treatment of persons suffering from Hansen's disease (leprosy). The numbers of isolation patients at these hospitals at 31 December 1972 were: Little Bay (New South Wales), 4; Fantome Island (North Queensland), 8; and Derby (Western Australia), 88. At 31 December 1972 there were 851 leprosy patients in the Northern Territory of whom approximately 62 were in-patients for the care and repair of deformity and not from the point of view of isolation. With the exception of the Institute of Tropical Medicine at Little Bay, nursing services are provided mostly by sisters of religious orders under supervision of Government medical officers.

Special wards for the isolation and treatment of leprosy patients are also provided at other centres. The location of these wards and the number of isolation patients resident at 31 December 1972, were: Fairfield (Victoria), 6; Princess Alexandra Hospital (Queensland), 3.

## Mental health institutions

The presentation of meaningful statistics of mental health services has become increasingly difficult because of changes in recent years in the institutions and services for the care of mental patients. The emphasis has shifted from institutions for care of patients certified insane to a range of mental health services provided for in-patients and out-patients at psychiatric hospitals, admission and reception centres, day hospitals, out-patient clinics, training centres, homes for the mentally retarded and geriatric patients, psychiatric units in general hospitals, and the like.

### In-patient institutions

The following table shows the number of major in-patient institutions in each State in 1971, the accommodation they provide for patients, and staff. In-patient care for voluntary patients is also provided at many general public and a number of private hospitals. There are also psychiatric units attached to gaols, juvenile corrective centres and similar institutions. Only the following institutions, under the control of the State mental health authorities, are included in this table: *New South Wales*—the fifteen State psychiatric centres (a psychiatric hospital and associated admission centre being regarded as one psychiatric centre) and the four authorised private psychiatric hospitals (several other institutions provide in-patient care for voluntary patients only, but are excluded from the scope of the statistics); *Victoria*—the seven psychiatric hospitals, ten mental hospitals, six informal hospitals, and nine intellectual deficiency training centres; *Queensland*—five psychiatric hospitals, three training centres, and one rehabilitation clinic; *South Australia*—six in-patient institutions; *Western Australia*—the three approved mental hospitals and two training centres; and *Tasmania*—the Royal Derwent hospital.

MENTAL HEALTH: IN-PATIENT INSTITUTIONS, ACCOMMODATION AND STAFF  
STATES AT 30 JUNE 1971

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.

Nursing(d) . . .	3,827	(a)3,061	1,439	701	682	360	10,070

(a) At 30 November 1971. (b) The number of beds and cots occupied on 30 November 1971. (c) Full-time staff and full-time equivalent of part-time staff. (d) Includes attendants.

There are no separate in-patient institutions for mental patients in the Northern Territory or the Australian Capital Territory. With the appointment of a Director of Psychiatric Services the organisation of a psychiatric service was begun in the Australian Capital Territory in 1967-68.

### Patients

The following table sets out statistics of in-patients under the care of the respective State mental health services.

IN-PATIENTS AT MENTAL HEALTH INSTITUTIONS, 1970-71

### State government expenditure on mental health services

The following figures show particulars of expenditure by States for the year 1970-71. Maintenance expenditure represents expenditure on wages and salaries, upkeep and repair of buildings and grounds, and other maintenance. The figure for New South Wales relates to the 15 State psychiatric centres and the Master in Protective Jurisdiction of the Supreme Court. Capital expenditure is expenditure as approved under the *State Grants (Mental Health Institutions) Act* 1964 only, and excludes the Commonwealth contributions paid under this Act—see page 439.

MENTAL HEALTH: EXPENDITURE, STATES, 1970-71  
(\$'000)

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	All States

Capital . . . . .	2,828	1,596	928	1,818	790	438	8,398

### Notifiable diseases

#### Methods of prevention and control

Provision exists in the Health Acts of all States for the compulsory notification of certain infectious and other diseases and for the application of preventive measures. When any such disease occurs the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts and on the appearance of certain diseases. Regulations provide for the disinfection and cleansing of premises and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Regulations also provide that persons suspected to be suffering from, or to be carriers of, infectious disease must submit to clinical and laboratory examination. Persons suffering from certain diseases, for example, smallpox, are detained in isolation.

#### Notifiable diseases and cases notified, 1972

The following table shows, by State and Territory, the number of cases notified in 1972 for those diseases notifiable in all States and Territories. In May 1965 the National Health and Medical Research Council at its Fifty-ninth Session proposed a basic list of diseases to be notifiable in each State and Territory, and this table is based upon that proposal. The table does not include all diseases which are notifiable in a State or Territory. Factors such as the following affect both the completeness of the figures and the comparability from State to State and from year to year: availability of medical and diagnostic services; varying degrees of attention to notification of diseases; and enforcement and follow-up of notifications by Health Departments.

NOTIFIABLE DISEASES(a): NUMBER OF CASES NOTIFIED  
STATES AND TERRITORIES, 1972

### Chronic illnesses, injuries, and impairments

As part of the quarterly population survey (see Chapter 20, Employment and Unemployment) a survey was conducted in May 1968, in all States except Victoria, in order to obtain estimates of the incidence of chronic illnesses, injuries and impairments in the population, the nature of these conditions and their cause (e.g. whether they were congenital or due to war, accident, etc.). In addition, the survey obtained information on the effect of these conditions on the activities of those who suffered from them.

Estimates derived from the survey were published in a mimeographed bulletin *Chronic Illnesses, Injuries and Impairments, May 1968* (Ref. No. 17.3). A summary of the principal results is given in the Appendix to Year Book No. 56.

### Disposal of dead by cremation

The first crematorium in Australia was opened in South Australia in 1903. At 31 December 1972 there were thirty crematoria in Australia, situated as follows: New South Wales, 14; Victoria, 4; Queensland, 5; South Australia, 2; Western Australia, 2; Tasmania, 2; Australian Capital Territory, 1. There is no crematorium in the Northern Territory. The following table shows the number of cremations and total deaths in each State and Territory for each of the years 1968 to 1972.

**CREMATIONS AND TOTAL DEATHS: STATES AND TERRITORIES(a), 1968 TO 1972**

(a) Cremations are not necessarily carried out in the State or Territory where the death was registered.

## CHAPTER 15

### LAW, ORDER, AND PUBLIC SAFETY

This chapter provides summary information about criminal and civil court proceedings (including divorce and bankruptcy); selected crime reported or becoming known to the police; police strengths; prisons; expenditure on law and order; fire brigades; and patents, trademarks and copyright. The main sources of further information for individual States are the State Year Books and Statistical Registers, and the annual reports of the relevant justice authorities. *See also* Year Book No. 55, 1969, page 456, for short descriptions of the National Safety Council of Australia, lifesaving organisations, the Royal Humane Society and the Order of St. John.

The statistics in this chapter are influenced by a number of factors which affect comparability from State to State and from year to year, such as differences in the jurisdiction of courts; changes in the law in particular States and differences in the laws between States; differences in the methods of compiling the figures (e.g. in respect of persons convicted for more than one offence); the prevailing attitude to laws such as those connected with liquor, vagrancy, gaming, and traffic offences; and the strength and distribution of the police forces.

Details of the development and structure of the State, Territory, and Commonwealth legal systems are given in Year Book No. 55, pages 565-7 and Year Book No. 56, page 441. The only notable changes since then occurred in South Australia and New South Wales. In South Australia the Local Courts Act Amendment Act, 1969 came into effect on 20 August 1970. It provides for the establishment of District Criminal Courts. Provision has been made for the division of the State into districts and for the appointment by the Senior Judge, of judges known as Recorders, to courts in each of these Districts. Under the Act the District Court has the jurisdiction and powers of the Supreme Court in respect of indictable offences except for capital offences and for felonies and misdemeanors where the maximum punishment is imprisonment exceeding ten years.

In New South Wales the Supreme Court Act, 1970 came into force on 1 July 1972. The Act provides for the concurrent administration of law and equity in the Supreme Court which will have the effect of bringing the New South Wales civil procedure in the Supreme Court in line with the other Australian States which have had concurrent administration from as early as 1876. Equitable reliefs and defences which could formerly only be pleaded in the Supreme Court exercising jurisdiction in equity can now be heard together with common law claims and defences in the one jurisdiction. The general scope of the Act will enable a suitor to obtain by one proceeding, the same ultimate result as he would previously have obtained either by having selected the right jurisdiction or after having been to each jurisdiction in succession. The Law Reform (Law and Equity) Act, 1972, which also commenced on 1 July 1972, provides that if any conflict or variance arises between the rules of equity and common law with reference to the same matter, the rules of equity will prevail. This principle extends, where applicable, to the inferior courts.

#### Lower (magistrates') courts

Particulars of the powers of magistrates, and of special provisions for dealing with juvenile offenders in special courts in the various States and Territories are given in Year Book No. 55, pages 567 to 571. The statistics in the following tables are influenced by the factors listed at the beginning of this chapter and, in particular by differences in the jurisdiction of lower courts in the various States.

#### Criminal proceedings

The number of charges heard at magistrates' courts in each State and Territory in the years 1967 to 1971 are given in the following table. The statistics relate to individual offences for which persons were charged, except for Queensland where proceedings against a person for a number of offences at the one hearing are counted as one charge.

**MAGISTRATES' COURTS(a): CHARGES HEARD, STATES AND TERRITORIES  
1967 TO 1971(b)**

<i>State or Territory</i>	<i>1967</i>	<i>1968</i>	<i>1969</i>	<i>1970</i>	<i>1971</i>
New South Wales . . .	336,746	337,540	361,377	390,233	427,560
Victoria . . .	318,172	326,445	341,284	339,019	339,527
Queensland(c)(d) . . .	95,155	100,046	107,375	110,803	110,883
South Australia(c) . . .	98,588	117,081	118,877	125,867	123,303
Western Australia . . .	76,458	86,836	93,157	88,940	101,077
Tasmania . . .	36,550	35,077	32,587	32,880	38,046
Northern Territory . . .	10,336	10,459	13,718	14,695	21,329
Australian Capital Territory . . .	7,318	7,647	6,685	(e)10,326	(e)11,416
<b>Australia . . . . .</b>	<b>979,323</b>	<b>1,021,131</b>	<b>1,075,060</b>	<b>1,112,763</b>	<b>1,173,141</b>

(a) Includes Children's Court, except for Darwin Children's Court in the Northern Territory prior to 1970. (b) Excludes minor traffic offences settled without court proceedings. (c) Year ended 30 June. (d) A person charged on several counts at the one hearing is included only once. (e) Includes remand cases, adjournments and court orders not collected in previous years.

Differences between States in the preceding table, and within States over a period of time are influenced by the large number of traffic offences and the arrangements which have been introduced at various times for dealing with them. Provision exists in the States and the internal Territories for settlement of parking and minor traffic offences by payment of fines without court proceedings. The numbers involved are shown in the next table.

**MINOR TRAFFIC OFFENCES SETTLED BY PAYMENT OF FINES  
WITHOUT COURT PROCEEDINGS, STATES AND TERRITORIES 1967 TO 1971**

<i>State or Territory</i>	<i>1967</i>	<i>1968</i>	<i>1969</i>	<i>1970</i>	<i>1971</i>
New South Wales . . .	411,447	426,496	418,626	456,798	511,005
Victoria . . .	343,432	410,857	443,222	477,332	544,663
Queensland(a) . . .	264,617	253,429	236,320	235,477	257,709
South Australia(a) . . .	240,014	239,619	267,709	244,120	277,464
Western Australia . . .	62,827	83,146	117,436	154,307	176,994
Tasmania . . .	45,081	55,677	56,076	62,408	76,062
Northern Territory(b) . . .	n.a.	n.a.	n.a.	8,438	10,444
Australian Capital Territory . . .	6,765	4,430	4,340	5,282	7,229
<b>Total . . . . .</b>	<b>1,374,183</b>	<b>1,473,654</b>	<b>1,543,729</b>	<b>1,644,162</b>	<b>1,861,570</b>

(a) Year ended 30 June. (b) No provision for settlement of parking and minor traffic offences by payment of fines without court proceedings existed in the Northern Territory prior to 1970.

The following tables show the number of cases dealt with in magistrates' courts in which convictions were made.

**CASES AT MAGISTRATES' COURTS(a) IN WHICH CONVICTIONS WERE MADE, BY  
CLASS OF OFFENCE: STATES AND TERRITORIES, 1971**

<i>Class of offence</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld (b)(c)</i>	<i>S.A. (b)</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>

Australian Capital Territory . . .	313	316	388	572	393
<b>Australia . . .</b>	<b>130,742</b>	<b>134,525</b>	<b>139,820</b>	<b>144,969</b>	<b>149,319</b>

(a) Includes Children's Courts except for Darwin Children's Court in the Northern Territory prior to 1970. (b) Year ended 30 June. (c) A person convicted on several counts at the one hearing is included only once. (e) Includes Children's Courts except for Darwin Children's Court in the Northern Territory prior to 1970.

**Convictions for certain serious offences at lower (magistrates') courts**

The figures given in the preceding tables refer to all convictions, and include offences of a technical nature, drunkenness, and minor breaches of good order, which come under the heading of crime in a very different sense from the more serious offences. The following table has therefore been prepared to show convictions at magistrates' courts for the years 1967 to 1971 for offences against the person, offences against property, forgery, and offences against the currency.

**CONVICTIONS FOR CERTAIN SERIOUS OFFENCES(a) AT MAGISTRATES'  
COURTS(b): STATES AND TERRITORIES, 1967 TO 1971**

<i>State or Territory</i>	<i>1967</i>	<i>1968</i>	<i>1969</i>	<i>1970</i>	<i>1971</i>
New South Wales . . .	35,809	37,367	40,583	40,642	44,191
Victoria . . .	27,355	26,338	30,286	33,025	34,744
Queensland(c)(d) . . .	6,789	6,604	6,865	7,525	7,373
South Australia(c) . . .	5,180	5,817	6,678	7,349	8,040
Western Australia . . .	10,207	12,065	13,622	15,925	19,776
Tasmania . . .	3,278	3,650	3,597	3,813	5,073

Australian Capital Territory . . .	895	1,133	970	729	1,069
<b>Australia . . .</b>	<b>90,331</b>	<b>93,915</b>	<b>103,998</b>	<b>110,525</b>	<b>122,017</b>

(a) Offences against the person, offences against property, forgery, and offences against the currency. (b) Includes Children's Courts except for Darwin Children's Court in the Northern Territory prior to 1970. (c) Year ended 30 June. (d) A person convicted on several counts at the one hearing is included only once.

**Committals to higher (judges') courts**

In the case of other than minor offences a preliminary hearing is held before a stipendiary magistrate or justice of the peace for the purpose of determining whether a *prima facie* case has been made out. If the magistrate or justice of the peace finds that there is a case to answer, the person charged is committed for trial at a higher court. The numbers of such committals are shown in the following tables.

**COMMITTALS TO HIGHER COURTS(a), BY CLASS OF OFFENCE: STATES AND TERRITORIES, 1971**

<i>Class of offence</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i> (b)(c)	<i>S.A.</i> (b)	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>

(a) Includes committals from Children's Courts except for Darwin Children's Court in the Northern Territory prior to 1970. (b) Year ended 30 June. (c) A person committed on several counts at the one hearing is included only once.

**Higher (judges') courts**

Higher courts are presided over by a judge, sometimes with a jury. The general jurisdiction of the higher courts in the States and Territories, which for this purpose include District, County and Supreme Courts, includes appeals from the lower courts, cases of serious crime committed for trial or sentence by lower courts, and civil cases involving common law, commercial causes, equity, etc. Under the Commonwealth *Matrimonial Causes Act* 1959-1966, the Supreme Courts of the various States and Territories have exclusive jurisdiction in matrimonial causes, and under the *Bankruptcy Act* 1966-1970, the Federal Court of Bankruptcy, the Supreme Courts of New South Wales, Queensland, Western Australia, Tasmania and the Northern Territory, and the Courts of Insolvency in Victoria and South Australia, can deal with bankruptcy cases. However, the Federal Court handles bankruptcy cases in New South Wales and Victoria.

Proceedings at higher courts include therefore criminal, civil, divorce, and bankruptcy proceedings. Separate details of all except civil proceedings are given in the following paragraphs.

**Criminal proceedings**

The statistics in the following tables are influenced by the factors listed in the second paragraph at the beginning of this chapter.

**PERSONS CONVICTED<sup>(a)</sup> AT HIGHER COURTS: BY NATURE OF OFFENCE: STATES AND TERRITORIES, 1971**

<i>Offence</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld(b)</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>

(a) See footnote (a) in table above. (b) Year ended 30 June.

**Capital punishment**

There were no executions in Australia in 1972. For a brief account of the law relating to capital punishment in Australia, see Year Book No. 55, page 573.

### Divorce and other matrimonial causes

A description of Commonwealth legislation governing divorce and other matrimonial causes in Australia is contained in Year Book No. 55, page 580. Under this legislation a court may grant decrees of dissolution of marriage (divorce), nullity of marriage, judicial separation, restitution of conjugal rights, and jactitation of marriage (i.e., that a person should refrain from making a false claim that a marriage has taken place between him and another person). Orders may be made for maintenance, the custody and welfare of children, and settlement of property, and damages for adultery. The following statistics refer only to petitions for, and decrees of, dissolution, nullity, and judicial separation. Detailed statistics are published in the annual *Divorce* bulletin (13.1), and the annual *Demography* bulletin (4.9).

#### Petitions filed

Statistics of petitions exclude cross-petitions contained in answers by respondents. The following table shows the number of petitions for dissolution of marriage, nullity of marriage, and judicial separation filed in each State and Territory during 1972.

#### PETITIONS FILED FOR DISSOLUTION, NULLITY, AND JUDICIAL SEPARATION STATES AND TERRITORIES, 1972

Petition for—	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

(a) Includes 4 petitions for dissolution or judicial separation.

**Decrees granted**

Statistics of decrees granted refer to decrees *nisi* made absolute except for the following cases, where no decree *nisi* is granted.

- (i) Decrees of judicial separation, which do not dissolve the marriage and may be discharged on resumption of cohabitation.
- (ii) Decrees of nullity of void marriage, as distinct from nullity of voidable marriage. A void marriage is invalid because of failure to meet a legal requirement, and the original decree of nullity is final. A valid marriage is voidable on proof of one or more of the grounds set out in Section 21 of the *Matrimonial Causes Act 1959-1966*, e.g. that either party is incapable of consummating the marriage.

The following tables show the number of dissolutions of marriage, nullities of marriage, and judicial separations granted in each State and Territory during 1972 classified according to petitioner, and the grounds on which decrees were granted during the years 1968 to 1972.

**DECREES FOR DISSOLUTION, NULLITY, AND JUDICIAL SEPARATION

**Divorced persons at each census, 1921 to 1971**

The following table shows the number and proportion of divorced persons in Australia as recorded from returns supplied at each census from 1921 to 1971. A classification of divorced persons by ages for the censuses from 1891 to 1947 appeared in earlier issues of the Year Book (*see* No. 39, page 269). The number of divorced persons at the 1911 Census is shown in Year Book No. 58, page 453. Before 1911 no record was made of divorced persons in South Australia, so comparisons cannot be made beyond that date.

**DIVORCED PERSONS AT CENSUS DATES: AUSTRALIA, 1921 TO 1971**

Sex	Number							Number per 10,000 of males or females 15 years of age and over						
	1921	1933	1947	1954	1961	1966	1971	1921	1933	1947	1954	1961	1966	1971

Females .	4,304	10,888	27,516	36,650	43,339	51,174	71,421	24	46	96	115	119	125	157

**Bankruptcy**

For a description of the provisions of the *Bankruptcy Act* 1966-1969, *see* Year Book No. 55, pages 586-7. The Bankruptcy Act was amended in 1970 to remove any obstacle the Act may present to the operation of compositions or schemes of arrangement entered into under State or Territory legislation providing assistance to farmers in respect of their debts.

**Bankruptcy proceedings**

The following table shows the number of bankruptcies of the various types in each State, together with the disclosed assets and liabilities of the debtors, during 1971-72.

**BANKRUPTCY PROCEEDINGS: STATES AND TERRITORIES, 1971-72**

State or Territory		Sequestration orders and orders for administration of deceased debtors' estates	Compositions	Deeds of assignment	Deeds of arrangement	Total

## The High Court of Australia

The High Court of Australia consists of a Chief Justice and six other Justices. Its principal seat is in Melbourne, but sittings are held in every State capital as occasion requires. The High Court has both original and appellate jurisdiction. Its original jurisdiction is usually exercised by a single Justice, appellate jurisdiction by at least three Justices. The following table sets out transactions in its original and appellate jurisdiction for 1971 and 1972.

## TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA, 1971 AND 1972

<i>Original jurisdiction(a)</i>	<i>1971</i>	<i>1972</i>	<i>Appellate jurisdiction</i>	<i>1971</i>	<i>1972</i>
Number of writs issued . . .	90	54	Number of appeals—		
Number of causes entered for trial . . .	27	26	Set down for hearing . . .	111	107
Judgments for plaintiffs . . .	5	8	Allowed . . .	47	49
Judgments for defendants . . .	3	2	Dismissed . . .	90	65
Otherwise disposed of . . .	14	10	Otherwise disposed of . . .	18	16
Amounts of judgments . . .	\$34,464	\$566,391			

(a) Some matters dealt with by the High Court neither originate as writs nor are entered as causes.

During 1971 and 1972, respectively, the High Court dealt also with the following: appeals from assessments under the Taxation Assessments Act, 53, 81; special cases stated for the opinion of the Full Court, 3, 4; applications for prohibition, etc., 10, 12. The fees collected amounted to \$15,992 in 1971 and \$15,046 in 1972.

## Selected crime reported to police

The following tables show some details of certain categories of offences reported or becoming known to police. This series, which commenced in 1964, is derived from police records and is based, as far as possible, on definitions and procedural arrangements uniformly determined for all States. The following explanations are necessary in order to interpret the figures in this series.

*Offences reported or becoming known.* All incidents reported or becoming known to the police which are found to constitute offences within the scope of the crimes covered are included. Offences are shown as 'reported or becoming known' in the period during which it has been established that the incident constitutes a crime, not necessarily in the period when the incident occurred. However, the incident is included when the police are satisfied that a crime has been committed, even though it may be established in subsequent proceedings that no crime or a crime of a different nature was committed. As far as possible, the offences are recorded in respect of the State in which the incident occurred, regardless of which police force undertakes investigations or prosecutions, or where an arrest is made. In the case of homicide, assault, robbery, and rape, one offence is counted in respect of each victim, regardless of the number of offenders involved. In the case of breaking and entering, and fraud, etc., one offence is counted for each act or series of directly related acts occurring at the same time and place, and under the same circumstances. Each motor vehicle stolen is counted as constituting a separate offence.

*Offences cleared.* An offence of the type included in this series is counted as 'cleared' when an information (charge, arrest or summons to appear) has been laid against at least one person involved. However, an offence may also be counted as 'cleared' without an information being laid. This may occur when the offender has received an official caution or has died, has committed suicide, has been committed to a mental institution, or is in another jurisdiction from which extradition is not desired or available, or is serving a sentence; or if there are other obstacles to prosecution, such as diplomatic immunity or that the complainant refuses to prosecute. A clearance is always shown against the classification under which the offence was 'reported', regardless of the nature of the charge laid or changes in the description of an offence due to later information. The entries are made in respect of the year when the offence was 'cleared', whether or not the offence was 'reported' in that or an earlier year.

*Persons involved in crimes cleared.* This is the sum of the number of persons dealt with in each of the offences shown as 'cleared'. If more than one person is involved in the one offence, each person is counted. If the same person is involved in more than one offence cleared, he is counted separately for each offence. Persons involved are shown against the categories of offences to which an incident was originally allocated, regardless of the actual offences they are charged with. This basis of counting 'persons involved in offences cleared' was adopted to reveal trends in crime participation by persons in various age-groups. The figures in this series are not directly comparable with statistics of persons charged or convicted in court, or of cases brought before the courts; nor do these figures reveal the number of offenders in the community.

#### Offences included in the statistics

*Homicide.* Separate details are provided for murder, attempted murder (i.e. acts done with intent to murder) and manslaughter (unlawful killing other than murder), excluding manslaughter arising from motor traffic accidents.

*Serious assault.* These are assaults normally dealt with on indictment. Includes woundings, offences causing bodily harm, assaults with a weapon, etc., and attempts of this nature. Excludes sexual assault and robbery. *Uniform interpretation of this definition between States is especially difficult to effect.*

*Robbery.* Stealing anything, if at or immediately before or after the time of stealing, the offender uses or threatens to use violence to any person or property in order to obtain the thing stolen, or to prevent or overcome resistance to its being stolen. Includes attempts of this nature.

*Rape.* Includes attempted rape and assault with intent to rape. Excludes unlawful carnal knowledge (i.e. where consent is given, but the girl is below the legal age of consent) and indecent assault.

*Breaking and entering.* Breaking and entering a building (or entering a building and breaking out) and committing or intending to commit a crime. Includes burglaries. Separate details are shown according to the type of building involved, namely, *dwellings* (including unoccupied dwellings, tents, caravans, etc., used as dwellings, and the residential parts of hotels, schools, etc.); *shops* (including kiosks, service stations, restaurants, bars, non-residential clubs, etc.); and *offices, factories and warehouses* (including parts of buildings, but excluding dwellings and shops used for such purposes). Includes attempts. From 1967 the figures exclude breakings involving property valued at \$100 or less.

*Motor vehicle thefts, illegal use, etc.* Includes all offences of illegal, unlawful or unauthorised use, use without consent, unlawfully assuming control, etc., no matter under which legislation these offences are prescribed. Excludes cases of 'interference', but includes attempts at illegal use. The number of stolen motor vehicles which are recovered is also shown.

*Fraud, forgery, false pretences.* Includes embezzlement, 'omit to account', misappropriation, fraudulent appropriation, conversion, larceny as bailee, falsification of accounts, company fraud, forgery, uttering, false pretences, passing of valueless cheques and offences by trustees. Includes attempts, but excludes imposition. As a general rule, offences are included only if there is an element of deception or trickery. Separate details are shown for *valueless cheque* offences (i.e. passing of valueless cheques, whether there is no account, insufficient funds or a false signature of the purported drawer of the cheque. However, this sub-group excludes cases where a genuine cheque is altered or the endorsement of the payee is forged. These cases are regarded as forgery and or uttering and included in 'other').

### Offences reported or becoming known to police

The following table shows, for each State and Territory, the number of offences in each of the seven categories covered by this series which were reported or became known to police during the years 1968 to 1972. The table includes offences reported to and investigated by the Commonwealth Police for the years 1970-1972.

(a) Figures for 1971 and 1972 are not necessarily comparable with those for earlier years because of changes in reporting procedures. (b) See definition on page 463. (c) Excludes offences involving property valued at \$100 or less. (d) Excludes 8,175 attempted breaking and entering offences in New South Wales in 1971, and 8,282 in 1972.

### Crimes cleared and persons involved

The tables which follow show, for the various categories of offences, the numbers of offences reported, the numbers cleared, and the numbers of persons involved according to age and sex. Sub-divisions of the categories homicide, breaking and entering, and fraud, etc., are provided. See pages 462-4 for definitions used and the bases on which these statistics are prepared.

The number of stolen motor vehicles recovered was: 1970, 34,864; 1971, 41,332; 1972, 42,956.

### Drug offences

Australia is a signatory to the Single Convention of Narcotic Drugs which has as its main aim the limitation of narcotic drugs to legitimate medical and research purposes.

As its name implies, the Single Convention covers only the so-called narcotic drugs. In recognition that there are other drugs of dependence, the member nations met during 1970 and 1971 and drew up a further Convention to impose controls on psychotropic substances such as hallucinogens, amphetamines, other central nervous system stimulants, barbiturates, tranquillisers and certain other sedatives.

#### Legislative provisions

Regulation 5 of the Customs (Prohibited Imports) Regulations made under Section 50 of the *Customs Act 1901-1971* provides the legal controls for the importation of narcotic drugs and other drugs of dependence. Under this regulation all importers of these drugs must be licensed and must obtain permission in writing for each importation. Importers are also required to keep these drugs in a secure place and to keep such records as may be required concerning use or disposal.

The penalty on conviction for an offence relating to narcotic goods as defined in the *Customs Act 1901-1971* is:

(a) In a Court of Summary Jurisdiction—

A fine not exceeding \$2,000 or imprisonment for a period not exceeding 2 years, or both.

(b) On indictment—

A fine not exceeding \$4,000 or imprisonment for a period not exceeding 10 years, or both.

The manufacture of narcotic drugs in Australia is controlled under the *Narcotic Drugs Act 1967*. The Act requires that a manufacturer shall be licensed and shall comply with strict conditions and directions relating to such manufacture and the handling of the drugs concerned. Failure to comply with these requirements constitutes an offence against the Act and the penalty upon conviction for such an offence is:

(a) In a Court of Summary Jurisdiction—

A fine not exceeding \$1,000 or imprisonment for a period not exceeding 2 years, or both.

(b) On indictment—

A fine not exceeding \$4,000 or imprisonment for a period not exceeding 10 years, or both.

State and Territory legislation relating to the regulation, control and prohibition of the sale, use, possession and administering (including smoking) of poisons, restricted substances, drugs of addiction, dangerous drugs and deleterious substances, is listed below.

New South Wales	. . .	Poisons Act, 1966-1967; Summary Offences Act, 1970
Victoria	. . .	<i>Poisons Act 1962</i>
Queensland	. . .	<i>'The Health Acts 1937 to 1967'</i>
South Australia	. . .	Narcotic and Psychotropic Drugs Act, 1970 (formerly Dangerous Drugs Act, 1934-1955); Food and Health Act, 1908-1962; Police Offences Act, 1953-1961
Western Australia	. . .	<i>Police Act, 1892-1967; Poisons Act 1964</i>
Tasmania	. . .	<i>Dangerous Drugs Act 1959; Alcohol and Drug Dependency Act 1968; Health Services Act 1960</i>
Northern Territory	. . .	<i>Dangerous Drugs Ordinance 1928-1973; Poison Ordinance 1924-1970.</i>
Australian Capital Territory	. . .	<i>Poisons and Dangerous Drugs Ordinance 1967</i>

In some States this legislation also provides for the offence of 'trafficking' (where there is possession of a minimum specified quantity of a prescribed substance, prohibited drug, or drug of addiction, such possession being *prima facie* for the offence), and for the offence of being the owner, lessee, or concerned in the management of any premises used for the purposes of drug abuse such as the smoking of opium or indian hemp. Offences of habitually consorting, etc., with reputed drug offenders are also covered under State legislation.

During 1971 some States introduced legislation requiring that stocks of dangerous drugs in pharmacies be stored in heavy metal safes.

All State Governments have agreed to a uniform code of penalties based on those applicable in Commonwealth legislation. Some State Governments have already taken the legislative action to implement this decision.

## Law enforcement

Law enforcement in respect of drugs is handled by State police forces, the Commonwealth Police Force, and the Department of Customs and Excise. In 1969 a National Standing Control Committee on Drugs of Dependence was established to consider further action by the Commonwealth and States to combat all aspects of the drug problem in Australia and to make recommendations on legislative and administrative action. The Committee is chaired by the Comptroller-General of Customs and its members comprise senior officers of Commonwealth and State police and health authorities.

The National Standing Control Committee on Drugs of Dependence recommended that the Central Crime Intelligence Bureau of the Commonwealth Police serve as the national agency for the systematic collection, evaluation and dissemination of information concerning the illicit drug traffic in Australia. During 1972, the third complete year for which the Central Crime Intelligence Bureau compiled statistics, 4,960 drug offences, for which 2,412 males and 413 females were prosecuted, were reported to the Bureau. Details of the offences and the drugs involved are given in the following table.

**PROSECUTIONS AND CONVICTIONS FOR DRUG OFFENCES REPORTED TO THE CENTRAL CRIME INTELLIGENCE BUREAU: PERSONS INVOLVED, AUSTRALIA 1972.**

(a) If a number of different drug types have been involved in an offence, they are counted under each drug category. (b) As a percentage of all charges, cannabis comprises 65.45 per cent; narcotics, 20.58 per cent; hallucinogens, 9.39 per cent; barbiturates/hypnotics, 2.02 per cent; amphetamines, 1.94 per cent; tranquillisers, 0.62 per cent.

In 1969 the Commonwealth Bureau of Narcotics was created within the Department of Customs and Excise, as part of the Government's campaign to combat the increasing incidence of illicit trafficking of drugs in Australia. The Bureau operates on a national basis and is made up of three sections:

**Licit Control Section**—responsible for the control of legal importation and exportation of all drugs of dependence as well as controlling the manufacture of narcotic drugs in Australia. The section is also responsible for ensuring that Australia's obligations, as a signatory to the various international conventions on drugs, are complied with.

**Overseas Liaison**—responsible for maintaining an effective system for the exchange of information with overseas law enforcement agencies concerned with the suppression of illicit trafficking in drugs.

**Law Enforcement**—responsible for the prevention of, and investigations into, illegal importation, exportation, and major trafficking of drugs. Its activities are concentrated in co-ordinated operations against importers and major distributors.

The following table shows the types of drugs and amounts seized by the Department of Customs and Excise in the years 1968–72.

## DRUG SEIZURES BY THE DEPARTMENT OF CUSTOMS AND EXCISE: 1968 TO 1972

Type of drug	Unit	1968	1969	1970	1971	1972

1969	32	34	27	20	5,300	7	84	1	..	7
1970	55	62	58	36	15,285	16	238	9	..	4
1971	74	78	60	41	11,005	16	188	3	2	16
1972	105	116	86	46	13,207	34	694	5	6	23
Other offences—										
1968	1	1	1	1	500	..	..	..	..	..
1969	5	5	4	3	500	1	6	..	1	..
1970	12	13	12	11	700	..	..	..	1	..
1971	15	15	10	6	3,950	4	88	..	..	5
1972	48	56	25	15	3,675	6	102	5	16	14

(a) Bonds include suspended gaol sentences and/or other recognisances to be of good behaviour for a specified period.

NOTE. Where dual penalties such as a fine and a bond were imposed both are included.

## Senate Select Committee

On 25 November 1969, by resolution of the Senate, a Select Committee into Drug Trafficking and Drug Abuse was established. The report of the findings of the Senate Select Committee was tabled in May 1971.

## Police

The primary duties of the police are to prevent crime, to detect and detain offenders, to protect life and property, to enforce the law, and to maintain peace and good order. In addition, they perform many duties in the service of the State, e.g. they act as clerks of petty sessions in small centres, as crown land bailiffs, foresters, mining wardens, and inspectors under the fisheries and various other

Acts. In metropolitan and large country areas they also regulate the street traffic. With the exception of the Commonwealth Police Force and the police in the Northern Territory and the Australian Capital Territory, the police forces of Australia are under the control of the State Governments, but their members perform certain functions for the Commonwealth Government, such as acting as aliens registration officers and concurrently with Commonwealth Police and other Commonwealth Officers, policing various Commonwealth Acts and Regulations.

Women police perform special duties at places where young women and girls are subject to moral danger, control traffic at school crossings and lecture school children on road safety. They also assist male police as required in the performance of normal police duties.

The strength of the police force and the duties and ranks of the personnel involved in each State and Territory for 1972 are shown in the following table. Comparability between States is affected by differences in the classification of ranks and duties, and known differences between States are mentioned in footnotes.

Also included in the table are statistics of ancillary and civilian staff employed by police departments. Differences between States in the use of such staff are considerable. These differences arise, on the one hand, from differences in the extent to which police make use of such staff for police functions and, on the other hand, in the extent to which such staff are required to undertake additional functions (such as parking control) which are allocated to the police in varying degrees between States. There is also some overlap between duties of ancillary and civilian staff as defined in the footnotes to the table.

**POLICE FORCES AND ASSISTANT STAFF: STATES AND TERRITORIES, 30 JUNE 1972—**  
*continued*

<i>Duty and rank(a)</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>
<b>TOTAL STAFF</b>								
<b>Grand total—</b>								
Full-time . . . .	9,388	6,259	3,849	2,730	2,190	1,009	343	451
Part-time . . . .	..	73	28	10	223	..	..	..

(a) Where more than one duty is involved, officers have been allocated to the category of duties in which the greater part of their time is spent. The allocation of executive officers and inspectors to categories of duties is necessarily somewhat arbitrary and varies from State to State. (b) Includes probationary constables. (c) Excludes probationary constables; included with trainees and cadets. (d) Includes sub-inspectors. (e) Includes officers engaged on motor vehicle examination and testing and licensing drivers. (f) Does not include transport and maintenance; each section undertakes its own transport, and maintenance is done on contract and/or by the government transport pool. (g) Includes 1 chief superintendent. (h) Parking police, native trackers, wardresses, etc.; special constables in New South Wales and Tasmania; police reservists in Victoria. (i) Includes clerical workers in the Women Police Auxiliaries. (j) Clerks, typists, artisans, cleaners. (k) Does not include cleaning which is done by the Cleaning Services Branch of the Government Stores Department. (l) Includes 72 cadets whose appointment is not subject to the Police Act.

Ancillary and civilian staff are excluded from the following table.

**POLICE FORCES: STATES AND TERRITORIES, 1968 TO 1972**

<i>30 June—</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
1968 . . . .	7,111	4,825	3,083	2,214	1,421	632	172	228	19,686
1969 . . . .	7,259	4,743	3,179	2,255	1,490	670	195	288	20,079
1970 . . . .	7,324	4,739	3,221	2,282	1,529	701	235	290	20,321
1971 . . . .	7,470	4,945	3,197	2,360	1,616	796	259	347	20,990
1972 . . . .	7,914	5,274	3,353	2,445	1,686	879	281	398	22,230

**Commonwealth Police Force**

The Commonwealth Police Force commenced operations on 21 April 1960, and is the principal agency for the enforcement of the laws passed by the Commonwealth Parliament. It is also responsible for the protection of Commonwealth property and interests at various buildings and establishments under the control of the Commonwealth. This force co-ordinates the work of other Commonwealth investigation and law enforcement agencies and acts on behalf of the United Nations Organisation for the suppressing of traffic in women and the suppression of obscene literature.

Under the control of the force is the Australian Police College at Manly, New South Wales, which provides training for officers of various police forces and other agencies in Australia and New Zealand. The force has its Head Office in Canberra and District Offices in each capital city. The strength of the force at 30 June 1972 was 989 policemen and 4 policewomen. At that date there were, in addition, 117 civilian employees.

**Prisons**

**Prisons and prison accommodation**

**PRISONS AND PRISON ACCOMMODATION: STATES AND NORTHERN TERRITORY, 30 JUNE 1971**

	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>Aust.</i>
Prisons . . . .	22	13	8	16	13	1	2	75
Accommodation . . . .	3,717	2,666	1,321	1,414	1,611	417	239	11,385

There is no gaol in the Australian Capital Territory, but there are two lock-ups attached to police stations at Canberra and another lock-up at Jervis Bay where offenders are held for short periods. Prisoners remanded or sentenced by a court in the Australian Capital Territory for more than five days are usually held in New South Wales prisons.

## Convicted prisoners

## CONVICTED PRISONERS: STATES AND TERRITORIES, 1967 TO 1971

30 June—	N.S.W. (a)	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Australia	
								Number	Per 10,000 of popu- lation
1967 . .	3,334	1,994	1,021	866	1,137	275	112	8,739	7.4
1968 . .	3,292	2,103	958	926	1,150	281	120	8,830	7.3
1969 . .	3,327	2,199	1,065	884	1,214	331	177	9,197	7.5
1970 . .	3,429	2,178	1,104	836	1,174	327	198	9,246	7.4
1971 . .	3,493	2,276	1,142	854	1,261	352	166	9,544	7.5

(a) Includes Australian Capital Territory prisoners held in New South Wales prisons.

## Expenditure on law, order and public safety

## Expenditure on law, order and public safety

The following table shows the identifiable expenditure on goods and services of Commonwealth and State public authorities whose activities are primarily directed towards serving the purposes of law, order and public safety. Because of differing legislative and administrative arrangements and differing accounting practices in the various States, the activities covered by the figures are not the same in each State; and the activities covered by the Commonwealth figures differ from those of the States because of the Commonwealth's different responsibilities in this field. The Commonwealth and State figures are therefore not strictly comparable; but they have been compiled by uniform methods, and each series is comparable from year to year.

ALL PUBLIC AUTHORITIES: EXPENDITURE ON LAW, ORDER AND PUBLIC SAFETY  
1967-68 TO 1971-72

(\$ million)

	1967-68	1968-69	1969-70	1970-71	1971-72

## Fire brigades

### New South Wales

A Board of Fire Commissioners, consisting of seven members, two appointed by the State Government (President and Deputy President), two representing insurance companies and one each representing local government authorities, volunteer firemen, and permanent firemen, operates under the Fire Brigades Act, 1909–1970, and 174 fire districts had been constituted at the end of 1971. The cost of maintenance of fire brigades is borne in proportions of local councils and the Government each one-eighth, and the insurance companies three-quarters.

At 31 December 1972 the actual strength of the Fire Brigade throughout the fire districts of New South Wales was 502 officers and 1,387 permanent and 2,726 volunteer firemen. Corresponding figures for the Sydney Fire District were 403, 1,173 and 215. The revenue for the year 1971 was \$15,752,771, as follows: from the Government, \$1,947,009; municipalities and shires, \$1,945,681; fire insurance companies and firms, \$11,670,234; and from other sources, \$189,847. The disbursements for the year were \$15,001,399. The Board of Fire Commissioners provides the fire protection services for Canberra, in the Australian Capital Territory, and the cost of these services is reimbursed by the Commonwealth Government.

Under the Bush Fires Act, 1949 a Bush Fire Fighting Fund exists from which finance is provided for the prevention and fighting of bush fires. Contributions to the Fund by the Government, councils and insurance companies are in the proportion of one-quarter, one-quarter and one-half, respectively. At 30 June 1972 Volunteer Brigades equipped by means of this fund numbered 2,420 with an active membership of about 60,000 persons. The expenditure from the Fund for equipment, up to 30 June 1972, amounted to \$12,148,414.

### Victoria

In Victoria, fire brigades are controlled by the Metropolitan Fire Brigades Board consisting of eight members, including an employees' representative, and the Country Fire Authority consisting of eleven members.

*Metropolitan Fire Brigades Board.* The Metropolitan Fire Brigades Board receives contributions from the municipalities and the insurance companies in the proportion of one-third and two-thirds respectively. At 30 June 1972 the Board had under its control 46 stations, 1,226 permanent staff, and 250 special service and clerical, etc. staff. The total receipts for 1971–72 were \$11,002,859, comprising contributions \$9,618,062, receipts for services \$857,798, and interest and sundries \$526,999. The expenditure was \$11,266,419.

*Country Fire Authority.* This authority is responsible for the prevention and suppression of fires in the 'country area of Victoria', which embraces the whole of the State outside the Metropolitan Fire District, excluding State forests, National Parks and certain Crown lands. The country area has been divided into twenty-five fire control regions, three of which (Ballarat, Bendigo and Geelong) are wholly urban and the remainder mixed urban and rural. The Country Fire Authority receives contributions in the proportion of two-thirds from insurance companies and one-third from the Treasury. At 30 June 1972 the Country Fire Authority Act applied to 157 insurance companies and 212 urban and 1,049 rural fire brigades. Permanent staff of the Authority totalled 319 (including administrative), while the effective strength of volunteer personnel was 113,221. Income for the year 1971–72 amounted to \$4,596,792. Total expenditure other than loan redemption and capital expenditure amounted to \$4,293,652.

### Queensland

There are two controlling bodies responsible for fire fighting services throughout Queensland. The State Fire Services Council controls brigades set up under 'The Fire Brigades Act, 1964 to 1971,' and the Rural Fires Board under provisions of 'The Rural Fires Act, 1946 to 1970' administers bush fire brigades. In addition a local authority may establish a fire fighting brigade of its own as do some major establishments such as the State Forestry Department and private companies whose activities involve fire hazards.

Fire districts are constituted under 'The Fire Brigades Act, 1964 to 1971'. For each district, there must be a Fire Brigades Board consisting of seven members, and the cost of maintenance of each brigade is borne by the State Government, the component local authorities and the contributory insurance companies and owners of property (which is insured with a company other than a contributory company) in the proportions of one-eighth each by the State Government and the component local authorities, and three-quarters by the contributory companies and owners of property referred to.

At 30 June 1972 there were 81 fire brigade boards. The number of stations was 191 and the brigade strength was 1,174 permanent staff and 1,320 auxiliary and 27 volunteer staff. The total revenue for the year 1971-72 was \$8,906,391 received mainly from the following sources: Government \$1,064,363, local authorities \$1,064,363, insurance companies \$6,419,752. Loan receipts (Government and other) were \$739,549. The total expenditure for the year was \$8,308,874, the chief items being salaries and wages \$6,598,217, and interest and redemption of loans \$767,998.

The Rural Fires Board, operating under the *Rural Fires Act* 1946 to 1970, consists of a chairman and nine members all of whom are appointed by the Governor-in-Council. Eight of the members are from Government Departments, the other represents the United Graziers Association. For administrative purposes the State is divided into Rural Fire Districts under the control of a Chief Fire Warden, and in these districts fire wardens are appointed to assigned areas. These officers control the issuing of permits, reporting of fire hazards and education in fire protection, while the bush fire brigades operate on a voluntary basis under the control of an appointed first officer. At 30 June 1972 there were 1,084 bush fire brigades. Expenditure by the State Government including contributions by bush fire brigades for equipment during 1971-72 amounted to \$131,334.

### South Australia

The Fire Brigades Act, 1936-1958 provides for a board of five members, that the expenses and maintenance of brigades are defrayed in the proportion of two-ninths by the Treasury, five-ninths by insurance companies and two-ninths by the municipalities concerned, and that when the Treasury proportion exceeds its statutory contribution of approximately \$31,000, the excess is borne five-sevenths by insurance companies and two-sevenths by the municipalities. At 30 June 1972 there were altogether 39 fire brigade stations, of which 18 were metropolitan and 21 country.

The strength of the permanent staff at 30 June 1972 was 575, comprising 403 officers and men, 116 country auxiliary firemen and 56 other employees (including maintenance workers). The total revenue for the year 1971-72 was \$2,695,962, including contributions of \$2,357,553 made up as follows: insurance companies \$1,414,140, Treasury \$395,000 and municipalities \$548,413. The Treasury contribution includes a special grant of \$292,308.

### Western Australia

The *Fire Brigades Act* 1942-1972 provides for the constitution of fire districts which are under the control of the Western Australian Fire Brigades Board. There were 69 fire districts at 30 June 1972. The contribution to the Board is made in the proportion of 16 per cent from the State Government, 20 per cent from local government authorities, and 64 per cent from insurance companies. The number of local government authorities and insurance companies who contributed numbered 81 and 163 respectively. Seventeen permanent and two volunteer brigades operate in the metropolitan fire district centred in the City of Perth. Permanent brigade personnel serve with volunteer brigade personnel in five large country centres and volunteer brigades provide town fire protection at some 67 other centres. At 30 June 1972 the Board had 581 employees and there were 1,555 volunteer brigade officers and firemen. The revenue for the year ended 30 June 1972 was \$4,228,959 and the expenditure \$4,288,178.

Under the *Bush Fires Act, 1954-1970* a Bush Fires Board, consisting of thirteen members, six of whom are nominated by the Country Shire Councils' Association, was set up to advise the Minister for Lands on bush fire control and to administer the Bush Fires Act. The Act also provides for the registration of bush fire control officers, who numbered 2,407 at 30 June 1972, and the establishment of bush fire brigades, 915 at 30 June 1972. Many individual brigades are large organisations with numerous self-contained sections.

### Tasmania

The *Fire Brigades Act* 1945 provided for the creation of the Fire Brigades Commission of Tasmania to co-ordinate the activities of existing fire brigade boards, while leaving the responsibility for individual control and management with the boards. The Commission comprises the following: two persons nominated by the Minister; one person representing the City or Municipal Councils; one person nominated by the Chairman of the Rural Fires Board; and three persons representing the insurance companies. Contributions towards the cost of operations are on the basis of 22.5 per cent each from the Treasury and the municipalities and 55 per cent from the insurance companies concerned. The cost for the year 1971-72 amounted to \$1,563,727. There were, at 30 June 1972, 23 boards controlling 40 stations, and their aggregate staffs numbered 685 (officers and firemen), comprising 227 permanent personnel, 418 part-time firemen and 40 volunteers. The volunteers all operate under the Hobart Board in the forested and mountainous Fern Tree area.

Following the fire disaster of February 1967, amendments were made to the *Rural Fires Act* 1950. The 1967 Act brought the separate urban and rural fire services and the State Civil Defence and Emergency Services together under the Chief Secretary. The newly-constituted Rural Fires Board, under a chairman appointed by the Governor, consists of 16 members. The Board has a paid staff of 15, headed by the State Fire Control Officer and includes five regional fire officers and an assistant

regional officer. At 30 June 1972 there were 299 rural fire brigades composed of 6,883 registered volunteers. The Board's budget in 1971-72 was \$397,450. Half the administrative expenditure is met by insurance companies insuring rural properties, and half by the Government. Special fire area expenditure is borne by the Government, with remaining expenditure being shared proportionately between the Government and municipalities.

## Patents, trade marks and designs

### Patents

Patents for inventions are granted under the *Patents Act* 1952-1969, which applies to the Commonwealth of Australia and the Territories of Norfolk Island and Papua New Guinea. The Act is administered by a Commissioner of Patents. The amending Act of 1969 came into operation on 1 January 1970. Regulations under the Act provide variable fees for lodgment of applications depending on size of specifications and number of claims. The basic fee for lodging an application and complete specification is \$20.00. Examination no longer automatically follows lodgment of applications. The Commissioner may now direct an applicant to request examination in which case the examination fee is \$60.00, or the applicant may request it of his own accord, in which case the fee is \$80.00. If examination is not requested within five years after lodgment, the application lapses.

Annual taxes are payable commencing with a fee of \$8.00 after the expiration of two years from the date of lodgment of the complete specification and rising to \$50.00 after the expiration of 15 years from that date.

#### PATENTS: AUSTRALIA, 1968 TO 1972

	1968	1969	1970	1971	1972
Applications . . . . .	16,712	17,446	16,443	16,407	16,165
Applications accompanied by provisional specifications . . . . .	3,899	3,637	3,628	3,933	4,195
Letters patent sealed . . . . .	5,537	7,127	6,130	10,641	10,920

### Trade marks and designs

Under the *Trade Marks Act* 1955-1966 the Commissioner of Patents is also Registrar of Trade Marks. Provision is made for the registration of users of trade marks and for their assignment with or without the goodwill of the business concerned. A new classification of goods was adopted in 1958, and trade marks registered under repealed Acts are reclassified on renewal. Under the *Designs Act* 1906-1968 the Commissioner of Patents is also Registrar of Designs.

#### TRADE MARKS AND DESIGNS: AUSTRALIA, 1968 TO 1972

## Copyright

Copyright is regulated by the Commonwealth *Copyright Act* 1968, which came into force on 1 May 1969. On that date Australia ratified its adherence to the Brussels revision of the Berne Copyright Convention and to the Universal Copyright Convention, whereby citizens of member countries are accorded protection by complying with the convention formality requiring proprietors to place on their works the symbol © together with their name and the year of first publication, in such a manner and location as to give reasonable notice of their claim of copyright in the works so identified. The new legislation contains no provision for the registration of copyright, and the Copyright Office ceased to exist on 1 May 1969. Copyright is now administered by the Attorney-General's Department.

## CHAPTER 16

### NATIONAL ACCOUNTS

National accounting aims at providing a systematic summary of the transactions taking place in the economy, especially of those that relate to the production and use of goods and services, and to transfers of income or capital between sectors of the economy.

Estimates of national income and expenditure have been compiled by the Bureau since 1944–45 and have been published annually as papers entitled *National Income and Expenditure* accompanying the Commonwealth Budgets. Detailed annual estimates of national income and expenditure on a revised basis were published in *Australian National Accounts, National Income and Expenditure*, 1971–72 (7.1). Preliminary estimates (less detailed) for 1971–72 were published earlier in a Budget Paper. Quarterly estimates are published in *Quarterly Estimates of National Income and Expenditure* (7.5). A supplement to the December quarter 1972 issue of *Quarterly Estimates of National Income and Expenditure* (7.10) presented historical quarterly series of gross domestic product and related aggregates at current and constant prices consistent with the 1971–72 Australian National Accounts bulletin.

More recently, the Bureau has been engaged in the compilation of input-output tables for the Australian economy. Preliminary tables for the year 1962–63 were published in February 1971 and the final results were published in *Australian National Accounts, Input-Output Tables 1962–63* (7.11) issued in May 1973.

The figures shown on pages 484–9 are as published in *Australian National Accounts, National Income and Expenditure*, 1971–72.

### NATIONAL INCOME AND EXPENDITURE

#### Description of National Income and Expenditure Accounts

A brief description of the conceptual basis of national accounts is given in this section, but for a more detailed treatment of the concepts and structure of the Australian National Accounts reference should be made to *Australian National Accounts, National Income and Expenditure*, 1971–72.

#### Definition and relationship of the concepts of product, income and expenditure

The main concepts of product, income and expenditure in the Australian National Accounts are defined and expressed in equivalents as follows.

*Gross domestic product* is the total market value of goods and services produced in Australia within a given period after deduction of the cost of intermediate usage of goods and services but before deducting allowances for the consumption of fixed capital. Thus gross domestic product, as here defined, is 'at market prices'. It is equivalent to gross national expenditure plus exports of goods and services less imports of goods and services. *Gross farm product* is that part of gross domestic product which derives from production in rural industries. *Gross non-farm product* arises from production in all other industries.

*Gross domestic product at factor cost* is that part of the cost of producing the gross domestic product which consists of gross payments to factors of production (labour, land, capital, and enterprise). It represents the value added by these factors in the process of production and is equivalent to gross domestic product less indirect taxes plus subsidies.

*Domestic factor incomes* is that part of the value added within a given period by factors of production (labour, land, capital and enterprise) which accrues as income to their suppliers after allowing for the depreciation of fixed capital. It is equivalent to gross domestic product at factor cost less depreciation allowances.

*National income* is the net income accruing within a given period to Australian residents from their services in supplying factors of production (labour, land, capital and enterprise) in Australia or overseas plus indirect taxes less subsidies. It is equivalent to domestic factor incomes plus indirect taxes less subsidies and net income paid overseas.

*National disposable income* is the net income accruing within a given period to Australian residents from their services in supplying factors of production, from net indirect taxes and from re-distributive transfers. It is equivalent to national income less net transfers overseas.

*Gross national expenditure* is the total expenditure within a given period on final goods and services (i.e. excluding goods and services used up during the period in the process of production) bought by Australian residents. It is equivalent to the gross domestic product plus imports of goods and services less exports of goods and services.

*Household income* is the total income whether in cash or kind, received by persons normally resident in Australia in return for productive activity (such as wages and supplements, incomes of unincorporated enterprises etc.) and transfer incomes (such as cash social service benefits, interest etc.). It includes the imputed interest of life offices and superannuation funds, which is the benefit accruing to policy holders and members from investment income of the funds. However, it excludes any income which might be said to accrue to persons in the form of undistributed company income. It also includes any property income received by non-profit organisations such as private schools, churches, charitable organisations, etc.

#### Framework of accounts and sectors

In the accounts shown in this Year Book four internal institutional sectors are distinguished—corporate trading enterprises (including public trading enterprises), financial enterprises (including the nominal industry), households (including their unincorporated enterprises) and general government. All of these internal sectors engage in production activity, receive and disburse income and accumulate assets. Without distinguishing between internal sectors, their transactions are summarised in three accounts, a domestic production account (Table 1), a national income and outlay account (Table 3) and a national capital account (Table 4). In addition there is an overseas sector having an account (Table 6) which shows a summary of the transactions into which overseas governments, persons and businesses enter with Australian residents. These four accounts form a system which though not detailed is complete in that, in principle, a credit in any account is matched by a debit in some other account. Income and outlay accounts are shown also for each of the four domestic sectors. The national income and outlay account is a consolidation of the income and outlay accounts of the four domestic sectors. The sector income and outlay accounts can together take the place of the national income and outlay account to provide a more detailed system.

The framework of sectors and accounts underlying the form of social accounts shown in this publication is set out in the following diagram. The heavy rectangles depict the minimum system of four accounts which represent the consolidated accounts of the nation. The light rectangles represent the accounts for institutional sectors. The sector income and outlay accounts are shown in this Year Book. The sector capital accounts are published in *Australian National Accounts, National Income and Expenditure, 1971-72* (Reference 7.1). The sub-division of the domestic production account represents production accounts for establishments classified according to industry. Selected transactions from such production accounts are shown in Reference 7.1 mentioned above, and such production accounts can be developed in detail to produce input-output accounts.

### ARTICULATION OF AUSTRALIAN NATIONAL ACCOUNTS

#### I. DOMESTIC PRODUCTION ACCOUNT

Industry (Establishments by kind of economic activity)							
Primary	Mining	Manufacturing	Building	Transport	Commerce	Finance	etc.

#### II. NATIONAL INCOME AND OUTLAY ACCOUNT

Corporate trading enterprises (including public trading enterprises)	Financial enterprises (including the nominal industry)	Households (including unincorporated enterprises)	General government
---	---	--	--------------------

#### III. NATIONAL CAPITAL ACCOUNT

Corporate trading enterprises (including public trading enterprises)	Financial enterprises (including the nominal industry)	Households (including unincorporated enterprises)	General government
---	---	--	--------------------

#### IV. OVERSEAS TRANSACTIONS ACCOUNT

--

### Description of the accounts

The *domestic production account* is a consolidation of the production accounts of all producers regardless of sector. The production account is shown as receiving revenue from the sale of goods and services to final buyers; all intermediate goods and services are cancelled out, since they represent a cost to one producer to offset the revenue of the other. On the payments side are shown the payments of indirect taxes less subsidies, and, since the account is presented from the point of view of the producing unit, the wages and salaries paid to employees. The balance is the gross operating surplus which may be divided into depreciation allowances and net operating surplus. Depreciation allowances is carried to the national capital account (or the sector capital accounts) and net operating surplus, together with wages and salaries and indirect taxes less subsidies, is carried to the national income and outlay account (or sector income and outlay accounts). In input-output tables, the national production account is broken up into accounts for separate industries, and transactions associated with intermediate usage of goods and services are shown in the production accounts for the separate industries.

The *national income and outlay account* is shown as receiving wages, salaries and supplements, net operating surplus and indirect taxes less subsidies from the domestic production account. From this income are deducted net payments of income and miscellaneous transfers to overseas, and the remainder is the national disposable income. The outlay side of the account shows this disposable income is largely used for final consumption expenditure and the balance is the nation's saving. The national income and outlay account is a consolidation of the sector income and outlay accounts.

The *national capital account* is a consolidation of the sector capital accounts. It shows on the receipts side depreciation allowances transferred from the domestic production account and saving transferred from the national income and outlay account (or from the sector income and outlay accounts). On the payments side are shown purchases by all sectors of new buildings and capital equipment, the increase in stocks of all sectors and a balance described as net lending to overseas. This concept of net lending to overseas includes increases (and, negatively, decreases) in Australia's overseas monetary reserves. The net lending to overseas is also the balance on current transactions in the overseas transactions account.

The *overseas transactions account* records all transactions of a current nature between Australian and overseas residents. Although this is an account for the overseas sector, the items are named from the Australian viewpoint. The account shows that Australia's current receipts from overseas consist of the value of (Australia's) exports of goods and services, property income received from overseas and transfers from overseas. These receipts are used for (Australia's) imports of goods and services and payments of property income and transfers to overseas; and the balance of current receipts represents net lending to overseas. Positive net lending to overseas corresponds to a surplus on current transactions with overseas and negative net lending corresponds to a deficit. The transactions in property income shown in this account differ from estimates shown in balance of payments statistics because in the national accounts undistributed company income is not imputed to the beneficial owners. For this reason, also, net lending to overseas differs from the balance on current account shown in balance of payments statistics.

The *corporate trading enterprises (including public trading enterprises) income and outlay account* is shown as receiving the net operating surpluses of trading enterprise companies and public trading enterprises from the domestic production account and property income (interest, etc. and dividends) from other sectors. This total of receipts is appropriated to various transfer payments (interest, etc. paid, income tax payable, dividends paid, and public enterprise income) and undistributed income which is the saving of the sector. Public trading enterprises are not shown to have any saving. Public enterprise income is here measured by the net operating surplus and the whole amount is transferred to the general government income and outlay account. Also, as property income received and paid by public trading enterprises have not been distinguished from property income received and paid by general government, the interest and dividends shown in this account are only those received and paid by companies.

The *financial enterprises (including the nominal industry) income and outlay account* is shown receiving net operating surplus from the domestic production account and property income from other sectors. This total of receipts is appropriated to various transfer payments (interest, etc., income tax and dividends) and the saving of the sector consisting of retained income of public financial enterprises and undistributed income of companies. The disbursements shown for the sector include interest on life and superannuation funds imputed to households. This represents earnings accumulated for policy holders and members and is shown as paid to the household income and outlay account where it contributes to household saving.

The *households (including unincorporated enterprises) income and outlay account* is shown receiving net operating surplus from the domestic production account in respect of unincorporated enterprises and dwellings owned by persons. In order to show the net income from these activities, related interest payments (which could be shown on the disbursements side) are here shown as a deduction from net operating surplus. Wages, salaries and supplements is also received from the domestic production account. In addition to these primary incomes, transfer incomes are received from other sectors (interest, etc., dividends, cash benefits from general government and transfers from overseas). On the disbursements side are shown payments for goods and services for final consumption and transfer payments (consumer debt interest, taxes and transfers overseas). The balance is the saving of the sector which is transferred to the sector capital account.

Household income includes interest on life and superannuation funds but not pensions received from superannuation funds nor claims on life insurance policies. These are treated as capital transactions involving only the exchange of one asset (equity in life insurance and superannuation funds) for another (cash). However, age and invalid pensions paid by general government are included in household income.

Estate and gift duties are treated as current receipts by general government and also as current payments by persons even though the individual payers may regard them as of a capital nature. All personal gifts and transfers to or from overseas are also treated as current. Personal transfers to and from overseas include such items as legacies and migrants' funds, which the persons concerned may think of as of a capital nature.

Net current expenditure on goods and services by non-profit organisations serving persons is included in private final consumption expenditure. Expenditure on buildings (e.g. churches, private schools, clubs) is treated as capital expenditure and excluded from this account.

The *general government income and outlay account* reflects a distinction between current and capital expenditure, which is necessarily arbitrary in some measure and has been made on the basis of excluding from current outlay expenditure on public works and increase in stocks. Expenditure on public works is taken to include new buildings, construction, plant and machinery and any replacement of assets charged to loan funds or capital works votes. Current outlay excludes all expenditure on roads, because a satisfactory distinction between new works and maintenance cannot be made. All defence expenditure is included in current outlay.

The income from public enterprises shown in this account consists of the income actually transferred to general government by public financial enterprises, and the whole of the income of public trading enterprises as measured by their net operating surplus. The net operating surplus of public trading enterprises is derived by deducting from their gross operating surplus any depreciation shown by these enterprises in their published accounts, except in the case of enterprises which are at present analysed on the basis of cash accounts in which depreciation is not allowed (usually enterprises whose accounts are included in Commonwealth or State public accounts). As in the case of households, all overseas gifts are included in the income and outlay account. These include gifts for international relief, technical assistance, etc., grants, contributions to international organisations and expenditure in connection with the administration of Papua New Guinea.

### **Estimates at constant prices**

For certain types of economic analysis it is useful to examine estimates of the principal flows of goods and services in the economy revalued in such a way as to remove the direct effects of changes in their prices which have occurred over the period under review. Such estimates, conventionally described as 'at constant prices', are presented in Tables 2 and 5 for gross domestic product, exports and imports of goods and services, and gross national expenditure and its principal components.

In concept, constant price estimates may be thought of as being derived by expressing the value of every component commodity as the product of a price and a quantity, and by substituting for each actual current price the corresponding price in the chosen base year. Aggregates at constant prices for each year are then obtained by summation. In practice, the quality and quantity of the available data are such that a number of methods are used in the preparation of estimates at constant prices. These estimates involve approximations and assumptions, and this should be borne in mind in the interpretation and use of the results.

Gross domestic product is equivalent to gross national expenditure plus exports of goods and services less imports of goods and services. This relationship has been used in deriving the estimates of gross domestic product at constant prices shown in Table 2. Their sub-division into gross farm product and gross non-farm product has been estimated by deriving gross farm product by the production method (revaluing farm output and farm usage of intermediate goods and services to obtain gross farm product as the difference) and deducting this from total gross domestic product to obtain gross non-farm product.

For a considerable part of personal consumption expenditure and exports and imports of goods and services, it is possible to identify specific units of quantity and price, and revalue the quantities at base year prices. Where it is not possible to express the values in successive years as the product of prices and homogeneous units of quantity, the treatment generally adopted is to divide values by appropriate price indexes.

With the remaining components of gross national expenditure, a greater degree of approximation and assumption is involved. For example, when information about the commodity content of a flow is limited (e.g. various components of gross fixed capital expenditure), special purpose price indexes relating to selected commodities are applied to the expenditure on the full range of commodities they represent. In other cases, for instance, where the expenditure relates to 'unique' goods (e.g. goods not homogeneous from year to year), revaluation is achieved by use of an index reflecting the price change of the direct materials and direct labour components of the unique goods in question. This method of revaluation is also applied to government final consumption expenditure. The resulting estimates have, therefore, considerable limitations for many uses, for example in studies of productivity.

The method used to estimate the increase in stocks involves first reducing the increase in book values of stocks by an estimate of the stock valuation adjustment to obtain the measures at current prices, and then revaluing the latter to arrive at the estimates at constant prices. The stock valuation adjustment has to be made because existing stocks are sometimes explicitly revalued (for example, such revaluations are sometimes made by business enterprises so as to show stocks at the lower of cost or market value for balance sheet purposes) or more commonly, because stocks used or disposed of are replaced by new stocks of the same goods but at different prices.

Part 1 of *Australian National Accounts, National Income and Expenditure, 1971-72* contains a fuller discussion of the conceptual problems involved in making these estimates and Appendix B of that publication contains a brief account of the sources and methods used in preparing the estimates.

#### Reliability and revisions

Estimates of national income and expenditure are necessarily prepared from a very wide range of statistical information, some of which is available quickly, some of it only with a delay of several years after the period to which it relates. Some of it is closely related to the desired national income concepts, but some of it is not completely satisfactory in various respects, including coverage, concepts and timing. Estimates, in particular for the most recent years, are therefore subject to revision.

This applies particularly to estimates based on income tax statistics—income of companies, non-farm unincorporated enterprises, depreciation, and part of gross private fixed investment—which are subject to substantial revisions for the last two years, as tabulations of income tax statistics do not become available until about twenty-two months after the end of each financial year.

It is not possible to put precise limits on the degree of revision likely to any particular series, nor to state degrees of reliability in a statistical sense. These depend in large part on the range and quality of the basic statistical data. For illustrations of common causes of revisions reference should be made to *Australian National Accounts, National Income and Expenditure, 1971-72*.

## National income and expenditure tables

(For explanatory note on item numbers see Note following Table 3.)

TABLE 1

NOTE. Items in all current price tables are numbered from 1 to 24, with or without the addition of a letter, and this system is used to identify the corresponding credit and debit entries in the accounts and as a key to the notes on pages 490-3. In some cases the items correspond exactly, while in other cases an entry in one table is the sum of two or more entries in other tables; here the total is given a number, and the components have a number and a letter. In the remaining type of case all entries are given the same number and a distinguishing letter, because in this group one item is not the sum of one or more entries. The relationship between these items can still be traced through because the sum of all credit entries must equal the sum of all debit entries.

## Description of items in the National Income and Expenditure Accounts

*Item 1. Final consumption expenditure—private.* Net expenditure on goods and services of consumption by persons and private non-profit organisations serving households. This item excludes the purchase of dwellings and capital expenditure by non-profit organisations (included in item 3), and maintenance of dwellings (treated as expenses of private enterprises), but includes personal expenditure on motor vehicles and other durable goods and the imputed rent of owner-occupied dwellings. Purchase of motor vehicles is the estimated expenditure by persons on new motor vehicles, second-hand motor vehicles purchased from business enterprises and general government, and net dealers' margins on purchases and sales of motor vehicles between persons. Motor vehicles include cars, station wagons, motor cycles, and motor scooters bought for personal use. The value of income in kind (e.g. food produced and consumed on farms, board and lodging provided free to employees) is included in both household income and private final consumption expenditure, but goods chargeable to business (expense) accounts are excluded.

*Item 2. Final consumption expenditure—government.* Expenditure by public authorities (other than those classified as public enterprises) which does not result in the creation of fixed tangible assets or in the acquisition of land, buildings or second-hand goods. It comprises expenditure on wages, salaries, and supplements, and on goods and services other than fixed assets and stocks. Fees, etc., charged by general government for goods sold and services rendered are offset against purchases. Net expenditure overseas by general government and purchases from public enterprises are included. All government expenditure on defence is classified as final consumption expenditure.

*Item 3. Gross fixed capital expenditure—private.* Expenditure on fixed assets whether for additions or replacements. This item includes expenditure on dwellings (item 3a), other building and construction (item 3b), and vehicles, plant, machinery, etc. (item 3c). It includes also expenditure on second-hand assets as well as new assets, less sales of existing assets. Expenditure on ordinary repair and maintenance of fixed assets is excluded as being chargeable to current account. Major additions are, however, regarded as capital expenditure. Dwellings purchased by persons from public housing authorities, including previously rented houses, are included in private capital expenditure. Net purchases of other land and buildings are not included.

*Item 4. Gross fixed capital expenditure—public enterprises.* Expenditure on new fixed assets whether for additions or replacements, including wages and salaries paid by public enterprises in connection with capital works. Expenditure on houses and flats is estimated by deducting the cost of previously rented dwellings sold to the private sector from the estimated expenditure on construction of dwellings. The sales value of these previously rented dwellings is included in private capital expenditure.

*Item 5. Gross fixed capital expenditure—general government.* Expenditure on new fixed assets whether for additions or replacements, other than for defence purposes. Because it has not been possible to make a satisfactory dissection, all expenditure on roads, including maintenance, is classified as fixed capital expenditure.

*Item 6. Increase in stocks.* The increase in stocks of enterprises and general government. The increase in stocks is calculated on a quarterly basis as the difference between the beginning and end-of-quarter estimates of stock levels, both revalued at average current-quarter prices by means of appropriate price indexes.

*Item 7. Statistical discrepancy.* The difference between the sum of the direct estimates of gross domestic product and imports of goods and services on the one hand and the sum of the estimates of components of gross national expenditure and exports of goods and services on the other hand. Conceptually these two totals are the same. Inclusion of the discrepancy on the expenditure side of the domestic production account implies nothing as to the relative accuracy of the estimates of gross domestic product and national expenditure. Similarly its inclusion in the capital account does not imply that estimates in this table are less accurate than those in other tables, or that capital expenditure estimates are less accurate than estimates on the receipts side of this account.

*Item 8. Exports of goods and services.* The value of goods exported overseas and receipts from overseas for other goods and services. In Table 6 this item is sub-divided into the following components.

*Item 8a. Exports f.o.b.* The recorded trade figures adjusted for balance of payments purposes. The adjustments are similar to those made to the recorded import figures except that no change is made to the basis of valuation.

*Item 8b. Transportation.* The expenditure of overseas carriers in Australian ports, the overseas earnings of Australian shipping and airline operators in respect of passenger fares, and their earnings from freight on exports from Australia, carriage of goods between foreign ports, etc.

*Item 8c. Travel.* Expenditure in Australia of persons visiting for pleasure or business, including expenditure in Australia of foreign students studying under the Colombo Plan.

*Item 8d. Government transactions.* Receipts for services rendered by the Australian government to other governments and international organisations, including services provided under joint defence projects and payments in Australia by foreign governments on diplomatic, consular and trade representation and for pensions.

*Item 8e. Other goods and services.* The value of Australian production of gold (including recoveries from scrap) less net industrial usage, business expenses of overseas firms in Australia, and commissions, brokerage, etc.

*Item 9. Imports of goods and services.* The value of goods imported from overseas and amounts payable overseas for services. In table 6 this item is sub-divided into the following components.

*Item 9a. Imports f.o.b.* Recorded trade figures adjusted for the purpose of balance of payments estimates. The principal adjustments are the deduction of a 'valuation adjustment' representing the excess of the recorded value of imports (based on value for duty) over the estimated selling price to the importer as shown on invoices accompanying customs entries, the addition of unrecorded imports, including ships and aircraft for use on overseas routes, and the subtraction of films imported on a rental basis, imports of gold, passengers' personal effects, goods for repair and goods intended for re-export.

*Item 9b. Transportation.* Freight payable to foreign carriers on goods imported into Australia and transported between Australian ports and fares payable in Australia to overseas shipping and airline companies. It also includes the overseas expenditure of Australian ships and aircraft, and net marine insurance payable overseas in respect of both exports and imports.

*Item 9c. Travel.* Expenditure in other countries by Australians visiting overseas for pleasure or business.

*Item 9d. Government transactions.* Expenditure overseas for defence, including the pay and allowances of personnel serving overseas, expenditure overseas on diplomatic, consular and trade representation, government pensions paid abroad, administrative expenditure overseas on immigration, and other miscellaneous payments for services.

*Item 9e. Other goods and services.* Administrative and promotional expenditure overseas by Australian firms, cinema and television film rentals and commissions, brokerage, etc. payable overseas, and the value of repairs on goods previously exported for repair and return.

*Item 10. Wages, salaries and supplements.* Payments by producers to their employees in the nature of wages and salaries as defined for pay-roll tax, including allowances for income in kind (board and quarters, etc.), together with supplements to wages, and pay and allowances of members of the forces. Employees cover all persons engaged in the activities of incorporated business units and in the production of government services and services of non-profit organisations, members of the armed forces, and all persons engaged in the activities of unincorporated enterprises except the proprietors and unpaid members of the family. In addition to wages and salaries paid by employers subject to pay-roll tax, this item includes wages and salaries paid by employers not subject to pay-roll tax, based on estimates of employment and average earnings. Supplements consist of employers' contributions to pension and superannuation funds, direct payments of pensions and retiring allowances, and amounts paid as workers' compensation for injuries. Pay and allowances of members of the forces consist of active pay, field, subsistence and dependants' allowances, and the value to the members of the forces of food, clothing, normal medical attention, etc. supplied in kind. They include deferred pay, but exclude war gratuities which are included in item 23.

*Item 11. Gross operating surplus.* The operating surplus, before deduction of depreciation provisions, dividends, interest, royalties and land rent, and direct taxes payable, but after deducting stock valuation adjustment, of all enterprises, trading and financial, from operations in Australia. It is the excess of gross output over the sum of intermediate consumption, wages, salaries and supplements, and indirect taxes less subsidies. Trading enterprises include all companies, public enterprises, partnerships and self-employed persons engaged in the production of goods and services for sale, but exclude financial enterprises. Public trading enterprises are government undertakings which attempt to recover all, or a substantial part, of their costs through charges made to the public for the sale of goods and services. All owners of dwellings are included whether they let the dwellings or occupy them themselves. Trading enterprises' gross operating surplus is shown separately for companies (item 11a), unincorporated enterprises (item 11b), dwellings owned by persons (item 11c), and public enterprises (item 11d). Financial enterprises comprise banks, insurance offices, superannuation funds and other enterprises primarily engaged in incurring liabilities and acquiring financial assets

in the market. The gross operating surplus of financial enterprises (item 11e) includes an imputed bank service charge which represents a reclassification of a part of interest receipts. The imputed bank service charge (item 11f) is not allocated among customers (which would have the effect of reducing their respective operating surpluses), but is shown in the production account as a negative adjustment to operating surpluses generally. *Net operating surplus* is, in principle, the operating surplus after providing for the consumption of fixed capital, and is estimated by deducting depreciation allowances from gross operating surplus. *Depreciation allowances* are financial provisions made for depreciation and represent in the main amounts allowed under income tax legislation, but include also the estimated depreciation on tenanted and owner-occupied dwellings and provisions made by public enterprises.

*Item 12. Indirect taxes less subsidies.* Indirect taxes (item 12a) are taxes assessed on producers, i.e. enterprises and general government, in respect of the production, sale, purchase or use of goods and services, which are charged to the expenses of production. Subsidies (item 12b) are grants made by general government to enterprises which are credited to their production accounts. These grants may take the form of bounties on goods produced, payments to ensure a guaranteed price or to enable maintenance of prices of goods or services below cost of production, and other forms of assistance to producers.

*Item 13. Dividends and interest etc.* Receipts and payments of dividends including dividends paid overseas and the remitted profits of Australian branches of overseas enterprises; and receipts and payments of interest, royalties and land rent. In most tables dividends are shown separately from interest etc. The items are shown net of intra-sector receipts and payments. *Net income paid overseas* comprises payments of dividends and interest etc. to overseas less receipts of dividends and interest etc from overseas. *Interest on life and superannuation funds imputed to households* (13i), represents the net earnings after tax, of these funds from dividends, interest, rental charges and other income which are accumulated for the benefit of policy holders and members.

*Item 14. Transfers to and from overseas.* All transfers to or from overseas on public authority or private account which are not payments for goods and services or payments of dividends, interest, etc.

*Item 14a. Personal transfers overseas.* Gifts of money by resident persons and private institutions, payments for sustenance, and transfers of emigrants' funds and legacies from Australia to overseas, together with the value of goods exported as gifts.

*Item 14b. General government transfers overseas.* Grants to, and payments made on behalf of Papua New Guinea and expenditure overseas in respect of technical assistance and relief under the Colombo Plan and United Nations and other aid projects. Includes contributions to United Nations and other international organisations due by virtue of membership of these organisations.

*Item 14c. Personal transfers from overseas.* Gifts of money received from non-resident persons and private institutions, receipts for sustenance, and transfers of immigrants' funds and legacies from overseas to Australia, together with the value of goods imported as gifts.

*Item 15. Income tax.* Income tax payable by trading and financial companies (15a and 15c), life and superannuation funds (15b) and households (15d) are amounts payable at rates of taxation applicable in each year. Income tax payable by households includes the total income tax payable by individuals on all forms of income, whether wages, business income or property income. *Increase in income tax provisions*, the difference between the amounts of income tax payable in respect of the income of the year and the cash receipts by general government during the year, is a component of the savings of the nation.

*Item 16. Undistributed income.* The undistributed income of companies comprising trading enterprise companies (item 16a) and financial enterprise companies (item 16b) is the balance of company income, including dividends received from other sectors (items 13d and 13h) after deduction of income tax payable and dividends paid. No imputation is made to the beneficial owners and therefore the whole of the undistributed income is regarded as saving by resident enterprises. The income, and consequently the undistributed income, of financial enterprise companies includes increases in provisions for unexpired risks of casualty insurance companies and health insurance funds.

*Item 17. Retained income of public financial enterprises.* The net income of public financial enterprises (mainly government banks and insurance offices) less payments from net income to general government. The payments to general government may be described in the accounts of the enterprises as dividends, income tax, payments in lieu of income tax or transfers of profit. The retained income of public financial enterprises includes increases in provisions for unexpired risks of government insurance offices on casualty insurance, but excludes net earnings on life insurance funds (item 13i).

*Item 18. Household saving.* The excess of household income over the sum of private final consumption expenditure, interest paid, income tax payable, other direct taxes, fees, fines, etc., and transfers overseas. Household saving is estimated as the balancing item in the household income and outlay account. It includes saving through life insurance and superannuation funds (including net earnings on these funds) and the increase in assets with marketing boards. Household saving may also take the form of increases in holdings of cash and net purchases of securities, the net increase in bank deposits less advances, the reduction in the outstanding advances of instalment credit companies to households and the increase in the equity of households in dwellings and in capital equipment, buildings and stocks of unincorporated enterprises.

*Item 19. Surplus on general government current transactions.* The excess of income, including the whole of the net income of public trading enterprises, over current outlay. Current outlay includes final consumption expenditure, as defined in item 2, and transfer payments (interest, cash benefits, subsidies, grants for private capital purposes, and transfers overseas). The surplus is transferred to the general government capital account where it is shown as part of total funds available for financing capital accumulation.

*Item 20. General government grants for private capital purposes.* Grants to meet part of the costs of private capital expenditure, e.g. Commonwealth Home Savings grants, grants towards construction of science laboratories and libraries in private schools and of houses for aged persons, payments under the Currency Act in relation to the conversion of accounting and other machines following introduction of decimal currency; and compensation to primary industry marketing authorities for losses on overseas debts resulting from sterling devaluation.

*Item 21. Net lending.* The excess of net acquisition of financial assets by transactors over their incurrence of liabilities. The net lending to overseas is the balance on current transactions in the overseas transactions account. However, it should be noted that it differs from the balance on current account shown in the balance of payments statistics by the net amount of undistributed income accruing overseas. The concept of net lending to overseas includes additions to overseas monetary reserves.

*Item 22. Public enterprise income paid to general government.* Includes the whole of the income of public trading enterprises and that part of the income of public financial enterprises which is paid to general government whether described by the enterprises as dividends, transfer of profits or as income tax. *Public enterprise income* for trading enterprises (item 22a) is equal to net operating surplus, being exclusive of interest received and before charging interest costs relating to the enterprises. In principle interest receipts and payments of public corporate enterprises should be included in account 7 and only actual transfers to general government in account 10, but all interest costs and interest receipts of public trading enterprises are included with other interest transactions in the general government income and outlay account pending satisfactory identification of the interest relating to public trading enterprises. *Public enterprise income* for financial enterprises (items 22b plus 17) is the net income after depreciation allowances, interest paid and working expenses are deducted from receipts of interest and charges for services. Depreciation allowances deducted in arriving at the income of public trading and financial enterprises are those shown in their published accounts, except in the case of some trading enterprises whose accounts, included in the Commonwealth or State budgets, are analysed on the basis of their cash accounts (in which depreciation is not charged).

*Item 23. Cash benefits.* Current transfers to persons from general government in return for which no services are rendered or goods supplied. Principal components are scholarships; hospital, medical, pharmaceutical, maternity, sickness and unemployment benefits; child endowment; widows', age, invalid and repatriation pensions; and attendance money for waterside workers.

*Item 24. Other direct taxes, fees, fines, etc.* Estate and gift duties paid and all other taxes, fees for services of a regulatory character, fines and gifts paid by persons to general government.

## CHAPTER 17

### PRIVATE FINANCE

Further information on the subjects dealt with in this chapter is contained in the annual bulletins *Banking and Currency* (5.1) and *Insurance and Other Private Finance* (5.15). Current information is contained in the *Quarterly Summary of Australian Statistics* (1.3), the *Monthly Review of Business Statistics* (1.4), the *Digest of Current Economic Statistics* (1.5) (monthly), and the following mimeographed statements: monthly—*Banking Statistics* (5.2); *Major Trading Banks Statistics* (preliminary statement) (5.3); *Savings Bank Statistics* (preliminary statement) (5.28); *Savings Banks Housing Finance Transactions within Australia* (preliminary statement) (5.35); *Life Insurance Statistics* (5.17); *Finance Companies* (5.14); *Instalment Credit for Retail Sales* (preliminary statement) (5.19); *Permanent Building Societies* (5.34); quarterly—*Instalment Credit for Retail Sales* (5.18); *New Capital Raisings by Companies in Australia* (bulletin (5.9) and preliminary statement (5.10)); *Capital and Maintenance Expenditure by Private Business in Australia* (5.8) (5.7); *Unit Trusts, Land Trusts and Mutual Funds* (5.31). Other relevant annual mimeographed bulletins are *Life Insurance* (5.32); *Australian Fire, Marine and General Insurance Statistics* (5.16); *Government Pension and Superannuation Schemes* (5.23); *Survey of Selected Private Pension Funds* (5.25); *Finance Companies* (5.13); and *Building Societies: Australia* (5.5).

### MONEY

#### Currency

Australia has a decimal system of currency, the unit being the dollar which is divided into 100 cents. Decimal coins and notes became legal tender on the 14 February 1966. Before that date the Australian currency unit was the pound divided into 20 shillings each of 12 pence. One dollar in the present currency is equal to 10 shillings in the old currency. The par value of the Australian dollar under the terms of the International Monetary Fund and established on the 14 February 1966, was 0.99531 grams of gold, which changed on the 23 December 1972 to 1.04360 grams of gold.

The *Reserve Bank Act* 1965 authorised the Reserve Bank of Australia to issue Australian notes in denominations of \$1, \$2, \$5, \$10, \$20, or \$50, or in any other denomination that the Treasurer, by instrument of writing published in the *Gazette*, determines. All Australia's coin requirements are met by the Royal Australian Mint, Canberra.

For additional information on note issue and coinage refer to List of Special Articles, etc., at end of this Year Book.

**Gold receipts, issues and price**

Since early in the 1939-45 War all gold has been acquired by the Reserve Bank, and the export and use of gold has been subject to regulation by the Commonwealth Government. All trading banks in Australia, the Deputy Master of the branch of the Royal Mint in Perth, and three private refining companies are authorised under the Banking (Gold) Regulations to deal in gold on behalf of the Reserve Bank. The Melbourne Mint ceased to deal in gold in 1964. The Royal Australian Mint at Canberra is not authorised to receive and issue gold.

The average price of gold in Australia is fixed by the Reserve Bank and at present reflects the parity value of Australian currency established in conformity with the *International Monetary Agreements Act* 1947. The average price paid for gold delivered to the Reserve Bank of Australia or to persons authorised by the Bank to purchase gold is fixed by the Reserve Bank of Australia, and had been \$31.25 per fine ounce since 1 May 1954, changing to \$29.80 per fine ounce on 23 December 1972.

In December 1951 arrangements were made whereby producers could sell a proportion of newly-mined gold for industrial purposes on overseas premium markets. Under these arrangements gold is acquired by the Reserve Bank in the usual manner and sold, at the Bank's buying price, to an association representing gold producers participating in the scheme. The association pays the Bank's handling charges and the costs of preparation of the gold and makes arrangements for export and sale. Profits earned by the association after meeting administrative expenses are distributed to members in proportion to the quantity of gold delivered to the Reserve Bank. Until August 1952, when permission was given for the export of fine gold, gold exported under this arrangement was not to exceed a fineness of 22 carats (11/12ths).

The average price per fine ounce in Australian currency obtained for gold on premium markets in Australia and overseas for each month during the year 1971-72 was: July \$35.99, August \$37.38, September \$36.45, October \$36.72, November \$36.70, December \$37.26, January \$38.23, February \$40.61, March \$40.56, April \$41.10, May \$43.67 and June \$52.21.

## Overseas exchange rates

In the following table the "par of exchange" rate is the rate as at 30 June 1972 established under the International Monetary Fund Agreement. Selling rates shown are mainly the averages of daily quotations by the Commonwealth Trading Bank of Australia, and in other cases are the rates used by the Department of Customs and Excise in converting import values to Australian dollars for purposes of calculating customs duty.

## OVERSEAS EXCHANGE RATES: PAR OF EXCHANGE AND AVERAGE TELEGRAPHIC TRANSFER SELLING RATES FOR SYDNEY ON OVERSEAS COUNTRIES, 1971-72

Country	Basis of quotation	Australian decimal currency equivalents		Country	Basis of quotation	Australian decimal currency equivalents

(a) From 20 September 1971 two rates quoted for Belgium and France: "convertible" rate (Belgium), "commercial" rate (France) for trade transactions accompanied by documentation and "financial" rate for other transactions. (b) Exchange rate allowed to fluctuate, no par value fixed. (c) Not a member of the International Monetary Fund. (d) No par value established.

## Volume of money

The statistics of volume of money compiled by the Reserve Bank of Australia include notes and coin in the hands of the public, deposits of the public with trading banks and deposits with all savings banks. As far as possible, all components of this series in the table below have been calculated on a weekly average basis. Deposits of the public with trading banks comprise the actual weekly average of current and fixed deposits with trading banks less both the actual weekly average of Commonwealth and State Government current and fixed deposits and a weekly average of inter-bank current and fixed deposits. Inter-bank deposits mainly comprise savings bank deposits with trading banks and deposits of overseas banks with trading banks in Australia. Certificates of deposit include any holdings by Commonwealth and State Governments and banks. Deposits of the public with trading banks also include the actual weekly average of deposits of the public with the Reserve Bank of Australia. Deposits with all savings banks comprise an interpolated "weekly average" based on end-of-month figures of total deposits with all savings banks. The figures for the volume of money include details for Papua New Guinea and Australia's other external territories.

## VOLUME OF MONEY: AUSTRALIA, JUNE 1968 TO 1972

(Source: Reserve Bank of Australia)

(\$ million)

Average of weekly figures for June	Notes and coin in hands of public	Deposits of public with all trading banks(a)			Deposits with all savings banks(b)	Total volume of money
		Current	Fixed	Certificates of deposits		
1968	964	3,450	2,191	..	6,200	12,805
1969	1,065	3,685	2,404	138	6,682	13,974
1970	1,187	3,798	2,617	145	7,090	14,837
1971	1,336	3,976	2,864	56	7,618	15,851
1972	1,467	4,328	3,260	113	8,339	17,508

(a) Current and fixed deposits exclude Commonwealth and State Government and inter-bank deposits but include deposits of the public with the Reserve Bank; certificates of deposit include any holdings by Commonwealth and State Governments and banks. (b) Interpolated "Weekly average" based on end-of-month figures.

## BANKING

The Australian banking system has developed along the lines of the United Kingdom system with widespread branch banking conducted by relatively few banks.

### Development since federation

With federation in 1901 the new Commonwealth Parliament was given power, under Section 51 of the Commonwealth Constitution, to legislate with respect to 'Banking, other than State Banking, also State Banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money'. In 1911 the Commonwealth entered the field of banking with the establishment of the Commonwealth Bank of Australia, which conducted both trading bank and savings bank operations. A separate Commonwealth Savings Bank was established in 1928.

### Central bank

Central banking functions of the Commonwealth Bank developed gradually over the years prior to and during the second world war. In November 1935 a Royal Commission was appointed by the Commonwealth Government to inquire into the monetary and banking systems in operation in Australia and to report whether any, and if so what, alterations were desirable in the interests of the people of Australia as a whole, and the manner in which any such alterations should be effected. The Commission presented its report in July 1937, and a summary of the recommendations appears in Year Book No. 31, page 1010.

In 1945 the Commonwealth Government legislated to give full legal effect to the central banking functions already being exercised by the Commonwealth Bank of Australia and to regulate the banking system as a whole. The Commonwealth Bank of Australia further developed mainly as a central bank when from 3 December 1953 the Commonwealth Trading Bank of Australia was established to take over most of the general trading bank functions of the Commonwealth Bank of Australia.

Legislation in 1959 completed the separation of the trading and central banking functions of the Commonwealth Bank of Australia with the establishment of the Commonwealth Development Bank of Australia under the *Commonwealth Banks Act* 1959 to take over the Industrial Finance Department and Mortgage Bank Department of the Commonwealth Bank of Australia.

A new bank, the Reserve Bank of Australia, was established under the *Reserve Bank Act* 1959 as the nation's central bank to administer the provisions of a new banking Act (*Banking Act* 1959). A statutory corporation, the Commonwealth Banking Corporation, was set up under the *Commonwealth Banks Act* 1959 to control the Commonwealth Trading Bank of Australia, the Commonwealth Development Bank of Australia, and the Commonwealth Savings Bank of Australia.

### Trading banks

Commercial banking in Australia is carried on by fourteen trading banks. Six large private trading banks together with the Commonwealth Trading Bank are generally referred to as the major trading banks. These banks provide widespread banking facilities throughout Australia. The remaining seven banks comprise one small local bank, three overseas banks which have been represented in Australia for many years and three State-owned banks operating only within their respective States.

The major trading banks are as follows: Commonwealth Trading Bank of Australia, Australia and New Zealand Banking Group, The Bank of Adelaide, Bank of New South Wales, The Commercial Bank of Australia Ltd, The Commercial Banking Company of Sydney Ltd, and The National Bank of Australasia Ltd.

The other trading banks are: Bank of Queensland Ltd, Bank of China, Bank of New Zealand, Banque Nationale de Paris, The Rural Bank of New South Wales, State Bank of South Australia, and The Rural and Industries Bank of Western Australia (Rural Department).

### Term Loan Fund

Lending by trading banks is generally conducted on an overdraft basis. A departure from this practice followed discussions during 1961-62 involving the Commonwealth Government, the Reserve Bank and the major trading banks, which resulted in arrangements whereby the banks agreed to create a fund known as the Term Loan Fund, the resources of which would be employed to make loans for capital expenditure on production in the rural, industrial and (to a lesser extent) commercial fields and to finance exports. The loans would be made for fixed terms, varying usually between three and eight years. The term lending arrangements operated from April 1962.

### *Farm Development Loan Fund*

Discussions in March 1966 between the Commonwealth Government, the Reserve Bank and the major trading banks resulted in the establishment of a fund known as the Farm Development Loan Fund, from which resources would be available to provide rural producers, particularly smaller producers, with greater access to medium and long-term finance. The Fund was established in April 1966.

### **Savings banks**

Prior to 1956 savings banks operations were conducted by the Commonwealth Savings Bank, two trustee savings banks in Tasmania, and State-owned banks in Victoria, South Australia and Western Australia. In January 1956 private savings banks were established as subsidiary companies by two of the private trading banks. By mid-1962 all the major private trading banks had established savings bank subsidiary companies. In May 1972 the Bank of New Zealand Savings Bank Limited was granted an authority to carry on savings bank business in Australia.

### **Development banks**

The Commonwealth Development Bank of Australia was established by the *Commonwealth Banks Act* 1959 and commenced operations on 14 January 1960. The Australian Resources Development Bank was established by the major trading banks with the support of the Reserve Bank of Australia and commenced operations in February 1968. For further information on these banks *see* pages 512-13.

### **Current legislation**

Operations of banks and banking in Australia are currently governed by (i) Commonwealth legislation enacted in 1959 in respect of banking other than State banking, and (ii) State legislation relating to the incorporation of banks and management of State banks.

#### *Commonwealth banking legislation*

(a) The *Banking Act* 1959-1967 applies to all banks operating in Australia including the external Territories of the Commonwealth except State banks trading in their own State. The objects of the Act are: (i) to provide a legal framework uniform throughout Australia for regulating the banking system; (ii) to safeguard depositors of the banks from loss; (iii) to provide for the co-ordination of banking policy under the direction of the Reserve Bank; (iv) to control the volume of credit in circulation and bank interest rates; (v) to mobilise and to provide machinery for the control of the foreign exchange and gold resources of the Australian economy. A summary of the main provisions of the *Banking Act* 1959 is given in Year Book No. 46, pages 759-60.

(b) The *Reserve Bank Act* 1959-1966 provides for the constitution and management of the Reserve Bank of Australia and the management of the Australian note issue

(c) The *Commonwealth Banks Act* 1959-1968 provides for the constitution and management of the Commonwealth Banking Corporation, Commonwealth Trading Bank of Australia, Commonwealth Savings Bank of Australia, and Commonwealth Development Bank of Australia.

The Commonwealth Banking Corporation is the controlling body for the Commonwealth Trading Bank, Commonwealth Savings Bank and Commonwealth Development Bank. Under the *Banking Act* 1959-1967 the Corporation and its constituent banks are subject to the same central banking controls as are the private trading banks.

#### *State Banking legislation*

The State Acts under which the various banks are incorporated differ. While some of the older banks were incorporated by special Act or Charter, e.g. the Bank of New South Wales by Act of Council 1817, the Bank of Adelaide by Act of the South Australian Parliament, and the Bank of New Zealand by Act of the General Assembly of New Zealand, most of the banks are incorporated under a companies Act of the States or the United Kingdom. This is also the case with those banks which were reconstructed after the financial crisis of 1893. State banks, constituted under State Acts, transacting general banking business are The Rural Bank of New South Wales, the State Bank of South Australia, and the Rural and Industries Bank of Western Australia. State savings banks, constituted under State Acts, transacting savings bank business are The State Savings Bank of Victoria, The Savings Bank of South Australia and the Savings Bank Division of the Rural and Industries Bank of Western Australia.

## Reserve Bank of Australia

The Reserve Bank of Australia preserved and continued in existence the original corporate body known as the Commonwealth Bank of Australia under the new name Reserve Bank of Australia. An account of the progress and development of that bank is given in earlier issues of the Year Book (see No. 37, pages 570-2, and No. 45, pages 735-7).

The general functions of the Reserve Bank are set out in Section 10 of the *Reserve Bank Act* 1959-1966, which states:

'It is the duty of the Board, within the limits of its powers, to ensure that the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia and that the powers of the Bank under this Act, the *Banking Act* 1959, and regulations under that Act are exercised in such a manner as, in the opinion of the Board, will best contribute to,

(a) the stability of the currency of Australia; (b) the maintenance of full employment in Australia; and (c) the economic prosperity and welfare of the people of Australia.'

In addition to its functions as a central bank, the Bank controls the Australian note issue through a Note Issue Department, provides special banking facilities through the Rural Credits Department, and acts as banker to the Commonwealth and some of the States.

### Management

The policy of the Reserve Bank is determined by a Board consisting of the Governor (Chairman) the Deputy Governor, the Secretary to the Treasury, and seven other members appointed by the Governor-General. The Bank is managed by the Governor, who acts in accordance with the policy of the Board and with any directions of the Board. The Bank is required to inform the Government of the monetary and banking policy of the Board. In the event of a disagreement between the Government and the Board as to whether the monetary and banking policy of the Bank is directed to the greatest advantage of the people of Australia, the Governor-General, acting with the advice of the Executive Council, may determine the policy to be adopted by the Bank.

### Central banking business

Under the *Commonwealth Bank Act* 1911-1943 and the war-time powers conferred by the National Security Regulations the Commonwealth Bank gradually assumed the functions of a Central Bank. Part III of the *Commonwealth Bank Act* 1945 formally constituted the Bank as a Central Bank and granted the necessary powers to carry on the business of a Central Bank, these powers being carried through into the present Act constituting the Reserve Bank. Under the provisions of the *Reserve Bank Act* 1959-1966 the capital for the Central Banking Business is the capital of the Commonwealth Bank for Central Banking purposes immediately prior to 14 January 1960, and such other sums as are transferred from the Reserve Bank Reserve Fund. The profits of the Bank are distributed as follows: (a) such sums as the Treasurer, after consultation with the Bank, determines shall be placed to the credit of the Reserve Bank Reserve Fund and (b) the remainder shall be paid to the Commonwealth.

### Note Issue Department

The Note Issue Department, established in 1920 when the control of the Australian note issue was transferred from the Commonwealth Treasury to the Commonwealth Bank, was maintained in the same form under the *Reserve Bank Act* 1959. The Reserve Bank may, through this Department, issue, re-issue and cancel Australian notes. Under the *Reserve Bank Act* 1959-1966 the profits of the Note Issue Department are paid to the Commonwealth.

### Rural Credits Department

The Rural Credits Department, established in 1925 for the purpose of making short-term credit available for the orderly marketing of primary produce, was continued in the same form under the *Reserve Bank Act* 1959. The Reserve Bank may, through this Department, make advances upon the security of primary produce placed under the legal control of the Bank, or other security associated with the production or marketing of primary produce, to co-operative associations or marketing boards formed under the laws of the Commonwealth or a State or Territory of the Commonwealth or other bodies specified by proclamation. The period of the advance shall not exceed one year. Under the provisions of the *Reserve Bank Act* 1959-1966 the capital of the Rural Credits Department is the capital of the Rural Credits Department of the Commonwealth Bank immediately prior to 14 January 1960, and \$4,000,000 provided by the Reserve Bank. The profits of the Rural Credits Department are dealt with as follows: (a) one-half to the credit of the Rural Credits Department Reserve Fund and (b) one-half to the credit of the Rural Credits Development Fund.

### Trading banks

Balance sheet information contained in the table on page 503 and profit and loss account information contained in the table at the top of page 504 for the years 1968 to 1972 does not relate to uniform accounting periods but rather to the financial years of the banks which ended in the years shown. For balance dates of individual banks see annual bulletin *Banking and Currency* (5.1).

Figures shown for averages of liabilities and assets in the table on page 504 are the average of liabilities and assets within Australia (including Papua New Guinea and other External Territories) of the banks on the weekly balance days (Wednesdays) during the period concerned. In the table on page 505 figures shown for debits to customers' accounts are the average of debits for the weeks ending on the weekly balance days (Wednesdays) during the period concerned. In the table on page 506 figures shown for new and increased lending commitments are the averages of weekly commitments for the six months ending on the second Wednesday of the last month in the period under review.

In the classification of bank advances, borrowers are classified into two main groups.

*Resident borrowers* comprising all institutions (including branches of overseas institutions) engaged in business in Australia and individuals permanently residing in Australia, and

*Non-resident borrowers* comprising all other persons and institutions, including companies incorporated abroad, which, although represented, do not carry on business in Australia.

Advances to resident borrowers are classified into.

*Business advances* which are advances to partnerships, companies and other institutions engaged in business in Australia, advances to individuals actively engaged in business or a profession on their own behalf if the advances are mainly for purposes of that business or profession, and advances to mutual, co-operative and benefit societies which distribute their profits to members by way of dividends, rebates of charges for goods and services, or increased benefits.

Separate figures are shown for business advances to companies and to other (unincorporated) businesses and advances are also classified to the main industry of borrower.

*Advances to public authorities* which are advances to local and semi-government authorities including separately constituted government business undertakings but not Commonwealth and State governments.

*Personal advances* which are advances to individuals for purposes other than carrying on a business or profession.

*Advances to non-profit organisations* which are advances to organisations which are not operated for the purpose of making a profit or gain to individual members, but for the purposes of the organisations or for the benefit of the community in general.

The classification used for overdraft limits is the same as that used for the classification of bank advances (see above) while abridged versions of this classification are used for bank deposits and new and increased lending commitments.

## Interest rates

At 30 June 1972 the maximum rate of interest paid by trading banks for the following terms were: (i) on fixed deposits of less than \$50,000, 3 months and less than 12 months—4.30 per cent, 12 months and less than 2 years—4.50 per cent, 2 years and less than 4 years—5.00 per cent, 4 years—5.50 per cent; (ii) on fixed deposits of \$50,000 and over, 30 days to 4 years—6.50 per cent; (iii) on certificates of deposit (\$50,000 and over), 3 months to 24 months—6.50 per cent. The maximum rate of interest charged on overdrafts was 7.75 per cent and the maximum flat rate on unsecured personal loans was 6.25 per cent.

## Branches and agencies

At 30 June 1972 the major trading banks operated 4,485 branches, and the other trading banks 290 branches. Of the total of 4,775 branches, 2,349 were located in 'metropolitan areas'. Trading bank facilities were also available at 1,397 agencies throughout Australia at 30 June 1972.

## Liabilities and assets

## TRADING BANKS(a): LIABILITIES AND ASSETS(b), 1968 TO 1972

(\$ million)

## Savings banks

For information on the origin of savings banks in Australia, see Year Book No. 50, page 854, and earlier issues.

All savings banks, including trustee savings banks, but not State savings banks, are subject to the *Banking Act* 1959-1967. Details of this Act and the special provisions applying to savings banks are given in Year Book No. 46, pages 759-60.

In the tables on pages 509-10 balance sheet and profit and loss account information for the years 1968 to 1972 does not relate to a uniform accounting period but rather to the financial years of the banks which ended in the years shown. For balance dates of individual savings banks see annual bulletin *Banking and Currency* (5.1).

The number of operative accounts excludes school bank accounts and small inoperative accounts. The other sections of the tables relating to depositors' balances, etc., include school bank accounts, small inoperative accounts, investment accounts, deposit stock and non-interest bearing cheque accounts at the State Savings Bank of Victoria and the Savings Bank of South Australia, and fixed deposit accounts and non-interest bearing cheque accounts at the trustee savings banks in Tasmania.

At 30 June 1972 all savings banks were paying interest on deposits at rates of up to 5.00 per cent. For accounts other than friendly and other societies the maximum interest bearing amount in any one account was \$20,000. There is no limit on the maximum interest bearing amount for society cheque accounts. Interest rates charged on loans made by the savings banks were: housing loans—up to 7.00 per cent; other loans—up to 7.75 per cent.

At 30 June 1972 savings banks operated 5,448 branches, 2,825 of these being in the 'metropolitan area'. Savings bank facilities were also available at 15,049 agencies throughout Australia.

## Development banks

### Commonwealth Development Bank of Australia

The Commonwealth Development Bank of Australia was established by the *Commonwealth Banks Act* 1959 and commenced operations on 14 January 1960. It was formed basically from an amalgamation of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank. Under the Act the Bank is authorised to provide assistance for the development of worthwhile enterprises in the fields of primary and secondary industries, which would otherwise be unable to obtain the necessary finance on reasonable and suitable terms and conditions. The Commonwealth Development Bank is managed by a General Manager under the Managing Director of the Commonwealth Banking Corporation and its policy is determined by the Board of that Corporation. The capital of the Development Bank consists of the capital of the Mortgage Bank and Industrial Finance Departments of the Commonwealth Bank immediately prior to 14 January 1960, \$10 million provided by the Reserve Bank, \$20 million appropriated from the Consolidated Revenue Fund in 1961-62 by the *Commonwealth Banks Act* 1961 and the *Commonwealth Banks Act* 1962, \$10 million appropriated in 1963-64 by the *Commonwealth Banks Act* 1963, and such other sums as are provided from the Commonwealth Development Bank Reserve Fund. The net profits of the Bank are paid to the Commonwealth Development Bank Reserve Fund, which at 30 June 1972 stood at \$32.5 million. Net profits in 1970-71 and 1971-72 amounted to \$1.8 million and \$1.5 million respectively.

### Australian Resources Development Bank Limited

The Australian Resources Development Bank Limited was established in 1967 with equity capital of \$3 million subscribed by the major trading banks. It was given the status of a bank by the *Banking Act* 1967 and opened for business on 29 March 1968. The main object of the Australian Resources Development Bank is to assist Australian enterprises to participate more fully in the development of Australia's natural resources. It provides finance to enterprises engaged in major developmental projects by direct loans, investing in equity capital or by refinancing loans made by trading banks acting individually or as a group. The Australian Resources Development Bank obtains funds by accepting deposits and by borrowing on the Australian and overseas capital markets.

## INSURANCE

### Legislation

Section 51 of the Commonwealth Constitution confers the necessary powers on the Commonwealth Parliament to legislate with respect to 'insurance other than State insurance; also State insurance extending beyond the limits of the State concerned'. Commonwealth legislation includes the *Marine Insurance Act* 1909–1966 defining the limits of marine insurance and regulating the terms of contracts, etc., the *Insurance Act* 1932–1966 requiring the lodgment of deposits by insurance companies, and the *Life Insurance Act* 1945–1965 generally regulating life insurance business in Australia. The *Marine Insurance Act* 1909–1966 and the *Insurance Act* 1932–1966 have limited application, and except for life insurance business, which is regulated by the *Life Insurance Act* 1945–1965, insurance business is conducted almost entirely under State laws.

### Insurance Act 1932–1966

Companies, persons or associations of persons carrying on insurance business in Australia or in any Territory of Australia are required to lodge a deposit with the Commonwealth Treasurer. Money deposited is invested by the Treasurer in prescribed securities selected by the depositor and all interest is paid to depositors. Deposits remain as security against liability to policy holders and are available to satisfy judgments obtained in respect of policies. Deposits held by States on 1 February 1932 could, however, remain with the States subject to the conditions embodied in the laws of the States, and depositors to the extent of the value of these deposits were exempt from liability to make deposits under the Commonwealth Act.

The following are not regarded as insurance business under the Act: staff superannuation schemes; schemes of religious organisations solely for insurance of their property; friendly society, union and association schemes involving superannuation or insurance benefits to employees.

This Act does not apply to State insurance within the limits of the State concerned, and under the *Life Insurance Act* 1945–1965 ceased to apply to life insurance business.

### Life Insurance Act 1945–1965

The objects of this Act are: (a) to replace all State legislation on the subject of life insurance, except that relating to the life insurance operations of State Government insurance offices within the State concerned, and to provide uniform legislation for the whole of Australia; (b) to appoint an Insurance Commissioner to exercise active supervision of the activities of life insurance companies, with a view to securing the greatest possible protection for policy holders; (c) to set up adequate

machinery for dealing with any company that fails to maintain a required minimum standard of solvency. The Act came into operation on 20 June 1946. A summary of the provisions of the Act is given in Year Book No. 37, pages 595-7. The Insurance Commissioner issues an annual report which contains detailed information on the operations of life insurance companies.

### Deposits under Insurance Acts

Deposits lodged under the Insurance Acts at 30 June 1972 totalled \$40.6 million, comprising \$4.9 million held by the Commonwealth in respect of life insurance, and \$35.7 million held by the Commonwealth in respect of other forms of insurance. The deposits consisted of Commonwealth Government securities \$24.6 million, United Kingdom Government securities \$2.0 million, fixed deposits \$1.1 million, bank guarantees and undertakings \$9.9 million, corporation debentures and stock \$0.8 million, titles and mortgages \$2.0 million, and other securities \$0.2 million.

### Life insurance

Since 1947, returns lodged under the *Life Insurance Act 1945-1965* have been used to compile life insurance statistics. The statistics included in the following tables relate to the Australian and overseas business of companies with head offices in Australia together with the Australian business of companies with head offices overseas. Unless otherwise stated, life insurance business in Australia excludes life insurance business in Papua New Guinea. The information shown has been compiled from returns of life insurance business submitted in the financial years which ended during the year stated.

### Offices transacting business

The number of companies which transacted life insurance business in Australia during 1971 was 48. Of these, 35 were companies incorporated outside Australia or were subsidiaries of such companies. Nine companies, including 4 incorporated outside Australia, were mutual companies. All companies conducted ordinary business and 46 conducted superannuation business. Industrial business was conducted by 11 companies, all of which also conducted superannuation business. In addition two State Government institutions conduct life insurance business only in their own State.

(c) State or Territory of location of mortgage, registration of policy or residence of borrower. (d) Includes Papua New Guinea. (e) Includes Northern Territory.

### Fire, marine and general insurance

The following statistics, which are in respect of the Australian business of companies operating in Australia and State Government insurance offices, conform to the following definitions and should be interpreted accordingly.

- (a) *Premiums* represent the full amount receivable in respect of policies issued or renewed in the year, less returns, rebates and bonuses paid or credited to policy-holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from 'earned premium income' appropriate to the year. In recent years, as the volume of premiums receivable has been increasing, the figures shown in the tables are greater than the premiums earned by insurers.
- (b) *Claims* comprise payments made during the year, plus the estimated amount of outstanding claims at the end of the year, less the estimated amount of outstanding claims at the beginning of the year. Salvage and other amounts recoverable have been deducted.
- (c) *Contributions to fire brigades, commission and agents' charges, and expenses of management* are mainly charges paid during the year.
- (d) *Taxation* is mainly payments made during the year, and includes income tax, pay-roll tax, licence fees, stamp duty (where paid by the company), etc. Income tax paid during the year is based on the income of earlier years.

The figures relate to selected items of statistics and are not construable as 'Profit and Loss' statements or 'Revenue Accounts'.

During 1971-72 revenue from premiums amounted to \$1,005.1 million, and that from net interest on investments, etc., to \$71.2 million, a total of \$1,076.4 million. Expenditure on claims amounted to \$648.5 million, contributions to fire brigades \$26.1 million, commission and agents' charges \$85.0 million, expenses of management \$167.4 million, and taxation \$27.9 million, a total of \$954.8 million.

### PENSION AND SUPERANNUATION SCHEMES

#### Government, local government and semi-government pension and superannuation schemes

The Commonwealth and all State Governments have established pension and superannuation schemes for their employees. These schemes are operated through funds to which both the Governments and their employees make contributions. Employees of local government and semi-government authorities are covered either by the Commonwealth and State Government schemes or by a separate scheme of the authority which is operated either through a separately constituted fund or through a life insurance office.

## Schemes operated through separately constituted funds

(a) Operating in all States except South Australia.

### Private superannuation, pension and retiring allowance schemes

In 1955-56, 1960-61, 1961-62 and 1962-63 the Bureau conducted sample surveys of pension and retiring allowance schemes in private businesses subject to pay-roll tax, other than in rural industries, private domestic service, and certain businesses such as accountants, trade associations, consultant engineers, etc. Commonwealth Government airlines and banks were included where they had established their own funds separately from the Commonwealth superannuation funds, but statutory coal miners' pension funds were excluded. Details were asked for three types of pension and retiring allowance schemes. They were (a) schemes operated through life insurance offices, (b) schemes operated through separately constituted funds, and (c) direct payments of pensions and retiring allowances.

The results of the 1955-56 survey are available in *Finance Bulletin No. 47, Part I—Public and Private Finance*, and the 1960-61, 1961-62 and 1962-63 survey results were published in *Insurance and Other Private Finance, Bulletin No. 2 and Year Book No. 51* (pages 898-900).

For the years 1956-57 to 1958-59, 1963-64 and 1964-65, information was collected from a small number of the larger separately constituted funds. Although only a small number of funds was included in these collections they accounted, in 1962-63, for about 27 per cent of the income, 28 per cent of the expenditure and about 34 per cent of the total assets of the separately constituted funds covered by the more comprehensive sample survey conducted for 1962-63.

Information for these selected funds for the years 1955-56, 1960-61, 1961-62 and 1962-63 was extracted from the returns obtained in the sample surveys conducted for those years and results of the survey for 1964-65, together with comparative figures for previous years, were published in April 1966 in a mimeographed bulletin.

In order to improve the coverage of the published statistics of private pension funds, returns were collected from some additional funds for 1964-65 and tabulated with the returns from the survey for 1964-65 referred to above. The separately constituted private pension funds included in the enlarged 1964-65 survey together accounted, in 1962-63, for about 72 per cent of the total contributions, 71 per cent of the income, 68 per cent of the expenditure and 77 per cent of the assets of the separately constituted funds covered by the more comprehensive sample survey conducted for 1962-63. The results of the enlarged 1964-65 survey were published in September 1966 in a mimeographed bulletin.

Further surveys, relating to the same funds that were included in the enlarged 1964-65 survey, of selected private pension funds, have been made in respect of each year from 1965-66 to 1971-72 inclusive. Since the *Survey of Selected Private Pension Funds* for 1971-72 is not a representative sample it is not known to what extent their share of the whole field has changed since the 1962-63 survey; nor is the pattern of income, expenditure and asset distribution of the large funds included in this survey necessarily representative of the whole field.

The statistics do not relate to uniform accounting periods but to the financial years of the funds which ended in the years shown.

**FINANCE COMPANIES**

Information relating to the lending operations of finance companies in Australia is given in the following tables. A comprehensive account of the scope of these statistics and fuller details of the transactions of finance companies, together with definitions of the various categories of finance agreements and of the items of data given in the tables, are provided in the bulletin *Finance Companies Transactions 1971-72* (5.13) and in the monthly statements *Finance Companies* (5.14). For the purposes of these statistics, finance companies are defined as companies which are engaged mainly in providing to the general public (businesses as well as persons in their private capacity) credit facilities of the following types: hire purchase and other instalment credit for retail sales, wholesale hire purchase, other consumer and commercial loans, and factoring. The finance companies covered in these statistics, insofar as they provide instalment credit for retail sales, are also included in the statistics of Instalment Credit for Retail Sales (see pages 530-1).

In general, companies which are engaged both in financing activities and other activities come within the scope of these statistics, provided that the major portion of their assets consists of financial assets of the types listed above and/or a major proportion of their income is derived from such assets. Companies are excluded if the major proportion of their balances outstanding consists of agreements written for the purpose of financing their own sales. Companies which are engaged mainly in financing, in any way, the operations of related companies ('related' as defined in the Companies Act) are also excluded from these statistics, as are unincorporated finance companies. Also excluded are the following classes of financial and quasi-financial institutions: banks; life insurance companies; fire, marine and general insurance companies; short-term money market dealers; pastoral finance companies; investment companies; unit trusts; land trusts; mutual funds and management companies for the foregoing trusts and funds; pension and superannuation funds; building and friendly societies; credit unions.

As from July 1971 the scope of the monthly collection has been altered to exclude all finance companies whose balances outstanding, on an Australia-wide basis, were less than \$500,000. Prior to July 1971 finance companies with balances outstanding of less than \$100,000 were excluded. Finance companies newly excluded from the collection as from July 1971 had, as at 30 June 1971, balances outstanding of less than \$57 million on the types of agreements mentioned above and \$0.7 million on leasing agreements. They had no transactions in bills of exchange.

## INSTALMENT CREDIT FOR RETAIL SALES

Information relating to instalment credit for retail sales in Australia is given in the following tables. More detailed information may be found in the annual bulletin *Insurance and Other Private Finance* and in the monthly and quarterly statements relating to instalment credit for retail sales issued by this Bureau (*see* beginning of chapter).

The statistics cover operations of all types of instalment credit schemes which relate primarily to the financing of retail sales of goods, whether the credit is advanced by a retail business or by a non-retail finance business. In general, the term 'instalment credit' is defined as relating to schemes in which repayment is made by regular pre-determined instalments. Types of schemes covered include hire purchase, time payment, budget account, and personal loan schemes which relate primarily to the financing of retail sales of goods. In these statistics the term 'retail sales' relates not only to retail sales by retail establishments coming within the scope of the Censuses of Retail Establishments conducted periodically by this Bureau, but includes also other sales of goods to final purchasers (e.g. plant and machinery).

Figures for amounts financed *exclude* interest, hiring charges, insurance, etc. Figures for balances outstanding and collections *include* interest, hiring charges, insurance, etc. Details are not available of these charges or of other items (e.g. rebates allowed for early payments, late payment charges, bad debts written off) which affect the reconciliation of the three main instalment credit series—amount financed, collections, and balances outstanding.

Statistics of amounts financed are classified by type of goods, defined as follows: *motor vehicles* (new and used separately)—motor cars and motor cycles, commercial vehicles, tractors, caravans, trailers, motor parts and accessories, etc.; *plant and machinery*—farm machinery and implements, earth-moving equipment, aircraft, industrial plant and machinery, business machines and equipment (including commercial refrigeration equipment), etc.; *household and personal goods*—furniture, furnishings and floor coverings, domestic refrigerators, electrical goods, radios, television, musical instruments, bicycles, motor mowers, clothing, etc.

(a) Compiled from returns supplied to the Reserve Bank by major pastoral finance companies. (b) Excludes Commonwealth Government securities.

## RURAL DEBT

Major sources of credit for rural purposes include banks, Commonwealth and State government, financial agencies, pastoral finance companies, and life insurance companies. The following table shows the estimated rural debt to these lenders.

## ESTIMATED RURAL DEBT TO SPECIFIED LENDERS, 30 JUNE 1968 TO 1972

(Source: Reserve Bank of Australia)

(\$ million)

Lender	30 June—

Commonwealth Development Bank	143	162	176	192	202
Life insurance companies . . .	97	113	128	129	132
<b>Total . . . . .</b>	<b>1,857</b>	<b>1,952</b>	<b>2,082</b>	<b>2,104</b>	<b>2,098</b>

(a) Reserve Bank estimate.

In addition, credit is supplied to the rural sector by finance companies, merchants, co-operative producer organisations, and by private lenders and investors, the most noteworthy of these last-mentioned sources involving family arrangements and property vendors. No data are currently available on the extent of the outstanding debt by the rural sector to these sources.

## NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

Information relating to capital raised by companies in Australia is given in the following tables. More detailed information may be found in the annual bulletin *Insurance and Other Private Finance* and in quarterly bulletins dealing with capital raisings (see beginning of chapter).

The statistics relate to capital raised by companies through issues of shares, and in the case of companies listed on stock exchanges, through the issue of debentures, notes and similar securities and the acceptance of deposits, and in the case of unlisted companies, by way of loans secured over the entire assets of the company. Capital obtained by way of bank overdraft or bank loans, trade credit, temporary advances, and loans secured over part only of the assets of the company is not included. Totally unsecured loans are included in the case of listed companies, but are excluded in the case of unlisted companies.

Separate statistics are given for listed and unlisted companies. Listed companies are companies incorporated in Australia or Papua New Guinea and listed on one or more of the Australian stock exchanges. All other companies incorporated in Australia (excluding its overseas territories), including subsidiaries of listed companies, are classified as unlisted companies. Companies incorporated overseas, whether listed on an Australian stock exchange or not, are excluded from the statistics of share issues. However, subsidiaries of overseas companies, if incorporated in Australia, are included in the statistics of share issues. The statistics of new capital raised through issues of debentures, notes, etc., and the acceptance of deposits, include, in addition to capital raised by companies incorporated in Australia (including subsidiaries of overseas companies), capital raised in this way from Australian sources by overseas public companies through their Australian offices. Where an issue is made at the same time on Australian and overseas markets, that part of the issue which is taken up through overseas brokers is excluded.

The following are explanatory notes relating to some of the items shown in the tables.

## New money

This is the net amount of cash transferred from the 'investing public' to the 'company sector'. For this purpose the 'investing public' is defined to include all non-company subscribers, Australian life insurance companies and Australian government and private superannuation funds. Subscriptions

by overseas banks, overseas life insurance companies and overseas superannuation funds, are excluded. In practice, it is necessary to include in 'new money', most subscriptions by companies holding less than five per cent of the ordinary shares of an issuing company as it is not practicable to separately identify all such subscriptions. However, where large subscriptions by companies holding less than five per cent of the ordinary shares in the issuing company are identified they are not included in 'new money'.

*Amount not involving new money.* This amount includes cash subscriptions received by issuing companies from associated companies. Such subscriptions represent inter-company transfers only, and do not involve a receipt of funds from the 'investing public'. Also included are amounts which, although subscribed by the 'investing public' (i.e. subscribers other than 'associated companies'), are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies. The funds used in this way are thus returned to another section of the 'investing public' and do not represent a *net* transfer of cash from the 'investing public' to the companies. (Besides these purchases of existing shares, etc., from individuals, purchases of existing shares, etc., from companies other than associates of the issuing company might also be included in this item, but the amounts involved are small and separate details have not been collected.) In the tables which follow, the 'amount not involving new money' is obtained by deducting from the total cash raised the amount of 'new money'.

**LISTED COMPANIES: NEW CAPITAL RAISED THROUGH ISSUES OF SHARES  
DEBENTURES, OR REGISTERED NOTES, ETC (a), OR ACCEPTING  
DEPOSITS(b), 1967-68 TO 1971-72**  
(\$ million)

(a) Includes preference shares. (b) Excludes deposits accepted by banks, insurance companies, pastoral companies and building societies, and loans to authorised dealers in the short-term money market. (c) Includes only loans which are secured by charges over the companies' entire assets. (d) Excess of repayments over receipts of new money. (e) Up to 1969-70, the industry figures for unlisted companies exclude share issues with a nominal value of \$2,000 or less, but such issues are included in the All Industries figures. From 1970-71 the industry figures for unlisted companies exclude issues with a nominal value of \$10,000 or less, and issues with a nominal value of \$200 or less are excluded from the All Industries figures.

## SHORT-TERM MONEY MARKET

For some years prior to 1959 leading stockbrokers had been actively engaged in the acceptance of short-term funds against the security of government securities, but their operations were limited by the absence of suitable short-term securities and their liquidity requirements. In February 1959 the Commonwealth Bank (now the Reserve Bank) gave official status to the market by announcing that under certain conditions it would act as lender of last resort to authorised dealers in the short-term money market.

The form of organisation consists of nine companies whose functions are:

- (i) to accept loans overnight, at call or for fixed periods, in minimum amounts of \$50,000 and to invest these funds in money market securities.
- (ii) to engage as traders in the buying and selling of money market securities.

The types of securities that may be used as money market securities are subject to the approval of the Reserve Bank. At present they comprise Commonwealth Government securities maturing within five years, commercial bills of any maturity that have been accepted or endorsed by a trading bank, banks' certificates of deposit maturing within five years, and non-bank commercial bills maturing within 180 days.

Dealers are required to have a minimum paid-up capital of \$400,000 and there is a limit on the maximum ratio of loans to shareholders' funds.

Under the lender of last resort arrangements dealers may borrow from the Reserve Bank for a minimum of seven days and at a high rate of interest against the lodgment of Commonwealth Government securities.

(a) At various balance dates within the financial year shown. (b) Includes advances on mortgages of terminating societies which are mainly on a gross basis. Net advances may be derived by subtracting 'Borrowing members' funds'.

## Permanent building societies

The following statistics summarise information obtained from a monthly collection introduced in May 1969 and relate to the operations of permanent building societies in all States and the Australian Capital Territory and the Northern Territory.

PERMANENT BUILDING SOCIETIES: 1968-69 TO 1971-72  
(\$'000)

	<i>Loans approved during year(a)</i>	<i>Loans advanced during year(b)</i>	<i>Loans approved but not advanced at end of year(c)</i>	<i>Principal owing on mortgages at end of year</i>	<i>Paid-up share-capital at end of year</i>	<i>Borrowings by societies—amount owing at end of year(d)</i>
1968-69 . . .	n.a.	n.a.	75,940	706,966	553,650	221,971
1969-70 . . .	379,051	375,535	58,354	993,539	799,470	277,659
1970-71 . . .	428,628	368,733	100,285	1,246,167	1,120,150	322,627
1971-72 . . .	689,323	616,349	150,421	1,702,549	1,624,697	414,223

(a) Includes loans approved for flats and home units, supplementary loans approved to complete the original purchase or construction of a house, flat or home unit and second mortgage loans approved. (b) Includes capitalised mortgage insurance premiums and other capitalised charges. (c) Excludes cancellations of loan approvals. (d) Includes deposits with societies, advances under Commonwealth and State Housing Agreements but excludes unsecured borrowings from banks.

## FRIENDLY SOCIETIES AND CO-OPERATIVE SOCIETIES

## Friendly societies

In 1971 the total membership of friendly societies in Australia was about 435,000, but as certain benefits such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must be more than doubled to arrive at an estimate of the number of persons who receive some direct benefit from these societies, even when due allowances are made for young and unmarried members. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its proposed rules conform to the law, and that the scale of contribution is sufficient to provide the promised benefits. Societies are obliged to forward to the Registrar annual returns about their membership and their finances, and reports dealing with the returns received are published in most of the States.

## FRIENDLY SOCIETIES(a): SUMMARY, STATES, 1970-71

(a) Excludes juvenile branches, dispensaries, medical institutes, and certain miscellaneous societies. Receipts and payments of subsidy under the Commonwealth medical and hospital benefit schemes are excluded. (b) Includes the Australian Capital Territory. (c) Year ended 31 December 1971.

## Co-operative societies

Co-operative societies are divided into three classes: (i) those engaged in the manufacture and marketing of primary products and trade requirements; (ii) those engaged in retailing general household requirements; and (iii) those engaged in activities covered by both classes (i) and (ii). The first class may be described briefly as producers' co-operative societies and the second as consumers' co-operative societies. The particulars given for New South Wales relate to societies registered under the Co-operation Act, 1923-1967. A summary of the business of all co-operative societies for the year 1970-71 for all States is given in the following table. Separate particulars for each of the three types of co-operative societies are given in the annual bulletin *Insurance and Other Private Finance*, and issue No. 7, 1969-70, contains details for 1967-68 and 1968-69.

# LOTTERIES AND BETTING

## Lotteries

The State Governments of New South Wales, Queensland, South Australia and Western Australia operate lotteries in their own States. Tattersall Sweep Consultations are operated under government licence in Victoria and also sell tickets under government licence in Tasmania and New Zealand. Tickets for any of these lotteries may also be sold in the Northern Territory and the Australian Capital Territory. The statistics of sales of tickets and prizes include the sales and allotments of prizes in New Zealand, Tasmania, the Northern Territory and the Australian Capital Territory. In general, revenue derived by the State Governments from these lotteries is used directly or indirectly to provide funds for expenditure on hospitals, charities, etc.

## AUSTRALIAN INDUSTRY DEVELOPMENT CORPORATION

The Australian Industry Development Corporation was established by the *Australian Industry Development Corporation Act* 1970 and commenced operations on 1 February 1971. Within the objectives and broad policy guidelines defined in the Act the Corporation operates as an independent commercial enterprise governed by its own Board of Directors.

The Corporation has a capital of \$100 million, to be subscribed by the Australian Government in instalments but the whole being available if required to meet obligations. The paid-up capital at 30 June 1973 was \$50 million.

The central objectives of the Corporation are to promote the development of industries in Australia and support local participation in the ownership and control of industries and resources. Consistent with these objectives and the principle that A.I.D.C. must operate on a commercial basis and assist only in ventures which can demonstrate sound prospects, the Corporation provides finance, obtained principally by overseas borrowings, for essentially Australian-owned firms (including local firms with foreign partners) engaged in new development or expansion in the manufacturing, processing and mining industries.

The Corporation's financial participation in a venture is governed by the prevailing terms and conditions under which it can itself obtain loan finance. The capital of the Corporation is provided as a base for its borrowings and is not directly used for assistance to industry projects.

The Corporation participates in the financing of a development only at the invitation of the enterprise concerned and in the manner dictated by the needs of the project. Its assistance may be given in a variety of ways, such as loan investments or guarantees, or by temporarily taking a minority equity position.

As at 30 June 1973, the end of A.I.D.C.'s second year of operations, the Corporation had undertaken financial commitments totalling \$114 million in respect of 60 industry development ventures.

## CHAPTER 18

### PUBLIC FINANCE

This chapter deals with the financial activities of the organisations which make up the three levels of government in the Australian political system—Commonwealth, State and Local—and which collectively constitute the public sector. The chapter is organised into seven main groupings of topics. An account is given of the activities of each level of government, with particular emphasis being given to Commonwealth authorities. Tables are then presented which bring together the transactions of all public authorities to highlight the role of the public sector as a whole in the Australian economy. Then follows a section on government borrowing activities at all levels; and a section which looks at some major groups of State authorities that have been created to provide specific services, such as roads, water supply, etc.

For further detailed information on the subjects covered by this chapter see the annual bulletins published by this Bureau: *Australian National Accounts—National Income and Expenditure* (7.1); *Public Authority Finance—Commonwealth Authorities* (5.12); and *Commonwealth Taxation Assessments* (5.29). Additional information may be found in *Public Authority Finance* (5.33), and in the mimeographed bulletins *Public Authority Finance—State and Local Authorities* (5.43) and *Public Authority Finance—Taxation* (5.30). Current information in summarised form is given in *Quarterly Estimates of National Income and Expenditure* (7.5), and is also contained in *Quarterly Summary of Australian Statistics* (1.3), the *Monthly Review of Business Statistics* (1.4), and the *Monthly Digest of Current Economic Statistics* (1.5).

Additional details of the transactions of public authorities engaged in particular fields of activity, such as defence, transport and communication, health and welfare, education, etc. may be found in other chapters of this Year Book.

### COMMONWEALTH FINANCE

#### Financial provisions of the Constitution

The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are contained in Sections 81 to 105A of the Commonwealth Constitution (see pages 16–19 of this Year Book). Two other sections which have a most important bearing on questions of Commonwealth finance are sections 69 and 51.

Section 69 provides for the transfer from the States to the Commonwealth of certain specified departments, and Section 51, in outlining the powers of the Commonwealth Parliament, implies the transfer or creation of other departments. Sections 87 and 96 deal with the financial relations between the Commonwealth and the States. The full text of the Financial Agreement of 1927 was given in Year Book No. 31, page 21; accounts of this Agreement as affected by subsequent Agreements were included in later issues of the Year Book up to No. 37 (see pages 685–90); details of the main provisions appeared in further issues of the Year Book up to No. 50 (see pages 952–3). Details of current provisions for financial assistance to the States are given on pages 557 to 565.

The *Audit Act* 1901–1969 lays down the procedure which must be followed in accounting for the receipt and disbursement of public funds. The general administration of Commonwealth finances is the responsibility of the Treasurer of the Commonwealth.

### Commonwealth Budget

The Commonwealth Budget records the transactions of those Commonwealth authorities whose receipts and payments are summarised in the statements of Treasury balances. In 1971-72 the change in cash balances was represented by the following—

	\$'000
Cash receipts of the Consolidated Revenue Fund . . . . .	8,688,105
plus cash receipts of Loan Fund . . . . .	1,258,988
plus cash receipts of Trust Fund . . . . .	4,484,173
<i>Total</i> . . . . .	<i>14,431,266</i>
less cash payments from Consolidated Revenue Fund . . . . .	8,688,105
less cash payments from Loan Fund . . . . .	1,258,988
less cash payments from Trust Fund (including increase in investments of the Trust Fund) . . . . .	3,916,504
<i>Total</i> . . . . .	<i>13,863,597</i>
<i>equals increase in cash balances</i> . . . . .	<i>567,669</i>

Revenues from taxation and other sources are paid into the Consolidated Revenue Fund, from which the main expenditures are for defence, social services, payments to the States and general administration. The Trust Fund covers special transactions outside the ordinary operations of departmental expenditures, such as pension funds and moneys held for expenditure by the Commonwealth at some future time. The Loan Fund receives its funds from the sale of Commonwealth securities, and the expenditures from the Fund are made in accordance with the purpose of issue of each loan. The main disbursements from the Loan Fund are to the States by way of distribution of the proceeds of loans raised by the Commonwealth on their behalf and capital assistance grants, the remaining disbursements being mainly for Commonwealth purposes such as defence or war service land settlement.

The receipts and outlay of the Commonwealth Budget for 1972-73 are set out in the table which follows, together with figures for the years 1968-69 to 1971-72. The national accounting presentation of the budget is shown in order to be consistent with other transactions figures given in this chapter.

It should be noted that some transactions undertaken by authorities covered by the Budget are not reflected in the change in cash balances, usually because they are not cash transactions or because a receipt and a payment are offset against each other so that only a net amount is included in published totals. The national accounting presentation of the Budget includes these additional transactions, further details of which may be found in the Appendix to the Supplement to the *Treasury Information Bulletin*, August 1970.

(a) Expenditure on new fixed assets *plus* increase in stocks *less* sales of previously rented houses.  
of previously rented houses.

(b) Excludes sales

### Financing of the Commonwealth deficit

The deficit shown in the last line of the preceding table represents the net excess of Budget outlay over receipts. In other words, the estimated deficit shown for 1972-73 represents the Commonwealth budget sector's 'financing requirements,' and the actual deficits shown for earlier years represents the net outcome of the financing transactions of the budget sub-sector. Most such transactions involve the issue, repurchase, redemption or acquisition of Commonwealth securities, but some involve or are represented by changes in other assets or liabilities of the Commonwealth.

Specifically the deficit is financed as follows.

Net sales of Commonwealth securities (new issues, *less* redemptions, *less* net purchases from Commonwealth balances in the Trust Fund);

*less* net purchases of other investments from Commonwealth balances in the Trust Fund *plus* minor items of indebtedness (such as borrowing by Australian Capital Territory and Northern Territory housing trust accounts)

*less* net additions to cash balances, and funds provided for the International Monetary Fund and the Australian Wheat Board.

The following table summarises the financing transactions of the Commonwealth budget sector for the years 1967-68 to 1971-72. Further details of Commonwealth loan transactions and of government securities on issue on account of the Commonwealth and the States are given in a later section of this Chapter.

### COMMONWEALTH FINANCING TRANSACTIONS, 1967-68 TO 1971-72

### COMMONWEALTH AUTHORITIES

In addition to the group of Commonwealth authorities whose transactions are covered by the Budget (i.e. itemised in the Consolidated Revenue Fund or recorded in a Trust Fund), there are a number of organisations owned or controlled by the Commonwealth whose transactions do not, for the most part, pass through the Public Account. This category consists largely of public enterprises such as the Post Office, Qantas, Trans-Australia Airlines, the Overseas Telecommunications Commission, the Australian Coastal Shipping Commission, the Snowy Mountains Hydro-electric Authority, the Reserve Bank and the Commonwealth Banking Corporation. Public enterprises, it should be noted,

are bodies which aim at covering the bulk of their expenses by revenue either from sales of goods and services (trading enterprises), or by charges for services and net interest receipts (financial enterprises). As well as these enterprises, there are other public authorities which record most of their transactions outside the Public Account but have only minor independent sources of revenue, and are financed almost entirely from funds voted to them each year from the Consolidated Revenue Fund. In order that the national accounting presentation may indicate as completely as possible the direct effect of the budget on demand, appropriations to this group of authorities are treated as final expenditure in the Budget. Authorities in this category include the Australian Broadcasting Commission, Australian National University, National Capital Development Commission, and the Australian Atomic Energy Commission.

The transactions of Commonwealth bodies not covered by the Budget may be brought together and consolidated with the transactions recorded in the Budget to yield figures of the transactions of all Commonwealth authorities. The remaining tables in this section have been prepared on that basis. These tables for all Commonwealth authorities exclude borrowing and the corresponding advances in respect of State works programmes: borrowing by the Commonwealth on behalf of the States is treated as borrowing by the States, and recorded in the table of receipts and outlay of State authorities given in the next section.

PLATE 34

**Summary of receipts and outlay**

The receipts and outlay of all Commonwealth authorities for the five year period ended 1971-72 are given in the following table.

**COMMONWEALTH AUTHORITIES(a): RECEIPTS AND OUTLAY, 1967-68 TO 1971-72**

(a) Excluding financial enterprises.

**Outlay classified by economic type and function**

In the following two tables the outlay of all Commonwealth authorities is shown in terms of a functional classification. The table on this page presents for 1971-72 the outlay under each functional head classified by economic type, highlighting the government's own demand for goods and services and the redistributive effect of its outlays. Current and capital outlay under each functional head are shown for the years 1967-68 to 1971-72 on page 552.

### Main components of outlay

The following tables give further details of the main components of the outlay of Commonwealth authorities, i.e. expenditure on goods and services, cash benefits, subsidies and payments to the States. More detailed information relating to outlay under specific function headings such as defence, education, health and welfare, may be found in the relevant chapters of this Year Book.

#### *Expenditure on goods and services*

Expenditure on goods and services by Commonwealth authorities (i.e. the demand by these authorities for the output of the producing sectors of the economy) consists essentially of purchases of goods and services for current consumption *less* any charges made by the authorities for goods and services which they themselves provide, together with expenditure on the acquisition of new fixed assets and existing assets (net of any sales of assets) and any change in stocks. The following tables show functional dissections of net current expenditure on goods and services and expenditure on new fixed assets for the five years ended 1971-72.

## Cash benefits to persons

Total payments of cash benefits to persons during the years 1967-68 to 1971-72 are shown in the next table. Further information relating to items in this table is given in the appropriate chapter of this Year Book, and figures of cash benefits paid to persons in each State and Territory may be found in *Public Authority Finance: Commonwealth Authorities*.

## Subsidies

The following table shows details of Commonwealth outlay on subsidies and bounties for the years 1967-68 to 1971-72. Other assistance to primary producers is included in, for example, tables relating to cash benefits and payments to the States, and additional information is given in Chapter 22, Rural Industry.

## COMMONWEALTH AUTHORITIES: SUBSIDIES 1967-68 TO 1971-72

(\$'000)

Type of subsidy	1967-68	1968-69	1969-70	1970-71	1971-72
Dairy industry . . . . .	27,000	27,000	27,000	41,500	39,882
Wheat prices stabilisation . . . . .	15,508	42,870	..	29,008	58,357
Phosphate fertilisers . . . . .	23,564	31,665	45,820	40,815	45,795
Oil search . . . . .	11,552	12,333	14,298	9,643	7,572
Nitrogenous fertilisers . . . . .	10,308	11,044	9,876	9,716	9,757
Gold mining industry . . . . .	4,302	1,737	1,812	2,828	1,992
Pyrites . . . . .	..	..	..	568	1,205
Cotton . . . . .	4,027	4,620	3,531	2,973	795
Processed milk products . . . . .	743	638	516	2,729	2,052
Sulphate of ammonia . . . . .	565	430	1,081	538	-2
Vinyl resin . . . . .	12	..	..	..	..
Sulphuric acid . . . . .	1,286	988	740	489	896
Agricultural tractor . . . . .	2,480	2,249	1,757	2,750	3,160
Cellulose acetate flake . . . . .	220	179	276	200	166
Poultry industry assistance . . . . .	10,418	10,920	11,349	12,505	13,420
Urea . . . . .	163	424	496	449	..
Devaluation compensation . . . . .	..	35,627	30,069	21,600	7,227
Book bounty . . . . .	..	..	1,374	3,217	3,181
Industrial and development research grants . . . . .	654	5,300	8,915	16,250	13,000
Ship construction . . . . .	11,605	12,551	18,758	18,646	12,692
Dried vine fruits stabilisation . . . . .	..	..	1,240	1,161	276
Wool marketing—Assistance . . . . .	..	..	..	2,900	4,100
Wool Commission . . . . .	..	..	..	1,040	..
Deficiency payments for wool . . . . .	..	..	..	..	52,802
Northern Territory—					
Coastal shipping service . . . . .	39	24	27	12	36
Petrol prices . . . . .	991	1,316	1,742	2,092	2,165
Railway freight . . . . .	100	113	87	114	80
Superphosphate sea subsidy . . . . .	43	23	50	55	200
Transport of stud stock . . . . .	80	175	245	129	100
Drought relief freight concessions . . . . .	50	2	239	149	210
Air services . . . . .	1,901	1,780	1,800	2,000	1,900
Coastal shipping service—King Island . . . . .	150	141	150	160	143
South American shipping service . . . . .	300	180	157	113	38
Petrol prices stabilisation . . . . .	16,578	17,948	20,625	21,737	23,064
Stevedoring industry . . . . .	6,190	9,053	9,323	12,289	14,892

Export incentive . . . . .	..	..	..	..	(a)50,674
Other . . . . .	400	68	..	10	..
Adjustment to payable basis . . . . .	27,361	-24,346	27,538	1,800	-18,300
<b>Total . . . . .</b>	<b>178,590</b>	<b>207,053</b>	<b>240,892</b>	<b>262,185</b>	<b>356,111</b>

(a) Offset against gross receipts of pay-roll tax prior to 1971-72.

**Grants and advances to the States**

Commonwealth financial assistance to the States takes two main forms: (i) direct financial assistance in the form of grants for general and specific purposes, and (ii) assistance for developmental and other specific purposes in the form of repayable advances. Some information about the more important or most recent of these forms of financial assistance is given on pages 557-65, but for more complete information reference should be made to the Commonwealth Budget paper *Commonwealth Payments to or for the States*. Further information also appears in chapters of this Year Book dealing with the specific function which the payments are designed to serve.

**Grants to the States**

The following tables show details of grants to the States for general and specific purposes. More detailed figures appear in *Public Authority Finance: Commonwealth Authorities*.

**COMMONWEALTH AUTHORITIES: GRANTS TO THE STATES, BY FUNCTION, 1971-72**

**General purposes grants**

*The Financial Assistance Grants.* Details of the financial assistance grants arrangements existing in 1971-72 and prior years are given in earlier issues of the Year Book (see No. 58, page 548). Revised arrangements to apply over the five years 1970-71 to 1974-75 are embodied in the *States Grants Act (No. 2) 1971*.

The financial assistance grants, which are the main general revenue grants to the States, will continue to increase each year in proportion to the increase in average wages in Australia as a whole in the year ending 31 March in the year of payment and to the increase in each States' population in the year ending 31 December in the year of payment and by a further 'betterment factor.' However, this last factor will increase, beginning with the calculation of the 1971-72 grants, from 1.2 per cent to 1.8 per cent. Further grants are provided for over the years 1970-71 to 1974-75 to New South Wales and Victoria (equal to two dollars per head of their population, increasing to \$3.50 in 1972-73) to Queensland (by way of an annual addition of \$2 million to the base on which its grant is calculated) and to Western Australia (the amount being \$9.5 million in 1971-72, \$10.0 million in 1972-73, \$3.5 million in 1973-74 and \$0.4 million in 1974-75). Compensatory grants payable to the States for the loss of receipts duty are subject to increases under the formula. As from 1971-72,

financial assistance grants otherwise payable are to be reduced to offset the transfer of payroll taxation from the Commonwealth to the States. The following table shows details of the calculation of the financial assistance grants for 1971-72.

CALCULATION OF FINANCIAL ASSISTANCE GRANTS FOR 1971-72  
(\$'000)

	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Total</i>
'Base' grants(a) . . . . .	473,588	352,732	221,552	153,932	152,963	65,731	1,420,498
Plus additions under formula(b) . . . . .	72,165	53,197	34,927	22,756	26,275	9,275	218,594
Formula grants . . . . .	545,753	405,929	256,479	176,688	179,238	75,006	1,639,092
Plus additional grants to particular States . . . . .	(c)9,282	(c)7,061	..	..	(d)9,500	..	25,843
Less reduction to offset the transfer of payroll tax(e) . . . . .	92,830	64,525	24,875	18,197	17,778	5,850	224,057
Total financial assistance grants . . . . .	462,204	348,464	231,603	158,491	170,960	69,156	1,440,878

(a) Financial assistance grants paid in 1970-71 under the *States Grants Act* 1971-72. They are the totals of the 1970-71 formula grants, additions of \$2 million and \$10 million for Queensland and Tasmania respectively, and the additions to the base made to compensate for the loss of receipts duty. (b) Due to population increases in each State in the year ended 31 December 1971 (the weighted average of these increases was 1.83 per cent) to an increase in average wages in Australia as a whole in the year ending March 1972 of 11.31 per cent, and to the betterment factor of 1.8 per cent. (c) Equal to \$2 per head of these States' populations at 31 December 1971. (d) Additional grant reduced from the \$12.5 million paid in 1970-71. (e) This amount was agreed between the Commonwealth and State Treasuries and was formally determined by the Treasurer in accordance with the *States Grants Act* 1971-72.

*Special Grants.* These grants are paid to the financially weaker States as supplements to the financial assistance grants. They are subject to annual recommendation by the Commonwealth Grants Commission. Each recommendation by the Commission for payment of a special grant consists of two parts: (i) One part is based on an estimate of the claimant State's financial need in the current financial year, and is treated as an advance payment subject to adjustment two years later when the Commission has compared in detail the audited budget results and standards of effort and of services provided in that year for both the claimant State and the States which the Commission takes as 'standard' (New South Wales and Victoria at present). (ii) The other part represents the final adjustment to the advance payment made two years earlier and is known as the completion payment. The following table shows special grants paid in the years 1968-69 to 1972-73.

COMMONWEALTH GRANTS COMMISSION: SPECIAL GRANTS, 1968-69 TO 1972-73  
(\$'000)

	1968-69	1969-70	1970-71	1971-72	1972-73
Queensland—					
Advance payment . . . . .	..	..	..	9,000	10,000
Completion payment(a) . . . . .	..	..	..	..	..
Total . . . . .	..	..	..	9,000	10,000
South Australia—					
Advance payment . . . . .	..	..	5,000	7,000	13,500
Completion payment(a) . . . . .	..	..	..	..	7,500
Total . . . . .	..	..	5,000	7,000	21,000
Western Australia—					
Advance payment . . . . .	..	..	..	..	..
Completion payment(a) . . . . .	..	582	..	..	..
Total . . . . .	..	582	..	..	..
Tasmania—					
Advance payment . . . . .	18,000	22,000	22,000	11,000	10,000
Completion payment(a) . . . . .	-1,190	-100	1,680	-3,200	-2,400
Total . . . . .	16,810	21,900	(b)23,680	7,800	7,600
Grand total . . . . .	17,392	21,900	28,680	23,800	38,600

(a) Adjustment to estimated grant paid two years previously. (b) \$10,000,000 and \$13,680,000 paid as Financial Assistance Grants and Special Grants respectively.

Minus sign (—) denotes excess of repayment.

*Capital assistance grants.* Also as part of the new revenue assistance arrangements, the Commonwealth has undertaken to pay grants to the States to finance capital works. The grants replace State borrowings and thereby relieve them of debt charges they would otherwise have had to pay. These grants, which were authorised by the *States Grants (Capital Assistance) Act* 1970, totalled \$200 million in 1970-71, \$219.1 million in 1971-72 and will amount to \$248.5 million in 1972-73.

### Specific purpose grants

#### *Education*

Payments to the States for universities were first introduced in 1951-52, and details of the States Grants (Universities) Acts under which they were continued are given in earlier issues of the Year Book (see No. 51 page 923 and No. 52 page 770). The *States Grants (Universities) Act* 1971 authorised grants totalling approximately \$251,400,000 for the Commonwealth share of the agreed program of development of State universities for the years 1970 to 1972. (See also Chapter 19, Education Cultural Activities, and Research.)

The Commonwealth, in the 1970-72 triennium, is meeting the full cost\* of a \$13.5 million research programme approved by the Australian Research Grants Committee. In addition, the Commonwealth has agreed to finance a program of research costing \$20 million in the 1973-75 triennium.

*Colleges of Advanced Education.* Under the States Grants (Advanced Education) Acts, the Commonwealth is providing financial assistance to the States of \$100.8 million during the 1970-72 triennium for recurrent and capital expenditures.

The *States Grants (Science Laboratories) Act* 1971 extended for the four years ending 30 June 1975 the operation of the scheme outlined in Official Year Book No. 54 page 745. A total payment of \$43.3 million is provided for with equal annual authorisations.

Grants for buildings and equipment for use in technical training in schools and colleges conducted by States only are provided for under the *States Grants (Technical Training) Act* 1971 which provides for the payment of up to \$36 million in the years 1970-71 to 1972-73.

Under the *States Grants (Teachers Colleges) Act* 1970 the Commonwealth provided for a maximum amount of \$30 million over the three years ending 30 June 1973 for the construction and equipping of teachers colleges.

Under the *States Grants (Secondary School Libraries) Act* 1971 grants totalling \$30 million were authorised over the three years commencing 1 January 1972 to finance buildings and associated capital facilities for libraries in government and non-government secondary schools.

The *States Grants (Pre-school Teachers Colleges) Acts* 1968, 1971 and 1972 provided for capital grants totalling \$2.5 million to 31 December 1973 for the purpose of increasing the physical capacity of approved pre-school teachers colleges.

The *States Grants (Independent Schools) Act* 1972 authorised payments to the States, for transmission to independent schools, of contributions to school running costs at rates of \$50 per primary pupil and \$68 per secondary pupil per annum as from the beginning of 1972.

The *States Grants (Capital Assistance) Act* 1971-72 provides an amount of \$20 million over the eighteen months January 1972 to July 1973 for capital expenditure on government primary and secondary schools.

#### *Health*

The *Tuberculosis Act* 1948 provided for the reimbursement by the Commonwealth of capital and maintenance expenditure incurred by the States in the provision of facilities for the diagnosis, treatment and control of tuberculosis.

The *States Grants (Mental Health Institutions) Act* 1964-1970 authorised assistance to the States amounting to one-third of their total expenditure on building and equipping approved mental health institutions up to 30 June 1973.

#### *Welfare*

The *States Grants (Home Care) Act*, 1969 the *States Grants (Paramedical Services) Act* 1969 and the *States Grants (Nursing Homes) Act* 1969 provide funds for a range of home care services, senior citizens' centres and nursing homes, mainly for aged persons. See Chapters 13, Welfare Services, and 14, Public Health.

During December 1971 the Commonwealth introduced a scheme of grants to the States for employment-creating activities in non-metropolitan areas. In 1971-72 these grants amounted to \$27 million.

*Development of resources and assistance to industry**Natural disasters*

Payments to the States for natural disaster relief (drought, flood, bushfire, earthquake, cyclone, mouse plague) include financial assistance to alleviate personal hardship and distress and to enable the States to meet budgetary problems arising from the effects on their revenues of such natural disasters. Such relief does not normally cover the full cost of restoration of private assets damaged by natural disasters, it being regarded as the individual's responsibility to provide against such losses by way of insurance. Of the total amount of \$5,682,000 made available by the Commonwealth for this purpose in 1971-72, grants of \$5,539,000 were paid to Queensland for drought and cyclone relief and cyclone damage restoration.

*Water resources projects*

*Investigation and measurement of water resources.* Commonwealth commitments under the National Water Resources Development Programme up to 30 June 1971 included further grants of up to \$12.8 million to Queensland for Bundaberg Irrigation Works, further assistance of up to \$9 million to New South Wales for flood mitigation works on various of its coastal rivers, further grants of up to \$4.7 million to New South Wales and Queensland towards the cost of construction of a dam and associated works on Pike Creek in the border river region of the two States, \$2 million to Victoria towards the cost of construction of a pipeline and certain associated works to carry water from the River Murray to rural holdings in the Millewa district, and of \$8.2 million for additional investigation and measurement of State water resources in a three-year program commencing in 1970-71.
